Emergency-grant assistance will continue to be necessary to meet crises such as the problem last winter of the Hungarian refugees, and cases where a newly developing country cannot qualify for a loan. These grants will continue on an annual basis.

I have watched the mutual-security program develop over a 10-year period from three distinct vantage points—as Congressman, as Governor and now as Under Secretary of State. I am convinced that it is a most vital part of our foreign policy and a powerful and flexible weapon in the grim war between the Free World and the slave.

I think its continuation is your best hope and mine, and our children's, for a free and prosperous world. It will be in a very real sense your understanding, as voter and taxpayer, that will insure its future.

THE MIDDLE EAST PROGRAM

Mr. SMITH of New Jersey. Mr. President, on Monday, May 27, the Honorable James P. Richards, former chairman of the Foreign Affairs Committee of the House of Representatives, and more recently special Ambassador and Assistant to the President, appeared before the Senate Committee on Foreign Relations and reported on his recent trip to the Middle East.

This is such an important contribution to the present discussion of the Middle East situation and the pending foreign aid legislation that I ask unanimous consent to have the statement of Mr. Richards printed at this point in the body of the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY AMBASSADOR JAMES P. RICHARDS, SPECIAL ASSISTANT TO THE PRESIDENT, BEFORE THE SENATE FOREIGN RELATIONS COMMITTEE, MONDAY, MAY 27, 1957

I am very glad to appear before you to report on my mission to the Middle East and to answer any questions you may have in mind. I returned on May 8 from a 2-month trip as a special representative of the President to explain the joint resolution of the Congress on the Middle East. This journey reinforced my ever-growing conviction of the importance to the national security of the United States of both economic and military assistance extended under the mutual security program. I would like to tell you about my trip and why it has further convinced me that we can ill afford to dispense with, or even drastically curtail, the benefits that have accrued to us from these programs.

In his message to the Congress on January 5, the President stated that he was sending a mission to the Middle East to explain the proposals he then advanced. He asked me to take on the job. While the Congress was considering the joint resolution, I briefed myself on the problems which would be encountered. Thus, I was able to depart promptly after the passage on March 9 of the resolution. Accompanied by a small staff drawn from the Departments of State and Defense, International Cooperation Administration and USIA, I traveled almost 30,000 miles, visiting 15 countries.

The President had entrusted me with a fourfold task:

1. To explain the spirit and purposes of the joint resolution of the Congress on the Middle East;

2. To determine which countries wished to participate;

3. To make commitments for programs of economic and military assistance, within the provisions of the joint resolution and within the limitation of funds appropriated by the Congress, which I deemed to be essential and urgent to accomplish the purposes of the program; and

4. To report to the President my findings and make appropriate recommendations.

Regarding task No. 1, I explained in detail the President's Middle East proposals, as endorsed by the joint resolution of the Congress, to the top government leaders in the 15 countries we visited—Afghanistan, Ethiopia, Greece, Iran, Iraq, Israel, Lebanon, Libya, Morocco, Pakistan, Saudi Arabia, Sudan, Tunisia, Turkey, and Yemen. I was careful to bring out the significance of this American doctrine as symbolic of United States recognition of the need to play a more active role in the Middle East, but only at the request of area countries. I believe the enunciation by the executive and legislative branches of the Government acting together of a completely American policy was profoundly impressive to peoples of the area. The different heads of state invariably had many questions about the doctrine and wanted particularly reassurance that the United States was not out to impose anything or exact any political conditions derogating from national sovereignty. I believe I was able to convince my questioners that this was far from our intentions.

I did not visit three of the countries in the Middle East. In Jordan, King Hussein was proving by his actions that he understood thoroughly the meaning of international communism and was capable of moving decisively to protect his country's independence and territorial integrity. We have tried to help him by providing aid through normal channels. The second country, despite our inquiries, avoided making definite arrangements for a visit by my mission. From the third country we received a piece of paper which might have been construed as an invitation, but the attitude of the government as shown in official statements and through the controlled press made it abundantly clear there was no desire for real discussions.

Regarding task No. 2, 12 of the countries I visited publicly declared their support of the purposes and objectives of the doctrine. Subsequently Israel also endorsed it. Two countries with which we held discussions, Sudan and Yemen, thought it desirable not to take a public position at this time but they did not reject the American concept. Naturally the degree to which different nations recognized the threat of international communism, or were willing to proclaim opposition publicly, varied. Some stood up shoulder to shoulder in open opposition to international communism. Others are doing quite but nevertheless effective work in the same cause. One thing did not vary. That is, the determination to maintain independence and to achieve economic and social progress. To this end, United States help was welcomed.

Regarding task No. 3, in nine countries I determined that it was essential and urgent to extend United States economic or military assistance in accord with the doctrine. Conditions were such that immediate action would clearly further the purposes of the joint resolution either by building up strength to assist in countering possible overt armed attack or by increasing economic strength and internal security against subversion. I authorized in principle approximately $120 million in aid, always calling attention to the provisions of the joint resolution, including the requirement that appropriate congressional committees should be informed 15 days before the money was used. Slightly more than half of the money went for economic assistance. Most of this aid was in the form of grants, although I insisted on loans whenever feasible. The military aid granted was always in furtherance of established military plans. It consisted, for example, of additional hardware, expendable items such as ammunition or military construction. In the economic field our aid was directed at, for example, communications, transportation, education and water development. I sought opportunities to encourage regional cooperation. To the Baghdad Pact, I made available $12,570,000 toward projects approved by its economic committee for improvement of the regional communications system, railroad connections, and a highway project. This aid is intended both for surveys and actual construction.

With respect to task No. 4—to report to the President—I met with him immediately after my return. Although my mission was not charged with seeking solutions to intra-area problems, I found that the various countries visited held strong views on these matters. In accordance with requests from different governments, I have conveyed their views to the President. The importance of this American doctrine with respect to intra-area problems is that by turning back international communism, the Communists' continuing efforts to inflame these quarrels will be frustrated and thus their solution facilitated. I can assure you that our Government is not neglecting intra-area problems. Most of the countries visited are involved in such difficulties, many of them most complex and of the utmost importance to the people concerned. They are working to find solutions and the United States, quietly and through normal channels including the United Nations, is doing what it can to help.

On a trip like the one I have just completed, one comes back with a mass of impressions. I would like to call your attention to six that stand out most clearly:

1. The intensity of the aspirations of the peoples of the Middle East for economic and social progress: They are determined to improve their lot. They recognize the limitations of their own resources. They are therefore determined to get outside help. The Communists are blandly offering aid on deceptively generous terms. We know from experience the trap behind such offers but it is not so evident to people in the area desperate for help. Entirely apart from any humanitarian motivations, a hard-boiled desire for self-preservation demands that we not leave these nations with no choice but to become ensnarled with the Communists. We should not be deluded by distance into thinking the fate of each country of the Middle East does not concern us. Once ensconced, communism spreads like the plague.

The effects of the closure of the Suez Canal is a recent reminder of the area's importance to our welfare.

2. The value attached to old or newly won independence: To the peoples of the Middle East, their independence is either a sacred tradition or a new precious right they are just learning to exercise. In either case they are determined to preserve it from infringement by any source. Sensitivity on this score is an overriding obsession. Their receptivity to this American doctrine rests upon our success in convincing them that the United States will act only at their request and then only to help them help themselves. The return to the United States from the aid extended under the doctrine, or otherwise, flows from what it enables the recipient countries to do for themselves. Constructive results would be negligible were political conditions attached. Fortunately the mutuality of interests between ourselves and area countries and the clear evidence of the value to each of cooperation lead us naturally along the same path.

3. Attitude toward international communism: Communism is anathema in the Middle East from the point of view of religion and traditional social values. None of the countries wish to see that atheistic creed established on their soil. But some nations have a tendency to think they can flirt with international communism, using it for their own purposes while keeping free of its tentacles. Their willingness to take risks in this regard increases in proportion to their inability to find a helping hand elsewhere, and also, in certain cases, to see the possibility of what they consider just solutions to intra-area problems.

4. Attitude toward the United States: I had not realized what a reservoir of good will we have in the Middle East. Government leaders do not hesitate to blame us for certain policies. Nevertheless, they have faith in our good intentions, respect for our motives, and are eager to test the two-way value of cooperation. We have a unique opportunity and a responsibility, which we can neglect only at our own peril.

5. Recent improvements in area conditions: I believe the last months have seen significant improvement in the area situation. Perhaps it is best described as the opening of possibilities to press forward for permanent gains toward peace and stability. With like-minded people, we have made a beginning. But, there are no grounds for complacency lest we quickly slip back behind the starting line. The Middle East is not an area of political equilibrium, if it is possible to find such a situation anywhere in our present world. It is a case of either going up or down hill. We want to keep on climbing.

6. The importance and complexities of our aid programs: These aid activities of ours are often large scale operations. In the Middle East they are carried on under the most difficult conditions by relatively small numbers of people who undoubtedly make mistakes, but whose efforts in their entirety are a credit and a value to our country. But there is always room for improvement. It is the duty, indeed the obligation, of all concerned constantly to search for means of increasing their effectiveness. One lesson experience has taught is that economic aid is not something one can package neatly into 1-year bundles. There is need for continuity in drawing up and carrying out these programs, and for flexibility. The changes proposed by the President, I believe, are an important improvement.

To sum up, there are two main features of this American doctrine. The first is the deterrent effect provided by the declared determination of the United States to use at the discretion of the President its Armed Forces to provide assistance if requested against armed attack by a state controlled by international communism. We have made this intent abundantly clear to the U. S. S. R. and the states of the area. I am convinced the U. S. S. R. will not risk overt attack as long as we keep up our global defenses. This assurance has brought vast relief to countries of the area, especially to those on the borders of the Soviet bloc and especially to the responsible military men. This aspect of the American doctrine has already achieved a notable success. The second is the extension of economic and military aid to build up strength to resist subversion and to help repel any attack by international communism. This cannot be a one-shot operation. The flexibility in extension of aid provided by the joint resolution has made an important contribution. However, the Communists are constantly boring away, searching for weak spots. We need to have available, on a continuing basis, the authority to act quickly. The doctrine as a whole can be judged a success only if we make good in all particulars. It will profit little the American people and the people of the Middle East if we make effective provision against overt attack, but neglect to provide protection against subversion.

In conclusion, may I make a few observations regarding the proposed basic amendments to the Mutual Security Act. You may recall that last fall I was directed by the Foreign Affairs Committee as its chairman to conduct a study of our foreign-aid programs and to recommend to the Congress by January 1, 1957, ways and means for improvement. If you will consult the record, you will find that my report included recommendations for basic changes very much in line with those now proposed by the President. My views on the subject have been confirmed by my recent studies in the Middle East. It is my judgment that:

1. The mutual security programs, including provision of both economic and military aid, are essential to the security of the United States.

2. Flexibility and the ability to act quickly are of primary importance. The special fund requested by the President which in the Middle East will permit him in part to carry on the work started by the joint resolution is indispensable to getting maximum results from the program as a whole.

3. Besides providing for special and emergency situations, we need to help meet the demand for a non-Communist way toward sound development. The development loan fund and the closely related technical cooperation program will permit us to do this most effectively.

4. We would be unwise indeed, in my opinion, to forego the immediate and direct strengthening of our own defenses to be derived from the defense-assistance program. In order that the American people can clearly understand that the defense-assistance program is an essential part of our own worldwide national defense program, it should be included in the Defense Department budget along with our other national defense programs.

5. These programs should not be one-shot annual affairs. Authority to spend funds over more than 1 year is needed and will result in better utilization of available moneys.

I am convinced that by carrying forward these mutual security programs in the manner recommended by the President in his message of May 21, the American people will help themselves by helping others make their own full contribution to the common defense and economic advancement of the free nations.

LABOR'S ANSWER TO KHRUSHCHEV

Mr. KNOWLAND. Mr. President, on yesterday the first secretary of the Communist Party in the Soviet Union made a television rebroadcast to the American people, in which he made certain predictions relative to this country ultimately having a Marxian Socialist form of economy, and presumably the type of government to go with it. I think Mr. Khrushchev perhaps may be pardoned for his predictions inasmuch as his outlook on the world is obviously colored by the Communist indoctrination he has received over the period of years.

However, Mr. President, I think the best answer, in advance to Mr. Khrushchev was given by the American Federation of Labor–CIO executive council on May 22, 1957. It is very important in our country that we not only have those in government and in the press who recognize the dangers of international communism to the free way of life, but that also the outstanding labor organization, the American Federation of Labor–CIO, should also clearly recognize the dangers which confront not only our country, but the entire Free World.

Mr. President, because of the importance of this statement by the AFL–CIO executive council, I ask that the entire statement be printed in the body of the RECORD as a part of my remarks at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE INTERNATIONAL SITUATION

(Statement by the AFL–CIO executive council, May 22, 1957)

The barbarous suppression of the Hungarian democratic revolution caused a worldwide revulsion against the Kremlin dictatorship and international communism. This suppression entailed Moscow's having to sacrifice every pretense of peaceful coexistence and to turn to open brutal aggression instead. To millions of people, especially in Asia and Africa, Soviet policy was exposed as viciously reactionary and utterly inhuman colonialism. But the West and the United Nations failed to respond effectively to the historic events in Hungary. Today, the moral indignation aroused by the Soviet savagery in Hungary has already begun to fade away in the democratic world. As a result, the movement for democracy and national independence in other satellite countries, such as Poland, has been slowed down.

Having weathered the most serious crisis yet faced by the Soviet Empire, the Kremlin rulers are now again turning to their so-called peaceful coexistence strategy for furthering their basic aims through encouraging the spread of neutralism, the relaxation of vigilance in the West, and the Communist infiltration of the free-labor organizations. The latest phase of Soviet foreign policy seeks to overcome the moral ostracism and isolation to which the Kremlin has been subjected in consequence of its criminal aggression against the brave Hungarian people. Moscow is again seeking to secure western acceptance of the Soviet system of satellite regimes and captive peoples as permanent. Through these moves, the Communist dictators strive to check the rising desire for freedom among the Russian people themselves.

In line with this strategy, Moscow has resumed its so-called cultural exchange campaign. It wants to restore and enhance Communist influence among the artists, scientists, business groups, and the trade unions of the Free World. Through greater utilization of the scientific, technical, and industrial superiority of the western democracies, and through securing goods and credits from them, the Kremlin seeks to overcome

the economic difficulties caused by Communist policies and aggravated by the revolt in the satellities. For Moscow, alleviation of these difficulties is urgent because they seriously impede the sixth 5-year plan, endanger Soviet capacity to render aid to some so-called uncommitted countries, and tend to engender revolt among the captive peoples yearning for elementary human rights and better conditions of life and labor.

Today the strongest barrier to Soviet world conquest is NATO and the industrial and military strength of the United States. The Kremlin dictators have come to realize that they cannot attain further imperialist expansion through armed aggression or even intimidation as long as the West is united in a strong collective defense system and as long as the United States maintains its lead in the nuclear field. The Soviet dictatorship is, therefore, maneuvering to undermine and overcome this barrier. It is proposing to dissolve NATO, to dismantle United States bases in Europe, and to have all American military forces returned to the United States. In return, Moscow would be ready to terminate the Warsaw pact with its satellites, withdraw the Red Army behind the present Soviet borders, and conclude a so-called European security pact guaranteed by the U. S. S. R. and the United States.

This Soviet scheme provides for the continued partition of Germany and the maintenance of satellite Communist regimes in Eastern Europe. With its gigantic military machine remaining intact, Moscow could easily keep its East European puppet regimes in power. The Kremlin knows that the moment NATO ceases to exist and the American Armed Forces are no longer in Europe, the much-weakened free European countries would be at the mercy of totalitarian Russia. Through pressure, blackmail, threats, ultimatums, Communist subversion and coup d'état, the Kremlin could overawe and dictate to the free countries of Europe.

Following the 1936–39 Hitler pattern of conquest, Moscow could overwhelm and control these free countries one by one. With the elimination of NATO and American military power as an immediately available force capable of deterring and defeating Soviet aggression, the final outcome would be either a Soviet Europe or World War II. For these reasons, the executive council of the AFL-CIO strongly urges our Government and its NATO allies to reject this latest Soviet maneuver as detrimental to freedom and world peace.

The Soviet rulers are supplementing their efforts to destroy NATO with a large-scale drive to end western superiority in the nuclear field. While frantically speeding up the Soviet development and production of atomic and hydrogen weapons, the Communist dictators are propagandizing a ban on the manufacture and tests of hydrogen bombs. While thus seeking to exploit for their own sinister aims the widespread and justified fear of an atomic war, the Soviet rulers are adamant in their opposition to the establishment of an effective worldwide system of inspection, control, and enforcement which alone could insure the discontinuance of further nuclear tests and an atomic war.

The fraudulent character of this Soviet maneuver and propaganda has been further exposed by Moscow's unequivocal rejection of Britain's latest modest but indispensible steps toward ending nuclear explosions. That the Soviet rulers are not animated by an earnest desire to relax international tension and seek only to weaken the democratic West is also confirmed by their latest response to President Eisenhower's proposal for aerial inspection. Moscow would have all of Western Europe and the Western half of the United States—but not the strategically important regions of the U. S. S. R.—subject to aerial inspection.

In view of the aforementioned developments, the executive council of the AFL-CIO urges our Government to adopt the following measures for protecting and promoting freedom, peace, prosperity, and social progress:

1. Give categoric assurance to the U. N. and the entire world that it will not enter into any bilateral arrangement or a deal with the U. S. S. R. for maintaining the international status quo—even under the guise of thus assuring world peace.

2. Be prepared to participate in another summit conference after the Soviet Government has complied with the U. N. decisions for the withdrawal of the Red army of occupation from Hungary and has discontinued its intrigue against and sabotage of peace in the Middle East.

3. Enter into negotiations with Moscow for a new European Collective Security Pact after the Soviet Government has carried out its previous pledges for German reunification in freedom and has complied with the Yalta agreement for "the * * * establishment through free elections of governments responsive to the will of the peoples" in the countries liberated from the Nazi yoke.

4. Place the problem of German national reunification and the situation of the captive countries on the agenda of the forthcoming 12th session of the U. N. General Assembly.

5. Mobilize all economic and diplomatic influence and resources to have Egypt comply with the U. N. six principles on the Suez situation so as to assure Israel and every other nation the right to freedom of navigation in the Suez Canal and the Gulf of Aqaba.

6. Move to reconvene the 11th session of the U. N. General Assembly for the purpose of acting on the full report of its Special Committee on Hungary and the continued Soviet repression of the Hungarian people.

7. Expand the American aid program for Hungarian refugees still in Austria and other countries to which they fled in the hope of coming to the United States.

8. Speed the transformation of NATO so as to enable it "to fulfill its primary purpose as a military defense body but in addition as an organ for greater economic and political cooperation in advancing peace, human rights, and improving living standards."

9. Work uncompromisingly and energetically for the establishment of a foolproof system of international inspection and control of nuclear and all other weapons of mass destruction in the air, on and under the ground, and on and under the sea in order to achieve progressively universal disarmament.

10. Assure congressional approval of the President's foreign-aid program with the additional proviso that America's efforts to help the needy populations in countries like Poland should be directed toward providing them, through an international agency, like the Red Cross, with consumer's goods rather than selling to their dictatorial regimes industrial machinery which might serve Moscow's military potential.

11. Call an international economic conference of all nontotalitarian countries for the purpose of promoting freedom, peace, prosperity, and social progress through joint action in: Raising the purchasing power and productive capacities especially of the peoples in economically underdeveloped areas; expanding their respective domestic markets; facilitating and expanding trade among the free nations; stabilizing prices of the basic raw materials; and organizing a more just international access to the world's natural resources; and securing more rational international utilization of the surplus manpower in any particular country.

Mr. KNOWLAND. Mr. President, while Mr. Khrushchev predicted that our grandchildren would be living under a Marxian Socialist system, I think it is perhaps for more accurate to say that the grandchildren of the present rulers of the Kremlin, and perhaps their children, or even the present generation of people in the Soviet Union, may be living under a free form of government long before the prediction Mr. Khrushchev made can ever be realized.

THE NEED FOR A MIDDLE EAST DEVELOPMENT AUTHORITY—ADDRESS BY DAVID ROCKEFELLER

Mr. WILEY. Mr. President, the other day there came to my attention a most significant address which was delivered by one of America's leading citizens, Mr. David Rockefeller, vice chairman of the board of directors of the Chase Manhattan Bank.

Speaking before the Arkansas Bankers' Association, Mr. Rockefeller addressed himself to the question of America's vital stake in the Middle East. He pointed out the vast and increasing needs of the Free World for petroleum. He pointed out further, however, that while the Middle East is rich with oil, only 6 of the 19 nations of that area are now enjoying oil production within their borders. As a result, there is an uneven distribution of the sizable oil revenues within this troubled, underdeveloped area.

Then, Mr. Rockefeller pointed out that many of the principal problems of the Middle East can best be solved on a regional rather than on a national basis.

He referred, for example, to such problems as the need for better utilization of waters of the Nile. This key matter involves not only Egypt but Ethiopia and the Sudan. Other regionwide problems are utilization of the Jordan River and widening of the Suez Canal.

Against this background, Mr. Rockefeller suggested that there be financed a Mideast regional development authority. Its organization and processes would be patterned on those of the World Bank.

This authority would make only sound loans and investments. Its management would be nonpolitical, highly trained, and skilled.

If such a Middle East authority were to be established, consideration might be given to allocating to it a part of the funds which our Government plans to assign to the Middle East under the Eisenhower doctrine.

This, then, is the basic outline of Mr. Rockefeller's suggestion.

In the short time since his helpful address, I am pleased to state that a number of leading journals throughout the United States have editorialized favorably on it.

I particularly commend it because I think it offers the type of new modus vivendi which is essential to extricate that region from the rut of troubles, frictions, and Soviet intrigue in which the Mideast now finds itself.

To establish such a Middle East authority would take a great deal of statesmanship, patience, and thoughtfulness.

Why? Obviously, because there is a deep pride among the Middle Eastern powers and, yes, deep suspicion and rivalry, as well.

And yet, I believe that among thinking leaders of the Middle East powers, there is a definite feeling that a new type approach must be adopted, if those who are truly devoted to the best interests of the region are to solve the Middle East's dilemmas—in a constructive fashion.

I ask unanimous consent that the text of Mr. Rockefeller's address be printed at this point in the body of the RECORD.

I trust that it will be given the most careful review by all interested parties.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

OUR STAKE IN THE MIDDLE EAST—ADDRESS BY DAVID ROCKEFELLER, VICE CHAIRMAN OF THE BOARD, THE CHASE MANHATTAN BANK, AT THE ANNUAL CONVENTION OF THE ARKANSAS BANKERS ASSOCIATION, WEDNESDAY, MAY 22, 1957, AT ARLINGTON HOTEL, HOT SPRINGS, ARK.

It is a great pleasure for me to be here today at the Arkansas Bankers Convention in this land which has been so very hospitable to my brother, Win, and which he has adopted as his home. I am particularly happy to have a chance to see at firsthand the remarkable progress you are making in this part of the country. I know that banking has played a most important role in stimulating the sound development and expansion of industry, commerce, and farming in Arkansas and her neighboring States. From all I have seen and heard, the banks of Arkansas are to be congratulated on the fine job that has been done, and you should look forward with confidence to continued advances in the period ahead.

When Jeff Burnett of the Arkansas Bankers Association asked me to speak to you today, we talked about what I might say to you which would be of interest. I suggested that this might be an appropriate time to discuss Our Stake in the Middle East. Developments in the Middle East have occupied substantial space on the front pages of our newspapers in the past 6 months. We have seen the seizure of the Suez Canal, the attack on Egypt, the U. N. cases-fire followed by the clearing of the canal, and more recently, the crisis in Jordan. In one sense, these events may seem remote, but in another they have a very important bearing on all of our lives.

The events we have mentioned have, indeed, been dramatic. Yet what I wish to emphasize today is not the news of the hour—or even of recent months—but rather the emergence of certain basic long-term facts and trends which cause the Middle East to assume a role of new and lasting importance for the whole Western World.

Why is it then that developments in the vast and faraway area of the Middle East should even affect banks and bank customers in the center of our country? To my mind, an answer to this question involves two main considerations. First, the Middle East is one of the key strategic areas of the world. We have a series of military bases there that form an integral part of our defense structure. These bases, and the recently proclaimed Eisenhower doctrine, reflect the importance which our Government assigns to the area from the point of view of our strategic defense against Russian aggression. Because it is at the crossroads of Asia, Europe and Africa and contain 1 of the 2 major canals of the world, the Middle East is of crucial importance to the economies of all the nations of the Free World, both in peacetime and in war. If the cause of freedom is to win out, it is vitally important to us to secure the support of the peoples of this area in our efforts to work out a secure and lasting peace. This is the politicomilitary side of the picture.

There is, however, a second reason for our concern about the Middle East. It is an area which contains 70 percent fo the world's proven oil reserves, but which now uses only 1 percent of the world's annual production. In contrast, the United States has only 15 percent of world petroleum reserves and uses more than half of all the petroleum and petroleum products the world now produces each year. Europe, the second most important market, has very little oil of its own. As the demand for oil in Europe and the Americas grows, the economic importance of Middle Eastern oil to the Free World grows correspondingly.

However, it could be that this very disparity between the countries having the big petroleum reserves and those which are the big consumers of petroleum will prove to be the basis for the development of sound and lasting economic relationships between the industrialized nations of the West and the underdeveloped nations of the Middle East. Both the United States and Western Europe need the oil which the Middle East can supply. By meeting this need, the Middle East can earn the funds and the foreign exchange necessary to support its general economic development.

To see why the nations of the Western World, and those of the Middle East, have a compelling mutual interest in development of the latter's vast petroleum resources, it is necessary to turn first to the basic trends in the world's supply of energy. An adequate supply of energy at reasonable cost—from coal, oil, natural gas, or other sources—is obviously a necessary condition for economic progress in the world of today. Our rising productivity depends on our ability to supplement human effort with energy applied through machines. Only through the harnessing of an ever-expanding amount of energy have we been able to increase our production at a rate that has exceeded the growth in our population. Only in this way has it been possible to keep pushing up our living standards.

Until recently, both the United States and Western Europe were able to provide the increasing supplies of the energy they needed to support industrial growth largely from domestic resources. During the past few decades here in our own country, we have had a truly phenomenal increase in oil and natural gas production. But since 1920, our use of oil has multiplied 7 times, and our use of natural gas 10 times. Thus, despite our growth in production, we were forced to become a net importer of petroleum and petroleum products about a decade ago. We now import about a tenth of the oil we use. It has been through developing our petroleum and natural gas resources that we have been able to meet our expanding needs for energy at costs the Nation could afford to pay. Our use of energy has shown a long-term growth averaging 3.3 percent per year, or somewhat more than the average annual growth of our production of goods and services. However, the overall cost of supplying the energy the United States uses has increased from 4½ percent of our gross national product in 1900 to almost 7 percent today, a 55 percent increase. Energy is still relatively low-priced in our country, but it is important to our future growth that we keep it that way. A 50 percent increase in the relative cost of energy in the next 50 years might well slow down the rate at which we could afford to use more energy. Therefore, we must seek ways that promise to prevent the cost of the energy the Nation requires from exceeding the present ratio of 7 percent of total output.

In Western Europe, the problem is somewhat different. There, the primary source of energy has been coal—in fact, coal still provides 70 percent of all energy on that continent (as against about 20 percent in the United States). Nevertheless, as recently as 1948, Western Europe met almost 90 percent of its energy needs from domestic production of coal and other fuels. But since that time, the industrial economy of Western Europe has experienced a considerable growth, while their domestic production of coal and other energy sources was bumping against a ceiling. Thus, Western Europe is now importing about a fifth of its energy requirements (or twice the proportion we import). Here again as is the case in the United States, the rising cost of energy is also a source of concern in Europe.

This brief review of recent trends in the United States and Western Europe shows that there has been a fundamental shift in the relationship between the demand for energy and the world distribution of energy sources. The industrialized nations of the west must now import a sizable part of the energy they use. However, the real significance of these trends emerges when you take a look at the future. A number of competent studies of probable future trends in the energy field have been made by governmental, international, and private institutions. In my opinion, which I hope is unbiased, one of the most authoritative of these is the recent report prepared by the petroleum department of the Chase Manhattan Bank.

But our studies show that the continued prosperity and expansion of the economies of our Nation and that of Western Europe depend on the accelerated expansion of petroleum production throughout the Free World, for they anticipate an increase in petroleum consumption in the Free World of more than 80 percent between 1956 and 1966. The increase for the United States itself is projected at 63 percent, whereas it is forecast that use in the rest of the Free World will more than double.

Where will we find the large petroleum supplies to meet this growing demand? Our petroleum department believes the United States domestic petroleum production may well rise almost 40 percent by 1966. However, it is unlikely to increase any more than this. It is not that the United States is running out of oil, far from it. But to continue to increase production 5 percent each year would involve a massive effort and a massive treatment. Even to sustain the 40 percent growth projected for 1966 means that we must find 1½ barrels of oil for each barrel produced, if we are to have adequate reserves. In the past 5 years, we have fallen short of this requirement.

The reason we have fallen short is that the cost of increasing our oil reserves has been rising steadily. I am told that the reserves added for each exploratory well drilled have declined from 450,000 barrels 10 years ago, to less than 200,000 barrels last year. And the cost of exploration has moved steadily higher. This is a hard fact with which I know all of you here in the Southwest are all too familiar.

In order to avoid a sharp advance in the cost of meeting our needs for petroleum, we must inevitably interest ourselves more actively in foreign sources of oil. I would like to emphasize that we should do this not to replace the present flow from domestic sources, but to supplement it. In looking abroad for additional petroleum supplies, it is natural that we should consider first the areas closest to us. Various surveys that have been made show that production in Canada, Venezuela, and other nations in the Americas could be increased rapidly enough, and economically enough, to supply the bulk of the Western Hemisphere's requirements.

The situation in Europe, however, is radically different. Careful studies show that even with a large-scale investment program,

the present prospect is that Western Europe's output of coal, oil, natural gas, and nuclear power combined could be increased by more than a third in the next 20 years. That would meet little more than one-third of the area's anticipated requirements for an increased flow of energy to support continued economic advance. In the short-term future, the only source Western Europe can turn to for additional energy supplies at reasonable cost is the Middle East.

In point of fact, unless vast new and unanticipated deposits are discovered, it seems clear that the Western Hemisphere alone could meet only about half the foreseen requirements of the Free World as a whole for increased oil supplies during the next 10 years. And this is why the Middle East is so important. There is not the slightest doubt that the Middle East has the physical capacity to produce as much oil as is needed to balance world demand in the foreseeable future. Moreover, the basic costs of production in that area (assuming reasonable arrangements for taxpayments to local governments) are likely to be lower than in other parts of the world.

Consequently, the Free World is becoming more and more dependent on the Middle East. This fact emerges most clearly when you consider that the future growth of the Western European economy is almost wholly dependent on an increased flow of Middle East oil. This is true despite the fact that oil shortage resulting from the recent crisis arising out of the closing of the Suez Canal was handled on an emergency and strictly temporary basis in admirable fashion with the help of the United States. The oil industry rose to the challenge and did a remarkable job in rearranging the flow of world oil to meet Western Europe's needs with a minimum of disruption. However, the very fact that Europe's use of oil is growing at a rate of 13 percent per year points to the fact that it will be more and more difficult to deal with a similar crisis should it occur a few years hence.

The Suez crisis emphasized how vulnerable future growth prospects in both Europe and the United States are to the shifting political tides in the Middle East. In Europe, this realization has acted as a powerful spur to the development of a common market encompassing six of the nations of Western Europe. This is a good thing for a free trade area in Europe (or the common market as it has come to be called) could strengthen the economies of the Western European nations making them less vulnerable to external developments.

In addition, the Suez crisis has provided a great impetus to the search for oil in the Sahara Desert and in Latin America; to the building of huge tankers; and to plans for the construction of additional pipelines to move Middle East oil to Mediterranean ports where it can be shipped to Europe.

The impact of Suez on our own economy has been less dramatic, since we were able to surmont the recent crisis without resorting to rationing or other measures of the sort that evoke a widespread public response. Yet indirectly the long-run implications may well be as significant for the United States as for Western Europe. We have a vital interest in the continued military and economic well-being of Western Europe. On the military side, the NATO alliance is perhaps the keystone in our attempt to build a secure peace. But NATO would quickly be placed in jeopardy if an adequate flow of oil to Europe were interrupted. NATO's vulnerability to an oil shortage was brought home most vividly in the recent Suez crisis.

On the economic side, we should be concerned about Western Europe's energy problems since even with the substantial resources of the Americas, the Western Hemisphere does not appear to have a petroleum supply adequate to meet the requirements of the entire Free World in the next few decades. An attempt to do without Middle East oil would complicate our energy problems enormously, both from a supply and a cost point of view.

It seems clear, then, that the Western World has a most vital interest in the Middle East. In view of the perplexing political problems surrounding that area, this is far from a reassuring conclusion. What I should like to suggest today, however, is that we should not approach our position in the Middle East with a defeatist attitude. The problems we face offer us a challenging opportunity to demonstrate what can be accomplished through private foreign investment supplemented by a realistic program of Government technical assistance and developmental aid.

Consider for a moment the bare economic facts of the Middle East as we find them today. The area includes 19 political entities with a population of 80 million people. Most of the inhabitants now exist at a minimum subsistence level; so low a level, in fact, that the average income per person is probably no more than $100 a year. The overall economy of the area produces no more than eight to ten billion dollars of goods and services annually—a small amount indeed compared to our standards.

In this situation, earnings from oil if wisely used, could make a tremendous contribution to the area's economic development. Estimates are that the Middle East's share in last year's petroleum production amounted to approximately $1 billion. That was 4 times the amount the area received in 1950, only 6 years earlier. The $1 billion earned from oil amounted to about 10 percent of the total production of the Middle East, and to a third of its foreign exchange earnings.

Projections of the world petroleum demand for 1966 show that the Middle East could readily increase its annual production 2½ times by that year. Thus, earnings from oil could likewise increase to $2½ billion annually by 1966. Over the total 10-year period, the area could look forward to receipts of about $18 billion from oil development.

If these earnings could be channeled into productive investment, they could generate a significant rise in living standards throughout the Middle East. Experience around the world shows that the nations which manage to invest as much as 15 to 20 percent of their annual production in roads, industrial equipment, farm development, and the like achieve a substantial rate of economic progress. Earnings from oil are sufficient to lift the rate of investment in the Middle East into this 15 to 20 percent range and thus help generate an upward movement in living standards throughout the area.

What is wanted is a program to sow the oil on the general pattern that has proven so successful in Venezuela. Venezuela has used oil earnings to finance general economic development. As a result, real income per person has increased 50 percent in the past 15 years. Similar results are achievable in the Middle East.

However, the problem of channeling oil earnings into growth-promoting activities is more complex in the Middle East than in Venezuela because there we are dealing with 19 political units of widely differing characteristics and problems. Moreover, direct receipts from oil production accrue to only 6 of these 19 nations. But other nations, as for example Egypt, Syria, and Jordan, could benefit from oil production, and could earn substantial sums by furnishing efficient facilities to transport oil to market. Egypt has been capitalizing on this through her control of the Suez Canal.

It is important to recognize, however, that in the long run no nation (not even Egypt) has a true monopoly of the means of transport for oil, or even of oil production. The huge tankers now being built are, in fact, too big to pass through the Suez. And the economics of tanker operations point to even bigger units.

Given time and sufficient capital investment in huge tankers, pipelines, and the search for new oil reserves, the Western World could bypass any artificial barriers such as Egypt is using in Suez—barriers that are imposed under the influence of short-sighted political pressures. In any event, oil remains the major opportunity—the great resource—which, if intelligently used, can lift the Middle East from its present level of relative poverty.

Some Middle Eastern nations have already made good progress in putting oil earnings to work to support general economic development. Iraq has completed major flood control projects on the Tigris and Euphrates Rivers, and is now working on a 6-year $1½ billion dollar development program. In oil rich little Kuwait, where oil revenues amount to the fantastic figure of $1,100 per person each year, a program is underway to build roads, develop a port and build a pipeline to bring water from Iraq.

However, the fact that oil earnings (the Middle East's major source of foreign exchange) are not evenly distributed throughout the region has led to uneven development. Some of the major oil-producing nations have greater annual revenues than they can use effectively in their present state of development, whereas other nations are hard pressed for funds to finance development. From a financial standpoint, therefore, there is need for a regional approach to the area's problems.

In fact, an impressive number of the Middle East's general problems can be solved efficiently only if handled on a regional basis. In broad terms, the two major problems are to develop a transportation system, and to bring water to parched lands. Three concrete examples can be advanced to support the case for a regional, as opposed to a national, effort:

1. The waters of the Nile could be used to develop agriculture not only in Egypt, but also in Ethiopia and the Sudan;

2. The Jordan River could be developed to provide power and irrigation in a manner that would benefit countries surrounding it;

3. The Suez Canal could be widened and deepened to accommodate the huge tankers now being built, thus increasing the flow of trade through one of the major arteries of the world.

These are only a few of the many examples of what might be done if a method could be found to use the region's massive earnings from oily effectively.

One way of accomplishing this might be to establish a regional development authority which would channel the surplus funds of the nations with large oil earnings into productive activities throughout the area. While I am always reluctant to suggest the creation of a new agency in a world that is already generously endowed in this respect, I do not believe that any existing organization can fill the need. Moreover, in view of the nature of the problems, it would seem desirable to have a new agency that the Middle East countries would consider their own.

In setting up such a regional development authority, I would urge that its structure and operations be patterned on those of the World Bank, which, through its progressive ideals coupled with able and conservative management, has been by all odds the most effective of all our postwar international economic organizations. Such a regional development authority, I believe, should make only sound loans and investments. It should follow the World Bank practice of making

sure that the projects it finances fit into an economically sound development program for the borrowing country. Its management should be competent and nonpolitical. In fact, it might be desirable to work out an arrangement by which the World Bank would provide technical assistance to the regional development authority in finding personnel and developing its pattern of operations.

If a balanced and constructive regional development authority could be established, it might be desirable to use it as the mechanism for handling a part of the $200 million of United States Government aid funds allocated to the Middle East under the Eisenhower doctrine. In addition, if such an instrumentality were to exist, the oil companies themselves might see fit to take part in some of its activities.

There is, of course, no guaranty that such an Authority would solve all the perplexing political, social, and economic problems of the Middle East. Yet, I am sure it would be an important step in the right direction, for without it, it is hard to see how the varied and conflicting forces in the Middle East could be brought together to solve the complex economic problems which confront them. Such an Authority would serve our interest in helping to promote the economic development of an area that is of crucial importance to our future security and prosperity. While economic growth is no panacea in itself, it may well be a prerequisite to progress on the social and political fronts and thus it can contribute importantly to world peace and stability.

I have talked today about developments in a part of the world that seems far away from us here in Hot Springs. Yet, as I have tried to show, what happens in the Middle East in the years ahead can have an important, perhaps even a decisive effect on our own Nation's security and prosperity. Middle East oil development can be expected to continue, and, in fact, some projections show that in 10 years, production there will be four-fifths as large as that in the United States. Over a longer period, Middle East production of oil may exceed our own. This is bound to have a strong effect on our industry. As Middle East oil production expands, the area could become one of the fastest growing markets for United States machinery, equipment, and other goods. Our total trade with this region, both exports and imports, now exceeds a billion dollars. But if we keep our share of the market, our exports to the Middle East could go up almost 10 percent per year in the next decade. It seems to me more and more clear that American businessmen and bankers need to keep up to date and well informed on Middle East developments.

In stressing the importance of the Middle East and the opportunities that can be opened up by the effective use of its huge oil resources, I do not wish to minimize the very real difficulties we can expect to encounter on the political front. As all of you know, it is a region of historic racial, religious, and political tensions, both domestic and international. It is also at present one of the primary targets of Soviet penetration. We can be sure that every possible device will be used by Russia to promote its interests in that area.

Yet, as I have tried to point out, the difficulty of the task should not blind us to the fact that the Middle East is vitally important to us, nor should it deter us from pursuing a positive and vigorous program. Fortunately, there is an interdependence between the Middle East and ourselves, for their only hope of using their oil effectively in the support of general economic progress lies in cooperating with the West.

Our task is first one of understanding. We cannot act intelligently until we know the history, the ambitions, and the mentality of the people who, for centuries, have lived in the Middle East. Next, we must formulate a program which takes into account both our own objectives and theirs. Finally, we must proceed on our course with conviction, strength and statesmanship. Our stake in the Middle East is huge. Let us not lose it by inaction or an ill-considered move.

THE NEED FOR EXPANDING OUR POOL OF FOREIGN LANGUAGE SPECIALISTS

Mr. WILEY. Mr. President, of the 2½ billion people on earth, only 250 million or so speak English as their native tongue.

This fact is one of the significant elements to bear in mind in connection with our efforts to maintain contact with the peoples of the world on both sides of the Iron Curtain.

Yesterday's CBS radio-television interview with Nikita Khrushchev shows that we are in a never-ending battle for the minds of men against a capable, resourceful, determined adversary.

MASS SOVIET TRAINING

But Mr. Khrushchev spoke Russian yesterday, and his cohorts are systematically graduating foreign-language specialists by the hundreds of thousands. These, in turn, can be sent to the farthest corners of the earth and speak the native tongue of foreign peoples, while helping build a dam or a road or a sewer system for them, and/or passing along Communist propaganda in the foreign tongue.

Meanwhile, as I have repeatedly stated here on the floor, the United States is sadly deficient in the foreign-language training of its own citizens.

We are short in terms of the needs of Government. We are short in terms of the needs of private business. We are short in terms of simple person-to-person contact for our own understanding as individuals.

I am pleased, however, to note that a number of steps are being taken by public and private sources so as to help cope with our shortage of foreign-language specialists.

FINE WORK OF MODERN LANGUAGE ASSOCIATION

In Madison, the capital of my State, from September 9 to 11, there will occur the annual convention of the Modern Language Association.

Important in this year's MLA program will be a discussion of the foreign-language problem.

In this connection, I send to the desk excerpts from a most helpful report which was prepared by Prof. William Riley Parker, of the department of English of Indiana University. Professor Parker, a member of the United States National Commission for UNESCO, and former executive secretary of the Modern Language Association, was asked by the Commission to prepare a discussion guide on this problem.

This is but one phase of the very important overall role which has been played by the Modern Language Association.

I send to the desk excerpts of Professor Parker's working paper. I precede them with two quotations which I believe highlight the importance of this issue. The first is from a message to the MLA from President Eisenhower. And the second is one from the present Director-General of UNESCO, the Honorable Luther H. Evans.

I ask unanimous consent that these excerpts be printed at this point in the body of the CONGRESSIONAL RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

I hope that you will explore * * * the ways in which language study can be used to strengthen our own cultural heritage as well as to cultivate better understanding between our citizens and those of other countries. * * * It is heartening to note that you are engaged in a study of the role which foreign languages and literatures should play in American life. (A message from President Dwight D. Eisenhower to the Modern Language Association of America, December 9, 1953.)

UNESCO has set itself to promote familiarity with the most widely spoken languages, so that larger sections of the world's population may communicate with one another. In so doing, the Organization is striving to make it easier for all the peoples to acquaint themselves with the world's civilization as a whole, while at the same time safeguarding and indeed developing the essential individuality of each one of them. (Luther H. Evans, Director-General of UNESCO.)

THE NATIONAL INTEREST AND FOREIGN LANGUAGES

(A discussion guide and work paper prepared by William Riley Parker for citizen consultations sponsored by the U. S. National Commission for UNESCO, Department of State)

PART III—TOMORROW'S FOREIGN LANGUAGE NEEDS

15. Foreign languages and international understanding

Everybody wants more international understanding. An increasing number of Americans, plain and prominent, are saying it is the most important subject to be taught in our schools. Although few of them go on to show specifically how it is to be taught, there is urgency in the talk; President Millicent McIntosh of Barnard College declares: "You might as well pour children's education down the drain unless they are taught international understanding today." Hundreds of people have recently called for more attention to foreign language study in our schools and colleges as an essential means to this end.

But knowledge of a foreign language, whether extensive or slight, brings no automatic or certain sympathy with the people speaking that language. It may bring the opposite. History is bloodstained with tales of nations speaking the same language and hating one another. We have twice been at war with England, which, like America, has suffered prolonged and disastrous civil conflict. Europe, where so many people speak the language of neighboring countries, has been a perpetual battleground. Communists are today learning English and Americans Russian more for protective rather than peace-seeking purposes.

What do so many people mean then when they talk today about a knowledge of foreign languages as a vital element in international understanding? The point, of course, is that language study speeds and increases understanding when the desire to understand is there—speeds and increases sympathy when the germ of it is present. Language study may, and often does (although there can be no guaranty), create

the desire to understand, the germ of sympathy. It may, and often does, prevent misunderstanding. Starting from good will, foreign language study makes possible that ready and more nearly perfect communication between peoples upon which mutual understanding depends. Starting from indifference, foreign language study makes possible, through better communication, the discovery of good will. As Secretary of State John Foster Dulles has said: "Interpreters are no substitute. It is not possible to understand what is in the minds of other people without understanding their language, and without understanding their language it is impossible to be sure that they understand what is on our minds."

But there is more to the issue. What has just been said has always been true. Two additional factors, however, have given the whole problem so much urgency, especially for Americans, that many public figures, like Leo M. Cherne, executive director of the Research Institute of America, are saying, "A knowledge of foreign languages is so much more useful and necessary today than it has ever been in our history." These two factors are what Cherne calls "the shrinking of the world" and America's new role in it. Communication between peoples was always a problem, but, thanks to modern science and technology, it is today a problem involving more people, more often, and more speedily, than ever before in the annals of mankind—and the climax of this development is not in sight. The details—air travel, films, radio and television, the press, and all the rest—are too familiar and omnipresent to be spelled out. Never have so many Americans encountered so much foreign speech with so little equipment for communication and so much depending upon communication. A sentence spoken in Paris or Rome or Moscow is read a few hours later in Chicago or Los Angeles, and whether accurately translated or not, who knows? And if literally translated, what connotations or nuances are lost, who knows?

It is a characteristic of the man with only one language that he naturally, but sometimes disastrously, tends to identify words with things. "Democracy" means something, and our word for it can, of course, be translated into other tongues. But what do the Russians mean by "democracy"? They are very fond of the word, and invite us to translate their usage literally. For that matter, what do the French mean by a "liberal" (a reactionary) and a "radical Socialist" (a conservative)? The man who acquires a second language learns the full meaning of words that seem the same as English words, but actually mean something different. This is a kind of knowledge crucial to international understanding.

Remember the American reporters (it was just a few years ago) who interviewed a French general and quoted him as "demanding" American aid for the French war in Indochina? (A deceptive word, "demander," except for those who know a little French.) Remember your fellow citizens (it was only a while ago) who accused UNESCO of preaching world government and one-world citizenship? UNESCO's headquarters are in Paris, and much UNESCO talk and writing are originally in French. UNESCO did and does promote civisme international, which until March 1952 usually got loosely translated into English as "world citizenship." It does not, of course, mean world citizenship in any legal sense (citoyennetté internationale), implying rights and duties between a state and an individual. But a single, too casual translation came close to damaging one of mankind's best hopes for peace.

America's new role in the world simply aggravates our national sensitivity to this unprecedented problem of stepped-up communication. Brig. Gen. M. K. Deichelman asks: "As world leaders, shouldn't we be the first to start breaking down present enormous language barriers which are bound to cause misunderstanding?" President Lynn White, of Mills College, puts it this way: "To expect the educated citizens of other lands to learn English without our troubling to acquaint ourselves with some foreign tongue is the sort of effrontery which is ruining America's reputation and influence abroad." In other words, the big question is now: International understanding in whose language?

Effrontery, linguistic complacency—such traits, we are told, do not suit our new role of global leadership. Even the appearance of them is to be avoided if possible in a nervous, easily resentful world, parts of which accuse us of cultural imperialism. Our indulgence of linguistic and cultural isolationism long after we professed to abandon political isolationism is, in the watchful eyes of other peoples, a suspicious paradox. No question about it, a great many foreigners understand English; but what they do not understand is America's evident ignorance of the fact that ethnic symbols and sympathies and aspirations defy translation and must be directly grasped by sufficient knowledge of a foreign tongue.

How well known is English—in France, for example? With the aid of the French Institute of Public Opinion, the magazine Réalités recently conducted a nationwide survey covering all French social classes and found that 8 percent say they know English, 22 percent say they have a smattering of it, but 70 percent say they do not understand a word of it. In India, only about 2 percent of 360 million people understand English.

Given an atmosphere of good will, an individual traveling abroad can, in a sense, "get by" or "get along" with English or, for that matter, with sign language. (A blind man gets along with a seeing-eye dog.) But given an atmosphere of global tension, which is the atmosphere in which we live today, it would seem that no nation, particularly not a nation with frightening power and enviable wealth, can long get by without even trying to talk the other fellow's language. One language makes a wall; it takes two to make a gate. That is why Americans, praying for peace and seeking an increase in international understanding, now gather to discuss foreign language study as a means to these ends.

16. Foreign languages and the Armed Forces

We pray for peace. We may again find ourselves at war. It would be folly to blink the possibility and equal folly to forget the military importance of foreign languages. The Armed Forces of the United States, which had needed a limited number of translators and interpreters in previous conflicts, discovered in World War II that proficiency in languages was a vital military weapon and thereupon spent an estimated $40 million to obtain it quickly. The wartime intensive language program was an aural-oral cramming process to meet an emergency. The emergency passed, what need now have the Army, Navy, and Air Force of foreign languages?

In June 1948 the Public Information Division, Department of the Army, sent to college and university presidents a lengthy communication beginning as follows: "The importance of training college and university students in the basic fundamentals of foreign languages as a vital requirement for national security in the event this Nation is ever forced into another war was stressed today by Gen. Jacob L. Devers, Chief, Army Field Forces. General Devers pointed out that a working knowledge of foreign languages is essential so that American troops would be able to deal intelligently with the personnel of any foreign allies this country would have in a future war, as well as a necessity in questioning prisoners of war of a foreign foe and in relations with enemy civilian nationals when enemy territory is occupied."

But what, exactly, are the present and the potential needs of our Armed Forces for men and women with a working knowledge of foreign languages? To this question there is no reliable answer except the lesson of history. In the early years of World War II the linguistic needs of our Armed Forces suddenly became great and urgent, and we were shockingly unprepared, for it was widely held before 1941 that Americans had little practical use for foreign languages. To be sure, during World War I an estimated 2,393,000 had seen service outside the continental United States, but that was briefly, and long ago. No one dreamed that between December 7, 1941, and the end of 1945 an estimated 11,453,000 American youths would serve outside our comfortably monolingual borders—and, during the Korean hostilities of 1950–53, about 3,700,000. Today no one knows how many American youths will next have to be sent where. We are currently spending about $40 billion a year on our defense effort.

Last year, of the 3 million or so Americans in active military service, about 1,370,000 were stationed in 900 foreign installations. In July 1954 the United States Air Force in Europe introduced a mandatory, on-duty, language training program for all personnel, aiming to break the linguistic barrier between American personnel and our allies, and foster better community relations in areas where Americans are stationed. The courses in 10 different foreign languages were therefore made available also, on a voluntary basis, to dependents of about 80,000 airmen. They have proved popular with wives and mothers, according to the USAFE director of education. The Air Force strongly encourages officers and airmen to take, beyond the mandatory classes, 2 or more years of foreign language study through university programs organized in a foreign theater; thus a year or so ago, more than 3,000 were enrolled at Air Force bases in University of Maryland language courses in French, German, and Russian. At home the Air Force has been sending its personnel to the Army Language School and to various universities.

We hardly need cite the new Air Force Academy, where language study is now required of all cadets (after an initial plan to offer them a choice between languages and a course in aircraft design), or the academies at Annapolis and West Point (at the latter every cadet studied French from 1802, its founding, until 1942, and today studies one of five languages offered). We should, however, note the installation of a language laboratory in the Army's Counterintelligence Corps School in Baltimore and also the establishment of the Navy's language school at Anacostia and the Army's language school at the Presidio of Monterery, Calif. (from 1946, although a program of instruction in Japanese was there as early as 1941). The Army's language school had graduated about 16,000 up to July 1955; it currently has some 2,300 students (more than are enrolled in modern foreign language classes in all the public high schools of Kansas or any one of eight other States) and about 550 instructors (note the ratio; 4 students per teacher), and it teaches a total of 31 languages. The students devote full time to language learning (11 months to Russian, 6 to Romance or Germanic languages), and classes are limited to about 8 persons (as are the first-year classes at West Point). The school has prepared and printed its own textbooks.

One of the Army's basic training manuals (FM 22–10, 1951) advises officers: "Learn

and cultivate the use of at least one foreign language. Lack of language facility is a marked handicap to leaders who must be prepared to serve the farflung interests of the United States." At SHAPE (Supreme Headquarters Allied Powers, Europe), where the official languages are English and French but the personnel have to deal with nationals of many countries, a language laboratory was installed in 1952, with tape recorders and all the latest accessories for speedy learning. Supreme Headquarters not long ago recommended that the study of English and French be stepped up in military schools and staff courses in all continental allied nations; earlier, NATO's Deputy Chief of Staff for Administration and Logistics had bewailed the mounting inefficiency resulting from language barriers.

The United States Armed Forces Institute (established 1943), which offers servicemen correspondence and self-study courses and materials for group-study courses, has found foreign languages among its most popular offerings (according to the 1954 official catalog, which lists not only conventional high school and college courses in the usual languages but also a spoken-language series in 21 languages for group study). During 1954 there were approximately 27,000 students in the first category, 26,500 in the second, with German the most popular language in each—and ranking ninth among the 32 most popular college courses offered.

That the Armed Forces continue to be convinced of the importance of foreign language study is clear from these and many other illustrations that could be adduced (e. g., in September 1955 the Marine Corps introduced a program of foreign language proficiency tests, to be administered from seven testing facilities, to identify new and active personnel with language skills). But many a young officer, commissioned in the Organized Reserve Corps from ROTC units in colleges and universities that have minimized language study, today feels cheated when he passes into active-duty status. He feels the more so if he has a chance to be detailed abroad as a military attaché to an American Embassy or as a member of a military mission, for one of the qualifications for appointment to these choice posts is knowledge of the foreign country's language or its most commonly used second language. Officers, otherwise competent, who have been denied this opportunity have been heard to complain that neither they nor their parents were properly advised in high school or college about the current value of foreign languages.

In Spain, on October 26, 1953, that current value was expressed in language that any high-school adviser could understand: Spanish military authorities announced a 15-percent increase in pay for all officers and noncommissioned men who can speak and write English, Russian, German, or Japanese; 10-percent increase for Arabic; 5 percent for French, Italian, or Portuguese. Should our own Armed Forces introduce such an incentive system? It might influence high-school and college students to such an extent that it would actually save money in the long run.

"Signs may get you a quick cup of coffee, but to know a people, learn their speech." That was the title of one of Harold Martin's columns (Oct. 4, 1953), in which he illustrated the complexity of our problem: "I've spent many a harassed hour in foreign lands, blocked at every turn because I could not speak the language. That was merely inconvenience. But it can lead to tragedy, too. For I saw a battalion badly bloodied once because nobody could understand what an excited Korean was trying to say—that a strong Red force was lying in ambush, just beyond the hill." (More than 3 months before the war in Korea began, the Modern Language Association's commission on trends in education warned that Korea might become of extreme importance to our national safety and urged that more Americans learn the language. It was a news release that few newspapers bothered to print.)

When Gen. Matthew B. Ridgway was Chief of Staff of the United States Army, he declared: "The value of a knowledge of foreign languages is nowhere more apparent than in the military profession. * * * My own military experience has repeatedly demonstrated that when allies can communicate with each other in a common tongue, their effectiveness is greatly increased. * * * I am convinced that increasing our knowledge of foreign languages will add significantly to our national security, not only by increasing our ability to work effectively with our allies but also by increasing the mutual understanding between nations." Ridgway's successor as Chief of Staff, Gen. Maxwell D. Taylor, is said to command six languages.

17. Foreign languages and government

"It is an oft-repeated complaint, how largely our public service abroad suffers from a lack of intimate knowledge of foreign languages." That statement was made in 1908. Although the need for Americans officially representing our Government abroad to know the language of the country where they are stationed might seem completely obvious, the unhappy fact is that only within recent years has it received much official recognition. We had first to make some costly blunders, to find ourselves grossly misinformed, to stand tongue tied at urgent and important conferences. We were not accustomed to think of our diplomats, or their entourage, as being able to communicate directly with anyone except, perhaps, members of the political party to which they owed their jobs.

Auspiciously, our Nation's leaders now illustrate for us the importance of foreign languages in diplomacy. In 1953 President Eisenhower delighted a joint session of the Canadian Parliament by speaking four sentences of hesitant French. There is even such a thing as foreign language diplomacy at home. In October 1952, speaking in New Orleans as a presidential candidate, Adlai Stevenson tried a few sentences in French; and a year later he said: "I can testify from long experience in the international field that a more extensive familiarity with foreign languages would be enormously helpful to our country."

Why it would be enormously helpful was made clear in an Associated Press story that appeared in the papers on December 29, 1952: "Until the first American trained especially for Indonesian duty was assigned to the Embassy in 1949, all translating was done by natives. To please their employers, they interpreted everything to sound rosy, pro-American. But when American area and language experts began to read Indonesian newspapers and attend session of the national legislature, the Embassy learned that strong Communist-inspired anti-American feeling was sweeping the country. * * * State Department officials, at their most optimistic, estimate the Department has only half the area and language experts which it considers a minimum need. * * * One career diplomat recalls that in 1946 the State Department did not have one officer who could read an Arabic newspaper. * * * To find out what Islam was saying in its newspapers, the diplomats had to mail them home to the Library of Congress for translation."

That was 1946, a decade ago, and it must be added that the situation is now greatly improved. But as recently as January 25, 1954, Under Secretary of State Bedell Smith told the House Committee on Appropriations: "Our training in the Department has reached a sort of an alltime low. * * * We found to our astonishment that we did not have one single officer or staff officer in the Czech Embassy who spoke Czech. * * * Our training setup * * * is not what you or we would like to have to support the foreign activities of the United States." Congressman Robert Sikes of Florida commented: "I have long been concerned about our inability as a people to speak the other fellow's language. * * * I think you should step up the language training program considerably more than you are now requesting funds for. * * * I do not see why we have not emphasized language training more among State Department personnel."

But the reason is clear: the American people as a whole have been slow to recognize the importance of foreign languages to the national welfare. It was not until 1946 that Congress finally established the Foreign Service Institute in the Department of State to give general training to diplomats and then to educate some as area and language specialists. The Department also has a Division of Language Services, which translates annually more than 10 million words. Much is now being done, but in January 1954 the Director of the Office of Personnel complained ruefully: "The present number of officers of the Foreign Service who have been given intensive full-time training in the language and areas pertinent to critical spots throughout the world is inadequate to meet the needs of the Service." That same month, speaking over television, Harry S. Truman declared that "to be a member of the Foreign Service" one ought to know "at least" 4 foreign languages "and all the history that you can."

Some Government officials, now aware of the need, turn elsewhere for speedy language training. In Washington itself, besides various commercial language schools, there is Georgetown University's School of Foreign Service and its Institute of Languages and Linguistics. But C. Douglas Dillon, Ambassador to France, Clare Boothe Luce, former Ambassador to Italy, and James B. Conant, former president of Harvard and now Ambassador to the Federal Republic of Germany, took Berlitz courses before entering upon their new duties. Vice Adm. Leslie C. Stevens learned Russian while on assignment to Moscow and came to the conclusion that none but Russian-speaking officials should thereafter be sent to Russia. Senator Joseph McCarthy picked up his working knowledge of Russian from phonograph records.

Investigating the Central Intelligence Agency, the Hoover Commission recently reported: "Lack of adequate linguistic preparation often has proved to be a serious handicap to our representatives abroad." Hence the Commission's Recommendation No. 9: "That a comprehensive, coordinated program be developed to expand linguistic training among American citizens serving the intelligence effort; and that the Department of Defense expand and promote language training by offering credit toward Reserve commissions to ROTC students and drill credit to Reserve personnel for completion of selected language courses."

That is an interesting proposal—one which the American people, through "Citizen Consultations" and other devices for group action, can help to make a fact. Let us consider a few other proposals which might merit public discussion leading to recommendation.

Senator ALEXANDER WILEY, of Wisconsin, has for a long time been "deeply interested in increasing the reservoir of American specialists in foreign languages" and wants the Congress to support a greatly stepped-up language training program. The president of Columbia University's Teachers College, having been sent abroad to study problems of our technical assistance programs, publicly warns the 43 United States universities which are involved to send faculty members who are able to speak the language of those

being helped. (Perhaps this should be called point 5.)

Our various Government agencies might consider the practice of the United Nations and offer a bonus to nonprofessional employees who acquire an additional language. At one point during 1955, after work, some 601 students representing 35 mother tongues and 47 nationalities—mostly staff members but also some delegates and career diplomats, who get no bonuses—were busily learning 1 of the 5 official languages, Chinese, English, French, Russian, and Spanish. This instruction, begun in 1947, has been offered in improvised classrooms scattered throughout the secretariat building, but a set of proper classrooms is now being constructed. Thus far more than 8,000 persons have taken advantage of the offerings. (For the famous simultaneous or consecutive interpretations of speeches, greater skills are, of course, required; these interpreters—there are currently about 61—are recruited fully or almost fully qualified, spend their first 2 years in probationary status, and are given such training as they need while on the job. Salaries range from $6,500 to $11,000. The U. N. also employs about 258 persons who translate written documents into the 5 official languages, and will soon add an Arabic translation section.)

Another suggestion: the Modern Language Association's Commission on Trends in Education recommends that, "in the interest of national safety, as well as the development of our economic and cultural independence in the field of languages, steps should be taken by the Government to provide financial aid for the training of especially promising students of foreign languages, looking to the establishment of a body of experts certified for the national service in peace and war. This training should begin not later than the junior college level with the selection by competitive testing of especially promising students both male and female and the award of fellowships for intensive work in one or more foreign languages through the senior college years. After graduation, successful candidates should be provided with fellowships for language and area competence in a foreign country, and after two years enrolled in a reserve corps of 'Foreign Language Experts,' drawing an annual stipend and subject to annual refresher work under the Departments of State and of Defense. The more proficient should be inducted into the national service as need arises. The training thus provided would also open a career in teaching or in industry or commerce."

For a final proposal we turn again to President Hollis L. Caswell of Teachers College, Columbia University, who says: "It is my belief that the national stake is such that efforts should be made to establish some agency comparable to the National Science Foundation to encourage and support study of foreign languages and cultures. * * * Our national welfare calls for the rapid development of resources in this area."

What have the American people to say to their Government about this and the other proposals?

18. Foreign languages and business

Can only our money talk to our foreign customers? Or is it true that you can buy abroad by speaking English, but to sell you had better talk the other fellow's language? By the end of 1955, according to the Commerce Department, private United States investments abroad had topped $29 billion, an increase of about $2.5 billion over the preceding year. The annual value of our foreign trade, including goods and services, has risen from less than $4 billion in 1914 to well over $42 billion today, according to the National Foreign Trade Council. These facts have inevitably made some branches of big and little business aware of the importance of foreign languages.

The Arabian-American Oil Co., for example, has six language experts on its payroll in Arabia. A different kind of interest is that of the Reader's Digest, which publishes more than 5 million copies monthly in 11 foreign languages. The curve of all such interests is upward. In 1953 the United States Council of the International Chamber of Commerce issued a guide to Doing Business Abroad, designed to induce additional American businessmen and corporations to extend operations to foreign countries. More than 50 foreign governments have more than 100 purchasing agents in this country.

An article in the New York Times (September 13, 1953) declared: "A great upsurge is taking place in the teaching of languages. * * * Business concerns sending workers abroad want them on speaking terms with the people they deal with." Harry C. Kenney, writing in the Christian Science Monitor (December 13, 1952), said: "International business organizations here have come to the conclusion that it is smart to have their representatives in foreign lands speak and understand the language of those countries. * * * Business has found that by the adoption of foreign languages not only its representatives but the companies involved are treated with a great deal more respect and appreciation. And the interchange of business activities is accomplished more quickly and efficiently. Airlines, such as Pan American World Airways and Trans World Airlines have discovered, somewhat to their surprise, but most tourists and business people not only want to but are making an effort to learn languages. Consequently they are giving their passengers booklets and pamphlets containing phrases, phonetics, and spelling."

Business Week (February 28, 1953) had a similar story to tell: "Today more and more executives are giving employees being readied for foreign service a concentrated course in language and social customs of the country they will be working in. A few companies conduct their own classes, using company personnel. But most—like Standard-Vacuum Oil Co.—take their problem to a specialist. * * * Linguaphone, which for many years did a tidy business with its phonograph record course, is now doing a booming trade with business firms and Government agencies whose employees must be bilingual to perform their tasks." Business Week went on to explain that in its two New York schools the Berlitz School of Languages instructs many company-sponsored pupils—trainees sent in by such companies as General Motors Corp., Remington Rand, Inc., National City Bank, as well as department stores, overseas airlines, and steamship companies.

A more recent article on the Berlitz schools, in the Saturday Evening Post, August 4, 1956, gives their gross annual yield at $8 million. "Many oil companies, banks, airlines, and motion-picture studios automatically include Berlitz fees in their overseas budgets. * * * Du Pont, TWA, Pillsbury, Quaker Oats, General Motors, and dozens of other American firms doing business overseas have set up special courses under Berlitz direction in Japan, Sumatra, Bombay and other distant outposts." Since the war more than 50,000 veterans have studied with Berlitz under the GI bill.

A recent issue of Export Trade and Shipper (January 30, 1956) editorialized: "The prospective big customer in Latin America, or in India or Saudi Arabia or where have you, may be able to understand English, it is true, but does he prefer English? In what language does he think? * * * Management of American manufacturing companies has often been criticized, and not without justification, in connection with the selection of export personnel, for failure to attach due importance to such qualifications as the fluent command of other languages. * * * The problem of language and correct idiom in advertising and other forms of communication will remain a major factor in world trade. Underestimation of its importance, by American business management, cannot fail to obstruct the maximum potential development of expansion in world markets."

Thus far, American schools and colleges have done nothing directly to help American business meet this growing need for foreign-language proficiency. Should they?

Many a leading businessman has lately spoken his piece on the importance of language learning. Perhaps the most piquant statement of them all came from Canadian-born Lord Beaverbrook, who, at 74, was taking lessons in French: "There are * * * certain branches of education which many youths consider unnecessary for a business career. Foremost among these are mathematics and foreign languages. * * * I regret that my business career was shaped on a continent which speaks one single language for commercial purposes from the Arctic Circle to the Gulf of Mexico. If a man can properly appraise the value of something he does not possess, I would place knowledge of languages high in the list of acquirements for success."

Omar N. Bradley offered perhaps the most concise summary of the situation: "The youngster of today will find that modern language study will pay great dividends in most fields of endeavor in the future."

(Selected references: Theodore Huedener. Opportunities in Foreign Languages (Vocational Guidance Manuals Co., 1955). Gives quotations from several dozen businessmen on the need for foreign-language proficiency. Quentin O. McAllister. Business Executives and the Humanities (University of North Carolina Press, 1951), ch. 3. Gives quotations from 43 leading businessmen on foreign-language study.)

19. Foreign languages and American society

There has long been a stock argument against foreign-language study in our schools and colleges which runs this way: "Sure, the Armed Forces and the Government and American business need a few specialists in foreign languages—more now, maybe, than before. But these few are only a small percentage of our whole population; the great majority of the American people will never have any real need for foreign languages; and the curriculums of our schools and colleges ought to prepare youngsters for needs they will actually meet." Those advancing this argument (you must have heard it) do not say how the student in school or college is going to determine in advance whether he will be drafted and sent abroad, or eventually enter Government service, or get into a business that is extending operations to foreign countries. They are concerned only with unspecified percentages, which they assume to be low.[1]

Education is concerned with both the predictable and the unpredictable future, and so had we better be, in talking about foreign languages and the ordinary citizen or his child. Without attempting prophecy, we may consider some facts and figures which do at least suggest the future, and the reader may project the curve for himself.

Travel. The ordinary American citizen has his most obvious need for foreign languages in his role as traveler to other lands.

[1] This argument has recently been advanced by Herbert F. A. Smith in the NEA Journal for May 1955, p. 271, and by Van Cleve Morris in Educational Forum for January 1954, p. 156.

Abroad, particularly if he sticks to tourist centers, he may find many persons who can speak English—to the extent of his tourist needs. But as Mrs. Margaret Thompson Biddle, seasoned traveler and European editor of Woman's Home Companion, said recently: "If the American traveling abroad is able to talk with the people of other countries in their own language, he gains a much broader and deeper understanding of their problems and attitudes." Mrs. Biddle (born in Helena, Mont.) added: "Don't scoff at our United States high school French—that's all I had to go on when I went to live in Paris, but it got me by."

The question, therefore, is: Are Americans traveling more, or traveling less, as the years go by? To this a very positive answer can be given. Every year the number increases and countless millions are looking forward to the trip some day. And why not? Air tourist service around the world for $1,348 is a reality. Except in the rush season, airlines offer reduced fares for families traveling together. Glamorous Paris is just 11 hours from New York.

The actual statistics are staggering. Take Spanish-speaking Mexico, which one may visit without a passport. During 1951–54 Mexico issued to United States citizens 1,703,438 tourist cards (461,961 in 1954 alone). No one knows how many Americans visit annually the parts of Canada where some 3,500,000 French Canadians live, or parts of the West Indies where foreign languages are spoken. But an official of the American Express Co. estimated that in 1954 approximately 1,250,000 United States citizens traveled beyond North America.

This estimate was based, presumably, on an interpretation of passport statistics. During 1947–55 the Passport Office of the Department of State issued 3,064,704 passports. The figures have been increasing steadily; in 1951, 290,407; in 1952, 395,337; in 1953, 418,170; in 1954, 434,044; in 1955, 525,259. The head of the Passport Office expects the annual total to be a million by 1960.

Consider all this in financial terms: Americans spend more than $1.5 billion a year on traveling abroad. (Little wonder that during 1954 at least 43 official government and tourist offices operated by 30 nations spent an estimated $6 million in an effort to gain American friends and woo American tourists.) But consider it also in human terms. John Gould said recently: "When somebody tells you that you can find somebody to speak English wherever you go, it is no doubt true. But I think the truth of the statement is beside the point; it seems to me the travelers are missing something. * * * You'll have a much better time if you break down and forget your English, and fiddle around with the other man's language. They may speak English wherever you go, but that's their intellectual achievement, not yours."

Robert Ulich, professor of education at Harvard, agrees "there always is somebody who speaks English," but warns: "Nevertheless, the fact remains that he understands you, but you do not understand him and his compatriots. This fact has had a deplorable impact on the international relations and international policies of this country."

Increased trade, among other factors, has been bringing increased travel, as our relations with the 160 million people in the 20 Latin American Republics illustrate. In 1954 the 20 republics spent $3,371,400,000 on United States merchandise, more than 6 times the 1938 figure; and in the same period our imports climbed from $443 million to $3,289,000,000. Some 500 United States companies have 2,000 Latin American subsidiaries and branches. Note, as one result, that whereas in 1928 only about 300,000 persons traveled between the United States and Latin America, in 1953 the total was 1,073,763—883,459 of them traveling by plane.

Isolationism: Was there a connection between the spirit of political isolationism once so prominent in American life and the public indifference to foreign language study during the same period? Writing in the 1953–54 winter issue of Public Opinion Quarterly, Elmo Roper reported: "There is no doubt whatsoever that the adult population of the United States is definitely committed to internationalism and international organization in one form or other." His findings indicate that 73 percent of us feel that the surest and wisest way to strive for peace is either to work along with the United Nations or to strengthen it, and only 9 percent believe that Washington should pursue a strict isolationist policy. A more recent (Aug. 1955) poll, by the National Opinion Research Center, found that 88 percent favor continued membership in the U. N. and only 5 percent still want to pull out. These polls may throw light on the increasing public interest in foreign languages.

* * * * *

Multilingual America: The familiar argument that an American must travel abroad in order to put his foreign language to any use ignores not only books, movies, radio broadcasts, foreign visitors, and such; it also ignores the population of the United States. We do not refer to the American Indian, although, of 400,000 on tribal rolls, 61,000 cannot yet speak English. In many parts of the United States, conspicuously in our large cities, but also in Florida, in Louisiana, in parts of New England, and in our great Southwest, we may hear and speak foreign languages without need of passports.

Want to practice your high school French? There are some 2 million Franco-Americans of Quebec and Acadian stock now living in the United States. In New Hampshire alone (population about 450,000), French is spoken in the homes of about half the school children, and almost all parochial schools in the State teach in French as well as in English. In Maine about 22 percent of the population, or some 200,000 people, understand and use French very freely.

The 1940 United States census makes it clear that in various sections of our country there are persistent, relatively permanent foreign language groups, in the main descendants of the original settlers. Thus, 97.1 percent of the white persons in Louisiana reporting French as their mother tongue were natives of native parentage, and 87 percent of those reporting Spanish in New Mexico were of the third, or a subsequent, generation. This phenomenon is also to be found in Arizona, California, Florida, Maine, New Hampshire, Pennsylvania, Texas, Vermont, and other States.

The figures produced by the 1940 census may surprise some Americans who are unaware of them. Of 118,392,040 whites then in the United States, at least 21,996,240 had a foreign mother tongue. The 1950 census did not produce comparable figures, but did note 23,578,375 native whites of foreign or mixed parentage, plus 10,161,168 foreign-born.

New York City has nearly 40 movie houses which show only foreign-language films, without English subtitles. Scattered throughout America are nearly 400 radio stations that broadcast at least part time in foreign tongues. At least 82 foreign-language daily newspapers, with a gross circulation of about 1,200,000, are published in the continental United States, and there are in addition 600 other periodicals (from triweeklies to quarterlies) published wholly or in part in one of at least 45 different foreign languages.

In times past we were greatly concerned to "Americanize" in a hurry the newcomers to our shores, and a usual byproduct of this process was to make the second and third generations ashamed of their cultural heritage, including the foreign tongue. Thus, in many schools in the Southwest, children of Mexican background were punished for speaking Spanish in school, even on the playground. Although in the workaday world they are expected to know Spanish, these children still, for the most part, have no opportunity to learn to read and write their mother tongue until they elect Spanish in high school—if they get to high school, and if it is taught there. It has recently been announced, however, that Spanish-speaking children in New Mexico will hereafter be given the opportunity to master their mother tongue beginning in grade 5 (while English-speaking children will learn Spanish from grade 1).

Whereas speaking only English was once almost universally identified with good citizenship and patriotism, there are other signs that this inhumane and, in view of America's rich history, illogical tendency is diminishing. We may yet demonstrate our national maturity by inviting the educated among foreign-born Americans (i. e., those with accents we want to imitate) to help us acquire a second tongue and some knowledge of another culture than our own.

In September 1954, with these thoughts in mind, the Modern Language Association held a conference on intercultural understanding, bringing together language teachers, social workers, cultural anthropologists, and others interested in fostering self-esteem and mutual respect among the various cultural groups represented in America. The conferees agreed that the melting-pot theory is now obsolete, that the admixture of other languages and cultures does not corrupt but enriches our own culture. They agreed also that, since culture and language are inseparable, both should be taught inseparably, beginning, if possible, with very young children.

Movies: There are at least 151 art theaters in the United States that regularly show foreign films, and at least 311 part-time art theaters that occasionally do so. These figures do not include the movie houses that cater to a foreign language speaking population; in New York City, for example, there are 22 houses that regularly show films in Spanish, and 17 others that regularly show films in other foreign languages. Although no one seems to know precisely how many foreign language films are now imported annually (the United States Bureau of the Census lists imports of prints only), one thing is clear enough: foreign movies are steadily becoming more popular in this country and are being shown in quantity sufficient to allow many an American to test his listening comprehension of a foreign tongue.

Clubs: Since 1947 the General Federation of Women's Clubs has had in force a resolution urging increased study of foreign languages by Americans. Pilot International, a service club for women, passed a similar resolution at its 1954 convention. No one knows the number of adult groups scattered about America which have been formed for the express purpose of keeping alive an interest in foreign languages and cultures. There are three such in Stanford, Calif. In Wilmington, Del., there are French and Spanish luncheon clubs. Alert people get together at regular intervals to talk French (and France) in Vineyard Haven, Mass. Pleasure in a second language is common to clubs (doubtless unaware of each other's existence) in Topeka, Kans., Devon, Pa., and Fairfield, Conn. A year ago a group of Oxnard, Calif., businessmen were studying Spanish twice a week between 5 and 7 o'clock in the morning. At Gimbel's department store in Philadelphia, for the past 5 years or so, between 25 and 50

people have gathered monthly in the Clubwomen's Center to hear and talk Spanish.

Television: Foreign languages have been taught over 2 or 3 dozen TV stations, and may soon be taught over a national network. A kind of informal refresher course in languages has proved popular with countless men and women. An early example was the University of Rochester's French for Travel, designed especially for adults who once had a limited amount of high school or college French and wanted to brush up on it. A different type of foreign language teaching program, addressed to the whole family, is the one telecast—since September 1955—over WGBH-TV in Cambridge, Mass.

International conferences: One of the phenomena of our times is the increase in the number of meetings, held both in this country and abroad, involving business or professional men or ordinary citizens from different nations. These have done about as much as any other single factor to dramatize the language barrier. Languages Slow up Fisheries Session, declared headlines in the New York Times on May 26, 1953—there were 60 delegates from 10 countries to talk about conserving the North Atlantic fish supply. Writing in School Life, April 1955, on the First Inter-American Seminar on Secondary Education, held at Santiago, Chile, our delegates concluded their report: "Because of the language difficulty—all discussions and speeches were in the Spanish tongue—certain restrictions were placed on more extensive participation by the United States delegation in the plenary sessions." The report might have added, but did not, that Spanish is currently being studied by only 7.3 percent of our total public high-school population, as compared with 8.2 percent 7 years ago.

On August 24, 1955, at Niagara-on-the-Lake, French Boy Scouts attending a world jamboree booed noisily when a program put on by American scouts was introduced in English only—and jamboree officials hastily called for bilingualism in all public announcements. These scouts were monolingual children. Mrs. Eugene Jolas expresses the adult situation simply: "How sad to see members of international conferences—big men, leaders in their own countries—unable to talk to each other after the formal business is completed through interpreters." How many Americans is she describing?

We have no figures on the total number of international congresses held in recent years and involving Americans from all walks of life, but we offer the impression—which the reader may check—that they are on the increase. H. Houston Merritt, eminent neurologist, says they are, and adds, "The scientist is at a disadvantage if he is unable to converse with colleagues from other nations."

* * * * *

20. International exchange of persons

An important development of our time, sure to be remarked by historians, is the increasing number of Americans sent abroad, or foreigners brought here, by scholarships, fellowships, and grants designed to promote educational, cultural, and scientific exchange and international good will.

The United States embarked upon this vast adventure with scant awareness of the extent to which knowledge of foreign languages affects its success or failure. It was perhaps in the Government's Fulbright program that the realization first dawned that language is the best passport. In December 1953, its presidentially appointed Board of Foreign Scholarships, mindful of the restrictions which linguistic inadequacy presents on applications of American students desiring to study abroad under the educational exchange program, formally urged the Modern Language Association of America to redouble its efforts to stimulate the teaching and learning of foreign languages in universities and colleges throughout the United States.

The introduction to UNESCO's trilingual handbook, Study Abroad, declares: "No single cause of failure is more frequently found among the holders of international fellowships than their inability to understand or express themselves in the languages of the countries where they are studying. * * * It is undesirable that the first 2 or 3 months of study abroad should be spent in learning the language of instruction." In a Survey of Summer Travel Habits, published in September 1955, the Council on Student Travel cited the language barrier as the chief problem encountered by American student travelers.

Does it matter? There are about 50,000 American students traveling abroad annually, an estimated 7,000 of whom enroll in foreign universities. Since its establishment in 1947, about 12,000 Americans have gone abroad for study or teaching in 31 foreign countries under the Fulbright program. The international educational exchange program conducted by the Department of State exchanges each year about 7,000 persons representing about 70 countries. This year there are about 36,500 foreign students in approximately 1,650 colleges, universities, or professional schools in the United States.

These figures may be misleading. Actually, it is hard to grasp the extent—to say nothing of measuring the effect—of all the current programs of international education. Educational exchanges are now offered by more than 100 countries and territories, a number of United Nations agencies, and several dozen international organizations. Our Government has spent more than $35 million since 1948 on German-American exchange of persons alone. (That's the cost of one new destroyer without armament.) Currently open to Americans are so many opportunities for foreign travel or educational exchange that few persons can keep track of them. The Institute of International Education, a nongovernmental, nonprofit, American agency for advancing international understanding by means of educational exchanges, was founded as long ago as 1919, and currently advises about 100,000 people a year on their foreign study plans. Less familiar, perhaps, are many of the other programs and organizations. The International Educational Exchange Service, for example, in 1953 approved 589 exchange-visitor programs by private groups.

In the Experiment in International Living (1932), a nonprofit agency which has provided more than 8,000 young people with an opportunity to travel and live with selected families in 28 foreign countries, a minimum of 2 years' current and successful study of the foreign language is required for visits to 7 named countries—3 years for visits to 3 others. The assistant director of the International Farm Youth Exchange (1948), a National 4-H Club agency which has sent more than 400 rural young people to 36 foreign countries and brought a slightly smaller number to the United States, declares that the language barrier is a great handicap to American participants in the program, who are lent self-help booklets and language records from the foundation's 14-language library. American applicants for the World Council of Churches' ecumenical work camps in 19 countries are asked to sign a series of 9 presuppositions, 1 of which is: "for France you will speak French, and for Germany, German—for other countries, applicants are given preference who speak one of those or some other language."

During 1955 international scholarships of the American Field Service sent 605 American youngsters overseas and brought 653 foreign students here. Two years of foreign language training are a minimum prerequisite for the Americans; the Director pleads for more stress on auraloral proficiency in our language courses and more teaching of German in our high schools. (All the American boys and girls, he points out, come home with a very great desire to learn languages.)

On the chartered ships of the Council on Student Travel, a coordinating agency which has sent more than 46,000 students abroad and transported about 22,000 of them, 2 hours each afternoon used to be set aside for language classes; but in the summer of 1955 the council attacked the language barrier vigorously and enrolled 7,395 persons in shipboard classes in 20 languages. Many enrolled on ships homeward bound.

We have not even begun to cite all the programs that are today making a knowledge of foreign languages important to Americans (another example: Since 1937 Pan American World Airways has been awarding travel fellowships to students with a knowledge of the language of the country to be visited). No one knows how many small, college-sponsored programs there are providing foreign travel for educational purposes. Fairly well known are the several Junior Year Abroad plans initiated by the University of Delaware (1923), taken over by Sweet Briar College (1948), meanwhile imitated by Smith and Rosary Colleges (1925), and eventually participated in by about 157 institutions. Middlebury College in Vermont has regular graduate schools in France and Spain; students from the universities of Denver and Omaha visit Mexico to study for college credit; and each summer students from the University of Mississippi visit France. There are many such programs. The fact is that the international exchange of persons has now reached such proportions that almost all parts of America are in one way or another affected.

Take Oklahoma. In December 1953 its Governor, Johnston Murray, said: "I know definitely the many advantages that can be derived by knowing a foreign language. In the State of Oklahoma we have something like 350 students from foreign countries who are learning English and other subjects in an attempt to understand our way of life. * * * I feel that the students in the various colleges of Oklahoma are becoming more and more interested in foreign languages because of the association with these fine youngsters from abroad." This may be so; but the distance still to be traveled is perhaps suggested by the fact that 9 out of 10 of Oklahoma's public high schools offer no instruction in a modern foreign language, and during 1954–55 there were only 4,804 students of a modern foreign language in the high schools that do.

Meanwhile Americans everywhere might gain perspective on the problem by asking and answering three questions: How many foreign students are currently visitors in your community and State? How many students from your community and State are currently studying abroad? What are the implications of these figures for the foreign-language situation in your community and your State?

PROPOSED NATURAL GAS EXEMPTION LEGISLATION

Mr. WILEY. Mr. President, I have been pleased to receive today from Hon. Ivan A. Nestingen, mayor of the city of Madison, a resolution which had been adopted by the common council of that great municipality. It expresses sound opposition to H. R. 6790, now pending before the House Interstate Commerce Committee.

Thus, this resolution reiterates the well-merited position of Madison against

the exemption from Federal regulation of the production of natural gas.

The resolution parallels the position reflected by every other city of my State which has contacted me on this subject down through the years.

And I am glad to reiterate that my own views coincide 100 percent with the judgment of the mayors and the common councils, as well as the judgment of the Governor of my State, the attorney general, and the State legislature—all of whom have spoken and written similarly.

FOUR HUNDRED AND FOURTEEN THOUSAND WISCONSIN CONSUMERS

I want to point out that, according to figures furnished to me by the public service commission of my State, in 1956 natural-gas sales amounted to 42,895,000 thousand cubic feet.

An increase of but 1 cent per thousand cubic feet across the board would cost Wisconsin consumers around $500,000 a year, since current sales are running in the order of around 50 million thousand cubic feet.

As a matter of fact, if there was a substantial increase, the jump in price would price some of the industrial use out of the market. This would, in turn, add to the burden on the remaining customers.

All told, there are around 414,000 residential customers in my State, 25,800 commercial customers, and a little under 2,000 industrial customers.

Of the 414,000 residential customers, around 122,000 are dependent upon natural gas for heating their homes.

WHY THE HASTE ON THIS PROPOSED LEGISLATION?

But this sort of fact may not unfortunately impress the majority of membership of the House Interstate Commerce Committee.

We note that, unfortunately, the committee seems determined to rush to a final vote on this proposed legislation within the next few weeks.

It is a source of wonder to us that, with all the other important proposed legislation now pending before that committee, there is such frantic haste to complete action on such a controversial bill—one which obviously the American people so overwhelmingly oppose.

TWO ADMINISTRATION AMENDMENTS BETTER THAN NOTHING

Our people are particularly made aware of the powerful forces which are at work behind the scenes over this issue when we note that the gas industry is apparently furious even over the very mild amendments which the administration proposed. These include the amendment which would make optional—permissive, not mandatory—the power of the Federal Power Commission to consider producers' cost in determining the reasonable market price.

As I have previously indicated, this amendment, like its sister amendment, is, in my judgment, weak and totally inadequate to protect the consumer's interest. But the two feeble amendments are certainly better than nothing.

The gas industry, however, wants to be 100 percent sure, not 99.9 percent sure, that the Federal Power Commission will always allow a sky-high price that the traffic will bear.

The gas industry does not even seem to want to allow one-tenth of 1 percent of a chance that the consumers will someday be protected. I hope that the Congress will see to it that the consumer is not gouged.

GIVE FPC MINORITY A CHANCE

The Federal Power Commission majority may not care for the consumer. But apparently there is a minority on the Commission which does care. And certainly the majority of this Nation does care. I hope that the propublic minority on the FPC will be heard from and that its voice and report will not be suppressed. I earnestly hope, too, that the judgment expressed by the city of Madison and by other communities across the length and breadth of this Nation will be heeded. I ask unanimous consent that the text of the Madison resolution be printed at this point in the body of the CONGRESSIONAL RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION BY COMMITTEE OF THE WHOLE (REQUEST OF THE MAYOR)

Whereas the primary purpose of the Congress of the United States in adopting the Natural Gas Act of 1938 was to protect consumers from exploitation by suppliers of natural gas, while at the same time assuring the suppliers of a fair and reasonable price for their product; and

Whereas the means whereby Congress accomplished this purpose was to confer jurisdiction upon the Federal Power Commission to fix reasonable rates for sales of natural gas in interstate commerce for resale to consumers; and

Whereas at the present session of Congress there has been introduced bill H. R. 6790 by Congressman HARRIS, which would exempt from regulation by the Federal Power Commission independent producers of natural gas making sales in interstate commerce for resale: Now, therefore, be it

Resolved, That the Common Council of the City of Madison go on record as opposing the passage in Congress of bill H. R. 6790; and be it further

Resolved, That a copy of this resolution be forwarded to the Congressional representatives of the city of Madison in the United States Congress.

This is to certify that the foregoing resolution was adopted by the Common Council of the City of Madison, Wis., at a meeting held on the 23d day of May 1957.

ELDON L. HOEL,
Deputy City Clerk.

THE ST. LAWRENCE SEAWAY LEGISLATION

Mr. BUTLER. Mr. President, Mr. P. M. Shoemaker, president of the Delaware, Lackawanna & Western Railroad Co., in speaking before the Propeller Club of the port of New York, delivered what I believe to be an excellent Maritime Day address on the possible perversion of the St. Lawrence Seaway legislation to the detriment of Atlantic-coast ports. I request unanimous consent that Mr. Shoemaker's speech be printed in the body of the RECORD, to be followed by an editorial, dealing with the same subject, as appearing in the Baltimore Sun on May 31, 1957.

There being no objection, the address and editorial were ordered to be printed in the RECORD, as follows:

ADDRESS OF P. M. SHOEMAKER, PRESIDENT, THE DELAWARE, LACKAWANNA & WESTERN RAILROAD CO., AND PRESIDENT OF THE CHAMBER OF COMMERCE OF THE STATE OF NEW YORK, BEFORE THE PROPELLER CLUB, PORT OF NEW YORK, WALDORF-ASTORIA HOTEL, NEW YORK, MAY 22, 1957

As one deeply interested in the future of transportation of all kinds, and as one particularly interested in the port of New York, which means the welfare of the interests serving and using the port of New York, I am more than honored to have the opportunity of discussing a few aspects of the future of transportation before this responsible organization.

It was in 1922 that the Propeller Club of New York was conceived by farsighted shipping men for the purpose of constructively discussing not only mutual problems of the moment, but the future of American shipping as well. Over and above our direct day-to-day obligations to our individual organizations, there has come the realization, and it has been a wholesome one, that it is both good business and good citizenship to actively participate in trying to solve the broader problems of one's industry, the civic problems of one's community and the governmental problems of one's nation. The Propeller Club of New York, whose impact has now spread across the Nation, owes a debt of gratitude to the broad concept of industrial and national service which characterized the thinking of its founders 34 years ago.

In 1922 the shipping industry, in a period of business recession, was attempting to straighten out its affairs that were still tangled as a result of World War I. The railroad industry had been returned to private ownership. It, too, was faced with the then seemingly insurmountable problem of recovering from the Federal Government's incompentency in its handling of surface transportation. The airline industry and the over-the-road trucking industry were not yet major factors in the transportation picture, nor was the potentiality of pipeline transportation widely recognized. Thus two major private enterprise groups, the shipping industry and the railroads, had the task of restoring economic health to their components and at the same time meeting their ever-increasing responsibilities to the industrial growth of our Nation. The history of World War II tells us that the job was done well.

Since World War II great new problems have been on the horizon. There has developed great competition between the various forms of surface transportation. In a period of steady inflation the survival of the American merchant marine has been predicated upon Federal help to meet the competition of foreign labor and material costs in the shipping field. Domestically there has been a resurgence of governmental interference in the transportation industry, with all kinds of combinations of regulation, subsidy, and discrimination which in part relate to the tremendously rapid growth of our economy and in part to there being no overall look at transportation as a whole. I will come back to that point, emphasizing now its importance to the shipping industry, however, by stating that which you know so well: a healthy shipping industry is dependent upon good business; good business in the United States is dependent upon sound transportation. This is an historical truth recognized clearly even as far back as 1768 when, in those years before the Revolution, farsighted shipping and businessmen of the port of New York established the New York Chamber of Commerce, with its subsequent broad mandate of authority and

responsibility in its charter from the King of England. Like the Propeller Club, that organization, which became the chamber of commerce of the State of New York after the Revolution, has had from its inception a consistent and constructive interest in good transportation.

To most of us here, the health of the port of New York is a basic concern. National Maritime Day is a peculiarly appropriate time to examine an aspect of this great port's future, which is not a comfortable one from my point of view. It is in this connection that I am going to briefly reexamine with you the potential impact upon this port from the St. Lawrence Seaway development.

I am not going to take your time to reargue the merits of the seaway. Port of New York interests fought the project for at least 40 years. The battle was lost when the first Republican administration in almost a generation endorsed the theory that a part-time waterway could be justified under the guise of defense. This might have had some validity before the days of airpower and guided missiles.

When Congress finally enacted the seaway legislation it did so on explicit assurance that the project would be self-liquidating through tolls. General Pick, then Chief of the Corps of Engineers, testifying before a Senate committee in 1952, said:

"Annual economic carrying charges for the new navigation facilities on the St. Lawrence from Ontario to Montreal are estimated at $16,712,000. That sum includes costs for operation, maintenance, repairs, interest on the investment, and amortization with interest at 2½ percent.

"Comparison of the anticipated toll revenue—at least $36 million yearly, with annual economic charges of $16,712,000—demonstrates that the navigation facilities on the St. Lawrence can be made self-liquidating."

Some of the opponents of the legislation raised a skeptical eyebrow at these figures and said that the costs were grossly underestimated and the revenues overestimated.

At the time that the seaway was authorized, the cost estimates for constructing the 27-foot navigation channels, for which tolls were to be collected to put it on a self-supporting basis, were stated to be approximately $300 million—$100 million for the United States and $200 million for Canada. In order to give a little leeway for interest and other items during construction, the United States statute established the Seaway Development Corporation with authorization to borrow $105 million from the Treasury Department.

Now Congress is being asked, long before the seaway is actually completed, to raise this authorization to $140 million. After examining the papers submitted in support of this increase, it appears that the costs for which the United States is responsible were badly underestimated.

Three items of the original $105 million have been deferred or revised. One was a payment of nearly $8 million for interest during construction, which has been indefinitely postponed with the concurrence of the Treasury Department. Another was the Point Rockaway Canal and lock, which has been deferred in favor of a parallel canal on the Canadian side. Subtracting deferred items, the basic estimates of 1952 come to about $74 million. Now, $140 million is needed, or an increase of 90 percent. Apparently, of the $66 million extra funds now requested, only about $19 million represents price increases while $37 million are for items which were not included in the original planning.

While there are no official figures on the cost above estimates on the Canadian side, they are also probably high. It seems certain that this seaway project from Montreal to the lakes is going to cost at least twice the original estimates.

And it should be remembered that the deepening to 27 feet of the seaway has brought demands on the Public Treasury for corresponding deepening of the Great Lakes connecting channels and shortly Congress will be faced with further proposals to deepen the Great Lakes harbors at Federal expense. There is no telling what the ultimate bill will be for this aspect of the seaway, from which there will be no toll recovery. Some $115 million has already been authorized for these lake channels. However, if all the proposals made at public hearings, which the Army engineers have been holding on Great Lakes harbors, are brought into the Public Works Committee, the United States will be urged to lay out another sum approximately equal to the total cost of the seaway between Montreal and the lakes.

The portion of the seaway from Montreal to the lakes was authorized under the specific condition that it be made self-liquidating by tolls. Mr. Lewis G. Castle, Administrator of the Seaway Development Corporation, summed it up in a speech before the Toledo Chamber of Commerce on March 9, 1955. as follows:

"We are granted the authority to borrow as much as $105 million from the Treasury Department for construction purposes, and repay that sum from toll revenues to be collected after completion of the St. Lawrence project. Consequently, this program is not deficit spending or public aid. Our estimates are such as to assure fairly conservatively that we can retire the moneys which we will spend in this work within a 50-year period and possibly much less time, including interest accruing during the construction period."

Now it is being suggested by some of the proponents of the seaway, who confidently affirmed its self-liquidating features a few years ago, that something must be done to change the enabling act to furnish the money at less than the cost paid by the Treasury Department, postpone the amortization beyond the 50-year period, or otherwise subsidize the project. Dr. N. R. Danielian, president of the Great Lakes-St. Lawrence Association, and chairman of the Users Committee on St. Lawrence Tolls, now says the annual costs of operation and interest will run about $28,330,000 against the original figure of $14,600,000, and requests Congressional help in keeping down tolls so that shippers will not use transportation that is competitive with the seaway.

As Dr. Danielian said to the House Public Works Committee on April 10 of this year:

"Two Government agencies jointly are cooperating in the construction and operating of a gigantic public utility. But there is no uniform system of accounts, no definition of rate base or property valuation, and no experience with regard to what is and is not necessary in the public interest to create a 27-foot channel, and no supervisory or regulatory body that has the power to review management decisions affecting the rate base. We fear that any attempt to set rates which are high enough, as a theoretical matter, to secure the needed revenues will curtail the traffic and thus defeat its purpose. The economic issue is that due to the existence of the many competing routes available into and out of the Middle West, it may not be possible to charge toll rates high enough and, at the same time, retain a volume of traffic."

Dr. Danielian's costs, as further developed in his testimony, are just about double the estimates that were so confidently presented by the seaway proponents before the project was authorized. When opponents of the legislation questioned the validity of the estimated sum at that time, the proponents expressed assurance that the project would be completely self-supporting on the basis of toll revenues.

As I stated, the Treasury Department has already agreed to postponing the interest during construction, according to the annual report of the Seaway Development Corporation for 1956, and it appears that the beginning of the amortization schedule is going to be postponed for several years. These are already discretionary subsidies which are aimed at easing the financial aspects of the seaway. There is no question in my mind but that the backers of the seaway, who sold the project to the American people so enthusiastically as completely self-liquidating, are contemplating the eventual saddling of the cost on the American taxpayer, regardless of its ultimate effect upon Atlantic coast ports and upon other elements in the transportation picture.

There has just been published by the bureau of business research of Indiana University a study entitled, "The Effects of the St. Lawrence Seaway on Grain Movements." The Chicago Board of Trade provided the essential financing for the study. Among other things, it pointed out that in the 1952–55 period 53 percent of United States wheat exports went to Europe. For the crop year 1955–56, 73.6 percent of our European exports of United States wheat were handled via Atlantic coast ports. The study evaluates the impact of the seaway and says in part, "The seaway will apparently reduce the cost of exporting grain enough that a large volume will be diverted to the new route; grain ports on the Atlantic and Gulf coasts will lose a portion of their grain-handling business; Buffalo and Oswego will lose considerable transshipping business; Atlantic coast ports will lose approximately half of their current grain export volume; flour for export can be loaded directly to shipboard at Buffalo and other upper lake ports after the seaway opens. The entire cost of eastern rail or truck hauling can be eliminated."

During the 1952–55 period there were about 8,350,000 bushels of wheat and about 12 million bushels of all kinds of grain exported each year through the port of New York. While this was less than the handlings through Philadelphia, Baltimore, Albany, and Norfolk, it still was a large amount. I have not seen a breakdown of flour handling through the port of New York, but everyone in the transportation business knows that it is substantial.

Perhaps I am misinterpreting the Indiana University study, but the implication to me is clearly one of expectation that tolls will be of insufficient magnitude to be of competitive importance. Some shipping interests favorable to the Great Lakes trade say frankly that high tolls will destroy the seaway. A pattern can be expected to develop with the lake ports creating a clamor, followed by subsidy-hungry shippers and shipping interests emphasizing the great investment to the Congress, with it all pointed toward tolls being eliminated and the American taxpayers paying the entire bill.

It is bad enough to have the port of New York injured by Government credit being behind the seaway, even if user charges over a long period of time pay back the full investment and all current operating costs. But it would be unconscionable for a deal to be perpetrated upon the American people to have user charges weakened, if not eliminated, before the seaway is even constructed.

There is not the slightest question but that a seaway with no tolls, or with insufficient tolls, will seriously hurt the business through the port of New York, and thus every element of the port community. We should be alive to this situation and oppose such a development aggressively.

I urge that all interests of the port of New York actively campaign to be certain that total and correct capital costs, and all operating and maintenance costs of the seaway are reflected in the toll schedule and thus that tolls be determined on a fully

self-supporting basis as Congress initially provided.

Our duty to the port of New York is plain, and I can assure the Propeller Club of the Port of New York that the New York Chamber of Commerce and the Lackawanna Railroad, with both of whom I am associated, will actively support this position.

In my earlier remarks I pointed to the confliction of Government interest with respect to transportation promotion. The irresponsible handling of the entire St. Lawrence Seaway issue clearly illustrates the condition from a promotional point of view.

Within the Department of Comemrce there exists the Defense Air Transport Administration, the Civil Aeronautics Administration, the Inland Waterways Corporation, the Maritime Administration, and the Bureau of Public Roads. Under the Department of Agriculture is a Transportation and Storage Services Division and a Performance and Aerial Photographic Division. Under the Department of the Interior is the Alaska Railroad. Within the independent offices and establishments of Government there is included the Air Coordinating Committee, the National Advisory Committee for Aeronautics, the Panama Canal Company, and the St. Lawrence Seaway Development Corporation. All of these, and probably many others including such parts of the military as the Corps of Engineers, have direct or fringe interests in transportation promotion or operation.

You will note I have not included the Interstate Commerce Commission, which has regulatory authority over railroads and some truck, water, freight forwarding and pipeline transportation, nor the Civil Aeronautics Board, with its regulatory authority over the airlines and the National Maritime Board regulating the ocean-shipping industry. I question its being good organization or good government to mix regulation with the other fields of promotional and operational interest in transportation matters.

Various Government departments and agencies advocate conflicting policy with respect to many aspects of transportation interests. Promotional activities are necessarily one-sided and even discriminatory. In the broad public interest I wonder if the time has not come when there should be seriously considered the establishment of a Department of Transportation, which would include all transportation promotion and operation which are not regulatory and not military.

The promotion of various modes of transportation should be a balanced one which recognizes inherent capabilities, and which recognizes the economic effects of possible Government promotion in one field adversely affecting the economic interest, and thus the public interest, in competitive modes of transportation. Our country has its future before it. Conflicting interests are less important than insuring for the future a healthy economic growth equipped with the best transportation human ingenuity can devise under our private enterprise tradition.

And I suspect such a Department of Transportation could be organized to operate at a saving in money over the present decentralization and lack of integration of this function. Such a byproduct would not be unwelcome in this period of inflation and excessive Government spending. If it is approached from the philosophy of minimizing Government interference with transportation development, and favor to none, we will indeed be on the road to improvement. Better Government can generally be achieved by less government.

I commend to the national organization of Propeller Clubs their serious study of the advantages and disadvantages, in the direction of a sound future for all kinds of transportation, of the establishment of a department of transportation, with its head at the Cabinet level. Your contribution to this being objectively considered in an atmosphere of nonpartisan, nonselfish transportation statesmanship, can be material and in the fine traditions of this outstanding organization.

In closing, I emphasize the profound respect which the railroad industry has for the shipping industry. We look forward with great anticipation to the privilege of cooperating with you on the many phases of transportation betterment in which, on behalf of the great future development of the country, we jointly have such a tremendous and responsible interest.

HELP COMPETITORS?

It was predicted in New York City last week that Great Lakes shipping interests will make a fight for the elimination of tolls for use of the St. Lawrence Seaway now under construction. The prediction was made by Mr. Perry M. Shoemaker, who is hardly an unprejudiced looker-on in seaway matters. Mr. Shoemaker is president of the Delaware, Lackawanna & Western Railroad and the seaway will give the railroad new competition.

But Mr. Shoemaker's prediction cannot be lightly turned aside. Obviously, the Great Lakes interests would be helped materially, if oceangoing ships could reach their piers without paying tolls for use of the long inland waterway. Furthermore, the matter of tolls has become a prime issue since the first of the year.

Here the cold hard fact is that the seaway is going to cost far more than its lusty proponents said that it would when they were making their fight for Congressional approval of the project. They argued, and in the end successfully, that the cost figure they cited could be readily amortized by reasonable tolls—in other words that the seaway would be self-supporting.

Now we have the far higher known cost. If this known cost is to be met through tolls alone, the rates for using the seaway will have to be higher than initially contemplated. This in turn could have an adverse effect on traffic and so reduce the benefits so confidently anticipated by the Great Lakes shipping interests.

And then there is the other side of the coin. If the tolls do not amortize the full cost or if they are eliminated entirely, a part of the cost or all of the cost of the seaway will be borne by the Nation as a whole. This means that we in Baltimore, and the people in other ports in our position, will be made to subsidize, in part, competitor ports on the Great Lakes. There would be a sour irony in this.

ANNOUNCEMENT CONCERNING THE COMMERCE DEPARTMENT APPROPRIATION BILL

Mr. HOLLAND. Mr. President, I should like to give notice to the Senate that the House has just approved the conference report on the appropriation bill for the Commerce Department and related agencies, and that I shall expect to call it up about the time Senators are through with lunch, in a half hour or three-quarters of an hour from now. I hope Senators will be on the floor.

The PRESIDING OFFICER. Is there further morning business?

FLOOD DAMAGE IN TEXAS

Mr. JOHNSON of Texas. Mr. President, it is with deep concern that I report continuing heavy floods in my State of Texas.

Flood damage in Texas this spring has been terribly costly in terms of dollars. Even worse, a heavy toll of human life has been taken. The newspapers this morning report that last night two members of the Air Force were swept away and drowned at San Antonio.

It seems that every day brings new disaster. Texas is suffering greatly.

The incessant rain, which began some 2 months ago, has fallen on lands that for 7 years had been baked hard by the worst drought in the history of our State.

Creeks that had dried up long ago have been turned into destructive torrents.

Rivers that had come little more than creeks have spread out over the countryside, taking human lives, sweeping away homes, ruining business and industrial properties.

Mr. President, we know from experience that this is a situation that can largely be controlled.

Bad as the situation is in Texas, it could have been worse.

We know that the damage would have been far greater except for the flood control and water conservation projects that have been constructed through the years.

Striking testimony regarding the effectiveness and value of such projects is contained in a telegram I have received from the Honorable Tom Griffin, county judge of Bastrop County, located in central Texas just south of our State capital.

The telegram sent to me by Judge Griffin reads as follows:

> The commissioners' court, acting for the people of Bastrop County, have requested me to express their deep appreciation for the flood protection which the dams on the upper Colorado have afforded this entire area.
>
> Many hundreds of us well recall the destruction in 1935 prior to the construction of the dams. The rainfall here was only half as great as this season, yet water ran 12 inches deep in our streets and many of the businesses and homes were damaged.
>
> That was 1935.
>
> Nineteen hundred and fifty-seven, with twice the rainfall, finds us dry, safe, and undamaged.
>
> We wish to express our gratitude to you and other far-sighted persons at the helm of our Government, who have the knowledge, the courage, and the vision to deal in legislation for such worthwhile projects.

Mr. President, I submit that this message from a Texas county judge eloquently answers those who cry "pork barrel" when we speak of the need for building dams that will control floodwaters.

Additional evidence, also of a specific nature, as to the tremendous value of such projects is set forth in an editorial entitled "Water Hurts Texas as It Wastes" that appeared recently in the Plainview, Tex., Daily Herald. I ask unanimous consent that the text of this editorial be printed in the RECORD at the end of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD.

(See exhibit 1.)

Mr. JOHNSON of Texas. Mr. President, the budget submitted to the Congress by President Eisenhower requests the appropriation of $684 million for the civil functions of the Department of Defense.

When we come to consider that appropriation measure, it is my earnest hope that we shall approach it in a manner befitting our knowledge that flood-control and water-conservation projects are investments—sound, dividend-paying investments.

We will, of course, want to examine carefully the specific appropriations proposed. It may be that we shall find it wise to rearrange some proposals or to shift funds from one project to another. That is our responsibility; and I have no doubt we shall meet it fully.

In meeting it, we must not be deterred by those who, through lack of information or because of wrong information, raise the cry "pork barrel."

Mr. President, I have never regretted a dollar of any money I have voted to spend for controlling floods and conserving our water resources. These expenditures are wise, necessary investments. We need to make more of them this year and in the years ahead; and by doing so the result will be saving many lives and millions of dollars.

EXHIBIT 1

[From the Plainview Daily Herald of May 5, 1957]

WATER HURTS TEXAS AS IT WASTES

The torrential rains, which have broken the Texas drought, have poured hundreds of thousands of acre-feet more than the land can absorb and use.

Reservoirs in many parts of the State have been filled to overflowing and downstream areas inundated by the water spilled from the works, and other water racing to join it from the downstream tributaries.

These works have been invaluable in lessening the damage from floods.

We speak of flood prevention. Flood control is a better term.

It isn't so much the water which the dams hold in the reservoirs that prevents floods, as the regulation of the stream by release of this water coordinatedly throughout a watershed, that controls floods.

Timing water releases so that the full capacity of channels can be used, without overflowing, to conduct the water downstream is the secret of flood control.

Waco's flood problems have been greatly reduced by the construction of Possum Kingdom Dam near Mineral Wells. It is not primarily a flood-control dam, but does help control.

Downstream Whitney Dam, near Hillsboro, is primarily flood control.

Waco's perplexing water situation, scarcity of water followed immediately by devastating flood, points the need for construction of a dam on the Bosque River, the north branch of which has been on rampage that continues at this moment.

Such a dam would create a dependable water supply for Waco and other downstream users, and would be the link that, with upstream dams now existing on the main Brazos, would effect 95-percent flood control at Waco, maybe 100 percent.

Only Thursday the Brazos River Authority at Waco voted to advance a quarter of a million dollars for commencement of construction of the Waco Dam. Plans are well under way by the Army engineers, who will construct with the aid of the State of Texas and the city of Waco.

Immensity of the flood damage has been impressed on Texans by news reports of the floods.

The waste of water, which has flowed uselessly and damagingly to the sea, is not so well understood.

Take Possum Kingdom Lake. It is full. The water is standing at the 1,000-foot mark above sea level. Five of its floodgates were down Friday night and a 54,000-cubic-feet-per-second stream of water rushed wastefully over these works. That is 108,000 acre-feet of water a day, enough to flood Hale County with 2 inches of water. Wednesday all gates were down and 130,000 acre-feet of water spilled, unutilized.

Since April 26, 700,000 acre-feet have been thus discharged, while the reservoir, initially down to 10 feet, filled with 200,000 captured acre-feet.

Without downstream Whitney, what a flood it would have been.

At Bryan 2,500 acres of the George Chance agricultural land is flooded. Near Caldwell the Porter brothers have 1,250 acres inundated. At Navasota, Harry Moore has between 5,000 and 6,000 acres overflowed and in it 3,000 acres of lush oats ruined. Imagine what's happened to these crops. Their neighbors are in similar plight.

Multiply this by the number of river basins overflowing, and you'll have a more comprehensive picture of the situation.

It isn't enough that we conserve as much water as we need to drink and bathe in. Water is a limiting factor in the development of Texas, and we need to do something about it.

We have plenty of water. People get unduly scared about the adequacy of our water supply.

We don't have as much water as we need and want, when we want it, where we want it.

We need to conserve water and amplify our distribution systems.

A good start has been made. Let's keep up the good work.

SENATE DINING ROOM—LETTER FROM PRESIDENT OF NATIONAL RESTAURANT ASSOCIATION

Mr. NEUBERGER. Mr. President, inasmuch as there was some discussion on the floor of the Senate May 20 about the operation of the Senate restaurant and dining room, I believe that my fellow Senators will be interested in a very thoughtful letter which I have just received from Mr. Larry Hilaire, who is a leading restaurant operator in my own city of Portland, Oreg. In addition, Mr. Hilaire is serving this year as president of the National Restaurant Association, which includes thousands of restaurant owners and caterers all over the United States.

I believe it is significant that Mr. Hilaire has stressed the one-meal type of service and the resulting extravagant use of manpower as one of the factors which is at the source of economic difficulties encountered by the Senate dining room and restaurant. I ask unanimous consent that the letter to me from Mr. Larry Hilaire, of Portland, be printed in the body of the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

HILAIRE'S RESTAURANTS,
Portland, Oreg., May 27, 1957.

The Honorable RICHARD L. NEUBERGER,
United States Senator,
The United States Senate,
Washington, D. C.

DEAR DICK: I read your discussion of the operating deficit of the Senate restaurant with a kindred interest. I agree that the prices for the food as comparable with those charged at other fine restaurants with the same atmosphere and service. I think you hit the nail on the head when you mentioned the one-meal service and the waste of manpower to serve it at all hours. Upon my last visit to the Senate restaurant I too was impressed with the amount of service available for the price.

I do not feel that the prices of food can be compared unless the size of the portion is the same. As you know, portion control and labor control are the determining factors. Service and atmosphere and other overhead costs are also important.

In my travels over the United States I find the prices charged in Portland are among the lowest in the Nation. And we are paying the highest wages in the Nation. The operators in this area have become most efficient.

I appreciate your interest in our problems, and hope to meet with you on one of my trips east.

With best wishes to you and Maurine.

Yours most sincerely,

LARRY HILAIRE.

FAST TAX WRITEOFF CERTIFICATES

Mr. MORSE. Mr. President, last week I introduced into the RECORD editorials from the Denver Post in opposition to the application of the fast tax writeoff law by this administration. In those editorials which the Denver Post used, some figures were challenged on the floor of the Senate.

On May 26, 1957, the Denver Post replied to the challenge in an article which I shall momentarily ask be made a part of my remarks, but I wish to read two paragraphs from the article:

Shortly after Mr. MORSE attacked the $65 million writeoff granted to the Idaho Power Co., for two dams near Hells Canyon on the Snake River, we reviewed the implications of such tax deferrals and found them to be huge, discriminatory and often unnecessary subsidies to a privileged few at the expense of the general public.

The Senator from Oregon insisted the writeoff amounted to an interest-free Government loan of $29,250,000 to the Idaho Power Co. Then he said that such a loan, figured over a 50-year depreciation life of the dams, was worth $329 million to the private utility.

That figure, $329 million, provoked challenge. This newspaper then checked the figure with the college of business administration at the University of Denver, and other reliable accounting and statistical sources, to prove or disprove it. Mr. MORSE is not, we concluded, substantially wrong in his estimates.

Fast tax writeoffs are interest-free Government loans.

Mr. President, I ask unanimous consent that the entire article be printed at this point in the RECORD as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GRAVY TRAIN ECONOMICS IS NOT FREE ENTERPRISE

Senator WAYNE L. MORSE, of Oregon, has catapulted the issue of special tax privileges for selected industries into a bitter name-calling contest over President Eisenhower's morality.

Mr. MORSE said the President and Dave Beck, teamster boss who is under grand jury indictment and Senate investigation, are two of the same kind of immoralists. It is the firebrand Oregonian's opinion that it is just as wrong for the Eisenhower administration to put its hands into the pockets of the taxpayers as it is for Beck to put his hands into the pockets of his union members.

Mr. MORSE's statements resulted in an unusual demonstration of Republican solidarity behind Mr. Eisenhower and sharp denunciations of the Senator's harsh words. While this newspaper finds the comparison of the President to Mr. Beck both offensive and indefensible, we are inclined to concur with the dour comment of Senator JOHNSTON, Democrat of South Carolina. "I, too, think it unfair to compare Beck to President Eisenhower," he said. "Because Beck knew what he was doing, but I doubt that the President does."

As a matter of fact, President Eisenhower, at a press conference within this month, joined his Secretary of the Treasury in calling for curtailment of fast tax writeoff privileges. Considering the effect of such privileges, it is hardly conceivable that the President would have countenanced them as long as he has—had he been fully and fairly advised.

Shortly after Mr. MORSE attacked the $65 million writeoff granted to the Idaho Power Co. for two dams near Hells Canyon on the Snake River, we reviewed the implications of such tax deferrals and found them to be huge, discriminatory, and often unnecessary subsidies to a privileged few at the expense of the general public.

The Senator from Oregon insisted the writeoff amounted to an interest-free Government loan of $29,250,000 to the Idaho Power Co. Then he said that such a loan, figured over a 50-year depreciation life of the dams, was worth $329 million to the private utility.

That figure, $329 million, provoked challenge. This newspaper then checked the figure with the College of Business Administration at the University of Denver, and other reliable accounting and statistical sources, to prove or disprove it. Mr. MORSE is not, we concluded, substantially wrong in his estimates.

Fast tax writeoffs are interest-free Government loans.

(A fast writeoff permits an industry to retain income taxes for 5 years on an amount of revenue equal to the writeoff. In the 6th year these postponed taxes begin to be repaid, through higher than normal taxes over the next 20 to 45 years or so, depending on the depreciation period taken for the new facility built with writeoff aid.)

Take the case of Idaho Power. The company will save or defer a net of about $6 million in taxes each year for 5 years under the fast writeoff certificate allowed it by Uncle Sam. This will total about $30 million which it otherwise would have paid in taxes during that same period.

In the 6th year Idaho Power will start repaying these postponed taxes of $30 million, without interest, over the next 45 years, assuming a 50-year depreciation period. This is the reasoning behind the contention that Idaho Power is receiving a $29 or $40 million interest-free Government loan.

But Idaho Power also incurs the obligation to pay above-normal taxes over the last 45 years, because it will have taken most of its depreciation deductions in the first 5 years. So some claim that the $30 million loan should be halved, to $15 million, to average it out over the full 50 years.

But when you borrow $2,000 to buy a car and repay by installments over 36 months, isn't that a $2,000 loan? You may have the full $2,000 for only 1 week or month and at the end of 3 years it has to be paid in full, and with interest. Still, it is a $2,000 loan, not a $1,000 loan, and the same thinking can be applied to Idaho Power's $30 million loan.

At one point, the end of 5 years, Idaho Power does have $30 million in actual tax dollars it otherwise would have paid. Invested in long-term bonds, this money should earn at least 3 or 4 percent compound interest by continual reinvesting.

Some have questioned the soundness of compound interest in calculating the value of fast writeoffs. Compound interest is available to all investors—even the smallest can obtain compound interest from any commercial bank savings account or from Government bonds. All investors can buy 91-day Treasury bills, which mature every 13 weeks and can be compounded 4 times a year by reinvestment to yield 3 percent on today's market.

However, a utility can make more than 3 or 4 percent compounded by simply putting its money into its own plant, on which it is entitled to earn 6 percent after taxes. This is general utility practice and the purpose of fast writeoffs in the first place. Thus, if the $30 million is plowed back into plant, it should earn 6 percent compounded in the rate base over the full 45 to 50 years.

So Mr. MORSE took $29 million as the amount of Idaho Power's interest-free loan, allowed for normal taxes and depreciation, applied 6 percent compound interest, and arrived at $329 million as the value of the $65 million writeoff to Idaho Power at the end of 50 years. The $329 million figure as the Senator used it appears to stand up.

But there are still other ways of looking at it. Subsidies are usually thought of in current instead of future values. And $329 million received 50 years from now is equal to $17.8 million received today. This figure can be computed by the statistical process of discounting $329 million at 6 percent. In effect, this means Idaho Power is building a $103 million power installation for about $85 million.

There are those who insist the only real benefit to Idaho Power is the interest it will save on its interest-free $30 million loan, since its tax savings in the first 5 years have to be repaid in the last 45 years. So they figure 4 percent interest on the actual annual balance over 50 years. By this method the total interest saved by Idaho Power amounts to about $30 million.

But this approach denies compound interest as a measure of the value of money, rejects the assumption of a reinvestment program, and ignores the earning power of the $30 million interest-free loan.

Invested in any sensible way, $30 million would pay itself off in 50 years and leave a sizable profit after taxes. And it should not be (and generally cannot be) paid out as dividends, because in reality it is a debt to the Government, carried on the books of most utilities as a reserve for income taxes deferred by fast writeoffs.

And what about the interest the Government pays on the money it must borrow to replace the $30 million loan? Treasury Secretary Humphrey has estimated the total interest cost to the United States over the years 1950 to 1960 at roughly $3 billion for the entire fast writeoff program.

The Washington Post fixed the interest cost to the taxpayers for the Idaho Power loan at $97 million, assuming long-term Government borrowing at 3 percent compounded over 50 years. But here again some deny the Government pays long-term compound interest to replace taxes deferred by fast writeoffs.

The Idaho Power loan, this argument goes, is an annual grant, made up for by short-term Government borrowing at simple 3 percent annual interest, not compound interest, and payable year to year on a declining balance over the 50 years. This would total about $23 million as the interest cost to taxpayers on Idaho Power's $30 million loan.

The fact remains, however, that the Government does borrow on long- and short-term obligations. It pays prevailing market rates of interest, which presently are higher than 3 percent for even the shortest term and which can be compounded by reinvestment. And the Government must borrow heavily for many years into the future to sustain fast writeoff tax losses until they are eventually repaid.

Still another theory has been advanced which holds that the Idaho Power writeoff requires certain Federal financing, through which the Government incurs an additional current liability of $13,607,000. Carried forward for 50 years at 3 percent compound interest, this would amount to a cost of $59,652,000 to the Nation's taxpayers.

Now, why all this attention to fast writeoffs—a controversy which led Mr. MORSE into an intemperate and unwise comparison of the Chief Executive with a labor despot?

Fast tax writeoffs were enacted first during World War II (F. D. R. called them privileges "for the greedy, not the needy"), and again during the Korean war, to encourage private capital to invest in building war plants and expanding defense production.

They were a device to wage war within the capitalist pattern at the same time averting even temporary socialization of war industry, the confiscation of profits and the commandeering of private property. They acted to offset excess profits taxes (which expired 3 years ago) and to free funds for defense investment.

Whether by neglect, faulty calculation or sly conspiracy, fast writeoffs were granted to a long list of industries long after clear defense justification for such subsidies had disappeared. The few have been given gravy at the expense of the many. And nobody, we repeat—nobody—has stepped forward to defend these wasteful, inflationary, discriminatory handouts for peacetime civilian purposes.

All of this is particularly ironic, of course, as it applies to the Idaho Power Co. development of the Snake River. For it was there that the old cry of "free enterprise versus socialism" was raised with such fervor—to be followed with disclosures that by special and privileged arrangement, the free enterprisers were (and are) permitted a subsidized ride on the backs of the American people.

Mr. MORSE. I ask also, Mr. President, that immediately following the Denver Post article there be printed in the RECORD another excellent article in opposition to the fast tax writeoff policy of this administration, printed in the May 22, 1957, issue of the International Wood Worker, Portland, Oreg., entitled "Big Steal Uncovered."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BIG STEAL UNCOVERED

The air was filled with denunciations of the pro-Hells Canyon people during the 1956 election campaign by the Welkers and McKays who loudly called the Idaho Power Co.'s three low-head dams a saving to the taxpayers.

As with other things, "murder will out" eventually. We now find that Ipco's plan was not only a giveaway on the part of Eisenhower, McKay, and Welker—but that it is a "steal" as well.

What was purported to be a saving to the taxpayer has become a loss of $330 million.

Even President Eisenhower's Federal Power Commission, packed as it is with more of the giveaway crowd, characterized these tax writeoffs as "a grant by our Government to a certificate holder of an interest-free loan."

Another individual that has never been famous for his support of Federal projects has reacted violently to the news of the Ipco tax writeoff. Senator HARRY F. BYRD, Dixiecrat, of Virginia, has attacked the writeoff gift to the private utility and has joined with WAYNE MORSE and other liberal Senators to prevent what the Oregon Senator calls an "unconscionable, politically im-

moral giveaway of the taxpayers' dollars to Idaho Power Co."

Under the provisions of the fast writeoff, Idaho Power Co. will save about $30 million in taxes during the next 5 years.

The way this works is interesting. The utility is given the fast writeoff certificate—which Ipco already has a result of the Office of Defense Mobilization's generosity—and it then proceeds to deduct from its taxable income one-fifth of the cost of its low-head dams each year. After 5 years, the entire value of the ODM certificates will have been deducted and the company will have lifted from the pockets of the Nation's taxpayers about $30 million.

The life of the private utility's project is figured at 50 years, Ipco would have to pay at least 6 percent interest on this $30 million if they went out on the market to borrow it and of course they don't, in this case, because Uncle Sam is giving it to them.

Figuring interest at 6 percent and the term of the loan at 50 years—the life of the Ipco project—and you come up with a figure of $330 million, or almost twice what the project will cost the company to build, according to their own figures.

Not only is this true, but the people of America have been cheated out of a great multipurpose dam which could have been built and owned by them for just $352 million, or only $22 million more than the private low-head, single-purpose dams were alleged to have cost in the first place.

Summing it all up—the people of America are asked to give eastern financers a dollar bonanza the equal of which has never been seen even during the days of the great robber barons.

These great defenders of so-called private enterprise capitalism are planning on becoming $330 richer because of their ties to the present Government of the United States. This is, to say the least, something of a contrast. It appears that when things are just a matter of principle these boys favor private enterprise, but when it becomes a matter of cold cash they are as eager for Government interference as the creeping Socialists they like to talk about.

The fact that the Ipco low-head dams are being built just to produce power, whereas the high, federally built Hells Canyon Dam would be built to supply not only power and more of it at that, but navigation; flood control; recreation and navigation benefits as well, makes no difference to these plunderers. Thus, for less development and for an actual waste of our natural resources, we the people are asked to pay the bill.

We wonder what would have happened to the Eisenhower majority in the Pacific Northwest in 1956, if the people had known about the tax plum when they went to the polls?

Mr. MORSE. Mr. President, immediately following that insertion I should like to have printed in the RECORD, as a part of my remarks an article which appeared in the A. F. of L. News, Morgan Views the News, in which Mr. Morgan, the exceedingly able news commentator of the A. F. of L., also reviews this fast tax writeoff scandal and makes some very important and, I think, apropos remarks in regard to it.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MORGAN VIEWS THE NEWS

Representatives of the extreme-liberal and the extreme-conservative wings of the Democratic Party, in the persons of Oregon's WAYNE MORSE and Virginia's HARRY BYRD, have joined hands in the Senate to denounce the continuing administration practice of favoring big business with fast tax writeoffs.

Want to know who joined them in principle? Man named George Humphrey, Secretary of the Treasury.

Humphrey told the Senate Finance Committee, of which Senator BYRD is chairman that the fast tax writeoff program in effect the last 6 years was going to cost the Government, meaning the taxpayers, $3 billion, and the Secretary supported a bill which BYRD is pushing to end this program except where the production of direct military equipment is involved.

The rapid amortization plan was applied in World War II to encourage industry to expand its defense production quickly. It was reactivated at the start of the Korean war in 1950 and although hostilities there ceased in the first year of the Eisenhower administration, the program has continued.

What it does is to let a company deduct from its income for tax purposes parts or all of the capital investment in a new plant in 5 years; the normal period for such a writeoff is 20 years or more.

So what the privilege amounts to is an interest-free loan to the company. That was what Secretary Humphrey was talking about; he translated that $3 billion to mean interest charges on money the Treasury has to borrow to make up for tax collections deferred by the writeoff.

The administration has been bestowing them these writeoff plums in an interesting fashion. The most recent recipient of its generosity, which is supposed to be motivated solely by defense needs, is the Idaho Power Co., which won out in a long fight with public-power advocates and is in the process of building two dams in Hells Canyon on the Snake River between Oregon and Idaho.

The Office of Defense Mobilization granted quick tax writeoff certificates to the company amounting to more than $65 million. ODM did this in spite of the fact that a joint Congressional committee on taxation had recommended last year that the fast writeoff law be repealed and in spite of sharp protests by Senators, raised long in advance, about the claims of the Idaho Power Co. that its Hells Canyon projects could classify as essential to defense and therefore eligible for the rapid writeoff.

Mr. MORSE. Lastly, Mr. President, on this item I ask to have printed in the RECORD, immediately following the Morgan column, a most interesting editorial in the Monday, May 27, 1957, issue of the Milwaukee Journal, entitled "Hells Canyon Tax Deal Is On the Tricky Side."

The Milwaukee Journal proceeds to express its disapproval of the policies of the administration in respect to the fast tax writeoff issue in connection with plants which are not in fact war plants, plants which were not in fact built because they would not have great civilian productive use after an emergency, but, as in this case, are plants which are really capable of having greater value in the years to come than they had at the time they were built.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

HELLS CANYON TAX DEAL IS ON THE TRICKY SIDE

Senator MORSE, Democrat, of Oregon, was intemperate in comparing President Eisenhower with Dave Beck, teamsters' union president. But the general complaint he was making remains valid and significant.

What has happened is this: A bitter dispute arose several years ago over whether the Federal Government should build a single large dam in Hells Canyon on the Snake River in Idaho or whether the Idaho Power Co. should build three smaller dams there. Public power advocates contended that only Federal development would result in adequate attention being paid to flood control, navigation, irrigation, and recreation as well as the production of cheaper electric power. The opposition countered that private industry could do the job without cost to the taxpayers.

Backed by the Eisenhower administration, private industry won the dispute. In 1955 the Federal Power Commission authorized the Idaho Power Co. to go ahead.

Now it turns out that the taxpayers are to help underwrite the dams anyway, but without owning any part of them. For the Idaho Power Co. has won Government consent to use the fast tax writeoff law, which was designed to speed construction of essential plants during wartime. Instead of depreciating the dams, for tax reduction purposes, evenly over 50 years, it can deduct 60 and 65 percent of their cost in the first 5 years.

In the later years, of course, when there is little depreciation left to claim, the taxes will be higher, and ultimately the Government will receive the same total. But meanwhile the utility will have the use and earning power of some $30 million that would normally have gone in taxes; the Government won't get the money, and will have to raise its equivalent elsewhere. In effect, this is subsidy, an interest-free-Government loan.

Senator MORSE and others who lost the public versus private power fight are understandably incensed. Even such a stalwart friend of private enterprise as Senator BYRD, Democrat, of Virginia, is opposed to this kind of fast writeoff. Secretary of the Treasury Humphrey, admitting that the practice has cost the Government $3 billion in interest since 1950, is supporting BYRD's bill to allow it only for special purpose plants making new defense items or doing research for the Defense Department or the Atomic Energy Commission.

The utility knew all along that a private power development was probably going to involve this kind of deal. Application for the fast writeoff certificates had already been on file 3 years when the company was running expensive magazine advertisements telling the taxpayers how they were saving money.

Even if it is all technically legal, the administration has thus been party to a fast shuffle—a cynical deception practiced upon the public. Senator MORSE's anger should find many to share it. And sincere advocates of private development of the Nation's resources find their cause badly tarnished.

ORDER OF BUSINESS

Mr. JOHNSON of Texas. Mr. President, I invite the attention of Senators to the fact that it is my intention, at the conclusion of the morning hour, to suggest the absence of a quorum, following which consideration of the unfinished business, Calendar No. 338, House bill 53, will be resumed. However, as soon as the distinguished senior Senator from Florida [Mr. HOLLAND], chairman of the subcommittee handling the appropriations for the Commerce Department and other agencies, is ready to proceed with consideration of the conference report, the unfinished business will be temporarily laid aside and the conference report will be taken up.

As Senators know, the conference report is highly privileged. If Senators are interested in it, I hope they will be present in the Chamber, because the conference report will be taken up in a few minutes.

Mr. HOLLAND. Mr. President, I thank the distinguished majority leader. I am ready to proceed at any time with the consideration of the conference report. However, I promised 3 or 4 Senators who are interested in certain items that I would notify them before proceeding. It is hoped that we can proceed with the consideration of the conference report within 30 minutes.

The PRESIDING OFFICER (Mr. COTTON in the chair). Is there further morning business? If not, morning business is concluded.

The Chair lays before the Senate the unfinished business.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6700) making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1958, and for other purposes; that the House receded from its disagreement to the amendments of the Senate numbered 11, 13, and 14, and concurred therein, and that the House receded from its disagreement to the amendment of the Senate numbered 18 to the bill, and concurred therein, with an amendment, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (S. 1463) to amend the Medals of Honor Act to authorize awards for acts of heroism involving any motor vehicle, and it was signed by the President pro tempore.

CONSOLIDATION OF LAWS ADMINISTERED BY THE VETERANS' ADMINISTRATION

The Senate resumed the consideration of the bill (H. R. 53) to consolidate into one act, and to simplify and make more uniform, the laws administered by the Veterans' Administration relating to compensation, pension, hospitalization, and burial benefits and to consolidate into one act the laws pertaining to the administration of the laws administered by the Veterans' Administration.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Aiken	Carroll	Hayden
Allott	Church	Hickenlooper
Anderson	Clark	Hill
Barrett	Cotton	Holland
Beall	Curtis	Ives
Bennett	Dirksen	Jackson
Bible	Douglas	Johnson, Tex.
Bricker	Dworshak	Johnston, S. C.
Bush	Eastland	Kefauver
Butler	Ellender	Kerr
Byrd	Ervin	Knowland
Capehart	Frear	Kuchel
Carlson	Goldwater	Malone
Mansfield	Neely	Smith, N. J.
Martin, Iowa	Neuberger	Sparkman
Martin, Pa.	O'Mahoney	Talmadge
McClellan	Potter	Thurmond
McNamara	Revercomb	Thye
Monroney	Robertson	Watkins
Morse	Saltonstall	Wiley
Morton	Schoeppel	Williams
Mundt	Scott	Yarborough
Murray	Smith, Maine	Young

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. CHAVEZ], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Tennessee [Mr. GORE], the Senator from Rhode Island [Mr. GREEN], the Senator from Missouri [Mr. HENNINGS], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Ohio [Mr. LAUSCHE], the Senator from Louisiana [Mr. LONG], the Senator from Washington [Mr. MAGNUSON], the Senator from Rhode Island [Mr. PASTORE], the Senator from Georgia [Mr. RUSSELL], the Senator from Florida [Mr. SMATHERS], the Senator from Mississippi [Mr. STENNIS], and the Senator from Missouri [Mr. SYMINGTON] are absent on official business.

Mr. DIRKSEN. I announce that the Senator from New Hampshire [Mr. BRIDGES], the Senator from New Jersey [Mr. CASE], the Senator from Nebraska [Mr. HRUSKA], and the Senator from New York [Mr. JAVITS] are necessarily absent.

The Senator from South Dakota [Mr. CASE], the Senator from Kentucky [Mr. COOPER], the Senator from Vermont [Mr. FLANDERS], and the Senator from Connecticut [Mr. PURTELL] are absent on official business.

The Senator from Indiana [Mr. JENNER], the Senator from North Dakota [Mr. LANGER] and the Senator from Maine [Mr. PAYNE] are absent because of illness.

The PRESIDING OFFICER. A quorum is present.

Mr. BYRD. Mr. President, I ask that the amendments to H. R. 53 be considered en bloc.

The PRESIDING OFFICER. Without objection, the amendments will be considered en bloc.

Mr. BYRD. Mr. President, the purpose of the bill is to consolidate into one act and to simplify and make more uniform the myriad of existing Veterans' Administration laws which cover compensation, pension, hospitalization, medical, and domiciliary care, burial benefits and so forth. The bill has been under study for many months and has been clearly checked by the General Counsel's Office of the Veterans' Administration, and all suggestions and amendments proposed by the Veterans' Administration have been incorporated into the bill, as reported. The bill does not adversely affect the entitlement of any veteran or dependent presently on the compensation or pension rolls. The established rates of pension and compensation are maintained.

The bill was passed unanimously by the House of Representatives and has the approval of the Veterans' Administration, General Accounting Office, Bureau of the Budget, American Legion, Veterans of Foreign Wars, Disabled American Veterans, and AMVETS. The committee, as well as all persons who have to work with the existing veterans' laws, realize the necessity for consolidating and incorporating into a single act the vast number of laws which affect veterans. The bill will do much to aid in the administration of veterans' laws and will be easier for the Veterans' Administration to adjudicate claims, to answer correspondence, and to perform all of the day-to-day administrative functions which the Veterans' Administration must perform, by having this great body of law into one act.

All Members of Congress and their staff will find that the bill will greatly aid them in locating provisions of law now scattered throughout the vast number of enactments, and in turn will help them in performing their day-to-day functions with reference to veterans' correspondence.

All national veterans' organizations, service officers, claims officials, and legislative representatives will find the bill to be of the greatest assistance in their work.

The bill contains only a few minor substantive changes in the existing law, generally of a minor liberalization, and the cost of the bill, as reported, would be approximately $200,000 for the first year.

Mr. REVERCOMB. Mr. President, will the Senator yield?

Mr. BYRD. I yield.

Mr. REVERCOMB. Do I understand correctly that the measure is an administrative bill, which deals with the administration of the several laws affecting veterans and their pensions?

Mr. BYRD. The Senator is correct.

Mr. REVERCOMB. Does it in any way reduce the amounts paid to veterans, the members of their families, or survivors?

Mr. BYRD. No; there is a slight liberalization. The cost will be increased about $200,000 a year. That is simply an equalization.

Mr. REVERCOMB. As I believe I heard the Senator state, the bill has received the approval of veterans' organizations throughout the country.

Mr. BYRD. All the veterans' organizations, the Veterans' Administration, the Bureau of the Budget, and the General Accounting Office have approved the bill. It is one of the few bills with which I have ever had anything to do which seems to have the approval of everyone.

Mr. REVERCOMB. I thank the Senator from Virginia.

Mr. CARLSON. Mr. President, will the Senator from Virginia yield to me?

Mr. BYRD. I yield.

Mr. CARLSON. I wish to thank the distinguished Senator from Virginia, the chairman of the Finance Committee, for reporting the bill which recodifies the veterans' laws of the United States. I think the bill is one of the best measures in behalf of the veterans and those interested in their welfare that has been drafted over a period of many years. The bill makes it possible to find in one statute, one law, all the measures pertaining to veterans, instead of requiring the examination of 15 different acts passed by the Congress.

I desire to commend the distinguished chairman of the committee and the committee staff who have worked on the bill. I think it is an excellent one.

Mr. BYRD. I thank the Senator from Kansas.

The PRESIDING OFFICER. The question is on agreeing to the committee amendments, which, by unanimous consent, are being considered en bloc.

The amendments were agreed to en bloc, as follows:

In the table of contents, on page 3, after "SEC. 404. Persons heretofore having a pensionable status.", to insert "SEC. 405. Payment of pension during confinement in penal institutions."; on page 27, after line 18, to insert:

"The foregoing shall not be applicable to any widow who, with respect to date of marriage, could have qualified as a widow for death compensation under any law administered by the Veterans' Administration in effect on the day before the effective date of this act."

On page 47, after line 18, to insert:

"PAYMENT OF PENSION DURING CONFINEMENT IN PENAL INSTITUTIONS

"SEC. 405. (a) No pension under public or private laws administered by the Veterans' Administration shall be paid to or for an individual who has been imprisoned in a Federal, State, or local penal institution as a result of conviction of a felony or misdemeanor for any part of the period beginning 61 days after his imprisonment begins and ending when his imprisonment ends.

"(b) Where any veteran is disqualified for pension for any period solely by reason of subsection (a) of this section, the Administrator may apportion and pay to his wife or children the pension which such veteran would receive for that period but for this section.

"(c) Where any widow or child of a veteran is disqualified for pension for any period solely by reason of subsection (a) of this section, the Administrator may (1) if the widow is disqualified, pay to the child, or children, the pension which would be payable if there were no such widow or (2) if a child is disqualified, pay to the widow the pension which would be payable if there were no such child."

On page 52, line 25, after the word "War", to insert "who is on the pension rolls on the day before the effective date of this act under any public law"; on page 53, line 18, after the word "War", to insert "as heretofore defined under public law administered by the Veterans' Administration"; on page 67, line 1, after "(e)", to strike out "Any disability of a veteran of the Spanish-American War shall be considered, for the purposes of this section an outpatient medical services under section 524, to be a service-connected disability incurred or aggravated during a period of war" and insert "Any disability of a veteran of the Spanish-American War, upon application for the benefits of this section or outpatient medical services under section 524, shall be considered for the purposes thereof to be a service-connected disability incurred or aggravated in a period of war."; on page 83, at the beginning of line 21, to strike out "thereof" and insert "therefor"; on page 90, line 7, after the word "Veterans' ", to strike out "act of 1924" and insert "act, 1924"; on page 109, line 17, after the word "review", to strike out "of" and insert "on"; on page 110, line 9, after the word "this", to strike out "part" and insert "title"; in line 21, after the word "this", to strike out "part" and insert "title"; on page 112, line 23, after the numerals "1405", to strike out "(a)"; on page 113, after the word "the", to strike out "States or Territories" and insert "States, Territories, or commonwealths"; in line 14, after the word "the", to strike out "States or Territories" and insert "States, Territories, or commonwealths"; on page 114, after line 15, to strike out:

"(b) Persons may be appointed under this title while on terminal leave from the Armed Forces and may be paid for their services rendered under such appointment not withstanding any law or regulation to the contrary."

On page 125, line 11, after the world "duly", to strike out "authorized" and insert "authorized"; on page 130, line 25, after the word "source", to strike out "(except retired pay, but including emergency officers' retirement pay)"; on page 131, line 2, after the word "benefits", to insert "(except retired pay, but including emergency officers' retirement pay)"; on page 177, line 14, after the word "in", to strike out "public or private" and insert "private, State, and other Government"; on page 181, line 19, after the word "shall", to insert "to the extent feasible"; one page 219, after line 5, to insert:

"(227) The act of April 25, 1957 (Public Law 85-24)."

On page 226, at the beginning of line 2, to strike out "or death" and insert "(or death occurring before January 1, 1957)"; and, in line 3, after the word "veteran", to strike out "occurring before the effective date of this act."

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill (H. R. 53) was read the third time and passed.

DEPARTMENT OF COMMERCE AND RELATED AGENCIES APPROPRIATIONS—CONFERENCE REPORT

Mr. HOLLAND. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the 2 Houses on the amendments of the Senate to the bill (H. R. 6700) making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1958, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read, for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of June 3, 1957, pp. 8218–8219, CONGRESSIONAL RECORD.)

Mr. JOHNSON of Texas. Mr. President, the House of Representatives has acted on the conference report on the Department of Commerce appropriation bill. I ask unanimous consent that the Senate now proceed to consider the conference report.

The PRESIDING OFFICER. Is there objection to the present consideration of the conference report?

There being no objection, the Senate proceeded to consider the report.

The PRESIDING OFFICER (Mr. CHURCH in the chair). The question is on agreeing to the conference report.

Mr. JOHNSON of Texas. Mr. President, I ask that the yeas and nays be ordered on the question of agreeing to the report, so that all Members will be on notice that there will be a yea and nay vote on this question.

The PRESIDING OFFICER. Is there a sufficient second?

The yeas and nays were ordered.

Mr. HOLLAND. Mr. President, the conferees on H. R. 6700, the Department of Commerce and related agencies appropriation bill for 1958, met on Wednesday, May 29, and unanimously reached agreement with respect to the matters in the bill where House and Senate were at a variance. The report is signed by all the conferees on the part of the House and all the conferees on the part of the Senate.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a comparative statement on the Department of Commerce and related agencies appropriation bill for the fiscal year 1958.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Department of Commerce and related agencies appropriation bill, 1958 (H. R. 6700)

[1] Excludes pending supplemental $55,000 to be derived by transfer.
[2] And in addition $65,000,000 to be derived by transfer from "War Shipping Administration liquidation" fund.
[3] Includes $250,000,000 appropriated in Public Law 15.
[4] Includes $900,000 appropriated in Public Law 15.
[5] Includes $45,000,000 appropriated in Public Law 19.
[6] $77,500,000 proposed for later transmission (under proposed legislation).
[7] Excludes $25,000 supplemental.

Mr. HOLLAND. Mr. President, when the bill was passed on the floor of the Senate on May 17, the Senate version of the bill was in agreement with the House version on the item of $1,690,000,000 payable from the highway trust fund covering the interstate highway program and various other Federal aid highway programs. The Senate version of the bill was also in agreement with the House version on 20 of the remaining 36 money items. The bill as passed by the Senate—exactly as reported by the committee, and without amendment on the floor—contained 31 amendments of the House version of the bill.

In the conference—which was most pleasant—the Senate prevailed in the case of 8 amendments, covering items as follows: First, amendment No. 6, a reduction of $5 million in liquidating cash for airport grants; second, amendment No. 8, an additional $2,167,000 for the industry divisions of the Business and Defense Services Administration; third, amendment No. 12, a reduction of $65 million in appropriations for maritime operating-differential subsidies; fourth, amendment No. 22, additional funds of $117,000 for school facilities for handicapped children in the Canal Zone; fifth, amendment No. 24, language authorizing $100 per diem for consultants for the Canal Zone Government, subject, however, to an existing overall limitation of $15,000 per annum for such services; sixth, amendment No. 27, a reduction for the Civil Aeronautics Board of $1.5 million in payments to air carriers; seventh and eighth, amendments No. 28 and No. 29, provision of the full budget estimate for the Tariff Commission by the restoration of $60,000 to the House version of the bill.

As indicated by the message from the House, the House recedes from its disagreement to and concurs in amendments 11, 13, and 14. The first of these relates to provision of administrative expense authorization for ship-construction activities previously authorized; the latter 2 amendments include language providing $65 million for maritime operating-differential subsidies to be derived by transfer of balances from the War Shipping Administration liquidation fund, in lieu of an appropriation in a like amount, and provide for rescission of unrequired amounts remaining in the War Shipping Administration liquidation fund.

The House prevailed in 10 amendments, covering items as follows:

First. Amendment 3, involving aircraft in the Civil Aeronautics Administration.

Second. Amendment 9, restoration of a proposed $195,000 reduction from the budget estimate for the Office of Area Development.

Third and fourth. Amendments 15 and 16, $2 million additional over the amount provided in the Senate version of the bill for liquidating cash for forest highways.

Fifth. Amendment 17, consultant limitation for the Bureau of Public Roads.

Sixth. Amendment 21, elimination of proposed supergrades for the Civil Aeronautics Administration.

Seventh. Amendment 23, capital outlay funds for the Canal Zone Government reduced $25,000 from the Senate version of the bill.

Eighth. Amendment 25, elimination of funds for the Advisory Committee on Weather Control.

Ninth and tenth. Amendments 30 and 31, reinstatement of a prohibition on use of management consultants in the field of management or organization.

That is referred to generally as the Gross amendment, which had been adopted on the floor of the House.

Compromise agreements were reached in 10 other instances involving passenger motor vehicles and aircraft for the CAA; funds for operation and regulation of the Federal airways; the establishment of air navigation facilities; administrative-expense limitation for air navigation-development activities; foreign-trade promotion activities of the Bureau of Foreign Commerce; consultant authority and limitation on funds to be utilized for such purposes in the Bureau of Public Roads; basic program functions of the National Bureau of Standards; operating expenses of the Weather Bureau; and administrative expenses of the Civil Aeronautics Board.

The utilization of the $65 million in War Shipping Administration liquidation funds for the operating-differential subsidies account of the Maritime Administration—to which I have already referred—though a reduction in appropriations is not a reduction in expenditures and must not be so considered. It is, however, a needed step in the direction of eliminating a balance which has been carried on the Treasury books, with annual renewal by the Congress, since 1948.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. HOLLAND. I yield.

Mr. BYRD. I congratulate the Senator very heartily on that action, which I think could well be extended to many other inactive accounts. The Senator from Florida has done a splendid job, not only in respect to that item, but in regard to the entire bill, both as chairman of the subcommittee of the Senate, and as a member of the conference committee.

Mr. HOLLAND. I appreciate that statement very highly. Whenever anyone receives a compliment from the distinguished senior Senator from Virginia on the floor of the Senate, it means he must have acted rather cautiously and wisely. So, for the entire conference committee, consisting of the full number of our subcommittee from the Senate, and a similar number from the House, I want to say we greatly appreciate the comments of the distinguished senior Senator from Virginia.

Mr. BYRD. It was a very sincere compliment, and I certainly appreciate what the distinguished Senator from Florida has said.

Mr. HOLLAND. I thank the Senator.

I may say, with respect to this item, which currently amounts to approximately $76 million or $77 million, which is what remains of larger amounts continued available since 1948, under appropriations by Congress, $65 million was made available to a similar activity having to do with ships. As the House had suggested, we left $10 million as a reserve to complete the liquidation of the War Shipping Administration claims. The balance of between $1 million and $2 million we transfer to the surplus fund. So that the surplus funds, in one pocket, which the Senator from Virginia has been so strongly suggesting for several years ought to be rescinded, or appropriated where they can be used, and used on necessary expenditures for the current or approaching fiscal year, have been used for that purpose in this instance.

As a member of the Joint Committee on Reduction of Nonessential Expenditures, which is so ably headed by the senior Senator from Virginia, I may say I am happy this is one item, if not the first, in which we are carrying out one of the major objectives of that committee. The record shows that $10 million remaining in that liquidation account will be adequate to settle outstanding claims.

There are 1 or 2 additional comments I should like to make. Senators will recall that in the handling of the funds for safer installations on the airlines or on the air lanes for the CAA, both the House and the Senate committees had insisted that a sizable part of the appropriation recommended in the budget be transferred to the military budget, because it was for the serving of military planes.

I am happy to say that in spite of the great cuts made by the House in the defense appropriation bill, which it passed a few days ago, there was added to that bill by amendment from the floor the amount of $21,500,000, which is a necessary expenditure to provide for greater safety for military planes—and since it affords them greater safety, it means greater safety is likewise assured to civilian planes which must at times be traversing the same areas, so that the safety of people traversing the air lanes is being safeguarded in that particular way, by providing the particular appropriation in another measure.

I should like to make one more point. I think it is important for the RECORD to give a sort of summary of the reduction of which all members of the committees, both in the House and the Senate, are quite proud.

The amount covered by the conference bill, which is in a total of $597,790,225, is $55,894,835, or 8.6 percent, below the amount voted by the House.

The total of the conference bill is $15,794,065, or 2.6 percent, below the amount voted by the Senate.

The amount carried in the conference bill is $273,722,775, which is more than a quarter of a billion dollars, or 31.4 percent, below the budget estimate.

The conference bill appropriation is also 22.2 percent below the amount appropriated to date for the present fiscal year.

Mr. President, as a matter of making sure that the RECORD does not deceive anybody, while the amount appropriated in this bill is 31.4 percent below the budget estimate, it is only 23.9 percent below the budget estimate for expenditures. The 31.4 percent is the reduction

in new appropriations. The difference between the figures 31.4 percent and 23.9 percent is represented by the transfer of $65 million, to which I referred earlier in my statement.

One more figure needs to be mentioned, and then I will close. The conference bill is $170,744,911, or 22.2 percent, below the amount appropriated to date for the present fiscal year. Of that figure we are particularly proud.

Mr. President, I wish to say that the House committee, the Senate committee, and the conference committee have all proceeded in a way different from that of using a broad ax approach. I think the various activities and agencies covered by the bill can be operated, and operated reasonably, with the funds appropriated by the bill, except one. In conference we had to finally agree with the House—or not have a conference report—on the complete elimination of a minor amount which was in the bill to carry on to completion the program for the Advisory Committee on Weather Control. The Senate committee felt, and the Senate indicated by its action, that since we had extended that activity to continue through this coming fiscal year, by all means we should appropriate funds to complete it, but the House conferees were adamant. The amount being small, and other items being of much greater importance, the Senate conferees ultimately yielded on that point.

Mr. President, I ask first that the conference report be adopted. Then I shall ask to have laid before the Senate the single amendment which has to be reported back for consideration and approval following action on the conference report.

The PRESIDING OFFICER (Mr. CHURCH in the chair). The question is on agreeing to the conference report. On this question the yeas and nays have been ordered.

Mr. HOLLAND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HOLLAND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. The question is on agreeing to the conference report. On this question the yeas and nays have been ordered.

Mr. HOLLAND. Mr. President, before proceeding with the vote, I wish to repeat what some Senators may not have heard, namely, that the conference report was unanimously agreed to by all the conferees of the Senate and all the conferees of the House. All the conferees of both bodies have signed the report. I know of no item in controversy.

In closing, I express my great appreciation for the cooperation which I received, not only from my colleagues on this side of the aisle, but from all my colleagues on the other side of the aisle, and particularly from the ranking minority member, the senior Senator from Maine [Mrs. SMITH].

Mr. President, I am ready for a vote.

The PRESIDING OFFICER. The question is on agreeing to the conference report. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. CHAVEZ], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Tennessee [Mr. GORE], the Senator from Rhode Island [Mr. GREEN], the Senator from Missouri [Mr. HENNINGS], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Ohio [Mr. LAUSCHE], the Senator from Louisiana [Mr. LONG], the Senator from Washington [Mr. MAGNUSON], the Senator from West Virginia [Mr. NEELY], the Senator from Rhode Island [Mr. PASTORE], the Senator from Georgia [Mr. RUSSELL], the Senator from Florida [Mr. SMATHERS], the Senator from Mississippi [Mr. STENNIS], and the Senator from Missouri [Mr. SYMINGTON] are absent on official business.

I further announce that if present and voting, the Senator from New Mexico [Mr. CHAVEZ], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Rhode Island [Mr. GREEN], the Senator from Missouri [Mr. HENNINGS], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Ohio [Mr. LAUSCHE], the Senator from Louisiana [Mr. LONG], the Senator from Washington [Mr. MAGNUSON], the Senator from West Virginia [Mr. NEELY], the Senator from Rhode Island [Mr. PASTORE], the Senator from Florida [Mr. SMATHERS], the Senator from Mississippi [Mr. STENNIS], and the Senator from Missouri [Mr. SYMINGTON] would each vote "yea."

Mr. DIRKSEN. I announce that the Senator from New Hampshire [Mr. BRIDGES], the Senator from New Jersey [Mr. CASE], the Senator from Nebraska [Mr. HRUSKA], and the Senator from New York [Mr. JAVITS] are necessarily absent.

The Senator from South Dakota [Mr. CASE], the Senator from Kentucky [Mr. COOPER], the Senator from Vermont [Mr. FLANDERS], and the Senator from Connecticut [Mr. PURTELL] are absent on official business.

The Senator from Indiana [Mr. JENNER], the Senator from North Dakota [Mr. LANGER], and the Senator from Maine [Mr. PAYNE] are absent because of illness.

The Senator from Connecticut [Mr. BUSH] is detained on official business.

If present and voting, the Senator from New Hampshire [Mr. BRIDGES], the Senator from Connecticut [Mr. BUSH], the Senator from New Jersey [Mr. CASE], the Senator from South Dakota [Mr. CASE], the Senator for Kentucky [Mr. COOPER], the Senator from Vermont [Mr. FLANDERS], the Senator from Nebraska [Mr. HRUSKA], the Senator from New York [Mr. JAVITS], the Senator for Maine [Mr. PAYNE], and the Senator from Connecticut [Mr. PURTELL] would each vote "yea."

The result was announced—yeas 67, nays 0, as follows:

YEAS—67

So the report was agreed to.

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its action on certain amendments of the Senate to House bill 6700, which was read as follows:

IN THE HOUSE OF REPRESENTATIVES, U. S.,
June 3, 1957.

Resolved, That the House recede from its disagreement to the amendments of the Senate numbered 11, 13, and 14 to the bill (H. R. 6700) entitled "An act making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1958, and for other purposes," and concur therein.

That the House recede from its disagreement to the amendment of the Senate numbered 18, and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: "$100 per diem: *Provided*, That not to exceed $10,000 may be expended for services of individuals employed at rates in excess of $50."

Mr. HOLLAND. Mr. President, there is one item which requires the adoption of an amendment by both Houses. The House has already acted. I now move that the Senate concur in the amendment of the House to the amendment of the Senate numbered 18.

The motion was agreed to.

PAYMENT OF EXPENSES INCURRED BY THE CIVIL SERVICE COMMISSION

Mr. HOLLAND. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 318, Senate bill 1740.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The CHIEF CLERK. A bill (S. 1740) to authorize the payment from the Employees Life Insurance Fund of expenses incurred by the Civil Service Commission

in assembling and maintaining the assets and liabilities of certain beneficial associations.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Florida.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. JOHNSTON of South Carolina. Mr. President the bill does nothing more than implement the action of the Senate a few days ago, when we included in an appropriation bill an amendment to accomplish the same thing this bill now does. The provision was stricken out in conference, because the House disagreed with the Senate. But it is absolutely necessary that this bill be passed in order that justice may be done to the different group insurance plans which were in existence prior to the passage of the employees' insurance law.

I shall read section 5 (c) of the Federal Employees' Group Life Insurance Act of 1954, to show that Congress is under obligation at this time to pass the bill:

(c) The sums withheld from employees under subsection (a) and the sums contributed from appropriations and funds under subsection (b) shall be deposited in the Treasury of the United States to the credit of a fund which is hereby created. Said fund is hereby made available without fiscal year limitation for premium payments under any insurance policy or policies purchased as authorized in sections 7 and 10 of this act, and for any expenses incurred by the Commission in the administration of this act within such limitations as may be specified annually in appropriation acts, except that such fund shall be available, without regard to any such limitations, for payment of any such expenses incurred in assuming and maintaining the assets and liabilities of associations referred to in section 10: *Provided*, That appropriations available to the Commission for salaries and expenses for the fiscal year 1955 shall be available on a reimbursable basis for necessary administrative expenses of carrying out the purposes of this act until said fund shall be sufficient to provide therefor. The income derived from any dividends or premium rate adjustments received from insurers shall constitute a part of said fund.

The administration desires passage of the proposed legislation, because it has only through August 31, 1957, in which to take over the various companies. Actually only some $79,000 would be required. The appropriation bill provided that the Commission could use slightly in excess of $115,000 in order to take over the policies of persons who have retired.

The difference between the amount appropriated and the estimated total of $194,000 is the amount which would be required to take over the policies of persons who are still employed by the Government.

The real point at issue is that unless the bill is passed, Congress will be discriminating by not providing for the taking over of the policies of many persons who have not yet retired. The Commission has found that it cannot legally take over the policies of those persons or those persons who are still employed. It should either take over all the policies held by any given beneficial association, or not at all.

The Commission already has taken over all the policies in 16 associations. The question now is whether it will be permitted to take over the policies of the nine remaining associations. As I see it, it is very important that that be done, in order that all persons may be treated alike.

Mr. NEUBERGER. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. NEUBERGER. As one member of the Committee on Post Office and Civil Service, who serves under the leadership of the Senator from South Carolina, I wish to thank him for the guidance he has shown concerning the bill. It seems to me that it is necessary for Congress to protect the equity of the many retired Federal employees whose insurance is held in the various beneficial associations. I quite agree with the distinguished chairman that, if one or a few of those associations is to be taken over, then such action must be made universal.

Mr. President, I ask unanimous consent that three very cogent and pertinent letters which I have received from constituents in my own State of Oregon, who are former employees of various departments of the Federal Government, be printed at this point in the RECORD, for the information and benefit of the Senate.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

PORTLAND, OREG., *May 16, 1957.*

Hon. RICHARD NEUBERGER,
United States Senator.

DEAR SIR: I bought insurance in War Department Beneficial Association to provide a necessary burial fund many years before Congress made group life insurance available for Government employees. I cannot afford to lose it. I am sure you want to protect this for me just as much as for the members of 16 other associations whose insurance has been taken over by the Government. I, too, am entitled to this protection.

Please do all you can to see that the United States Civil Service Commission is authorized to use sufficient funds to take over my insurance. I am a retired Federal civil-service employee with 30 years' service—since 1953 with the Army Engineer Corps, Portland district.

Sincerely,

CLARENCE THOMPSON.

NELSCOTT, OREG., *May 18, 1957.*

Hon. RICHARD L. NEUBERGER,
Senate Office Building,
Washington, D. C.

DEAR SENATOR NEUBERGER: This is a request for your support of a matter now pending before the Senate in regard to funds for the Civil Service Commission for the assumption by the Government of all life insurance agreements of the various nonprofit associations of Federal employees.

Under the act of Congress approved 17 August 1954, as amended, the Civil Service Commission is authorized to take over these policies and has done so for 16 associations, but has suspended negotiations with the remaining 9 pending congressional authority to use funds for this purpose.

One of the 9 affected is the War Department Beneficial Association with which I have had 3 insurance policies since 1935, and as I am now at an age and with a total disability with no possibility of obtaining additional insurance, I am quite concerned that this insurance be protected in every way possible.

I would appreciate your conveying these views to Senator MORSE and other appropriate Members of the Congress to the end that all such associations may receive equal treatment.

With warmest regards from both of us and many thanks,

Sincerely,

OTTO W. CAHILL,
Lieutenant Colonel, USAF (Retired).

CHEMAWA, OREG., *May 29, 1957.*

Hon. Senator RICHARD NEUBERGER,
Washington, D. C.:

I bought insurance in Department of the Interior Beneficial Association to provide a necessary burial fund many years before Congress made insurance available for Government employees.

To be exact, I have been paying for twenty-some years, and I cannot afford to lose this, because it will mean very much to my peace of mind right now, and very much to my wife, because it certainly would make it hard for her.

I am near 65 years of age, and the Government insurance diminishes in value annually, and I feel it is necessary that I get the protection from this insurance that I have been paying for a long time.

I understand the Government has taken over the life insurance of some of the associations, but has suspended negotiatings with some others, including the one I am connected with, pending congressional authority to use funds for this purpose. I feel that I am justly entitled to some protection, and I ask you, honorable Senator, to do all you can to protect this for me, by trying to see that the United States Civil Service Commission is authorized to use sufficient funds to take over my insurance.

Sincerely yours,

JOSEPH J. BRUSH.

Mr. NEUBERGER. I thank the Senator from South Carolina for the direction and leadership he has shown in bringing this important bill before the Senate.

Mr. JOHNSTON of South Carolina. I thank the Senator from Oregon for his remarks. I have always found the Senator most helpful in all legislative matters which benefit and are necessary to carry on our Government.

Mr. MARTIN of Iowa. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. MARTIN of Iowa. As a member of the Committee on Post Office and Civil Service, am I correct in my recollection that there was no objection whatsoever to the bill by any member of the committee?

Mr. JOHNSTON of South Carolina. There was no objection; the committee was unanimous in reporting the bill.

The PRESIDING OFFICER (Mr. YARBOROUGH in the chair). The bill is open to amendment.

If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 5 (c) of the Federal Employees' Group Life Insurance Act of 1954 is amended by inserting before the colon preceding the proviso therein a comma and the following: "except that such fund shall be available, without regard to any

such limitations, for payment of any such expenses incurred in assuming and maintaining the assets and liabilities of associations referred to in section 10."

ORDER FOR ADJOURNMENT TO WEDNESDAY

Mr. JOHNSON of Texas. Mr. President, I am hopeful that tomorrow we shall be able to report several bills from the standing committees, particularly appropriation bills which have been marked up by the subcommittees considering them.

Therefore I ask unanimous consent that when the Senate concludes its deliberations today, it stand in adjournment until noon on Wednesday next.

The PRESIDING OFFICER (Mr. TALMADGE in the chair). Without objection, it is so ordered.

WIDESPREAD GEOGRAPHIC USE OF BONNEVILLE POWER SUPPLIES FOR INDUSTRIAL PAYROLLS

Mr. NEUBERGER. Mr. President, recently much concern has been expressed in Oregon that the marketing of hydroelectric energy from the Federal dams of the Columbia River Basin, under the present laws and policies of the Bonneville Power Administration, will be inequitable and prejudicial to the people of my State. I rise today to discuss these policies and to introduce a proposed amendment to the Bonneville Project Act, the purpose of which is to provide that low-cost Bonneville power will be used intelligently to promote diversified industrial and economic development fairly and equitably throughout the several States of the Columbia River Basin. First, I shall review the problem and the background of the present adverse power marketing policies. Next, I shall explain my proposal for a return to progressive and constructive Bonneville power policies. Finally I shall review some of the facts which lead me to my firm conviction that proper planning of the use of a major share of Bonneville power for industrial development is of central importance to the economic future of Oregon and the Pacific Northwest.

LOW-COST POWER TAKEN FOR GRANTED FOR NEARLY 20 YEARS

For nearly 20 years, the low-cost hydroelectric power which is inherent in the surging flow of the Columbia River and its tributaries has steadily and increasingly entered the economic bloodstream of the Pacific Northwest, until it has become one of the most basic and essential components of the economy of the whole Columbia River Basin. From the day when the first generators began to turn at Bonneville Dam in 1938, until a few years ago, a continuing series of large, multipurpose Federal dams, harnessing these flows, has steadily added new blocks of low-cost power to the capacity of the Bonneville system. First there was Grand Coulee in 1941, followed by Hungry Horse in 1952, McNary in 1953, Chief Joseph in 1955, and the Dalles Dam expected this year, not to mention numerous subsidiary projects on tributaries of the Columbia.

With this steady addition of new power supplies, the Bonneville Power Administration was able to meet the needs of a growing region for low-cost energy—energy which could not be obtained from coal, from oil, from natural gas or any other fuels, none of which are indigenous to the Northwest. With this low-cost energy supply, the Pacific Northwest experienced, through war and peace, the fastest economic growth of its history.

Mr. President, as is the case with so many important things which form an intimate part of our daily living, it may be that the majority of the people of the Pacific Northwest, those not directly concerned with power problems, came to take the Bonneville power program for granted. It had not been a partisan political question. Bonneville Dam itself had been the realization of a dream for which Oregon's illustrious Republican leader, Senator Charles L. McNary, had fought from as early as 1921. He had continued his fight for the projects which followed, in cooperation with Democratic Presidents in the White House—a cooperation which was symbolized in the great dam which was named for him after his death. So, Mr. President, when this great and successful Bonneville program of developing the hydroelectric resources of the Columbia basin was abruptly ended by the Eisenhower administration upon taking office in 1953, it took a while for the economic significance of this fact to become apparent to some of the people who had enjoyed the economic benefits of the stimulus of low-cost Bonneville power without being conscious of their source.

Mr. President, today the Pacific Northwest, and particularly my own State of Oregon, is confronted with two simultaneous developments which must bring home to all of us the significance of this administration's decision to end the Federal Columbia River power program. First, Oregon is in an economic slump. For several years, the average per capita income of Oregon residents has receded in its relationship to the national average, from being $202 above the average in 1947 to $10 below the national average in 1956. Today, Oregon is experiencing serious unemployment and underemployment of its labor force.

This is particularly significant at a time when the Nation as a whole is enjoying a relatively high measure of prosperity and is still seriously combating inflation. True, the immediate cause of Oregon's present difficulties lies in the administration's fiscal policies, with their depressing effects on homebuilding and thus on the lumber industry, rather than directly in the administration's power policies. But by dramatizing the adverse and dangerous effects of our dependence on the fate of a single natural resource—the timber of our vast forests—Oregon's present slump forcefully demonstrates the importance of such industrial diversification as might be attracted to our State and region by the intelligent and energetic development and use of our other great and unique resource, the low-cost power of our abundant rivers. Yet the second simultaneous development, Mr. President, is the growing apprehension that it may be almost too late—that we may not be able to resume the interrupted Federal river development in time to catch up with and exceed the steeply rising curve of demand for electrical energy in our region. If this should be true, and if the best available statistics and forecasts show that sooner or later, in the next two decades, the Northwest will consume far more electricity than can be produced at all the hydroelectric installations which may be developed at all the sites available in the basin consistently with protection of migratory fish runs, of national parks, and other conservation needs—then we must face the issue of how to make the best use we can of the economic asset of low-cost Bonneville power, and how to assure the equitable distribution of the benefits from this unique regional assets among all of the people of the region, and in the greatest national interest. This is the problem to which I am addressing myself today.

"PREFERENCE CLAUSE" IS KEYSTONE OF POWER-MARKETING POLICIES

The cornerstone in the marketing of power from Federal projects has been the preference granted public agencies and nonprofit systems in the use and distribution of such power. The preference clause has been the traditional expression of the public's decision to dedicate the product of public resources and public investment to the public benefit, and to prevent its monopolization for private profit. On May 15 of last year, during the debate of the bill to authorize construction of the Niagara River project by the State of New York, I had occasion to review the history of the preference clause from the Reclamation Act of 1906 through its inclusion in many subsequent Federal acts dealing with power, including the Federal Power Act, the Rural Electrification Act, and acts authorizing many specific projects constructed by the Federal Government. Senator McNary included a public power preference clause in his original draft of the bill which became the Bonneville Power Marketing Act. As that law was finally enacted, it included a preference clause phrased in the following terms as section 4, now title 16, United States Code, section 832c:

(a) General provisions: In order to insure that the facilities for the generation of electric energy at the Bonneville project shall be operated for the benefit of the general public, and particularly of domestic and rural consumers, the Administrator shall at all times, in disposing of electric energy generated at said project, give preference and priority to public bodies and cooperatives.

In other acts, the preference clause has been expressed in various other terms, but the principle has been the same. Its operation has justified the great importance which has so long been attached to it. It has offered the public a choice between the kind of service organization they prefer in what is necessarily a natural monopoly field. By of-

fering real or at least potential alternatives to the distribution of federally generated power by private, profitmaking companies, it has kept down electric rates in the areas within its reach. Most important of all, in conjunction with the Rural Electrification Act, the preference clause has made possible electric service, and thus a whole new way of life, for thousands of farm families throughout our country. In Oregon, for example, on January 1, 1935, electricity from central station service reached only 18,000 of 65,000 farms, or 27.5 percent. A little more than 2 decades later, on June 30, 1956, nearly 97.3 percent of all Oregon farms had the incalculable benefits of such electric service. This is surely the most revolutionary change which has been made possible by the access given farmers, through co-operatives or otherwise, to low-cost electric power. And when we look back to the conditions of 1935, it is easily understandable why domestic, and particularly rural, consumers were specifically singled out as members of the general public for whose benefit the Bonneville project was to be operated.

"PREFERENCE CLAUSE" NEEDS RESPONSIBLE ADMINISTRATION

Mr. President, of course, the Bonneville preference clause which I have quoted above had to be applied by someone charged with the administration of the act and with responsibility for this new marketing function of the power generated at the Bonneville project. Although the act itself stated that "the form of administration established in this chapter for the Bonneville project is intended to be provisional pending the establishment of a permanent administration for Bonneville and other projects in the Columbia River," this marketing function has remained continuously in the hands of the BPA under the Department of the Interior.

Mr. President, from what I have reviewed so far, and from facts which I shall review in more detail later in my speech, it is apparent that the marketing policies of the Bonneville Power Administration play a central role in determining the impact of the federally generated supply of electric energy in the Pacific Northwest. Armed only with the brief criteria of the preference clause I have cited, the Administrator has had considerable discretion in allocating this power supply through various agreements with preference customers, with private utility companies, and, in some instances, directly with large industrial power users. Given a relatively abundant supply and the prospect of continued abundance through addition of new projects to the system, this discretion enabled the BPA to serve the needs of all of the divers interests of the region, both with domestic and rural power and with power for industry, wherever industry might decide to locate its plants within economic reach of a transmission line. And a policy of expansion, to meet the needs and to help develop the opportunities of an expanding region, was the guiding principle of BPA marketing policy prior to 1953.

Thus, Mr. President, soon after the end of World War II, Secretary of the Interior Harold L. Ickes issued a memorandum on power policy which set forth his view of the manner in which congressional acts in this field were to be interpreted and applied. This memorandum, dated January 3, 1946, included a series of guidelines under the heading of "Operations and Sales," which I ask unanimous consent to have printed at this point in the RECORD as a part of my remarks.

The PRESIDING OFFICER (Mr. TALMADGE in the chair). Is there objection?

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

OPERATION AND SALES

(a) Active assistance, from the very beginning of the planning and authorization of a project, shall be given to the organization of public agencies and cooperatives for the distribution of power in each project area. The statutory objectives are not attained by merely waiting for a preferred cutsomer to come forward and offer to purchase the power.

(b) Operations shall be economical and efficient.

(c) Wholesale rate schedules shall be nondiscriminatory and shall be designed to bring power at the lowest possible rates to distributors that are principally serving domestic and rural consumers.

(d) Resale rate and other provisions shall be included in wholesale contracts with distributors to insure that power is furnished to the ultimate consumer at the lowest possible rates, which shall reflect as nearly as may be the cost of the service.

(e) Public agencies and cooperatives shall be encouraged to build diversified loads and markets and neither the operations nor the markets of these agencies or of the Government facilities shall be restricted by contracts or operating agreements which might serve to limit the widespread use of the power from the Federal project.

(f) No contracts shall be made that operate to foreclose public agencies and cooperatives from obtaining power from the Government project. Contracts with these organizations shall recognize their preferential character and assure them full opportunity to secure the benefits of Federal power. Contracts with privately owned companies shall be limited in time and shall contain provisions for the cancellation or modification by the Government as necessary to insure preference to public agencies and cooperatives.

(g) Rates, contracts, and financial data shall be made public.

(h) A diversified development of the industries and resources of the region shall be given active encouragement in order to benefit the load factor and to promote the economic stability of the project as well as to aid in regional development.

(i) Public agencies and cooperatives which are existing or potential customers of the Federal project shall be given every assistance in promoting sound programs and operations.

Mr. NEUBERGER. Mr. President, I particularly wish to draw attention to paragraphs (e) and (h) of this memorandum. They are of central significance for the policy decisions which I am discussing today, and which urgently require the attention of the people of the basin whose economic future is intimately involved with them. Paragraph (e) emphasized the importance of diversification in the loads and markets for power to be distributed by public agencies and cooperatives. And this emphasis on diversification was made even stronger and more specific in paragraph (h), which directed that a diversified development of the industries and resources of the region shall be given active encouragement in order to aid in regional development.

Mr. President, I can think of no better statement than this last principle of our 1946 Federal power marketing policy, of the active pursuit of the promise of economic development which lies dormant in the Columbia Basin's vast hydroelectric potential. It expresses a philosophy of abundance and of confidence in the future. An administration motivated by such a conception of the proper function of the power program entrusted to it could play a truly dynamic role in economic development. To the extent of its plans and forecasts for future Federal projects which would continue to add low-cost power to the system, it could use the assurance of such a power supply as a magnet to attract to the Pacific Northwest industries to which power costs are important enough to overcome the disadvantages of high freight charges inherent in our distant location from national markets.

PHILOSOPHY OF ABUNDANCE ENDED IN 1953

But, Mr. President, this philosophy of abundance was abandoned when the Eisenhower administration took office in 1953. There would be no more new Federal projects recommended for authorization in the Columbia River Basin. The rivers were to be turned over to the private utility companies, which had consistently fought the Bonneville program every inch of the way, even while wheeling large proportions of Bonneville power to their customers. And with the end of new Federal dam construction and of transmission lines, there would no longer be an uncommitted supply of future power with which to encourage diversified loads and the diversified development of the industries and resources of the region. Thus, hand in hand with the ending of the Federal dam construction program by this administration went a sharp reversal in Bonneville marketing policy. On August 18, 1953, there was issued a new memorandum on Department of the Interior power policy, as conceived by the Eisenhower administration, which included the following section on preference to public agencies and cooperatives:

The Department of the Interior will operate the federally owned generating and transmission facilities under its control for the benefit of the general public, and particularly of domestic and rural customers, and the Department will give preference and priority to public bodies and cooperatives in disposing of electric energy generated at Federal plants. It will be the policy of the Department to dispose of power, remaining after provision for existing preference customers, to privately owned public utilities serving domestic and rural customers in the area. The Department will not ordinarily undertake to dispose of power directly to consumers except to carry out existing contracts or renewals or expansion thereof, nor

will it use or permit the use of the preference privilege as a means to provide power for large industrial consumers at the expense of domestic and rural customers served by either publicly or privately owned public utilities.

Mr. President, as I have said, this negative, restrictive, niggardly conception of Bonneville power marketing functions went hand in hand with the administration's simultaneous decisions to hand over the incomparable Hells Canyon site on the Snake River to the Idaho Power Co., and to propose giving up, under the so-called partnership scheme, the powerhouses at the John Day, Cougar, and Green Peter projects, all of which had been authorized as Federal dams under preceding administrations. Today, Oregon faces the consequences of this reckless and irresponsible abandonment of the only large-scale program of new resource development that offered any promise of diversification and new industrial payrolls for our State and region.

Today, Mr. President, some of the leaders in Oregon's public life and business, who must share in the responsibility for having encouraged this administration's destruction of the Bonneville program, have at last become concerned about these consequences. They recognize that the so-called partnership scheme has been decisively repudiated by the people of every western State where it has become a matter of controversy; but in the course of this unnecessary controversy, which was precipitated by their attacks on the existing Federal program, almost half a decade in waterpower development in the Columbia basin has been lost. They recognize that now we fight, not for an assured long-run abundance, but, more immediately, to stave off a crippling shortage of hydroelectric power. The first evidence of this new recognition has been the unanimity of support for immediate construction of John Day Dam, under its present authorization as an all-Federal project. Appropriations for this purpose even have been supported by a number of Oregon newspapers which previously have not been known for their enthusiasm for Federal power development, and now by representatives of the Portland General Electric Co. Many of these favored the anti-Federal power partnership scheme until recently.

Completion of the John Day project in the fastest feasible time can offer the Northwest a brief breathing spell in facing and planning the future of our power supply. Beyond this immediate concern for assuring the power available at John Day Dam lies a long-range concern over the future role of Federal power in the basin, and particularly over the equitable distribution of its benefits throughout the States of the basin.

OPPONENTS OF PUBLIC POWER NOW SEEK ALLOCATION OF POWER FROM JOHN DAY DAM

Only 11 years ago, spokesmen for private-utility companies told the Congress that additional Federal dams would generate more power than the Pacific Northwest could use, while conservative opposition kept public distribution of electricity, which could benefit from the preference clause, from being widely adopted in Oregon. Today, spokesmen for the same point of view point with alarm to Oregon's disadvantageous position in competing with publicly owned distribution system in Washington—which can take advantage of the preference clause—for a share of Federal power, as the demand for this power fast threatens to outstrip the supply which has been so tragically and needlessly throttled down. So now we hear urgent demands that something be done to assure more of a share in future Federal power for Oregon—if necessary, by tying a formula of geographic allocations for Oregon and other States, on a State-by-State basis, to future legislation or appropriations for Columbia River projects.

Mr. President, there is much irony in this situation; but I do not refer to these events for the purpose of criticism or to fix blame. I have reviewed them as necessary background for what I, as a Senator from Oregon, believe can be done to preserve the legitimate and essential interests of the people of my State in the renewed growth and vitality of the Bonneville power system.

I do not believe in the "Balkanization" of the Columbia River Basin by seeking to tie down, legislatively, specific benefits for specific States. The mountains, the high, narrow gorges, and the broad river valleys, the clouds which precipitate their loads of rain or snow over the watershed, the forests which regulate the runoff—these basic conditions, which form the water resources of the Columbia Basin, are facts of geography and climate that know no man-made boundaries. It always invites waste, misuse, and underdevelopment when comprehensive planning for the best use of such resources is subordinated so as to fit the straitjacket of man-made political units, whether they be local groups, States, or whole nations. Such planning and development in the Columbia River Basin could only suffer by being made a subject of controversy between different States in the basin, as it is already suffering by the long drawn-out controversy between our Canadian neighbors and ourselves over the allocation of the downstream benefits attributable to development of the vast upstream storage potential of the upper Columbia and Kootenay Rivers in British Columbia. I know that there are precedents for geographic allocations of power from Federal projects—at Hungry Horse, in Montana; in the Missouri Valley; and in the bill for the high Hells Canyon project which we shall soon debate in the Senate. These may have been necessary exceptions to meet special conditions; but when we are dealing with the hydroelectric power of the basin as a whole, such allocation must remain only a last resort. To propose it now would be to concede the end of the basinwide Federal power system which so many of us have fought so long to preserve against the attacks of precisely those who now ask for allocation, and of this administration. It would be to concede the end of the Pacific Northwest's philosophy of abundance of hydroelectric power, and to turn instead to the rationing of the scarcity which must result from this administration's deliberate policies toward our region. I, for one, am not prepared to concede that this would be in the best interests of the people of Oregon which it is my responsibility to represent in the Senate.

RETURN TO FORWARD-LOOKING POLICIES NEEDED

I propose, instead, that the Bonneville power program return to the principles and objectives which guided it prior to the change in administrations in 1953. First and foremost, I shall continue to fight for an accelerated program of adding new hydroelectric power capacity to the Bonneville system, in an effort to make up for the loss caused by the needless delays of the past 5 years. There is still time for everyone in Oregon, of whatever business, profession, or political persuasion, who has become concerned about our economic future, to unite in this effort. Perhaps we can soften the administration's opposition to appropriations for an immediate start on building John Day Dam. There is still time to authorize the incomparable high Hells Canyon Dam, the key water-storage project on this side of the border. I shall continue to urge early agreement with Canada on terms which will permit starts on the large Libby Dam and on the huge Mica project in British Columbia, which eventually would add the equivalent capacity of several Bonneville Dams to the Bonneville system, without endangering any fish, wildlife, or unique scenic values. Such a return to an aggressive program of water-resource development must be the indispensable first step toward a return to a Bonneville philosophy of abundance and of the use of power for economic expansion.

Second, the Bonneville Power Administration must again accept this philosophy as the guidline of its marketing policy. In the 1953 statement of Department of the Interior Power Policy which I have quoted, the administration explicitly abandoned its responsibility for using the low-cost power of the Bonneville system as a form of economic adrenalin for the economic circulatory system of the Pacific Northwest. Not only does Bonneville today not seek to stimulate new industrial diversification based on low-cost energy, but the Interior Department's 1953 statement of its policy on preference to public agencies and cooperatives expressly states that it will not sell directly to industrial users, nor permit preference customers to use their preference so as to obtain power for large industrial consumers.

Mr. President, one constructive proposal toward which the Oregon Legislature has taken the first steps this spring, and which the people of Oregon can adopt in the years immediately ahead, would be the creation of a State agency specifically charged with responsibility for obtaining power at the lowest possible cost and seeing that it is used where it is most needed. There is no doubt but that such a State agency is a public preference customer under the preference clause of the Bonneville Act. As such, it could serve the function of a

magnet for power-using industry for Oregon which Bonneville itself no longer serves. As a preference customer, a State agency would put Oregon on equal terms with public agencies in other States, so far as access to federally generated low-cost power from BPA is concerned. For these reasons, I proposed such a State agency several months ago, and I have used such persuasive influence as I may possess toward having it created. Mr. President, I ask unanimous consent to have printed at this point in my remarks a press release from my office, dated March 11, 1957, concerning my support for establishment of a State industrial power agency for Oregon.

There being no objection, the release was ordered to be printed in the RECORD, as follows:

POWER PREFERENCE FOR OREGON THROUGH STATE AGENCY PROPOSED BY SENATOR NEUBERGER

Oregon could enjoy expanded benefits of the public power preference clause if the State government will establish an industrial power marketing agency, Senator RICHARD L. NEUBERGER declared today.

NEUBERGER said he had received an opinion from the Legislative Reference Service of the Library of Congress, which "makes it evident that an agency of the State of Oregon can qualify as a preference customer under the terms of the Bonneville Power Act."

The Oregon Senator suggested that establishment of such an agency by the new State administration "would knock in the head the timeworn argument that Oregon is at a disadvantage because of the preference clause—a provision of law, incidentally, which was backed by the late Oregon Senator Charles L. McNary."

An opinion prepared for the Oregon Senator by James P. Radigan, Jr., senior specialist in American public law for the Legislative Reference Service, stated that "under terms of the Bonneville Project Act, States, public power districts, counties, and municipalities, including agencies and subdivisions of any one of them, are entitled to a preference and priority."

In his inquiry, NEUBERGER asked whether, under relevant Federal law, any distinction is made in the priorities of preference purchasers or of nonpreference purchasers of electricity on the basis of the uses for which it is to be resold or distributed.

Radigan replied that "the Bonneville Project Act does not establish any criteria that would make the uses for which the power is to be sold or distributed determinative of the right of the purchaser to receive. Reading the declaration of intention of congress contained in this act with the preference and priority provision does not provide a definitive conclusion that the proposed use of electrical energy by the grantee shall be controlling."

NEUBERGER also disclosed that the staff counsel of the Senate Interior and Insular Affairs Committee was continuing studies into the legal rights of a State power marketing agency whose primary objective would be to supply energy to industrial enterprises.

Mr. NEUBERGER. As I have stated, Mr. President, there can be no doubt that a State agency would be a preference customer. Nevertheless, my proposal has been, and continues to be, attacked as an inadequate solution for Oregon, on the ground that BPA, under its 1953 policies, will not sell power to a State or other public agency for resale to industrial customers.

It is my opinion, based on legal advice I am inclined to trust, that such a refusal to sell would be a violation of the preference law. The preference for public agencies in the law is expressed in absolute terms. But in its 1953 policy statement, and actions taken under it, the Department of the Interior has placed great reliance on the introductory phrase of the preference clause, which refers to the "benefit of the general public, and particularly of domestic and rural consumers." Although this is merely an introductory statement of the objective of the preference clause, which itself is stated in unqualified terms, the 1953 policy explicitly gives private utilities serving domestic and rural consumers priority over public preference customers, if these preference customers seek to obtain Bonneville power for an industrial load.

BILL INCORPORATES PRINCIPLES FOR EFFECTIVE AND FAIR MARKETING POLICY

Mr. President, I believe this policy is wrong. I believe that, in conjunction with the corollary policy of no new starts, it spells the end of economic development in the Pacific Northwest based on low-cost hydroelectric power. This policy is said to be based on the present preference clause of the Bonneville act. Let me read that clause again at this point:

In order to insure that the facilities for the generation of electric energy at the Bonneville project shall be operated for the benefit of the general public, and particularly of domestic and rural consumers, the Administrator shall at all times, in disposing of electric energy generated at said project, give preference and priority to public bodies and cooperatives.

BPA's present attitude is obviously not compelled by the language of the law, as the very different interpretation given this law up to 1953 proves. In fact, I think it is contrary to the law. But it is said to be based on the law. For that reason, Mr. President, I introduce today—for myself and the senior Senator from Oregon—a bill to amend this section of the Bonneville Act and I ask unanimous consent that the bill may be printed at this point in my remarks, so that it may be easily compared with the existing phrasing of that section.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 2206) to amend the Bonneville Project Act to authorize the Administrator to establish priorities and preferences so as to benefit the general public and to promote diversified economic development fairly and equitably throughout the several States of the Columbia River Basin, introduced by Mr. NEUBERGER (for himself and Mr. MORSE), was received, read twice by its title, referred to the Committee on Public Works, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That section 4 (a) of the Bonneville Project Act, title 16 United States Code section 832c (a), be amended to read:

"In order to insure that the electric energy disposed of by the Administrator appointed under this act will benefit the general public fairly and equitably throughout the whole Columbia River Basin, the Administrator may establish priorities for industrial uses which will best promote the diversified economic development of the several States of the basin and for distribution to domestic and rural consumers, and with respect to such distribution the administrator shall, in disposing of such energy, at all times give preference and priority to public bodies and cooperatives."

Mr. NEUBERGER. Mr. President, a comparison of my proposed amendment with the existing language of the Bonneville Act will indicate the program to which I believe BPA should return in its power marketing policies. Let me explain some of the points of difference.

First, reference to operation of the Bonneville project has been changed to refer to all power sold by the Administrator, because many subsequent projects have been added to the Bonneville system since the original act. This makes no substantive change.

Second, specific provision is made for the Administrator to establish a separate schedule of priorities for industrial uses of low-cost Bonneville power where it will make the greatest contribution to the diversified economic growth of the several States of the Columbia River Basin. No particular proportion of Bonneville power is required by my bill to be allocated to industrial uses. My purpose is to establish definitely and beyond doubt the discretion of the Administrator to channel the low-cost power generated at Federal projects throughout the basin into industries which will make a real contribution toward diversifying the economies of the States of the Pacific Northwest.

Third, in exercising this discretion, the Administrator is to be guided not only by considering the contribution which potential industrial users of Federal power will make to diversified economic development, but also by the desirability of having this diversified industrial and economic development distributed widely and equitably throughout the several States of the whole Columbia River Basin. That is the significance of the reference in my bill to "the several States" and to benefiting the public "fairly and equitably throughout the whole Columbia River Basin." Again, no specified proportion of the whole Bonneville power supply is required by my bill to be geographically allocated to any one State. But it would be obviously inequitable, as well as highly prejudicial to the continued future development of a regionwide power program, if increasingly disproportionate fractions of the total supply were to go to users in only 1 or 2 States in the basin.

In brief, Mr. President, under the marketing policy I propose, industries could again be attracted to the Pacific Northwest by the assurance of adequate amounts of low-cost power, in recognition of their contribution to the much-needed diversified economic development of our Northwest States. It would be up to the States themselves to attract industries to one or another site, for reasons other than the power supply. But if Oregon's State industrial power agency, for instance, were to persuade a

power-needing industry to locate in Oregon, it would be able to assure it of the power it requires, within the priorities and limits set by the Administrator in the light of the total available supply. And as between two or more such potential industrial loads to be located in different parts of the basin, the Administrator would—other things being equal—take into account the criterion of wide and equitable distribution throughout the several States of the basin of the economic benefits of low-cost Federal power, and presumably give highest priority to the industry which wants to locate in the State which is furthest from enjoying its equitable share of these benefits. This criterion will serve to protect Oregon and other States against preemption and loss of their vital interests in the Federal power system.

I repeat, Mr. President, that none of these things could not be done under existing law, given enlightened administration and enlightened policies of continued advance development of the abundant waterpower resources which have been bestowed so generously upon the Pacific Northwest. We have regrettably not enjoyed such enlightened policies toward the Columbia River Basin since 1953. One Senator, or even the united delegations from several States, cannot bring about such enlightened policies in the face of a hostile administration. I am proposing today what I believe the policies should be. I think they would serve the best interests of the people of Oregon, as well as the Northwest as a whole. As a member of the Senate Committee on Interior and Insular Affairs, I shall seek committee hearings on Bonneville's power-marketing policies. I have introduced my bill today in the hope that it may serve as a basis for comparing the present policies, and their economic effects, with the policies which I propose.

INDUSTRIAL POTENTIAL OF POWER NOT A NEW EMPHASIS

Mr. President, my emphasis on the potential which low-cost power could have for the diversified industrial and economic development of my State and region is not a new discovery with me. I have argued for many years that this is perhaps the best hope we have for building a diversified economy where we now are tied to the exploitation and export of a few basic raw materials, such as our forests, minerals, and agricultural products. In my campaign for the United States Senate in 1954, this constituted a major plank in my platform. I have spoken about it consistently during the 2½ years I have served in the Senate.

I recognize that we shall not always have enough low-cost hydroelectric power to serve all of our domestic needs and offer large amounts to industry, too. I believe the people of Oregon are prepared to face this fact. The rural electrification, which is the greatest accomplishment of low-cost power, has virtually been completed in the Pacific Northwest. The average household in the Northwest uses far more electricity than the national average. Unquestionably, we shall have to decide whether we want more kilowatts to roast our turkeys and light our TV sets; or whether we want to use the low-cost power which is the unique resource of our region to create new, year-round industrial payrolls and their subsidiary economic benefits, with which to buy the turkeys and the TV sets.

Mr. President, let me review some of the facts which indicate the significance of the decisions at issue.

The economic well-being of the Pacific Northwest region is intimately tied in with the adequacy of a low-cost power supply for industry. A recent study by Daniel E. Goldy, regional director of the Labor Department's Bureau of Employment Security, shows that the creation of new job opportunities in Columbia Basin States has lagged in the past 5 years. This period of slow-down in growth of the labor force coincides with a tightening of the power supply for industry. While the brakes have been applied to development of new jobs, the economy of the Nation as a whole has expanded dramatically.

It should be noted that during the past winter all four northwest States were among the six States in the Nation with the highest unemployment rates. My home State of Oregon had the highest unemployment rate in the Nation; Idaho was second; Montana fourth; and Washington sixth. Concentration of this adverse employment situation in the northwest States is due to its lack of industrial diversity. Essentially, the economy of the Pacific Northwest is resource-based, depending heavily on extractive industries such as agriculture, lumbering, mining, fishing, food processing, and pulp and paper manufacturing.

Mr. Goldy, in his recent able study of the northwest employment situation, summarized the problem as follows:

> When an economy is comprised disproportionately of resource-based industries, its employment patterns strongly reflect seasonal factors and market prices of raw materials. This is the case in the Pacific Northwest. Moreover, the timber and mineral resources of the Pacific Northwest are depletable. This poses an additional problem for the region, since new job opportunities must be created to replace declining employment in industries based on dwindling supplies of raw materials, in addition to taking up the slack caused by seasonal variations or sharp fluctuations based on market conditions of raw materials.

The employment situation in the Pacific Northwest has not always been so dim. It so happens that the period from 1939 to 1947 was the one decade in our history when manufacturing employment in the Pacific Northwest grew faster than in the entire Nation—329 percent for our region, as contrasted with 284 percent for the whole United States. This was the period of World War II, and armament needs dictated greatly expanded industrial production. Yet the whole country was involved in World War II; the Pacific Northwest did not provide the sinews of war alone. I think more revealing is the fact that the period from 1939 to 1947 saw the influx of a vast supply of low-cost kilowatts from Bonneville and Grand Coulee Dams. That condition did occur in the northwest alone. No other region of the Nation shared in this 2-mill industrial power.

As new industrial power was being made available from Federal dams, aluminum and other electroprocessing industries were attracted to the region. Employment flourished. For instance, in 1940 not an ounce of aluminum was smeltered west of the Mississippi. By the end of World War II, nearly 50 percent of the Nation's expanded aluminum production came from our region.

Aluminum's impact on Northwest industrial employment was illustrated not long ago in a study made by Stanford Research Institute. This study shows that in 1952 "the grand total of people whose incomes are directly or indirectly related to aluminum industry in the Northwest amounts to 85,127 people." None of these jobs existed in 1940, when Aluminum Company of America opened its first aluminum potline at Vancouver, Wash. Yet 12 years later this industry provided a major portion of the region's year-around manufacturing payrolls.

According to a study of Bonneville Power Administration experts, every job in a Northwest primary aluminum plant creates or stimulates at least four other jobs in the region. Aluminum makes its biggest economic contribution in the field of product manufacturing. It was emphasized in the Stanford study that at the peak of World War II it was estimated that 80 persons were employed in aluminum fabrication from every one in aluminum smelting. It has been found that more employment is created outside of aluminum plants than in the aluminum plants, and the trend for such employment continued to grow as long as new supplies of industrial power were available.

ALUMINUM NOT SOLE INDUSTRIAL POWER USER

Although aluminum plants took by far the largest portion of industrial power from the Bonneville Power Administration during this period of expansion, other industries also were attracted by this storehouse of low-cost energy. I should like at this point, Mr. President, to read a list of the industrial customers of BPA so as to illustrate the scope of end products utilizing the Federal power supply. They include: Aluminum Company of America, Vancouver and Wenatchee, Wash., plants; Anaconda Aluminum Co., Kaiser Aluminum & Chemical Corp., Spokane Aluminum fabricating and reduction plants, Tacoma reduction plant; Reynolds Metal Co., Longview, Wash., and Troutdale, Oreg., plants; Carborundum Co., Crown-Zellerbach Co., Electro-Metallurgical Co., Hanna Nickel Smelting Co., Keokuk Electro-Metals Co., Pacific Carbide & Alloys Co., Pacific Northwest Alloys Co., Pennsylvania Salt Manufacturing Co., Rayonier Co., Victor Chemical Works.

I have mentioned, Mr. President, that the Northwest region achieved its greatest advance in manufacturing during the period from 1939 to 1947. Why did this beneficial trend cease, and why did a reversal set in? I think it is noteworthy Mr. President, that from 1949 to 1955 there was little appreciable change in the amount of firm power sold by Bonneville Power Administration to the aluminum industry. This restriction of power supply placed a ceiling on expansion of

aluminum production facilities in the Pacific Northwest. While growth of the region's labor force has lagged in the past 5 years, the present administration has choked off the program for Federal dam construction in the Columbia Basin. At the same time, it has imposed the power sales policies which I have described to limit the amount of industrial energy which can be sold by its public utility customers. Little wonder that the region's economic progress has become stagnant.

Mr. President, the Bureau of Employment Security estimated that States of the Pacific Northwest must provide between 315,000 and 500,000 new jobs during the next decade to keep pace with population growth. This is an annual rate of as many as 50,000 new jobs per year. I submit, Mr. President, that this objective cannot be achieved solely through the planting of more crops, the harvesting of more trees, the opening of new ore veins. Expansion of these productive features will help, but they alone are not the answer. Rich as is this region in natural resources, it must turn more and more to the manufacturing of finished products if necessary employment goals are to be met.

Fortunately, our region is blessed with 42 percent of the waterpower potential of the Nation. It is our only source of energy to power the wheels of industry. Future demands will make it necessary to channel a larger and larger share of this renewable resource into industrial production. In so doing, we will achieve one of the goals voiced by the father of American conservation, Gifford Pinchot: "The greatest good of the greatest number for the longest time."

If wisely and fully used, Mr. President, the water resources for the Columbia Basin can turn the States of the Pacific Northwest into an electro-processing industrial complex of great magitude. Besides the light-metal industries which have been attraced to the region, the diversion of more energy into industrial channels promises the expansion of chemical and rare metal manufacturing. There is great potential for electric furnace treatment of low-grade phosphate ores in the region, for the new materials of the atomic age—zirconium, titanium, lithium, hafnium, tantalum, and columbium. These are the products of the future, based on technologies still largely in their industrial infancy. But they have great potential for the future, and for improving the economy of the Northwest region, if the energy base provided by the falling water of the Columbia River is directed toward its best possible use.

During the Easter recess, Mr. President, it was my pleasure to deliver the dedicatory speech at the new zirconium plant of the Wah Chang Corp., at Albany, Oreg. Zirconium is the metal which cloaked the atomic fuel of the submarine *Nautilus* on its historic 60,000-mile voyage. I have been told by management of the Wah Chang Co. that its expansion plans call for tripling of output of rare metals by the end of this year. This will mean an annual plant payroll of about 750 or 800 persons and the production of hundreds of thousands of pounds of a new industrial material which was virtually unknown only 10 years ago. It must be remembered that in 1945, scientists at the Bureau of Mines laboratory in Albany made metallurgical history when, after long research, they produced 90 grams of rare zirconium through a magnesium reduction process. In my opinion, the mushrooming of zirconium production from 1945 to 1957 is but one indication of the industrial potential which lies ahead through expansion of our industrial power supply. This is a new industry, heavily dependent on low-cost power in large volume, which will provide paychecks each week for 52 weeks a year. It is the kind of new industry which Oregon needs to help level out the peaks and valleys of unemployment experienced in the past because of our reliance on agriculture and lumbering.

POWER-BASED INDUSTRIES MAKE LARGE TAX CONTRIBUTIONS

Another facet of the impact of new industry is illustrated in 1952 study by Bonneville Power Administration researchers. It was shown that 13 electroprocess industries buying their power from BPA produced about $250 million in metals and chemicals. Federal income taxes and excess profits taxes on the output of these power-created industries amounted to an estimated $17 million. Local property taxes paid by the new companies were $1,669,000, or about 1 per cent of all taxes levied on real and personal property in the States of Oregon and Washington combined.

The effect of new industry in broadening the tax base also is felt at the local level. I have been advised by the Wenatchee, Wash., Chamber of Commerce that the Alcoa plant there alone pays a fraction over 12 percent of the entire property tax for Chelan County. The aluminum plant pays nearly double the taxes of the next largest taxpayer, the Great Northern Railroad, and nearly five times as much as the telephone utility. In addition, the Alcoa plant has the largest single payroll in the entire area, over $5 million annually.

Industry has come to the Pacific Northwest in the past, and more will come in the future if the supply is made available. But it must be low in cost. Because of its distance from major markets and high costs of transportation, the Northwest can maintain competitive equality with more favored areas only if energy for manufacturing is developed at the lowest possible cost. Waterpower is our region's principal natural source of fuel. The cost of generating it is of prime importance.

NEW YORK ALLOCATES LOW-COST POWER FOR INDUSTRIAL EXPANSION

This fact was brought home to me recently during the hearings of the Senate Subcommittee on Rivers and Harbors on a bill to authorize the State of New York to develop hydropower at Niagara Falls. I was greatly impressed by the number of corporations, such as International Minerals & Chemical Corp., Speer Carbon Co., Kimberly-Clark Corp., and Hooker Electrochemical Co., whose officials expressed to me in letters their great concern over availability of a low-cost power supply in the New York area, in which they had operated for many years.

For instance, a letter from the executive vice president of Kimberly-Clark Corp., Mr. W. R. Kellett, related:

> Kimberly-Clark located in this area initially because of the favorable power rates. These rates have enabled Kimberly-Clark to remain competitive in spite of the lack of basic raw materials in the Niagara Falls area.

It was apparent from this letter that power costs were a determining factor in the location of plants of this paper products company.

This matter of power costs was further underscored in a letter received from Mr. Bjarne Klaussen, president of Hooker Electrochemical Co., of Niagara Falls. This company employs more than 4,500 persons, over 86 percent of them in 4 plants located on the Niagara frontier. Mr. Klaussen wrote:

> The importance of power, at reasonable rates, to our company can be gathered from the following figures giving the percent of total manufacturing costs represented by power from some of our basic products:

	Percent
Caustic soda	21.3
Caustic potash	12.0
Chlorine	24.1
Hydrogen	11.6
Phosphorus	19.0
Sodium chlorate	30.0
Sodium perchlorate	29.4
Potassium chlorate	16.5
All products	10.3

Mr. President, these letters were a revelation to me, because political opponents often have challenged my claims that an ample supply of low-cost power through Federal dams would be an incentive to new industry. These critics of low-cost Federal power for Northwest industry usually contend that Oregon's tax structure, lack of an Oregon sales tax, real property levies, or some other tax factor blocks new industry from Oregon.

It was significant, I think, that the officers of these New York corporations did not mention any especially favorable New York State tax conditions as the reason for wanting action on Niagara Falls power development. Actually, Mr. President, the 1956 State individual income and corporation net income levies for the 2 States show Oregon collections from these sources were $49.58 per capita, New York collections were $41.40.

No, the concern of these executives was not primarily over the tax structure, but over the availability of power at low cost. I might add, Mr. President, they seek power even at rates nearly double the Bonneville Power Administration's average industrial charge of 2.24 mills per kilowatt-hour. I think it is reasonable to assume that Niagara's nearness to major market centers and moderate power costs, rather than tax factors, have determined the location of plants there. Likewise, it is reasonable to assume that the Northwest's hopes for new industry can only be achieved by preserving low-cost power and by directing a reasonable portion of the supply into industrial uses. No matter what the tax situation might

be, the State of Oregon could never compete for new industry if the advantage of low-cost power were erased.

Niagara area businessmen have made it apparent that they favor allocation of power to industries. This concept has been firmly fixed in proposals for development of St. Lawrence Seaway energy and Niagara Falls energy by the New York Power Authority. New York State's share of firm power production on the St. Lawrence will come to about 735,000 kilowatts. Of that portion, the New York Authority already has allocated 174,000 kilowatts of firm power to Aluminum Company of America and 200,000 firm kilowatts to Reynolds Metals Co. This latter contract was subjected to considerable controversy in New York State before it was finally approved by Gov. Averell Harriman. When the decision was finally reached, however, it was hailed in newspaper editorials as a contribution to the State's economic development. An editorial in the New York Times of February 15, 1957, reflected the general sentiment. It said:

> The direct benefits of St. Lawrence and Niagara power at low rates are confined to economic transmission distance. But all the people of the State benefit indirectly when new industry is attracted, when business prospers. The localities build a sounder fiscal foundation, need less State aid. The State receives more bountiful tax collections. Mr. Harriman has made a decision that is good for New York State.

This action in New York is a strange contrast with what has happened in Oregon, where some business and financial interests have deprecated the contribution of the aluminum industry to our economy. The aluminum plant which will be built by Reynolds near Massena, N. Y., will cost approximately $88 million, about the same as a similar plant under construction by the Harvey Aluminum Co. near The Dalles, Oreg. Both plants will employ about 1,000 workers, with an annual payroll of over $5 million. In New York, the plant is greeted as a sound addition to the economy. In Oregon, some political figures and business interests attempted to have the contract canceled between Bonneville Power and Harvey. New York is not exactly a backward area and Oregon is not a booming industrial empire, so I am at a loss to understand the contrasting positions, but it is plain that New York wants power to go to new industry.

OREGON MUST PROFIT FROM EXPERIENCE OF EASTERN STATES

Oregon and the other States of the Pacific Northwest must base their hopes for new, permanent industrial payrolls on low-cost power in abundant supply. The region's economic future would be foreclosed by abandonment of the Federal power program. Let me explain what I mean.

Today, at the new community of Omal, Ohio, the Olin-Mathieson Chemical Co. is erecting a huge aluminum smelter and steam-power plant, which will burn coal for fuel at the mine mouth. This power will be produced for slightly less than 3.5 mills per kilowatt-hour. The coal supply is guaranteed by the mine owners for at least 100 years. The Ohio plant is located in the midst of the Nation's major aluminum-consuming market area.

What industry is going to erect a costly plant in the Northwest to obtain energy at private-utility rates when it has the opportunity to purchase steam power for 3.5 mills per kilowatt-hour within a mashie shot of millions of customers?

Even the Bonneville rate of 2.1 mills might have some difficulty competing under these circumstances, should railroad freight rates continue to rise. The Olin-Mathieson people, incidentally, have told me that they made unofficial representations to the Bonneville Power Administration for an adequate allotment of power but, of course, it was not available under existing circumstances in the Northwest. Two-mill industrial power might have brought Olin-Mathieson to Oregon.

The situation of Olin-Mathieson in Ohio is not an isolated instance of the small competitive margin between eastern-produced steam power and northwest-produced hydropower. The Kaiser Aluminum & Chemical Corp. has under construction a $216 million aluminum mill and smelter at Ravenswood, W. Va. Would this huge development have come to Oregon, Washington, Idaho, or Montana if the industrial energy were available? The answer is made moot by the circumstances—the power was not available in the Northwest. It was not available because the Federal river development on the Columbia had been throttled by the present administration. It was not available because of the administration's power policy closing off the sale of new power to industry.

I think both of these policies are unwise, shortsighted and adverse to the interests of my State and the entire Nation. I will continue to work for their reversal. I am proposing that low-cost Bonneville power be directed toward industrial uses because I believe that such action will be the key to the future expansion of every individual State in the Northwest which knows how to take advantage of it. It will determine the degree of maturity reached by the region's economy.

The plant being built by Kaiser at Ravenswood is an example of the climactic business expansion which comes when new industry is brought to an area. I ask unanimous consent to have printed in the RECORD a story of this development which appeared in the New York Times of Sunday, May 26, 1957.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

VILLAGE TACKLES BOOM IN ADVANCE—KAISER ALUMINUM SUPPORTS RAVENSWOOD'S EFFORTS TO AVOID GROWING PAINS

(By Jack R. Ryan)

RAVENSWOOD, W. VA., May 24.—The $216,000,000 aluminum mill and smelter complex under construction down the road a piece might well have turned this little Ohio River village into a jerrybuilt boomtown by now.

Or, just as regrettably, into a dispirited company town owned and bossed by the Kaiser Aluminum & Chemical Corp.

The huge aluminum project is about half completed, and Ravenswood has managed to steer away from both those pitfalls. But the task has not been simple, either for the harassed town fathers or for the company.

The means they are working out to make sure the town will attract the kind of permanent families they want are being watched closely by other corporations planning similar invasions along the Ohio and elsewhere.

Before the turn of the century this was a bustling river port serving prosperous farms. But its importance faded when a railroad took over much of the river traffic and a major north-south highway bypassed the town several miles to the east. Its population dwindled, its young people moved elsewhere looking for jobs, and Ravenswood became a sleepy village of 1,175, inhabited mostly by elderly people.

To Kaiser Aluminum, Ravenswood looked like the answer to a serious problem in logistics. The company's only sheet and plate rolling facilities were in Spokane, Wash., its only foil mill near San Francisco. Mills here would be within 500 mies of 70 percent of the Nation's aluminum-consuming market. Delivery time would be cut sharply, transportation costs slashed as much as 75 percent.

Also, alumina—or semiprocessed bauxite—from a new plant at Gramercy, La., between Baton Rouge and New Orleans, would need to travel only about 1,000 miles by river barge to a smelter here, compared with a 2,600-mile rail haul from the old Baton Rouge alumina plant to the smelters in Washington.

And electric power for the smelter was available here in abundance, based on tremendous reserves of coal.

The plant envisioned in 1954—and twice expanded on the drawing board since—is going up on schedule. Machinery, furnaces and cranes are being installed in spawling, cavernous mill buildings made of aluminum. Thirty-two acres are under roof and a lacework of steel girders covers scores of acres more, where the smelter is being erected.

A few big rolling mill units already are turning out light-gage sheet and foil. Others are being tuned up. The first of four potlines, or series of smelting units, will start pouring primary ingot late this year. Three others should be in production by mid-1958, and 3 more are being planned for an ultimate primary capacity of 220,000 tons a year.

VILLAGE COMES ALIVE

To Ravenswood, the coming of this industrial giant ended a long stagnation. There were young people on the streets again, cash registers rang briskly, the number of bank depositors soared.

But stunning problems of housing, schooling, roads, sewers, recreation were thrust on the village. The handful of merchants who principally direct its civic affairs were suddenly faced with the need to prepare for a twelvefold increase in population within a few years.

Kaiser Aluminum brought in the first 70 families of supervisory personnel a year ago, chiefly from Washington, California and Louisiana—young people with children mostly, eager to establish pleasant and permanent homes and well able to pay for them. Many of these built handsome prefabricated homes. Others combed surrounding Jackson County for living quarters and drove as much as 40 miles over mountain roads to the plant.

Today there are three times that many supervisory families and the need for housing is acute. Some 200 housing units and 56 apartment units have been built—but 4,000 more will be needed for the approaching influx. Employment at the plant now numbers 800, not counting temporary construction workers. A year hence plant employment alone will be 3,000, and eventually it will reach nearly 5,000.

PLANNERS CALLED IN

Kaiser Aluminum is anxious to help stimulate the growth of a well-balanced community so as to stabilize employment, but it is trying to keep its own participation and control at a minimum. It does not want to dominate the lives of employees away from the job, and most of all it is determined to avoid anything smacking of a company town—particularly unpopular in West Virginia.

So it engaged a firm of urban planning experts to help Ravenswood's City Council with a master development plan. To prevent land speculation while the plan is being worked out, it optioned enough acreage for 4,000 homes adjacent to town. It intends to turn this over to builders at cost.

Much of the remaining land suitable for housing in this area of steep hills and occasional floods is owned by Ray E. Ritchie, president of a large construction concern here and of the Jackson County Bank. He has made an agreement with the company to withhold those 3,000 acres from market until the town decides on its plan, works out zoning, and chooses developers for its shopping centers and other facilities.

Meantime, entrepreneurs seeking to build stores and taverns and gasoline stations must wait.

Most of the schools in the country are 1-room buildings without running water; the rest are antiquated and impoverished. There were 3,600 pupils when Kaiser arrived. This fall there will be 5,000 and next year the school population may almost double.

An emergency school-bond issue was rejected by the voters recently, apparently because it stirred regional jealousies elsewhere in the county, according to townspeople here. Kaiser officials believe the pressure that will be put on the voters by increasingly concerned and active parent-teacher associations will remedy this situation eventually.

To ease the immediate crisis, the company is building a modern 20-classroom elementary school here that it will lease to the county for $1 a year.

The Appalachian Electric Co. solved the town's power-expansion problem by buying the little old municipal diesel-generating plant and connecting Ravenswood to a power network. The city council is hopeful of Federal assistance to get sewers built, and that a community development concern with which it is negotiating for mass housing will be able to arrange reasonable mortgage terms, despite the tight-money market, through the Federal National Mortgage Association.

Kaiser aluminum has contributed a picturesque old hillside farm to help start a recreation program, and has agreed to provide funds to remodel the farmhouse for a club and the barn for a dance and meeting room. Employees are doing the work on a volunteer basis and building picnic tables, barbecue pits, trap-shooting ranges and baseball diamonds.

Mr. MORSE. Mr. President, will my colleague yield for a few questions?

Mr. NEUBERGER. I am happy to yield.

Mr. MORSE. Before I ask my first question, I wish to congratulate my colleague for the excellent speech he has just delivered on one of the most important issues that confront the people of the Pacific Northwest.

I want the Senator to know that I am delighted to be associated with him as a cosponsor of the bill he has introduced.

My first question is this: Will not this bill provide an opportunity for hearings on the question of the operation of the so-called preference clause, about which there seems to be some controversial discussion in our State at the present time?

Mr. NEUBERGER. I appreciate the fact that the senior Senator from Oregon has asked that question. It is my intention to ask the able chairman of the Senate Committee on Interior and Insular Affairs, the distinguished senior Senator from Montana [Mr. MURRAY], to authorize hearings both at the field level and in the National Capital on the proposed amendment to the Bonneville Act, which the senior Senator from Oregon and I have introduced today.

Mr. MORSE. Mr. President, the introduction of this bill is very typical of my colleague, because it shows that he never ducks issues and never evades them. When a problem which is of concern to the people of our area arises, we can always be sure that the junior Senator from Oregon will ask the question, "What are the facts?"

Therefore, I ask the Senator this question: Does not the bill he has introduced today, of which I am a cosponsor, give the opportunity for a discovery of the facts, and give all people who have varying points of view, with respect to the question of the distribution of power, a chance to come forward and make a record of whatever facts they think they have to support their respective contentions?

Mr. NEUBERGER. It is also my intention—and I know the senior Senator from Oregon will join with me—to make a request of the chairman of the Senate Committee on Interior and Insular Affairs, that all available and legitimate points of view in the Pacific Northwest, as well as in the National Capital, be expressed at these proposed hearings.

Mr. MORSE. If my colleage and the Senate will permit me, I should like to take a minute or two preliminary to my next question to emphasize a couple of vital points which the Senator has made in his excellent speech.

Of course, Mr. President, as the junior Senator from Oregon has pointed out, this problem of the distribution of power between and among groups clamoring for it would not have arisen if we had had a program which was designed to provide adequate power development. What we have been confronted with in recent years is an administration whose natural resource and power program has been one of underdevelopment, not maximum development; it does not contemplate full development of our river basins, as my colleague brought out in his speech. The present administration has had a so-called partnership program, which has been a program of underdevelopment and not full development. The administration has been proposing a power program whereby the taxpayers would have to foot a substantial share of the bill for the construction of facilities which would be owned by the private utilities and not by the taxpayers.

One of the excuses for that kind of a giveaway program on the part of this administration has been that the private utilities would pay taxes on their plants, whereas a multiple-purpose dam owned by the taxpayers would not pay taxes. In fact, I was astonished to have an editor in our State so able as the editor of the Salem Statesman, a former Governor of our State, in an editorial attacking me a few days ago, make reference to the fact that I was standing for the building of dams which would not pay taxes. I may say, for the enlightenment of this editor, that is not news to anybody in the State of Oregon. Of course I stand for the building of multiple-purpose dams by the Federal Government, to be owned by the taxpayers and not given away, as this administration would give them, to private utilities, to be owned by private utilities, which would reap profiteering profits for decades to come.

I may say to the editor of the Salem Statesman in these remarks today that of course what my program would do—and it is the program joined in by my colleague, as my colleague has brought out in his speech, about which I wish to ask him a question in a moment—would be to bring into the Pacific Northwest private businesses which otherwise would never exist there, because they must come into the economic environment of low-cost power in order to make a profit in the Pacific Northwest.

What we have seen—and it is demonstrable and cannot be denied—is business after business and industry after industry go into the Pacific Northwest or spring into being there, because low-cost power has made it possible for them to operate at a profit. What they pay into the Federal Treasury by way of tax dollars over the years is hundreds of times—note my figure—the taxes that would go into the Federal Treasury from private utilities in connection with underdevelopment programs, by way of puny dams which would offer no inducement whatever for a great expansion of private enterprise in the Pacific Northwest.

Is it not true, as the figures which the junior Senator from Oregon has brought out in his able speech, that as a result of the low power cost in the Pacific Northwest, as a result of the multiple-purpose dams which have been built, we have been able to increase the taxes which have gone into the Treasury of the United States, which taxes would never have flowed into the Treasury in any such amounts if these resources had been left to the underdevelopment of private utilities?

Mr. NEUBERGER. There is no doubt that all the statistics presently available support what the senior Senator from Oregon has said about the economic development of the Pacific Northwest. Prior to the time that Franklin Delano Roosevelt, a great Democratic President, and Charles L. McNary, a distinguished Republican Senator, began to work together for industrial development on the Columbia River, only about 28 percent of the farms in Oregon had electrical service. In addition, there was not one ounce of aluminum smeltered anywhere west of the Mississippi River, to say nothing of the area west of the Continental Divide.

As a result of the power development which was brought about by the great Federal program in the Columbia River

Basin, more than 97 percent of the farms in our State today have central electrical service. In addition, there is produced in the Pacific Northwest more than one-third of all the light metal which is used in the United States for military purposes and civilian purposes.

There are so many other additional industries relying on cheap power, that if I were to undertake to enumerate them it would occupy nearly all the time of the Senate this afternoon. But those are specific statistical examples of how low-cost power development, initiated and carried out by the Federal Government, has made possible the greatest major industrial prosperity which has ever come to the Pacific Northwest.

I think it is significant that the very thorough economic atlas published by Oregon State College, at Corvallis, Oreg., shows that the 10-year period in which, for the only time in its history, the Pacific Northwest had a greater gain in industrial payrolls than the national average, happened to coincide exactly with the first decade when Bonneville power became available and first came on the line. It is obvious that what the senior Senator from Oregon says about industrial development in the Pacific Northwest is borne out by the facts which we have at hand.

Mr. MORSE. I am very glad the junior Senator from Oregon has made the comments he has made about the tax problem. He emphasizes one of the great fallacies of spokesmen for the administration with regard to the underdevelopment natural-resources program of the Eisenhower administration. Members of the administration are seeking to lead the American people to believe that those who are fighting for full development are urging a program which would result in less taxes going into the Treasury of the United States, when the fact is that full development means a greater chance of maximum development of our economic potentialities; and when we attain the maximum development of our economic potentialities, we increase the amount of money going into the Treasury by reason of such development.

Mr. NEUBERGER. There are also involved local taxes collected for schools, roads, hospitals, clinics, and the general public welfare, as well as all the other purposes of local government. That is a very important factor, because the taxes paid by the new industries burning Columbia River power for fuel are extremely valuable to all the county, school district, and State functions carried on in the Pacific Northwest.

Mr. MORSE. That leads me to the point I wish to make preparatory to the next question. Before proceeding with that subject, I wish to stress the fact that the jobs which would be created by reason of the program for which my colleague is fighting in the Pacific Northwest represent a great source of new taxes for the local communities to support their police departments, their fire departments, law-enforcement agencies, schools, and all the other costs of local government. Those benefits are in addition to the increased number of tax dollars which go into the Federal Treasury.

I wish now to come to another portion of the Senator's speech. He said that he did not undertake to fix responsibility for the existing situation. That is in accord with his usual charitable attitude. However, he did comment upon a certain irony in the situation with regard to the power-development program.

As my colleague well knows, for some years vested reactionary economic interests in our section of the country have been doing everything they could to thwart full development, and to sponsor underdevelopment. Now, when they realize that the people of that area manifested pretty clearly in November 1956, as they did in November 1954, that they want full development of our river basins, and that they have had enough of the underdevelopment of the Eisenhower administration, we hear the cry about allocation of power. Organizations such as the Portland General Electric Co. are urging that something be done at this time, before the dams are built, to obtain some commitments for the allocation of power on a State basis, because, as they say, a State like Washington has more public preference groups than does the State of Oregon.

It is ironical, but I say to the Portland General Electric Co., and to some of the other reactionary economic forces which are found within the Portland Chamber of Commerce—and that means most of its members—that if they had been fighting as hard as have the junior Senator from Oregon [Mr. NEUBERGER], and Representatives AL ULLMAN, CHARLES O. PORTER, and EDITH GREEN, before they came to the Congress and since they have been in the Congress, for full development of our power resources, by way, for example, of such a great power dam as Hells Canyon, they would not be so disturbed as they now are about the problem of the future in regard to allocation, because, as the junior Senator from Oregon has pointed out, our problem is to develop an abundance of power, not a scarcity of power, which would be the result under the Eisenhower program.

I appreciate the kindness of my junior colleague, but I do not propose to be quite so kind to these reactionaries. One of the reasons they find themselves in the plight they are now deploring is that they have used their powerful economic political force with this administration to block full development of power for the benefit of the people of Oregon.

I say to them, to complete the argument, Look to your Portland Chamber of Commerce, and some of the other chambers of commerce in the State of Oregon. Look to the Portland General Electric Co., the Pacific Power & Light Co., and some of the other private utility companies, if you want to know why you are confronted with a growing threat of more and more brownouts, because these selfish reactionary economic forces in the Northwest have been working against the best interests of the people of Oregon. They have been joining with privateers across the country in an effort to block, for example, great multiple-purpose dams such as Hells Canyon. I say to the people of Oregon that they can be sure that the Members of Congress from Oregon whom I have just named will stand shoulder to shoulder in their endeavor to bring about the great program which the junior Senator from Oregon has been supporting on the floor of the Senate today.

What we need is full development of our power potential, not underdevelopment of it. We shall never realize full development of our power if we follow the Eisenhower giveaway program in regard to our natural resources in the Pacific Northwest.

If we can bring about the construction of such dams as Hells Canyon, John Day, and the other very much needed multiple-purpose dams, then, I ask my colleague, shall we not have, for the first time, an opportunity, under our pooling principle with respect to power, to give careful consideration to such a program as he outlines in his bill today, whereby we can determine to what extent, for industrial purposes, we can agree upon a formula for the distribution of power, not on the basis of State lines, but on the basis of industrial and economic needs? The approach my colleague is making is the one that should be followed, after, however, there is a general recognition that the dams should be built. Then we can proceed with the consideration of a formula for the distribution of the power.

Mr. NEUBERGER. Mr. President, of course there is some genuine irony and incongruity in the situation mentioned by the senior Senator from Oregon. The people who created the power shortage are now bemoaning the fact that there is a lack of power—if I may use that expression—to divide up. The people who have thwarted Federal development of Hells Canyon on the Oregon border, now deplore the fact that there is not sufficient power for Oregon. Those same people took the lead in surrendering the Hells Canyon site for fractional and piecemeal use by a private power company, with only about 5 percent of its entire load for use within the borders of the State of Oregon. Those are the people who said Hells Canyon was not necessary. They are the people who have delayed for over 3 years the great John Day Dam, with over a million kilowatt capacity, by advocating their so-called partnership scheme, which proposes to deauthorize the John Day project as a Federal dam site.

They are the people who brought about the appointment of personnel to the international joint commission of people who have been hostile to Federal development on the Columbia River.

They are the officials who are now charged with the responsibility of negotiating with our Canadian neighbors for the great storage facilities along the upper Columbia, which will increase downstream production in the United States. Those are the people who now lament the fact that there is not enough power in Oregon, after they had been the leaders in the movement to deny Federal development.

It is almost like the case of somebody pushing a man off a high cliff, and then berating the family doctor because he did not save the man's life.

I should like to say this to the senior Senator from Oregon. The reason I have introduced the bill—and I am very happy about the fact that the senior Senator from Oregon has joined as a cosponsor—is that we can now discuss intelligently how this additional supply of power shall be distributed when it is eventually available.

I have included in the bill two phases of this distribution. One is a geographic distribution, and the other is with reference to the type of use made of the power. It seems to me that we must bring about a widespread geographic distribution of the power among the several States, and also the wisest possible type of utilization.

I believe that in the early days of the Bonneville project it probably was essential that the major use be for farms and homes. At that time most of the farms in our area had no electricity. I know, for example, that Mrs. Neuberger's own family, who ran a dairy farm, did not receive central electrical energy until the Bonneville system was created and the REA's came into existence.

However, today, when nearly all of our farms are electrified and when we have in the Northwest, if I am not mistaken, the greatest average use of electricity per residence in any region of our Nation—although at the same time we have the highest unemployment rate in the whole Nation—it may be that we should try now to get payrolls based on the low-cost power supplies, for which the senior Senator from Oregon fought so long to bring into being. That is what we want to have discussed when the hearings are held on the bill.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. NEUBERGER. I am very happy to yield?

Mr. MORSE. I wish to say that I associate myself with every word of the comment made by the Senator from Oregon. Before I ask my next question, I should like to comment on another bit of irony. It has some humorous characteristics too. Representatives of the Portland General Electric Co. are very much concerned now about the allocation program. They are concerned because some public preference bodies may get a substantial amount of power, with the result that the people in our State who are served by private utilities will find themselves lacking an adequate supply of power.

It was not so many months ago that my colleague debated all over the State of Oregon with the then Representative in Congress from eastern Oregon, and the now-defeated Mr. Sam Coon. In my opinion he was defeated primarily because of the wrong position he took on the power issue. However, it was personnel of the Portland General Electric Co. who traveled from debate platform to debate platform as advisers and, I think it is proper to say, coaches to Mr. Coon in his debates with the junior Senator from Oregon. In those debates the junior Senator from Oregon pointed out, as he has stated on the floor of the Senate today, the vital interest of the people of Oregon in maintaining their control and authority over public power resources.

It is rather ironic that in those debates, when the Portland General Electric Co. was trying to get monopolistic control of the John Day Dam, the Portland General Electric Co. wanted to get all the power under its control, under a kind of gift arrangement which it wanted to work out with the Eisenhower administration. I did not hear their coaches to Mr. Coon, or any of the other officials, at that time express any great concern about the people, those constituting the so-called public preference groups.

Now that they know they do not have a chance to get John Day as a partnership dam, they suddenly show great concern about getting power allocated for the benefit of, as they say, "all the people" of Oregon.

I am willing to cooperate with the Portland General Electric Co., if they want to cooperate. I will cooperate with them if they want to work for a new principle on the whole power program. So, from the floor of the Senate, I invite them to join with us now in using their influence—and they have demonstrated time and time again that they have great influence with the administration, along with other private utility bodies and their other colleagues, who helped to form Ebasco, for example, one of those service agencies for the private utilities monopoly combines—to secure the adoption of the principle we advocate.

I invite them to join with us in the battle for the great Hells Canyon Dam, a project which seeks to develop the maximum potentials of the Snake River for the benefit of all the people of the Pacific Northwest. I will say again what I have said to their representatives, when they have come to discuss this matter with me, "Once we get this power supply built up and working I will see to it that you get fair long-term contracts for power out of the common power pool—contracts which will not be limited to the amount of power you put in, but will be determined by a formula based upon the economic needs of the areas you serve."

That stand of mine has got me into trouble, I may say, with some so-called public preference groups, who seem to think that there should be no modification at any time, in any way, of the so-called public preference program. I have said to the public preference groups that I am a public preference man, but I do not recognize the public preference clause as a sacred cow. I am first for a power distribution program which will best serve the needs of the people of my area and Nation. I do not intend to make a sacred cow out of the public preference clause. One reason that I am a cosponsor of the bill introduced by the junior Senator from Oregon is that I think it offers an opportunity to gather the facts as to how public preference has worked in the past and what its advantages or disadvantages during any change may be in the future.

I think we should work to that end. But I may say that the private utilities, in my judgment, if they cooperate in a pooling program—and a pooling program is essential for low-cost power—are entitled to fair treatment when it comes to contracts which will make available to them the power they need to serve the private-utility consumers.

So I ask my colleague if the introduction of the bill means that not only will we make a review of the operation of public preference, but that we will have an opportunity to consider the so-called State power agency he has advocated for so long, which I think is absolutely sound, and which, of course, could supplement and strengthen the so-called public preference program. A State power agency, which would consider the economic needs of the State and the need for power, for example, by a private utility which may be serving a great need in some area of the State, could enter into a long-term contract with the private utility, be it the Portland General Electric Co., the Pacific Lighting Co., or Copco, or any of the others, in return for which, of course, there would be an agreement with respect to power rates and a guaranty of a continuation of low-cost power.

Will that not, I ask my colleague, strengthen the possibility of favorable consideration of a State public power agency, such as he referred to in his speech?

Mr. NEUBERGER. I believe the bill we have introduced today will afford an opportunity for a review of all Bonneville marketing policies.

In addition, I am happy to report to the senior Senator from Oregon, as I am certain he already realizes, that the recent Oregon State legislative session has placed on the ballot a proposal to create a State power agency, which we have discussed. It is my understanding that the people of Oregon will vote at a referendum on this particular issue in November 1958. It is my hope that the people of Oregon will then bring into being an active, effective State power agency which will qualify under the preference clause as a preference purchaser of energy from the Columbia River power system.

I believe the most important responsibility a State power agency could fulfill, as I have tried to point out in my remarks on the floor today, would be to buy power and resell it to industrial firms in the State of Oregon at the Bonneville wholesale rate. These should be firms which will offer the most widespread, diversified economic use of the power for payroll and employment purposes that it is possible to obtain.

Columbia River kilowatt-hours, which can be generated for from 2 mills to 3 mills a kilowatt-hour, are, in my opinion, virtually the greatest resource the State of Oregon has for additional economic development.

I believe at present the best use to which these kilowatt-hours can be put for our State is to find new and diversified payrolls.

I have high hopes that the State power agency will be brought into being in November 1958, and that the amendment which we have offered to the preference clause will give strength and vitality

to that State power agency as a source of new payrolls and new jobs in Oregon. I commend Gov. Robert D. Holmes and his legislative leaders on this particular measure—Representatives Dick Eyemann, of Lane County; and Don S. Willner, of Multnomah County—for the State power agency bill now on the Oregon ballot.

Mr. MORSE. I think there is another phase of the matter which ought to be mentioned in the colloquy, as we make our record today.

My colleague knows there has been a great deal of discussion in our State among many persons in regard to the possibility of a so-called corporation to be organized for the sale of bonds for the handling of power distribution. I have given much thought and attention to that proposal. Its most ardent advocate, as the Senator knows, is one of the most able power experts in our whole section of the country, Mr. Gus Norwood. I have said, as the public record shows, that if and when such a proposal is perfected in bill form, I shall be very glad to introduce it in the Senate for the purpose of holding hearings, so that we can ascertain what the pros and cons really are on the basis of the evidence advanced.

As my colleague knows, the general principle of such a program has been editorially supported by the Portland Oregonian. I hope that no editor on the staff of the Portland Oregonian will suffer a heart attack or a brain hemorrhage when he learns that he might be in agreement with me or that I might be in agreement with him on this particular project, since there are so few things in which I find myself in agreement with the editorial writers of the Portland Oregonian. But I say from the floor of the Senate today that, so far as I am concerned, I think that proposal also offers us the opportunity, probably in a subsidary way, prior to the introduction, at least, of any bill, to take a look at the whole problem of power generation and distribution in the Pacific Northwest, with some consideration being given to the corporation idea.

I think that what ought to be done—and I know my colleague, as a representative of the people of our State, will agree with me on this—is to place all the possibilities on top of the table. We ought to take a long look at all the various proposals for the solution of the very vital power need in the Pacific Northwest. The difficulty which confronts so many partisans is that they seem to think these programs are exclusive, one from another. I have never thought so. I think, for example, there can be some adjustment of the so-called public preference clause along the lines of a program for industrial use, such as is employed in the bill my colleague is introducing today, and at the same time for the consideration of a State corporation for the distribution of power, and also a State power agency, such as my colleague has suggested. At least, I do not think they are so exclusive, one from another, that they cannot be combined for consideration in one hearing.

I should like to see us, as we go into the hearing, proceed with the idea of ascertaining, on the basis of the facts, what, if any, modification of the Bonneville Act is needed. After all, the corporation idea amounts, in effect, to a modification of the Bonneville Act.

I wish to compliment highly my colleague for the introduction of the bill, because it is, I feel, an answer to some critics in Oregon who have been trying to give the false impression in our State that the two Senators from Oregon are for Federal power or no power at all. Once again we have demonstrated in this colloquy that those words cannot be reconciled with the truth. We have stood for the development of private power by private power companies at low-head dams, provided that it be at low-head dam sites. We have stood for the development of multiple-purpose dams at multiple-purpose dam sites, to be owned by the people of the country, with the proceeds, of course, to go into the Treasury of the United States, and a part of the proceeds to be used to pay for the other multiple-purpose needs such as irrigation, navigation, recreation, and the very important item of flood control.

Then we have stood for the pooling of power by public bodies and private utilities in a common pool, in order to maintain the low-cost consumer power rate in our section, a rate which is so vitally needed if we are going to develop economically because of the disadvantageous freight rate differential and other disadvantages.

I think my colleague is to be commended for once again focusing attention on this kind of program. As he has pointed out, respecting a great Republican Senator from our State in years gone by, Senator McNary, in a very real sense what the junior Senator from Oregon and I have been arguing for on the floor of the Senate today is the extension of what amounts to the McNary program.

Mr. NEUBERGER. Mr. President, I thank the senior Senator from Oregon for his generous observations.

In conclusion, I desire to point out that I, too, am openminded about the so-called regional corporation approach to the financing of other projects in the Columbia Basin. However, I wish to make it clear that the Federal development program was an outstanding success until January 1953. Had that program not been summarily ended in that year, it would not be essential and necessary for us to consider some of the alternatives which are now forced upon us.

Had we continued with the program begun by Franklin D. Roosevelt and Charles L. McNary, and continued by Harry S Truman and many others, it would not have been so compelling that we seek, or at least consider, such alternatives as the so-called regional corporation. Inasmuch as the senior Senator from Oregon [Mr. MORSE] has mentioned the position of the Portland Oregonian, I think it should be emphasized that the Oregonian has been supporting very ardently an Oregon State power agency which would be able to resell energy at wholesale to industrial customers. In that advocacy, I think the Oregonian is eminently correct, and is to be commended for trying to promote within our own State a State of Oregon entity which may qualify within the preference clause for the requisite authority to make sales that would encourage new payrolls in our State.

Inasmuch as the senior Senator from Oregon [Mr. MORSE] and I represent, together, in this body a State which during the past winter had the highest unemployment rate of any State in the Nation, we have a real responsibility resting upon us. In addition, we represent a State which approximately 8 or 9 years ago had a per capita income for its people far above the national average, whereas now it is slightly below the national average. These are circumstances which he and I cannot overlook, and which we are not overlooking. Both he and I realize that perhaps our greatest opportunity to terminate this economic decline in Oregon is to use low-cost power for jobs in Oregon. That is the goal we are seeking today in the Senate, and which we are going to continue to seek when hearings on the bill we have introduced in the Senate, are held.

Mr. President, I yield the floor.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed, without amendment, the following bills of the Senate:

S. 895. An act for the relief of Josefa Kusiak; and

S. 1203. An act for the relief of Lydia Anne Foote.

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (H. R. 6700) making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1958, and for other purposes, and it was signed by the President pro tempore.

CORPORATE SALARIES

Mr. McNAMARA. Mr. President, last week the chairman of the Republican policy committee placed in the RECORD a list of salaries paid the presidents of American labor unions. I want to thank the senior Senator from New Hampshire for this service to statisticians, historians, and others who may be interested in the subject.

According to the Senator's statement, the source for this compilation was the statements filed annually with the Department of Labor, under the Labor-Management Relations Act. It was my understanding that it was the long-standing policy of the Labor Department to release these figures only to individual members of a specific union, if so requested, and perhaps to congressional committees in the pursuit of official business. I was not aware that the senior Senator from New Hampshire was a union member; but I know, of course, that he has the Republican policy committee well organized. I certainly do not want to accuse the chairman of any violation of the spirit of the Labor De-

partment's policy in his zeal to place this vital information before the public.

As a matter of fact, recently I joined a number of my colleagues on both sides of the aisle in sponsoring Senate Joint Resolution 94, which provides for public disclosure of such information. Perhaps the Republican policy committee simply is anticipating passage of the joint resolution.

As I said, Mr. President, we should thank the committee for collecting the data on union salaries. Unfortunately, the committee only half completed the job. If we are to discuss intelligently this phase of labor-management relations, we should not slight management by leaving it out of the salary picture.

In the May 25, 1957, issue of Business Week magazine, a very reputable business publication, there was published a list of corporate executive earnings for 1956. According to Business Week, the figures were compiled from company reports submitted to the Securities and Exchange Commission. In a separate listing, the magazine gave the top 23 earners for the year, including additional compensation. I ask unanimous consent that this list be printed in the RECORD at this point in my remarks.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

23 top-ranking corporate earners for 1956

1. Eugene G. Grace, chairman, Bethlehem Steel — $809,011
2. Harlow H. Curtice, president, General Motors — $695,100
3. Arthur B. Homer, president, Bethlehem Steel — 669,176
4. Crawford H. Greenewalt, president, Du Pont — 600,886
5. Frederic G. Donner, executive vice president, General Motors — 577,625
6. Louis C. Goad, executive vice president, General Motors — 521,100
7. Robert E. McMath, vice president, Bethlehem Steel — 514,340
8. J. W. Schwab, president, United Merchants and Manufacturers — 386,588
9. Morse G. Dial, president, Union Carbide — 383,386
10. Ernest R. Breech, chairman, Ford Motor — 370,000
    Henry Ford II, president Ford Motor [1] — 370,000
11. Henry B. du Pont, vice president, Du Pont — 354,400
12. Samuel Bronfman, president, Distillers Corp., Seagrams, Ltd — 351,042
13. Charles M. White, chairman, Republic Steel — 351,000
14. Walter J. Beadle, vice president, Du Pont — 350,831
15. Walter Dannenbaum, vice president, Du Pont — 347,700
16. Albert Bradley, chairman, General Motors — 341,300
17. Neil H. McElroy, president, Procter & Gamble Co. — 319,974

[1] Not given number; makes list 23 instead of 22.

23 top-ranking corporate earners for 1956—Continued

18. William S. Paley, chairman, Columbia Broadcasting — $316,526
19. Delmar S. Harder, executive vice president, Ford Motor — 315,000
20. Frank Stanton, president, Columbia Broadcasting — 312,335
21. W. K. Whiteford, president, Gulf Oil — 300,061
22. Lewis D. Crusoe, executive vice president, Ford Motor — 300,000

(Source: Business Week magazine, May 25, 1957, from reports submitted to Securities and Exchange Commission.)

Mr. McNAMARA. Mr. President, as you will note, these payments range from a paltry $300,000 a year to $809,011.

Out of curiosity, I had the salaries of the presidents of the 146 labor unions totaled on an adding machine, and the total comes to $2,173,650.94. I am sure that the Senate will be interested to know that the earnings of the top 3 corporation executives alone would just about pay the salaries of all 146 union presidents.

Mr. President, so the top-ranking corporation executives will not feel they are being singled out for any special attention here, I ask unanimous consent that the full list, as published in Business Week, be printed in the RECORD at the conclusion of my remarks.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

	Salary	Additional compensation	1956 total	1955 total
AGRICULTURAL MACHINERY				
Allis-Chalmers Manufacturing Co.:				
R. S. Stevenson, president	$101,800	----------	$101,800	$85,033

[35] Stock bonus plan (retirement).
[36] Retirement trust.
[37] Agreement dated Feb. 24, 1956 under which 2/3 of amount payable under company's incentive compensation plan ($8,000 for Dart included in aggregate salary) will be accrued by company and will be payable to him as contingent compensation.
[38] Includes $20,000 paid under 1946 deferred compensation, payable for 8 years starting 1954.
[39] Shares valued at $64.62½ a share payable in 15 to 20 years annual installments after termination of employment, if earned out (incentive compensation).
[40] Shares.
[41] Deferred remuneration contingently payable in cash (August 1956).
[42] Incentive compensation.
[43] Also $21,866 was paid to contributory retirement plan.
[44] Shares in profit-sharing plan.
[45] Resigned Dec. 4, 1956.
[46] Agreement between company and Iddles commencing Apr. 1, 1957 (or later as full-time employment terminates). Company will pay $20,000 per year for life if he performs advisory and consultive services for company as reasonably requested.
[47] Profit-sharing plan.
[48] Plus 176 shares for Straus, 144 shares for Brownell, and 56 shares for Brown under contingent pay plan; in addition each got $2,871, $2,184, and $154 respectively, as dividend equivalents on contingent allotments.
[49] Retired as president, July 1, 1956.
[50] At 1956 annual meeting an executive compensation plan was approved—payable in 120 equal installments after termination of employment.
[51] Profit-sharing plan.
[52] Includes $10,000 and $12,500, respectively, in deferred profit sharing. Cates also received $15,000 retirement income.
[53] Incentive compensation, shares contingently allotted, valued at $44.53 per share.
[54] Shares.
[55] Thrift plan contribution.
[56] Thrift retirement plan.
[57] Incentive compensation plan.

[58] Employees' saving plan.
[59] Employees' saving plan.
[60] Contingently allotted under stock plan.
[61] Under employees' saving plan.
[62] Thrift plan. In addition to the above, there were payments to annuity purchase plan: Rathbone $16,195; Crane $20,619 and E. E. Soubry $14,453.
[63] Leach retired Oct. 1, 1956, and Baker on Feb. 1, 1957.
[64] Also company contributed under employees saving plan the following amounts respectively: $3,726; $4,626; $2,988; $2,700.
[65] Under company's group insurance and pension plan.
[66] Company's contribution to employees incentive plan.
[67] Excludes royalties on Person to Person.
[68] Pension plan.
[69] Bonus is payable in 5 annual installments, if earned out and amount shown was paid in 1956.
[70] Includes under deferred contingent compensation plan to be received after termination of employment in 10 annual installments:
Staley, 485 shares, at $35.50 per share.
Lustenberger, 313 shares, at $35.50 per share.
Knies, 173 shares, at $35.50 per share.
[71] $10,000 is salary, rest under general office compensation plan.
[72] Includes profit sharing.
[73] Retired June 13, 1956.
[74] Figure includes corporation's incentive compensation fund, $140,000 was allocated—only ¼ paid at time, balance being payable in 2 equal installments (1958–59). Hook, chairman until Nov. 1, 1956, then consultant. Sebald, president until Aug. 15, 1956 thereafter chairman of executive committee and vice president of board. Gray executive vice president until Aug. 15 then president.
[75] Vice chairman after Oct. 1, 1956.
[76] President after Oct. 1, 1956.
[77] Retirement.
[79] Retired Aug. 21, 1956.
[79] Year and payments of profit-sharing bonus plus $24,641 to Mauthe and $99,214 to Watson received as they have reached normal retirement age.
[80] Paid to trustee under profit-sharing plan.
[81] Plus $2,174 paid under retirement annuity plan.

RETIREMENT OF OFFICERS AND MEMBERS OF THE METROPOLITAN AND OTHER POLICE FORCES

Mr. BIBLE. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 328, S. 1770.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The CHIEF CLERK. A bill (S. 1770) to provide for the retirement of officers and members of the Metropolitan Police force, the Fire Department of the District of Columbia, the United States Park Police force, the White House Police force, and of certain officers and members of the United States Secret Service, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Nevada.

The motion was agreed to; and the Senate proceeded to consider the bill which had been reported from the Committee on the District of Columbia with amendments.

Mr. BIBLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. CARROLL in the chair). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BIBLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The first committee amendment will be stated.

Mr. WILLIAMS. First, Mr. President, may we have an explanation of the bill?

Mr. BIBLE. Yes. I intended to have the committee amendments adopted first if that will meet with the approval of the Senator from Delaware, and then to make a brief explanation of the changes and of the entire law. I thought that would be the more orderly way to proceed.

Mr. WILLIAMS. I think it would be better to have the explanation made now.

Mr. BIBLE. Very well; I have no objection to making a preliminary statement at this time.

Mr. President, the proposed legislation now pending before the Senate, Senate bill 1770, is designed to strengthen the retirement provisions for employees of the Police and Fire Departments of the District of Columbia. It was felt that the existing law, which had had no major overhaul for a great many years, should be brought more nearly in line with the Civil Service Retirement Act of 1956.

There were extended hearings by the District Commissioners, representatives of the White House Police Force, the United States Secret Service Division, the Park Police, the Metropolitan Police, the Fire Department, and the policemen's and firemen's associations of the District of Columbia.

After extended conferences, a bill was arrived at on which there was major agreement among those who attended the conferences.

The bill makes a number of changes as compared with the Civil Service Retirement Act.

There was introduced during the session of the Senate on the last calendar call a table, which is to be found at page 7383 of the CONGRESSIONAL RECORD of Wednesday, May 22. By reference to that table I should like to point out a number of changes which are being made by Senate bill 1770.

The first change is found under the heading "General Service Requirements." The present police retirement law requires no minimum service. Senate bill 1770, which is before the Senate makes no particular change in that respect.

There is a difference between S. 1770 and the Civil Service Retirement Act, because the Civil Service Retirement Act provides for at least 5 years' creditable civilian service, including 1 year's covered employment out of the last 2, unless separation is by death or for disability retirement. In that respect—and I think it is a minor difference—there is a difference between the Civil Service Retirement Act and the bill presently before the Senate.

The next section is the section entitled "Compulsory retirement (immediate annuity)." The present law provides "At or after age 60, regardless of length of service at discretion of District of Columbia Commissioners or head of employing department." We on the District of Columbia Committee made no change concerning this particular phrase of the question. The provision, however, is different from that in the Civil Service Retirement Act, because, as the Senator from Delaware is well aware, in the act the provision is "At or after age 70 with 15 years' service. The President," under that particular act, "is authorized to make exemptions from this requirement if deemed in the public interest."

The next general subject is "Optional retirement," and on this point there is a difference. The present law governing policemen and firemen in the District of Columbia provides for optional retirement at age 55 after 25 years' service, at 50 percent. The bill before the Senate provides for optional retirement at age 50, with 20 years' service, with a retirement factor of 40 percent. The Civil Service Retirement Act has a graduated scale affecting those involved in so-called hazardous occupations, which reads as follows, "Age 50, 20 years of service (hazardous law enforcement duty); age 62, 5 years of service; age 60, 30 years of service; age 55, 30 years of service (reduced annuity)."

That, too, is a change in the bill before the Senate, as compared with the Civil Service Retirement Act. As will appear later on in the analysis I am making for the Senator from Delaware, there is a percentage difference as well.

Mr. YOUNG. Mr. President, will the Senator yield?

Mr. BIBLE. I yield.

Mr. YOUNG. The bill before the Senate does not provide any additional benefits for those who have retired; it deals entirely with those who are employed. Is that correct?

Mr. BIBLE. That is a correct statement.

Mr. YOUNG. Has not all previous legislation affected both the retired and employed persons?

Mr. BIBLE. I do not believe that is correct. Perhaps I had better correct my statement. I may have made it a little too broad. The act will become retroactive to last October, the effective date of the Civil Service Retirement Act, and it does blanket in those who have retired from October 1956, up to the present date; but it does not take into consideration and provides no additional benefits for those who retired prior to the effective date of the Civil Service Retirement Act of 1956, nor, I am advised, does it provide any additional benefits for those who had previously retired under the Civil Service Retirement Act prior to October 1956.

Mr. YOUNG. Why does the bill go back only 1 year, and not all the way?

Mr. BIBLE. I think the answer to that is that there was a desire to make the effective date of the bill coincide with the effective date of the Civil Service Retirement Act. That is the reason the bill so provides. It was meant to go back to the effective date of the Civil Service Retirement Act of 1956.

Mr. YOUNG. Would there be any objection to including benefits for all those who have retired, as we have done in the past? I understand in the past we have included both employees and retired workers.

Mr. BIBLE. Everyone is included although they are not entitled to the increased benefits, so I am advised. I may say to the Senator from North Dakota that all previous retirees, those retired prior to October 1956, are included in the general provision where there are salary increases. They get the same benefits as under the previous retirement act.

Mr. YOUNG. Additional benefits are being provided only for those who are presently employed, and those who retired——

Mr. BIBLE. After October 1956.

Mr. YOUNG. Would the Senator object to making the bill retroactive so as to include all former retired personnel?

Mr. BIBLE. That question was discussed in committee. It was felt such a provision might open the door too wide for those under the retirement act. The question was also raised in other connections, insofar as the 3-percent factor is concerned.

We were advised by Chairman McLaughlin of the District Commissioners that at present a study was being made of the economic implications involved if the retirement system were broadened to cover those who had retired prior to October 1956. The question was asked of Chairman McLaughlin when he appeared, and it was felt it would be premature to attempt to blanket in everyone, without some definite date.

Mr. YOUNG. It would seem to me that not many additional people would be involved, if we made the bill retroactive all the way. It seems to me those who retired a few years ago need help more than some who are retiring now.

Mr. BIBLE. There may be considerable merit in what the Senator from North Dakota says. As chairman of the subcommittee, I assure the Senator that the matter will receive our careful consideration when we get the report from the Commissioners. They are making a study of the matter at this time. It was the feeling of the subcommittee, and a similar sentiment was expressed in the full committee, that pending the completion of that study it would not be wise to blanket in those persons who retired prior to October 1956.

Mr. YOUNG. Will there be any other legislative measure considered by the committee which could contain such a provision?

Mr. BIBLE. As soon as we get the recommendation of the Commissioners of the District of Columbia, I will say to the Senator from North Dakota, depending upon what the recommendations are, the matter might very well be included by way of amendment to the present law.

Mr. YOUNG. I dislike very much to see the bill passed now without a provision to include those who in my opinion need help most of all. I would rather see the proposed legislation carried over until we received the report and ascertained what the additional cost would be. I think the cost could not amount to very much.

Mr. BIBLE. I will say to my good friend the Senator from North Dakota that we were not sure of the exact amount. Pending the completion of the study, it was felt this bill should go forward, because we felt its enactment was needed, and that possibly its provisions could be enlarged at a later time, when the studies were completed.

Mr. YOUNG. I have a great deal of confidence in the fairness and judgment of my good friend the Senator from Nevada. I shall not raise any further objection now. I feel quite sure that when the study is completed serious consideration will be given to proposing additional legislation.

Mr. BIBLE. The Senator has our assurance that we will give the matter very careful consideration.

Mr. YOUNG. I thank the Senator very much.

Mr. BIBLE. The next point of difference between the pending legislation and the Civil Service Retirement Act is found in conditions relating to disability requirement. In the present law, which governs the retirement of police and firemen, there is no provision whatever for a case involving disability not occurring in line of duty. The bill was amended so as to provide that there could be allowances for disability not incurred in line of duty, after 5 years of police or fire service, when the disability was not due to vicious habits, intemperance, or willful misconduct precluding further service with the department.

The Civil Service Retirement Act in this respect is substantially the same as the bill now before the Senate. It says, "After 5 years' civilian service. Total disability for position held, not due to vicious habits, and so forth, within 5 years preceding onset of disability."

That is another change made by the committee in Senate bill 1770, as compared to the existing law, which is more nearly in conformity with the Civil Service Retirement Act.

Another change, which I might mention, is that disability incurred in line of duty after any length of service—injury during performance of duty, which permanently disables for such duty—is subject to a disability retirement allowance, and the Senate bill 1770 carried that forward. The Civil Service Retirement Act has no provision other than that I just noted, that there must be 5 years' civilian service.

The separation benefits are different. The present law with respect to police and firemen requires a refund of deductions without interest prior to retirement for any reason. The pending bill substantially carries that forward. It is different in that respect from the Civil Service Retirement Act, because the Civil Service Retirement Act provides that after 5 or more years of civilian service there may be a choice of refund or deferred annuity, starting at the age of 62. That again is a difference in the bill and the Civil Service Retirement Act.

There is a difference as to which the Senator from Delaware [Mr. WILLIAMS] commented on May 22, as to the computation of the basic annuity. The present act says, "not to exceed 50 percent of salary at time of retirement."

Mr. WILLIAMS. Mr. President, will the Senator yield?

Mr. BIBLE. I yield to the Senator from Delaware.

Mr. WILLIAMS. Is the Senator referring to my comment on the previous occasion when this bill was discussed? My comments at that time were in the line of questions.

Mr. BIBLE. Certainly.

Mr. WILLIAMS. First I should like to read the question which I asked the Senator from Pennsylvania [Mr. CLARK]:

> How does the formula provided in the bill for the computation of annuities compare with that prevailing under the regular Civil Service Retirement Act?

The Senator from Pennsylvania [Mr. CLARK] replied:

> It is my understanding that it is identical.

I think it was definitely established then, and is certainly established by the explanation the Senator from Nevada has given today, that the formulas are not identical, and in fact, they are not anywhere near identical. Is that not correct?

Mr. BIBLE. I think they are not identical. I believe that is correct. I do not think I can go along with the statement that they are nowhere near identical. I think they are fairly close.

The computation we use in Senate bill 1770 is a final basic salary, whereas, as the Senator from Delaware knows, the basis of civil service retirement is the average salary for 5 highest consecutive years of service.

Of course, with reference to the police and firemen, though they have grades,

they do not have within grade promotions as do the civil servants. I think that is a difference. I do not think there is any particularly great difference.

Mr. WILLIAMS. Does the Senator think these differences reflect much of a difference in the total cost of the two systems?

Mr. BIBLE. Would the Senator mind repeating the question? I am not sure I understood.

Mr. WILLIAMS. I put the question this way. Under the civil-service retirement system an employee pays 6½ percent.

Mr. BIBLE. The Senator is correct.

Mr. WILLIAMS. It is my understanding that under the bill the contribution of the members of this system has been raised from 5 percent to 6½ percent.

Mr. BIBLE. The Senator is correct. They pay the same amount.

Mr. WILLIAMS. The contribution of employees in each instance would be the same. Now the Government pays 6½ percent to the civil-service retirement system, which is considered about adequate to keep that system solvent. In the minds of the committee, how did they estimate the cost involved to the Government?

Mr. BIBLE. We asked for information upon that point. The main difference, as the Senator is undoubtedly aware, arises because of the additional percentage to be paid after 20 years of service, which is 3 percent. An additional payment is made of 3 percent, rather than 2 percent, after 20 years.

Mr. WILLIAMS. Does the committee have an estimate of that percentage increased cost, so that they can tell the Senate for the RECORD what it is? I think it would be well for us to know what we are doing.

Mr. BIBLE. Certainly.

Mr. WILLIAMS. And I think it should be established what this bill will cost the Government.

Mr. BIBLE. Certainly. I shall be very glad to read that into the RECORD.

The table affixed to the report shows, on page 5 of the report, an analysis of the estimated cost of the Commissioners' bill.

The Commissioners estimated that the total added annual cost of the Commissioners' bill to the District government in the first year of operation would be minus $479,100. They estimated that in the second year of operation it would be minus $378,000. They estimated that in the third year of operation it would be minus $101,400, and that in the fourth year it would be minus $31,400.

Then they estimated that in the fifth year it would cost an additional $37,600 to pay the retirement benefits contemplated under the Commissioners' bill, which was likewise introduced. The main difference between the Commissioners' bill and the bill now being considered by the Senate lies in the 3 percent after 20 years of service. That is the main difference, and I believe it would account for the difference in costs.

The 6th year the cost would be $107,600; the 10th year $391,600; the 15th year $731,600; the 20th year the cost would be $1,023,600; and the ultimate cost $1,539,600.

I ask unanimous consent to have the table to which I have referred printed in the RECORD at this point as a part of my remarks.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Analysis of the estimated cost of Commissioners' bill

Year of operation	Total annual cost increase over present law	Additional employee contributions [1] (1½ percent of payroll)	Total added annual District government cost
1	$46,900	$526,000	−$479,100
2	148,000	526,000	−378,000
3	217,000	318,400	−101,400
4	287,000	318,400	−31,400
5	356,000	318,400	+37,600
6	426,000	318,400	+107,600
10	710,000	318,400	+391,600
15	1,050,000	318,400	+731,600
20	1,342,000	318,400	+1,023,600
Ultimate	1,858,000	318,400	+1,539,600

[1] 1½ percent of payroll plus contributions for Government service credit.

Mr. BIBLE. I should also like to have printed in the RECORD an anlysis of the estimated cost under the bill now pending before the Senate. The difference in ultimate cost is $126,000, as between the Commissioners' bill which was submitted to the District Committee and the bill now before the Senate. For the earlier years, of course, the differential would be much less.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Estimated annual costs of S. 1770

Year of operation	Total annual cost	Additional employee contributions [1]	Total added annual District of Columbia cost
1	$50,200	$526,000	−$475,800
2	160,900	526,000	−365,100
3	236,200	318,400	−82,200
4	312,500	318,400	−5,900
5	387,800	318,400	+69,400
6	464,000	318,400	+145,600
10	770,000	318,400	+451,600
15	1,133,800	318,400	+815,400
20	1,444,400	318,400	+1,126,000
Ultimate	1,984,600	318,400	+1,666,200

[1] 1½ percent of payroll plus contribution for Government service credit.

Mr. WILLIAMS. Mr. President, will the Senator yield?

Mr. BIBLE. I yield.

Mr. WILLIAMS. Based upon that computation, what is the Senator's or the committee's estimate as to the percentage of the payroll which the District of Columbia would have to figure upon paying to meet its proportionate part of the cost of retirement benefits? Under the Civil Service Retirement Act the Government pays 6½ percent and the employees pay 6½ percent. Under this bill the employees would be paying 6½ percent. How much would the cost for the employer, which is the Government, be?

Mr. BIBLE. These are the additional costs to the District of Columbia——

Mr. WILLIAMS. I am asking for the Government's part of the cost. The Senator says that the benefits under the bill would be substantially the same as under the Civil Service Retirement Act. The Civil Service Retirement Act costs the Government 6½ percent of the payroll. Now, what percent of the payroll will this cost? You mentioned the difference between this bill and the Civil Service retirement formula as being slight.

Mr. BIBLE. That is correct, so far as I have gone in my analysis. The major change is in the item of 3 percent.

Mr. WILLIAMS. I understand that, but I wonder if the Senator has an estimate as to the percentage of the cost which the District Government or the Federal Government would have to underwrite. How would that cost compare with the 6½ percent paid by the Federal Government in connection with the Civil Service Retirement Act?

Mr. BIBLE. The tables show the total amount which the District of Columbia would pay into the fund under either of the two bills. Percentagewise, the difference would be represented by the difference in percentage as between the ultimate figures of $1,666,000 and $1,539,600. I assume that roughly, that would be about 8 percent, at the ultimate figure, and far less in the earlier years.

Mr. WILLIAMS. Does that mean that the committee feels that this bill would cost 8 percent of the payroll so far as the District of Columbia is concerned, or does the 8 percent mean 8 percent more than the present cost? If so, what is the present cost?

Mr. BIBLE. The total annual cost increase in the first year of operation would be $50,200. If the Senator will take a look at page 5 of the report accompanying the bill——

Mr. WILLIAMS. I have done so, but the answer to my question is not to be found on that page. My question is this——

Mr. BIBLE. Perhaps I do not understand the question.

Mr. WILLIAMS. I do not think so.

The assumption is that if we pass this bill the employees will be paying 6½ percent.

Mr. BIBLE. That is correct. That is provided for in the bill.

Mr. WILLIAMS. What percentage will the employer or the District of Columbia be paying if the bill is passed?

Mr. BIBLE. It will be paying the matching 6½ percent plus the difference which I have indicated. That is my understanding, but I will check the figure.

Mr. WILLIAMS. I am sure the Senator knows what he is talking about. I am not questioning that. What I am trying to establish for the RECORD is, What is the percentage? The overall cost cannot be established without this figure.

Mr. BIBLE. I am sorry I cannot give the Senator the figures in terms of percentage. I can give the figures in terms of additional cost to the District of Columbia by way of contribution.

Mr. WILLIAMS. We could understand the situation better if we could have the difference stated in percentages, provided such percentages could be stated with reasonable accuracy. It seems to me the committee should know the overall cost.

Mr. BIBLE. We were not particularly interested in percentage figures. We were very well aware of the amount of money which would be added to the cost to the District government, as shown by the table. We did not apply the difference by way of a percentage figure, although I suppose that could very easily be done.

Mr. WILLIAMS. The reason I asked the question is this: We speak of this bill as being substantially in agreement with the Civil Service Retirement System and of the benefits as being about the same. Supposedly, the cost to the Government in each instance is about the same, but what I want to establish definitely is, is it the same? If not, then how much higher? We have been comparing this system with a system in which both employer and employee pay 6½ percent.

Mr. BIBLE. That is true.

Mr. WILLIAMS. When we consider the bill, we should have a similar percentage comparison as to cost. Let us assume that the cost to the District of Columbia would be increased by 1 percent. We could then visualize what it would mean if we were to vote for this bill and if we were later to extend similar benefits to other employees' retirement systems. That was the basis for my question. I just want an accurate estimate of the cost. I think the Senator from Nevada will agree that it has been our experience that once we adopt a certain formula for one system, employees under another system use that fact as an argument for requesting changes in their own retirement systems. They have a good argument on that point, because they will be paying 6½ percent, the same as these employees. If the Federal Government is going to underwrite greater benefits for one group which is paying 6½ percent of their salary than it is for another group making the same payments, we should know it. That is what I am trying to establish for the RECORD now.

Mr. BIBLE. I shall be very happy to supply that information for the RECORD. We did not make a percentage rundown. We knew what the various costs would be over the years of operation.

Mr. WILLIAMS. Cannot the Senator give us an estimate?

Mr. BIBLE. I have asked the staff member to check and ascertain the percentage comparison, so that it can be furnished before action is taken on the bill.

Mr. WILLIAMS. Is it the opinion of the Senator from Nevada that the costs would be anywhere near the same so far as the employer is concerned? Is that a reasonably accurate estimate.

Mr. BIBLE. I think the differential in the District of Columbia cost, as between the 2 percent and the 3 percent, falls within the range from 6 to 8 percent.

My able friend from Delaware refers to the cost to the District of Columbia or to the Federal Government. One of the main problems we have had in connection with District of Columbia appropriations has been to have the Federal Government carry what those of us on the District of Columbia Committee feel is an equitable share of the financial burden. Actually this cost is met by the taxpayers. The same is true in the Senator's city of Wilmington, or in Dover, the capital city of Delaware.

Mr. WILLIAMS. That is correct. I am not going into the merits or demerits of the proportionate share paid by the District of Columbia or by the Federal Government. I am referring to both of them as a unit when I refer to them as the employer. Certainly, we should establish for the record the liability we are creating for the employer, whether that employer be the District of Columbia, or the Federal Government, or a combination of both.

Without the information there is no way to estimate the projected cost, assuming later the same formula should be extended in other Government retirement systems.

That information should have been in the report.

Mr. BIBLE. We shall be very happy to furnish a percentage figure.

Mr. WILLIAMS. Is it the Senator's opinion that it would be somewhere between 6½ and 8 percent?

Mr. BIBLE. I do not think that is correct. The question the Senator asked me, and which I tried to answer, related to the difference, percentagewise, in the costs, as between the 2 percent and the 3 percent. My answer was that the difference in cost as between the 2 percent and the 3 percent, after 20 years' service, would be in the neighborhood of 6 percent. That was not responsive to the question the Senator had in mind.

Mr. WILLIAMS. What I am trying to establish for the RECORD is this: For the moment, let us forget the merits or demerits of the various proposals. Assume that we pass Senate bill 1770 as it stands. We shall be passing on to the employee a liability of 6½ percent. What liability would we be passing on to the employer? That is the point I am trying to raise, and certainly the answer is essential before voting.

Mr. BIBLE. That is the answer which we will supply before the deliberations on the pending bill are concluded.

Mr. WILLIAMS. Am I to understand that in the meantime the Senator can give no estimate?

Mr. BIBLE. As I have pointed out to the Senator from Delaware, the additional cost under the pending bill would be $1,666,200.

As to the percentage, I shall get that figure and supply it for the RECORD.

Mr. WILLIAMS. That still does not answer the question. Can the Senator tell me what percentage of the payroll the District is paying now?

Mr. BIBLE. The District is now operating under a very old retirement act which goes back to 1916. I understand it has had no major overhaul since that time. The District matches the employee's contribution. It is considerably less than 6½ percent, which is the figure called for under the bill. I believe the matching is to the extent of 5 percent of the basic salary.

Mr. WILLIAMS. The Senator thinks it is 5 percent that the District is paying now?

Mr. BIBLE. That is correct.

Mr. WILLIAMS. Then as I understand it we are now being told that the employer is now paying only 5 percent and under the pending bill will be paying this 5 percent plus the additional percentage needed to underwrite the extra cost involved in this bill. But as I understand it the Senator does not know exactly how much the additional amount will be. Is that correct?

Mr. BIBLE. I know how much the additional amount will be, but I do not know it in percentage figures.

Mr. WILLIAMS. Is the Senator certain that it is 5 percent that is now being paid?

Mr. BIBLE. My understanding is that it is 5 percent now.

The next point, which is one of the major points of difference, is the one which was pinpointed by the Senator from Delaware in the discussion the other day. It refers to the computation of the basic annuity. Under the present law, it cannot exceed 50 percent of salary at time of retirement.

Under the pending bill it is 2 percent of final basic salary times years of service for 20 years; 3 percent of final basic salary times years of service in excess of 20, but not to exceed 70 percent.

That is the point of departure from the Civil Service Retirement Act.

Under the Civil Service Retirement Act the percentage is 1½ percent, or $25 plus 1 percent of the high 5-year salary times the years of service up to 5 years; plus 1¾ percent, or $25 plus 1 percent, of the high 5-year salary times years of service over 5 years up to 10 years; plus 2 percent, or $25 plus 1 percent, of high 5-year salary times years of service over 10 years.

Of course, in the case of hazardous occupations, as pointed out by the Senator from Delaware—in the FBI and in the narcotics squad, for example—there is no provision for the 3 percent after 20 years of service. That is one of the main points of difference between this bill and the Civil Service Retirement Act.

There is a maximum provision in the Civil Service Retirement Act of 80 percent, whereas under the pending bill there is a maximum provision of 70 percent. That refers to the basic salary.

I do not know whether the Senator from Delaware desires an explanation of each of the changes. I have tried to analyze the bill and pinpoint the main differences as I see them. There is a difference in funeral expenses, for example. Under the old retirement act, which now governs policemen and firemen, the Commissioners of the District of Columbia may authorize a payment up to $250 to defray the funeral expenses of a member who dies in service. The pending bill authorizes that that amount be increased to $300.

Under the Civil Service Retirement Act there is no provision for funeral expenses for any employee dying in service.

I will say to my good friend from Delaware that the pending bill had the support of everyone appearing before our committee. The Commissioners of the District of Columbia, in their offi-

cial report on the bill, pointed to 4 areas of disagreement, 3 of which I believe have been taken care of. The fourth point of difference was with respect to the additional 3 percent which is paid after 20 years of service at a minimum age of 50.

The testimony before the committee seemed to be clear that this additional incentive payment was necessary and desirable to encourage policemen to stay in the service. The testimony of Chief Murray was to the effect that the average age of the recruit was in the neighborhood of 23 or 25 years. He said it took about 3 or 4 or 5 years adequately to train a raw recruit for service. He said, also, that there was a heavy turnover in the police force in the District of Columbia. As the Senator well knows, there is a requirement that the authorized strength of the police force be maintained at 2,500. Testimony at the time of the hearing was to the effect that there were 2,272 policemen on the force. The police chief further testified as to his great difficulty in obtaining recruits and, after obtaining them, in holding them, because here in the Nation's Capital there is considerable competition from other Federal agencies which have more desirable pay scales and in the absence of the enactment of the pending bill, better retirement benefits and other benefits.

Therefore it was the thinking of the committee—unanimously, I might say—that we should make this provision. The only point of difference, as I said, so far as the District of Columbia Commissioners was concerned, was with respect to the 3 percent after 20 years of service. Even the Chairman of the Board of Commissioners testified that in his personal view he thought that should be added to the law as an additional incentive.

I am sure the Senator from Delaware is just as anxious as I am to keep a good, fine police force on duty in the District of Columbia, and at the strength that is authorized. The Commissioners have never been able to come up to that strength, because they cannot hold a sufficient number of men in the service. The chief thought this added incentive after 20 years would help in that connection.

It should be borne in mind that these men must retire after 30 years of service. It was felt that it was best to have that tenure of service in order to secure the maximum effectiveness from the police force, in view of the fact that it takes some time to train the raw recruit.

For those reasons, and based upon very thorough hearing of the matter, the subcommittee unanimously and, I may say, the full committee also, reported the bill to the Senate.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. BIBLE. I yield.

Mr. MORSE. I should like to ask a few questions of the Senator. As a member of the full Committee on the District of Columbia I rise to support the chairman of the subcommittee and to commend him and his colleagues on the subcommittee for the fine job they did throughout the hearings in making what I think is an unanswerable record.

Am I correct in understanding that the distinguished Senator from Maryland [Mr. BEALL] is a member of the subcommittee?

Mr. BIBLE. That is certainly correct. I may say that he is a very able and helpful member of the subcommittee. I know he will have something to say on the bill.

Mr. MORSE. He is certainly one of the most sincere friends the people of the District of Columbia have on the committee.

My first question is this: Is there anything in the record of the committee to show that the proposal of the subcommittee is in any way out of line with similar systems throughout the country?

Mr. BIBLE. There is nothing to show that it is out of line with similar systems throughout the country. I cannot answer as to the provision for 3 percent additional after 20 years of service that was written into the bill. There was some testimony before the committee to the effect that larger cities, such as New York, Philadelphia, Chicago, San Francisco, and, I think, possibly Portland and Seattle, provided for voluntary retirement after 20 years of service without any consideration of age whatever. It was the feeling of the committee that it was far better to hold a man in service after he had spent 20 years, and take advantage of his training and of his years of experience on the force, rather than to retire him after 20 years of service.

I will say in that respect that the bill before the Senate does not go so far as do other retirement plans for policemen and firemen in other cities of the United States.

Mr. MORSE. That is why I asked the question. It was my understanding, as a member of the full committee, when the report finally was made, that the proposal not only is not out of line with the systems in many cities of a size comparable with that of Washington, D. C., but that actually it is not as good as that which exists in some cities.

I wanted to have the record clear as to whether we are voting here today for a bellwether system, in that we are voting for a system which would be the leader in the Nation—although I would be willing to vote for a bellwether system—or whether we are voting for a system which we could say is, generally speaking, typical of the benefits paid in other cities of comparable size.

Mr. BIBLE. I think, as I have just indicated, that in many instances cities go beyond what we are attempting to do in the proposed legislation.

Mr. MORSE. Can the chairman of the subcommittee state how the benefits of the bill compare with the retirement benefits provided for other services which do not involve, for example, the constant risk of life which happens to be inherent in the work of a policeman, a risk which is taken for the benefit of all of us?

Mr. BIBLE. As I am certain the Senator from Oregon knows, the general provisions of the Civil Service Retirement Act dealing with the so-called hazardous occupations are scaled up to a maximum of 2 percent per annum times years of service. That would take into consideration the FBI and the narcotics agents. They may retire after 30 years of service, with a maximum, I stress, of 80 percent; whereas there is a ceiling of 70 percent in this particular retirement bill.

Mr. MORSE. I understand that. Let me restate my question. I am now comparing the retirement system of policemen and firemen—firemen also have very hazardous jobs—with the retirement systems outside the field of the civil service, but in American industry, where there is a lack of comparable hazards.

I shall put my question this way: Does the Senator know whether the retirement benefits for policemen, such as are proposed in the bill, and as exist in many cities, are, in fact, somewhat lower than those which prevail in retirement systems in a good many industries, retirement systems which have been negotiated between the unions and management across the collective bargaining table?

Mr. BIBLE. I should be inclined to think that the retirement systems of private industry and private life are far more favorable than the one we are considering.

Mr. MORSE. If the Senator will permit me to make a point, it is that we are lawmakers for the taxpayers, and we are dealing with one of the most dedicated groups engaged in public service—the policemen. I happen to believe that in the District of Columbia we could make a strong case for proposing a system which would be a model for the country. But the system which the Senator from Nevada is asking us to support this afternoon is not a so-called bellwether system. I think it is an exceedingly reasonable proposal, in the light of systems which exist in other cities of comparable size.

The point I wish to make is that we are considering a group of men who for us and our protection risk their lives every time they put on a uniform. Not very many days go by without our reading of the risks which policemen encounter in protecting society. Theirs is a hazardous occupation.

I point out to the Senate that there have been negotiated across the collective bargaining table in private industry between management and organized labor many retirement systems the benefits of which are substantially greater than the amounts we offer our policemen. Policemen are not in a position, as are workers in an industrial plant, to enjoy the benefits of that type of collective bargaining. We must bargain for them. We have the public duty, it seems to me, of protecting them to the extent that annuities will protect them and their families.

I shall support the bill because I think it is an exceedingly fair one. I think a recommendation really could be made for even more than the bill allows. But I do not want the Senator to think that that reflects to the slightest degree any disapproval of the measure. I think the Senator from Nevada did outstanding work in bringing together the various

points of views in the hearings held by his subcommittee. I congratulate both the Republicans and the Democrats on the committee upon the bill they have reported.

Mr. BIBLE. I thank the Senator from Oregon for his statement.

Mr. WILLIAMS. Mr. President, will the Senator yield?

Mr. BIBLE. I yield.

Mr. WILLIAMS. I have said many times that the retirement system for the District of Columbia police and firemen should be brought into line with the civil service retirement system. Not only should the contributions into the system be brought into line, but certainly the benefits should be brought into line with the benefits under the Civil Service Retirement Act. With that purpose I am fully in accord. That is the basis on which the bill was reported to the Senate. But I think before this debate is over I can establish that the bill goes far beyond that.

I return to my original question, because I think we can more readily evaluate the proposal if we know what it will cost to project the costs in terms of other systems. What will be the cost to the employer after the enactment of S. 1770? That, I think, is a proper question.

Mr. BIBLE. I certainly recognize it as a proper question.

Mr. WILLIAMS. We have been told it was 5 percent prior to this time both to the employer and the employee.

Mr. BIBLE. I think if I said that—and I am certain I said it—I was in error. I think the contribution of the employers is probably more than 5 percent. We have asked the actuaries and the experts to supply us with the exact figures concerning the contributions which are made. We have not as yet secured that particular information.

The cost, over and above the amount now required by the District of Columbia, is in the neighborhood of $1,066,000.

Mr. WILLIAMS. I am certain the Senator will agree that that is a very proper question in considering the bill and one upon which we should have an answer before we act on the bill.

Mr. BIBLE. I certainly do. That is why I am doing my best to get the information for the Senator from Delaware at the earliest possible moment. I can give the exact figure of the appropriations made by Congress during the past 5 years, but I do not have the percentages.

Mr. WILLIAMS. The amount must be reduced to percentages because when it is reduced to percentage of payroll and projected to the Civil Service Retirement System, we will have an accurate comparison as to cost.

Suppose I ask the Senator this question: How does this retirement fund of the police and firemen stand as of today?

Mr. BIBLE. That likewise is a figure which will be furnished the Senator from Delaware; I do not have it at my finger tips.

Mr. WILLIAMS. Is it not true that the fund is "broke," "bankrupt," and that the only way the benefits under this bill could be financed would be by additional appropriations made directly by Congress?

Mr. BIBLE. I cannot answer the question of the Senator in that respect. If any danger of that kind was pointed out to the committee or the Commissioners who are in charge of fiscal affairs, they raised no question about the soundness of the fund.

Mr. WILLIAMS. Is that not an appropriate question to be raised? If we are asked to consider providing additional benefits to these employees when they retire, certainly it is a proper question, first, to evaluate the financial condition of the fund as of this moment. It is my understanding that the fund, as of this moment, has exactly zero in its treasury.

Mr. BIBLE. It is my understanding that the fund has repeatedly depended upon congressional appropriations, out of the general fund, just as Congress appropriates money for all the District of Columbia business.

Mr. WILLIAMS. The civil service retirement fund is a trust fund of several billion dollars. It is handled as a trust fund. The 6½-percent contributions of civil service employees are set aside along with Government contributions as a special fund, or trust fund, and kept intact to be used to pay the employees when they retire.

Is it not true that the District of Columbia has been spending for general expenses during the past several years all the money which should have gone into the employees' trust fund and that the District does not have a dime of it left?

Mr. BIBLE. They have been contributing a considerable amount of money as the employers' share, as well as using the employees' contributions in order to pay retirement benefits.

Mr. WILLIAMS. Is there any trust fund at all? Assuming that Congress stopped appropriating money for this purpose, would there be any money at all with which to pay any retirement benefits after July 1?

Mr. BIBLE. I should think that would depend upon the making of an appropriation; otherwise, there would not be any funds for the District of Columbia.

Mr. WILLIAMS. But by this measure, 6½ percent of the employees' salaries will be withheld.

Mr. BIBLE. That is correct.

Mr. WILLIAMS. Certainly those funds should be segregated by being placed in a trust fund. The Railroad Retirement Fund is maintained on that basis. All collections for the Social Security System are placed in a trust fund as are contributions from civil-service employees.

The Senator from Oregon compared this retirement system with the retirement system of private employers, but in all those instances the pension funds are set aside and are handled as trust funds.

However, in the case of the District of Columbia is it not true that there is no trust fund but that the amounts deducted from the employees' salaries are placed in the general fund and are used for general purposes—for instance, to pay for the cost of street repairs or to pay for other costs?

Mr. BIBLE. But the Commissioners of the District of Columbia had no question about the bill, except in one particular.

Mr. WILLIAMS. But does the Senator from Nevada not think it is time for this question to be raised?

Mr. BIBLE. I am happy to have the Senator from Delaware raise it, and I am trying to obtain the best possible answer.

Mr. WILLIAMS. Does the Senator from Nevada not think a trust fund should be established?

Mr. BIBLE. That may well be.

Mr. WILLIAMS. I am asking for the opinion of the Senator from Nevada as to how the moneys should be kept.

Mr. BIBLE. I certainly recognize that most retirement moneys are placed in trust funds by the agencies operating the retirement systems.

Mr. WILLIAMS. Does the Senator from Nevada not think it is highly improper to comingle these funds with the general funds of the District of Columbia and not to withhold these funds as trust funds established for the purpose for which the moneys have been withheld?

Mr. BIBLE. Of course, I do not know how the money is handled at the present time; but I have been trying to obtain the information for my distinguished friend, the Senator from Delaware.

Mr. WILLIAMS. I think the question should be answered; and I believe it should be answered here, before the Senate acts on this bill. Does not the committee know how the contributions to this fund are handled?

The other day when the bill was under discussion I said that I thought the employees' contributions should be increased to 6½ percent as in the case of the contributions made by the civil-service employees. I said the benefits should be increased so as to be on a par with those of the law-enforcement employees under the Civil Service Retirement Act. We begin with that basis.

All afternoon I have been trying to find out exactly what the committee is doing. Certainly we are in agreement that the funds should be placed in a trust fund and the system should be maintained with some degree of solvency. After all, there is no use in our voting to increase the retirement benefits for these employees if there will be no way to pay them.

In the case of the retirement fund for the Members of Congress, and other civil service employees, our contributions to the fund are withheld as deductions from our salaries, but that money is not put into the general fund and spent for the building of a dam or a highway or a bridge or for the dredging of a river. Instead, it is placed in a trust fund from which the required payments are to be made when the individual concerned retires.

Mr. BIBLE. I think I should point out to the distinguished Senator from Delaware—although I am sure he is aware of it—that the fiscal affairs of the District of Columbia are managed by three able Commissioners. Frankly, I do not know the mechanics of the retirement fund. But I know that when the Commissioners appeared before the com-

mittee, they pointed only to the additional cost which would be incurred. Certain moneys have been appropriated year after year by the Congress, taking into consideration all the tax moneys raised in the District of Columbia to operate the system.

The statement of the Senator from Delaware, namely, that the money is not placed in a trust fund, is absolutely new to me; I have no knowledge of it. The question has not been raised before now. I am happy to have him raise the question, and I shall do my best to obtain the proper answer to it.

Mr. WILLIAMS. It is a proper question.

Mr. BIBLE. I do not disagree with the right of the Senator from Delaware to ask the question; and it is a proper question.

Mr. WILLIAMS. The Senator from Nevada does not disagree, does he, with my statement that the money should be kept in a trust fund?

Mr. BIBLE. I think that is the established practice in the States and cities; and I believe it is a good practice, certainly.

Mr. WILLIAMS. Yes; I think we can at least agree on the fact that the money should be kept in a trust fund.

Those who have responsibility for the District of Columbia should know whether or not it is being operated as a trust fund.

Likewise, it should be established what percentage of the payroll will be required as a payment by the employer to keep the fund solvent.

Mr. BIBLE. I understand the question thoroughly; and as soon as the actuary gives me the answer, I shall be glad to provide it to the Senator from Delaware. In the meantime, I am very glad to yield to my distinguished colleague, the Senator from Maryland [Mr. BEALL], on the other side of the aisle, who will make a statement regarding the bill.

Mr. BEALL. Mr. President, I think perhaps the Senator from Delaware has made a very pertinent observation. At the same time, this measure has been considered, first, by the subcommittee, and then by the full committee. We recognized the need for this proposed legislation.

It seems to me the real question at issue, when all is said and done, is that suggested by the Senator from Oregon [Mr. MORSE], namely, Are we to have an adequate police force in the District of Columbia?

Some 3 years ago Congress provided that the District of Columbia police force should be increased to 2,500 members, and a drive was made to get a sufficient number of physically fit young men to qualify for the police department. At the present time, there are approximately 320 or 330 vacancies, after all these years of the drive. The FBI and other Government agencies have offered more inducements than those offered by the District of Columbia police department.

Mr. WILLIAMS. Mr. President, will the Senator from Maryland yield to me?

The PRESIDING OFFICER (Mr. YARBOROUGH in the chair). Does the Senator from Maryland yield to the Senator from Delaware?

Mr. BEALL. I yield.

Mr. WILLIAMS. Time and time again I have emphasized the point that I want to have these employees given the same retirement benefits as those given to the FBI personnel or to other law-enforcement officers. But I wish to ascertain how that result is to be brought about. It seems to me that certainly the Senator from Maryland, as one of the sponsors of the bill, should know whether the money required in order to pay the benefits provided by the bill will be available. The bill does not carry an authorization for an appropriation. I am advised that in the District of Columbia there is no fund from which a single payment can be made to these employees, but that, on the contrary, the funds previously withheld have been commingled with the general funds of the District of Columbia and have been spent in their entirety. There is not a dime available to pay the benefits proposed under this bill unless the Congress later makes an appropriation for that purpose. That is a shocking state of affairs, particularly when the committee which is pressing for an increase in the benefits does not know whether such a trust fund has ever been established.

Mr. BEALL. Perhaps, again, that is the fault of Congress. The Members of Congress have been very shortsighted in making necessary contributions to the District of Columbia; and, as a result, it has been necessary for money in the police fund to be used in order to pay certain of the operating expenses of the District of Columbia government. Again, that is the fault of the Congress, which for years has failed to make for the District of Columbia the appropriations which the Congress properly should make. Perhaps the District of Columbia has used this money to pay some of the general expenses of operating the local government. I do not know that that is so; but, if it is so, I think the District of Columbia officials were justified in taking such action, since the expenses of the District had to be paid.

Mr. WILLIAMS. Does the Senator from Maryland not agree that these moneys should be maintained separately as a trust fund?

Mr. BEALL. Perhaps so; but when one Government agency borrows from another Government agency, I do not see why such an arrangement should not be made in this case. After all, the operating expenses of the District of Columbia must be paid.

Mr. WILLIAMS. Mr. President, will the Senator from Maryland yield for a further question?

Mr. BEALL. I yield.

Mr. WILLIAMS. Picture this situation: A former employee of a Government agency under the Civil Service Retirement Fund is employed by the District of Columbia and thereby comes under the provisions of this retirement system.

Mr. BEALL. Yes.

Mr. WILLIAMS. The employee then withdraws the contributions he had made to the Civil Service Retirement Fund, and he is required to redeposit those contributions with the District of Columbia before he can qualify under this bill.

My question is this: What does the District of Columbia do with that money after it has been withdrawn from the other retirement fund and has been turned over to the District of Columbia? Should it not be kept in a separate trust fund, rather than used as a part of the general fund of the District of Columbia, perhaps to pay the cost of constructing a street?

Mr. BEALL. Yes; I think perhaps it should be. But heretofore Congress has never seen fit to require that that be done; no Commissioner of the District of Columbia has ever requested it, nor has any one else.

Mr. WILLIAMS. Well, I am insisting on it now, and I think at least we should delay action on the bill long enough for the members of the committee to be able to find out whether such a trust fund is maintained.

Mr. BEALL. Certainly, that is a timely point.

Mr. WILLIAMS. It is my understanding that there is not a dime in the fund.

Mr. BEALL. Would the Senator from Delaware be willing to vote to increase the appropriations for the District of Columbia in an amount sufficient to make possible the payment of the benefits under this system?

Mr. WILLIAMS. If we are going to pass a retirement bill, I will vote to finance the cost. When we pass a retirement bill we have with the employees a contractual obligation on which we cannot renege. If there is in the District of Columbia a fund which is bankrupt—and it is my understanding that the fund in question is zero, that all the funds are commingled with the general fund—I think it is time that the committee of which the Senator is a member find out about it.

Mr. BEALL. Perhaps so, but why should the policemen and firemen be made to suffer for the shortsightedness of a previous committee or the present committee? Why should the retired policemen and firemen be made to suffer for something that was done many years ago? Now is the time to act, and if the Senator from Delaware or any other Senator desires to offer a proposal I think we as a committee will be glad to go into the question. We shall cooperate, as we always have cooperated with Senators on both sides of the aisle. The Senator from Oregon and I worked together for years on the committee. We shall be glad to work out a system. At this time, however, there is before the Senate the bill now being debated.

Mr. WILLIAMS. I most respectfully advise the Senator from Maryland that now is the appropriate time to know whether we have the money to pay for what is provided in the bill. If I am correct in my understanding that there is no money in the fund, I ask the simple question, "How is the District to pay for it?"

What is the use of holding out to these employees a glowing promise of a substantial increase in their retirement

benefits when the fund is bankrupt already? I am surprised that the District of Columbia Committee, which has had hearings on the bill, did not at least go into the bill sufficiently to ascertain where the money will come from to finance the law. There is no appropriation mentioned.

Mr. BEALL. The District Commissioners did not say they did not have any money. We had always understood they had the money.

Mr. WILLIAMS. If the Senator will yield, I remind him that in the area whence I come, we sometimes ask whether we have the money. I think sometimes I have heard the same question asked in Washington, and it might have been less embarrassing to the committee had you asked a few questions before reporting the bill.

Mr. BEALL. The legislation now proposed was requested by the District Commissioners. There is need for it. The District Commissioners did not tell us that they needed any additional money. So, we come back to what I previously said: if there is a shortage in the fund, it is the fault of Congress.

Mr. WILLIAMS. If the Senator will yield, I will ask him the same question as previously asked of the Senator from Nevada. Under the Civil Service Retirement Act the employees pay 6½ percent of their salaries into the fund. Under the pending bill the payroll deductions into the fund will be increased from 5 to 6½ percent. What will that cost be to the District of Columbia as the employer? We ought to have a reasonable estimate from some member of the committee as to the cost. I am asking for that percentage of payroll cost.

Mr. BEALL. The chairman of the subcommittee [Mr. BIBLE] did not work the figure out in percentages, but he did in dollars and cents.

Mr. WILLIAMS. How would it compare with the 6½ percent the Government pays?

Mr. BEALL. I do not know.

Mr. WILLIAMS. Does the Senator have any idea?

Mr. BEALL. No, I do not.

Mr. BIBLE. Mr. President, will the Senator yield at that point?

Mr. BEALL. I yield.

Mr. BIBLE. I shall try to clear up the question which the Senator from Delaware, very properly, has asked. I am advised the policemen's and firemen's retirement fund for the District of Columbia operates pretty much on a pay-as-you-go basis. I think the Senator from Delaware is aware the employer must pay the differential between the amount contributed by employees and the amount paid to various persons who retire.

Mr. WILLIAMS. It is my understanding that the funds collected from the employees are commingled with the general fund of the District of Columbia.

Mr. BIBLE. That is true.

Mr. WILLIAMS. Does the Senator from Nevada or does the Senator from Maryland know of any other fund in the Government or in private industry of which that is true?

Mr. BIBLE. Most retirement funds of which I have any knowledge—and I did have the privilege of drawing up the retirement law for the State of Nevada—are in trust funds. Although the employee contributes 5 or 6 or 6½ percent of the amount of money he receives, the employer contributes a far greater amount. It is not an equally matching basis.

I was in error when I indicated to the Senator from Delaware that the employer's share was 5 percent. I am now advised it is something closer to and in the neighborhood of 33 percent.

Mr. WILLIAMS. That is a substantial difference, the Senator must admit.

Mr. BIBLE. I am very glad to correct the RECORD in that respect.

Mr. WILLIAMS. Is it not a fact that this bill would cost the United States Government, or the employer——

Mr. BIBLE. I think the Senator should say the United States Government.

Mr. WILLIAMS. Is it not a fact that the employees will be paying 6½ percent under the bill and the United States Government will be paying 39.02 percent of the payroll into the fund after the program comes into full operation. That is 7 times as much as the 5 percent estimated cost mentioned earlier today.

Mr. BIBLE. If the bill is passed, including the interest, that is approximately what it will cost.

Mr. WILLIAMS. Then if we were to project the same formula into the Civil Service Retirement Act, what would be the additional cost to the Government under that act? Suppose the Government employees under the Civil Service Retirement Act were to say, "We are entitled to comparable benefits. We are paying 6½ percent, the same as these employees are paying"—which would be a logical argument, the Senator must admit—how much would it cost the United States Government?

Mr. BIBLE. I imagine it would cost the United States Government a considerable amount if the same formula were used for all the employees in civil service.

I should like to point out to my distinguished friend, the Senator from Delaware, that we are dealing with a question in the District of Columbia which involves the policemen and firemen. Admittedly, the retirement system which has applied to them, so I am advised, has never undergone any type of overhauling since 1913. The governing fathers of the District of Columbia have indicated that the bill now pending meets their approval, with one exception. That have reflected the cost, unquestionably, in the budget request they presented to the Appropriations Committee.

As I attempted to indicate to the Senator from Delaware, the additional cost will reach an ultimate of $1,666,200 over and above what the Commissioners are presently asking. The employer's share does not match the employee's share equally; there is no doubt about it.

Mr. WILLIAMS. Under the Civil Service Retirement Act the payment is on a matching basis, 6½ percent for the employees and 6½ percent for the employer.

Mr. BIBLE. The Senator is correct.

Mr. WILLIAMS. This bill was reported by the committee and submitted to the Senate on the basis that it was substantially in conformity with the present retirement law. Will not the Senator now admit that in one instance the Government's contribution is 6½ percent and in another will be 39 percent?

Mr. BIBLE. I think there were a number of differences. The purpose of the committee was to attempt to bring the policemen and firemen in the District of Columbia up to generally the same standards which exist in other retirement systems.

Mr. WILLIAMS. Let me ask another question.

Mr. BIBLE. So far as contributions are concerned, I think what the Senator says is correct.

Mr. WILLIAMS. It is correct as to contributions.

Mr. BIBLE. I do not disagree with that.

Mr. WILLIAMS. Let me ask one further question. The Senator speaks of firemen and policemen. This bill also brings in the Park Police in the District of Columbia.

Mr. BIBLE. That is correct.

Mr. WILLIAMS. Does it bring in the Park Police of Nevada, or Oregon, or the various other parks throughout the country?

Mr. BIBLE. It does not.

Mr. WILLIAMS. We would then have this situation, that the Park Police throughout the United States would be paying the same contribution out of their salaries into a retirement fund as do the Park Police in the District of Columbia. Is that not a true statement?

Mr. BIBLE. They will all be paying 6½ percent; the Senator is correct.

Mr. WILLIAMS. All will be paying 6½ percent, whether they be in Oregon, Nevada, or wherever they may be, as employees in any national park. They all pay 6½ percent. Would they not be entitled to the same benefits?

Mr. BIBLE. It would seem, on the face of the Senator's remarks, that they are entitled to the same benefits.

Mr. WILLIAMS. Would this bill not create such a situation that the benefits to the Park Police of the District of Columbia would be nearly double or substantially greater than the benefits to the Park Police in any other area?

Mr. BIBLE. I would not say they would be nearly double. I do not think that is a fair statement.

Mr. WILLIAMS. Let me phrase the question this way: Is it not a fact that the Government is making a contribution of 6½ percent to the retirement fund in the Park Police throughout the United States, and if this bill shall be enacted, the Government will be making a 39 percent contribution to the retirement fund of the Park Police of the District of Columbia or six times as much?

Mr. BIBLE. I do not think the Government would do so. I think the contribution of the Government, insofar as the Park Police is concerned, would be 6½ percent. It would be the same.

Mr. WILLIAMS. Oh, no.

Mr. BIBLE. When the appropriation comes from the governing board of the District of Columbia, the Commissioners.

Mr. WILLIAMS. I beg the Senator's pardon. I would not claim to be any authority, but Mr. John P. Jones, the actuary for the Director of the Budget, this morning said that it would cost the Government 39.02 percent of the salaries of all these employees we are proposing to bring in under the legislation and to give them the benefits of this bill. I have their letter here.

Mr. BIBLE. I was under the impression that that percentage was the cost to the District of Columbia; that that was the amount reflected in the budget request.

Mr. WILLIAMS. We will not go into the question of whether it is the District of Columbia or the United States Government. I am speaking of them jointly as the employer.

Mr. BIBLE. Certainly.

Mr. WILLIAMS. In fact, that is the language they use, that if the bill should be enacted, the total cost to finance it would be 45.52 percent of the payroll, of which 6½ percent would be paid by the employee and that 39.02 percent would be paid by the employer. Also, the Civil Service Retirement Division has pointed out that if we should extend to other employees the same benefits, there would be an increased cost of $1.2 billion.

They state:

> Based on the above considerations, we estimate that if the provisions of S. 1770 were extended to the Civil Service Retirement System, the Government's annual retirement cost would be increased by 13½ percent of the payroll, or by more than $1.2 billion per year.

Mr. BIBLE. I do not question the Senator's figures.

Mr. WILLIAMS. If we extend the formula of this bill to all employees who are paying 6½ percent of their salary—and every employee paying the 6½ percent has a right to claim the same benefits—it would cost $1.2 billion. Where is that money coming from?

Mr. BIBLE. I should like to make a comment there.

Mr. WILLIAMS. I am thinking of all the employees who are making similar contributions.

Mr. BIBLE. I should like to say to my friend, the Senator from Delaware, that we in the committee attempted to frame a bill which we thought would be helpful in developing and strengthening the police and fire forces in the District of Columbia. The intent of the bill was to give to the policemen and firemen in the District of Columbia that to which we thought they were entitled, in the form of greater consideration from the standpoint of retirement. We drafted the bill on that basis. We find that other employers in cities throughout the United States are doing exactly the same thing, and I think we could make the same comparison as to the amount the city of New York or the city of Wilmington is paying. I assume that the wonderful city of Wilmington has a fine retirement system. I daresay that contributions are not on a matching basis. I have no doubt at all that the city of Wilmington contributes far more than the 5, 6, or 7 percent which the employees contribute.

I think the Senator will find that situation to be true throughout the United States.

In the District of Columbia the Commissioners came to us with a bill, and they said, "We feel this would strengthen the police and fire forces of the District." The Commissioners are, in effect, the "city fathers," though for some rather unusual reason we in the Congress require them to clear everything with us. Personally, I favor home rule for the District, because I think it is their responsibility.

Mr. WILLIAMS. I may say, I will join with the Senator in backing home rule for the District of Columbia. Let us amend this bill and give the District of Columbia home rule, and perhaps that will clear up the situation.

Mr. BIBLE. I will go along with that, though it might encounter some difficulty along the legislative trail.

Mr. WILLIAMS. I have stated many times that I was in favor of home rule.

Mr. BIBLE. Nevertheless, I think the contributions should be on a matching basis. The Commissioners are the governing board, and they are the men who spend the money day after day, trying to work out the problems. They try to make the city a better place in which to live.

I think they pay a high percentage into this fund. Probably the failure to create a trust fund was not wise, as the Senator from Delaware suggests, but probably, depending upon congressional appropriations year after year, they did not know particularly which way they were headed and they did not quite know how to accomplish what the Senator considers to be desirable.

I might say the situation applies not only to retirement, but to other items. If the Appropriations Committee, now meeting on the District of Columbia budget, fails to appropriate the money, it might be necessary to close down the hospitals, or maybe the teachers will not get paid on July 1. I think we could go along ad infinitum on that subject.

All we are attempting to do here is build into the law a retirement system which, in our opinion, is justified in order to hold the persons employed in these hazardous occupations in the District of Columbia.

Mr. WILLIAMS. Does the Senator not feel that if we are to act on the bill we shall have to consider whether it will necessitate a cost factor of 35 or 40 percent—39 percent, to be exact—of the payroll by the employer in order to keep the fund solvent? Does the Senator not think that the bill should be presented to the Senate on such a basis rather than on the basis that there is substantially no difference between the cost of administering this bill and the cost of the Civil Service Retirement Act?

Mr. BIBLE. The Senator from Nevada never said that there was not considerable difference between the civil service retirement system and the system proposed by this bill.

Mr. WILLIAMS. I am speaking of the cost.

Mr. BIBLE. If I said there was no difference I was in error. I do not want to mislead the Senator from Delaware.

Mr. WILLIAMS. I certainly think the Senator started out by leaving the impression that at present the employees were paying 5 percent and the District of Columbia was paying 5 percent. Actually at present in the District the employee is paying 5 percent and the District is paying around 25 percent.

Mr. BIBLE. It did not take the Senator from Nevada very long to correct that wrong impression. He was wrong, and he certainly admits that the employer does pay a greater share.

Mr. BEALL. Mr. President, for the information of the Senator from Nevada and the Senator from Delaware, I point out that there never has been a retirement fund in the District of Columbia. The retirement system has always been operated through direct appropriations from year to year. I shall not discuss the question of whether that is right or wrong, but the system has operated all these years by means of direct appropriations each year. The policemen and firemen have paid into that system each year, just as taxpayers would pay. There has never been any retirement fund as such.

Mr. WILLIAMS. Mr. President, will the Senator yield?

Mr. BEALL. I yield.

Mr. WILLIAMS. I know the Senator wishes to keep the record straight. The fact is that any attempt to maintain a separate fund was abolished about 1935.

Mr. BEALL. I am very glad to receive that bit of information. I thank the Senator for the correction.

Mr. WILLIAMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Flanders	Morton
Allott	Frear	Mundt
Anderson	Fulbright	Murray
Barrett	Goldwater	Neuberger
Beall	Hayden	O'Mahoney
Bennett	Hickenlooper	Potter
Bible	Hill	Purtell
Bricker	Holland	Revercomb
Bush	Ives	Robertson
Butler	Jackson	Saltonstall
Byrd	Johnson, Tex.	Schoeppel
Capehart	Johnston, S. C.	Scott
Carlson	Kefauver	Smith, Maine
Carroll	Kerr	Smith, N. J.
Church	Knowland	Sparkman
Clark	Kuchel	Talmadge
Cotton	Malone	Thurmond
Curtis	Mansfield	Thye
Dirksen	Martin, Iowa	Watkins
Douglas	Martin, Pa.	Wiley
Dworshak	McClellan	Williams
Eastland	McNamara	Yarborough
Ellender	Monroney	Young
Ervin	Morse	

The PRESIDING OFFICER (Mr. YARBOROUGH in the chair). A quorum is present.

The question is on agreeing to the first committee amendment, which will be stated.

The first amendment of the Committee on the District of Columbia was, on page 1, at the beginning of line 7, to insert "Amendments."

Mr. WILLIAMS. Mr. President, first, I wish to repeat what I have said many times; namely, that I believe the formula

for computing the retirement benefits of the District of Columbia Policemen and Firemen should be the same as that provided for computing the retirement benefits of the law-enforcement officers under the Civil Service Retirement Act. That is the basis on which this bill was recommended by the committee; namely, that the employees' contributions would be increased from the present 5 percent to 6½ percent, and that their retirement benefits would also be raised to a comparable basis with those employees under the Civil Service Retirement Act. We were told by the committee that the formula for computing the annuities was comparable to that used under the Civil Service Retirement Act. In fact, when the bill was first called up, I asked—as appears on page 7382 of the CONGRESSIONAL RECORD for May 22—the following question:

> How does the formula provided in the bill for the computation of annuities compare with that prevailing under the regular Civil Service Retirement Act?

The Senator from Pennsylvania [Mr. CLARK], then in charge of the bill, replied:

> It is my understanding that it is identical.

In the colloquy which ensued, both the Senator from Montana [Mr. MANSFIELD], the Senator from South Carolina [Mr. JOHNSTON], and the Senator from Pennsylvania [Mr. CLARK] stated—and they were sponsors of the bill—that in their opinion the bill would result in having those who retired under the provisions of the bill receive substantially the same benefits as those received by persons retiring under the provisions of the Civil Service Retirement Act.

Under the Civil Service Retirement Act, the employees pay 6½ percent and the employer—the United States Government—pays 6½ percent.

But in the case of the pending bill, if it is enacted into law, the contribution made by the employees will be increased to 6½ percent; but the United States Government will be required to pay into the fund in order to make it solvent 39.02 percent of the salaries. A paycent of 25 percent will be required immediately, and it will gradually increase to 39.02 percent, and over the years it will average 39 percent. That is six times the contribution the United States Government makes to the retirement fund of the civil service employees.

Mr. BIBLE. Mr. President, will the Senator from Delaware yield to me?

Mr. WILLIAMS. I yield.

Mr. BIBLE. The Senator from Delaware said the United States Government would be required to make that payment. I do not believe that is a correct statement; I believe the District of Columbia, as the employer, would be required to make the payment.

Mr. WILLIAMS. What is the difference? Thus far the United States Government has been underwriting substantially the employer's contribution and under the provisions of the bill will continue to do so.

Mr. BIBLE. I think it follows the same percentage as the Federal contribution.

Mr. WILLIAMS. I should like to have the Senator explain what he meant by that statement. Is it his opinion that the United States Government would put only 6½ percent into the fund?

Mr. BIBLE. No; the Senator from Nevada does not say that. The employer's share depends on appropriations, regularly enacted, by the Congress of the United States. I mean to point out that of the moneys appropriated by the Congress of the United States in the regular District of Columbia appropriation bills, as the Senator from Delaware well knows, a great amount comes from taxes levied in the District of Columbia, such as excise taxes and the other types of taxes.

Mr. WILLIAMS. Let us get the record straight. Last year $5,020,000 was appropriated as the United States Government's part of the contribution to the retirement system, and the employees' contribution was $985,000. The Government paid five times as much as the employees paid. Employees contributed 5 percent of their salaries into that fund. They paid $985,000. The $5 million the Government contributed then was a little bit over 25 percent of the payroll. That is exactly what I said before. Last year the Government paid 25 percent. Over a period of years the Government, if this bill is enacted, will pay an average of 39.02 percent. The point I make is that no employer can afford to pay 39.02 percent of all salaries into a retirement system and keep solvent.

Just imagine projecting that formula into all Federal retirement systems. Furthermore, there is no provision in the bill authorizing the appropriation of money with which to pay the retirement benefits provided in the bill.

The argument was made in the Senate today that the money with which to pay retired employees would be paid out of the retirement fund. But that retirement fund is broke, and has been broke since 1935. There is not a single dime in the District retirement fund today. The contributions and deductions from the employees' pay have for years been commingled into the general fund and spent accordingly. There is today no retirement fund so far as employees of the District of Columbia are concerned.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. BUSH. I understood the Senator to say a moment ago that on a previous occasion the acting chairman of the committee, the Senator from Pennsylvania [Mr. CLARK] had said the purpose of the bill was to bring it into line with benefits for similar employees under Federal civil service. Is that correct?

Mr. WILLIAMS. That is correct.

Mr. BUSH. Has the Senator any estimate as to what would happen to the Federal civil service retired employees if they were brought into line with the benefits provided in this bill?

Mr. WILLIAMS. Under the bill, the contributions of employees will be increased to 6½ percent. Civil-service employees are now paying 6½ percent. Any civil-service employee who is paying 6½ percent, with the United States Government as the employer, has the right to expect comparable benefits. I asked the director of the civil service retirement fund to compute what it would cost the United States Government to extend to these civil-service employees, who likewise are paying 6½ percent, comparable benefits to those provided for employees under this bill. I quote from the letter received from Mr. Andrew E. Ruddick, Chief of the Retirement Division, answering that question:

> Based on the above considerations, we estimate that if the provisions of S. 1770 were extended to the civil service retirement system, the Government's annual retirement cost would be increased by 13½ percent of the payroll, or more than $1.2 billion a year.

Mr. BUSH. I thank the Senator.

Mr. THYE. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. THYE. My concern, of course, is with the question whether the employees under consideration are entitled to retirement benefits at this time.

Mr. WILLIAMS. To which employees does the Senator refer?

Mr. THYE. The employees who are in question here. I understand they are the Park Police.

Mr. WILLIAMS. Yes.

Mr. THYE. They are entitled to retirement pay?

Mr. WILLIAMS. Yes and are getting it.

Mr. THYE. If they were eligible to retire under the present system, to how much a month would they be entitled?

Mr. WILLIAMS. I do not have the amount as to what they would get and would need information as to the number of years worked plus the salary received. I think it can be said—that under the present system these particular employees are not getting as much as employees who come under the Civil Service Retirement Act. It should be pointed out, however, that the employees under discussion are paying only 5 percent of their salaries toward their retirement, whereas civil service employees are paying 6½ percent.

The bill provides for an increase in the contribution to 6½ percent, which will be the same as that contributed by law enforcement officers under civil service. Therefore, I think they are entitled to benefits equivalent to those received by law-enforcement officers under the Civil Service Retirement Act.

Mr. THYE. That is what I was trying to get clear. I think there is no question that they should be receiving that much in the way of retirement, if other Federal employees under the classified service receive such benefits. While the Park Police are under the District of Columbia, they are policing Federal parks.

Mr. WILLIAMS: That is correct.

Mr. THYE. Therefore, in my opinion, they are justly entitled to come under Federal retirement benefits. If we have failed in the past, we may have erred; but certainly the employees should not suffer because we who are charged with the responsibility in Congress have failed properly to legislate to cover them in the past. I feel we should today take

the step necessary to protect the employees.

Mr. WILLIAMS. They are protected now, although, I repeat, I think the formula applying to them should be revised upward wherever necessary to give them all the benefits extended to any other law-enforcement officers under the Civil Service Retirement Act. We have been in complete agreement on that point. The bill was reported by the committee with the recommendation that that was the purpose of the bill. We are not in disagreement as to the stated purpose of the bill, but my point is that the bill goes far beyond what law enforcement or any other employees receive under the Civil Service Retirement Act.

As evidence of that fact, the Director of the Bureau of the Budget said that if we projected the benefits proposed under the pending bill to other civil-service employees who are paying 6½ percent into the retirement fund, it would cost the Government $1,200 million annually.

Mr. THYE. Mr. President, will the Senator yield for another question?

Mr. WILLIAMS. I yield.

Mr. THYE. Under the proposal in the bill how much retirement pay would an employee be eligible to receive? How much would his monthly payments be?

Mr. WILLIAMS. There are many ways in which the bill differs from the civil service retirement formula. The contribution of the employees is increased to 6½ percent. One change is that the retirement payment, instead of being computed on the average of the highest 5 years as is done under the civil-service system, may be computed on the basis of 1 year.

Mr. THYE. Will the Senator yield further at that point?

Mr. WILLIAMS. Yes.

Mr. THYE. Does the Senator mean there is provided a special opportunity for retirement by taking the last year's salary as the basis for computation?

Mr. WILLIAMS. That is correct. The salary does not have to be averaged over 5 years; the last year can be used as the basis for computation.

Mr. THYE. Will the Senator yield for a further clarification? The salaries of park policemen, with the exception of captains or lieutenants, are very much the same from year to year, except for longevity provisions based on the length of their service. Is that not correct? So that they are not faced with the same question as an employee would be who may have started as a clerk and reached an executive position in the past 2 or 3 years, and who may have a much higher salary on which retirement would be based, using the 5 highest years, rather than the last year, as in the case of a police officer.

Mr. WILLIAMS. That is perhaps true.

Mr. THYE. It seems to me the committee may have taken into consideration the fact that a park policeman, once he is qualified and put on the payroll, remains pretty much in the same status, unless he is promoted to a lieutenant or captain, and there are very few who reach that higher rank. It seems to me as if the committee may have done a pretty good job in taking the service into consideration. We may say it is an exception to the rule in civil service.

When we consider the Park Service alone—I am not too familiar with it, because I have never served on the District of Columbia Committee—by applying commonsense to the question, it seems as if the committee has used a lot of commonsence. If the Senator and I were park policemen, retiring tomorrow, and if we had been good, faithful servants of the Government, we would like to see our retirement made comparable to the retirement of other classified personnel and their privileges.

Mr. WILLIAMS. I may say to the Senator from Minnesota that I am trying to make their retirement comparable to others, but I do not think for the same amount of contribution they should go so far beyond. While this bill does propose to change the contributing formula to the same basis as civil-service employees, it substantially increases over the Civil Service Retirement Act for the park police in the District of Columbia the retirement benefits. The park police in Yellowstone Park, or in any other park, whether we call them rangers or park police, pay 6½ percent for their retirement into the fund, but they will not receive the benefits of this bill. It applies only to District of Columbia Park Police.

Mr. REVERCOMB. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield to the Senator from West Virginia.

Mr. REVERCOMB. First, I wish to thank the Senator for yielding to me for a few questions.

Does the Senator mean that he is entirely willing that those covered by the bill, the police and firemen in the District of Columbia, shall have their retirement pay raised to the level of that of the other civil-service employees? Am I correct in my understanding?

Mr. WILLIAMS. The Senator is correct.

Mr. REVERCOMB. The Senator does object to raising it far beyond that amount, over and above that which anyone else is receiving. Is that a correct understanding?

Mr. WILLIAMS. The Senator is correct. We certainly cannot provide the additional benefits for this group unless we are ready to extend the new formula across the board, but to do this would cost an additional $1.2 billion. It is prohibitive.

Mr. REVERCOMB. The Senator wishes to be fair in giving them an equal amount, but he is not willing to set a precedent in this case whereby the other civil-service employees would desire the same raise. Is that correct?

Mr. WILLIAMS. The Senator is correct.

Mr. REVERCOMB. Would it not be a precedent, which would give the other civil-service employees the right to ask that their retirement be raised to a figure just as high as this bill would raise retirement for the police and firemen in the District of Columbia?

Mr. WILLIAMS. They would not only have the right, but I do not think Congress could defend its action in not responding to their demand should we adopt the precedent of this bill.

Mr. REVERCOMB. Congress would be in an indefensible position, would it not, if it raised the retirement pay for the park police, the police and firemen in the District of Columbia, up to such a high level and did not raise it for other civil-service employees?

Mr. WILLIAMS. The Senator is correct. Right here in the Capitol Building, a part of the police force or guards is under the Metropolitan Police Force Act, and a part is under the Civil Service Act. They are working side by side and are doing comparable work. They are both paying 6½ percent into the Retirement Fund.

Yet if we should pass the bill as it is worded, those men will still be paying 6½ percent, but one class will be getting substantially greater benefits from the retirement system than will the others under the Civil Service Retirement Act. We cannot defend such action.

Mr. REVERCOMB. Will the Senator yield further?

Mr. WILLIAMS. I yield.

Mr. REVERCOMB. Do I understand correctly that the Capitol Police are not to receive benefits which are to be given to the Park Police and firemen under this bill?

Mr. WILLIAMS. The Senator is correct.

Mr. REVERCOMB. Does the bill omit the Capitol Police?

Mr. WILLIAMS. We have omitted the guards at the Capitol, and we have omitted some of the police here. I do not know just where the dividing line is, but I do know that some are in and some are out of the bill. It does not take them all in—yet all make the same 6½ percent contribution.

We would also have this situation: If we passed the bill as it is worded, we are branching out beyond the Metropolitan Police and firemen and taking in the Park Police and some of the Secret Service. These employees are direct employees of the United States Government; and why should we transfer them to a city retirement fund especially when that fund is already bankrupt?

They are not employees of the city of Washington. Yet we would be putting them under the retirement system of the city.

We also would have the situation that as these men came under the system by election, they would withdraw their funds which they had contributed to the civil service retirement fund, and those funds would be redeposited in the District of Columbia. But the District of Columbia operates no trust fund, therefore the funds would go into the general fund of the District and be spent for repair of the streets or anything else.

Mr. REVERCOMB. Mr. President, will the Senator yield for a further question?

Mr. WILLIAMS. I yield.

Mr. REVERCOMB. It seems to me to be very unfair to the police of the Capitol, whom we know as Capitol police, to make a distinction against them in favor of any other group coming under

a retirement system. Does it not seem so to the Senator?

Mr. WILLIAMS. Yes. I think all law enforcement officers should be put on the basis of equality, all paying the same amount into a retirement fund and all receiving the same benefits.

Mr. REVERCOMB. Is this not a case where further study should be given to the bill, so that the Capitol police may be considered along with others, and certainly so that the park police, the city police, and firemen may be raised up to the level enjoyed by others, but not that a precedent should be established to bring about a pyramiding affecting every division of Goverment employees in respect to retirement?

Mr. WILLIAMS. I think it would result in that. Should it be felt that law enforcement officers, whether they be in the District of Columbia or in other branches of service, are entitled to more than they are getting now, the situation should be evaluated, a price tag should be placed on it, and it should then be brought before the Congress. The committee should not report a bill, as was done in this instance, with the statement, "Here is a bill that makes substantially no change in the formula as compared to the Civil Service Retirement Act," and then find such glaring differences as have been established.

Certainly $1.2 billion is a substantial change.

Certainly this bill was not brought before the Senate with proper representations. The Senate was not given all the facts behind the bill. We were told earlier in the colloquy today by the manager of the bill that under the existing formula the employees and employers in the District were each paying 5 percent. It was later developed beyond a question of doubt that the District of Columbia is paying 25 percent. That is 500 percent of the employee contribution. Surely the sponsors of the bill should be more accurate and know more about the bill than that.

We were also told that the fund was reasonably sound. Then it was later admitted that there was no fund. The fund is broke. There is absolutely no trust fund.

Mr. REVERCOMB. Mr. President, will the Senator yield further?

Mr. WILLIAMS. I yield.

Mr. REVERCOMB. I wish to compliment the Senator for the very careful study he has given this bill. I express the hope that the motion will be properly made to recommit, so that the bill may be further studied. It is a matter of grave concern, first, that we are not bringing the pay up to a level of the other civil-service employees, and, second, that we are setting a precedent which would raise the cost, a precedent which could not soundly be resisted, when others might come forward and ask for an increase up to the point of the increase granted by this bill. Therefore, I express the hope that the able Senator will move to recommit so that further study may be given to the bill, and that the motion will be agreed to by the Senate.

Mr. WILLIAMS. I thank the Senator from West Virginia.

Mr. MUNDT. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield to the Senator.

Mr. MUNDT. First of all, I should like to associate myself with the congratulations extended by the junior Senator from West Virginia for the splendid public service the Senator from Delaware has rendered in analyzing the bill and exposing its fundamental and basic fallacies, as well as for taking the initiative—which I hope he will take, or perhaps has—as to suggesting a motion to recommit.

I do not believe this bill should be killed permanently. I think there is merit in what the committee has been trying to do. However, it certainly is loose legislation, improperly presented to the Senate, with basic fiscal errors, which demonstrate how easily Congress can stumble into an additional expenditure of $1.2 billion. May I ask the Senator, is that an annual increase?

Mr. WILLIAMS. That is an annual increase; yes.

Mr. MUNDT. None of us can sit here and maintain his self-respect if we are to give to one little select group of Federal employees benefits at a level which, in order to make them universally available, would cost $1.2 billion a year. It shows that prudence is important in connection with a measure of this kind.

I ask the Senator from Delaware whether his suggested remedy is to try to amend the bill on the floor of the Senate, or whether he thinks it should be recommitted to the committee, so that the committee can iron out the inequities and report a bill which will stand up on the basis of equality to all?

Mr. WILLIAMS. The bill should be recommitted. I would hesitate to try to amend it on the floor. We are dealing with a retirement system, which is rather delicate, and I think whatever changes are made should be evaluated from all angles. After all, the basic, fundamental value of a retirement system is that a man when he retires at the age of 60, 65, or 70, or whatever the retirement age is, should have confidence that the fund is sound. Therefore, we must not haphazardly pass a retirement bill with no one on the committee knowing whether or not there is any money in the fund to pay the benefits. Any employee who is paying to the United States Government a portion of his salary for retirement has the right to know that the fund is being kept intact. That is the case with our social security fund, the regular civil service retirement fund, and the railroad retirement fund.

Mr. MUNDT. Also that he is being treated with the same equity as are his associates in the Federal employment family, who are paying the identical contribution of 6½ percent.

Mr. WILLIAMS. That is correct.

I point out one further inequity which would be difficult to explain to a civil-service employee. Under the provisions of the pending bill, the widow of a dependent would receive a minimum of $1,800 a year. There are many civil service employees who have worked for the Government only a few years or perhaps had a lower salary. They may be drawing only $400 or $500 or $1,000 a year in retirement benefits. When such a man dies, however, his widow would receive a retirement benefit equal to about one-half his salary. Under the bill now before us a man's widow would be entitled to a minimum of $1,800 a year regardless of what his original retirement was.

I shall be glad to yield to the Senator from Nevada [Mr. BIBLE], if he wishes to take exception to this statement. However, I think he will agree with me that this is the effect of this bill.

Mr. BIBLE. There are a number of differences.

Mr. WILLIAMS. A man's widow would be entitled to $1,800 a year as a minimum, regardless of what his retirement payments might have been.

Mr. MUNDT. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. MUNDT. I point out that in virtually every State there are Park Service employees. The Park Service maintains a force of men who perform the same kind of service as the Park Police render in the city of Washington. There are the same kind of gradations, as they move up the ladder of seniority. As the Senator from Minnesota appropriately pointed out, such service is not like working in a Government office and moving up from clerk to manager, and so forth, in following a lifetime career.

How could we justify paying a park policeman in Washington, D. C., benefits which we deny to those working in the Park Service in the several States? Would there be any justice in such action?

Mr. WILLIAMS. There would be no justice in it. It could not be defended.

I believe that this retirement system should be brought up to the basis of equality, with respect to formula, with the benefits provided for law-enforcement officers under the civil-service retirement system. But I do not think we would be justified in giving employees under this system greater benefits than we would be willing to extend to all the other law-enforcement officers. If it is the wisdom of the committee and the Congress that we should go further than what we are now providing under the civil-service retirement system, let us treat all employees in a similar category alike. Let us accurately estimate the cost and then make our decision. This bill has been advanced as having a negligible cost. Certainly $1.2 billion cost for extending similar benefits to other civil-service employees who likewise are paying 6½ percent is not negligible.

We could not justify taking 6½ percent of the payroll of 2 men—who, in many instances, are working side by side as employees of the United States Government—and then giving to one retirement benefits substantially greater than those provided for the other.

Mr. MUNDT. I think the Senator is entirely correct.

Mr. THYE. Mr. President, will the Senator yield for a question?

Mr. WILLIAMS. I yield.

Mr. THYE. I should like to have an answer to this question: Assume that a Park Police private receives a flat annual salary of $5,000, and that another Federal employee, one in the classified service, also receives an annual wage of $5,000. Would the park policeman receive greater retirement benefits than the classified employee with the same salary?

Mr. WILLIAMS. Oh, yes.

Mr. THYE. How much more a year?

Mr. WILLIAMS. It would depend on the years of service, but the difference might run as high as 30 percent for a 30-year employee. I have not figured it for 20 years.

Mr. THYE. Consider, for example, the case of a classified employee in the Interior Department who has drawn a salary of $5,000 annually. Does the Senator mean that upon his retirement he would receive less retirement benefits annually than would a park policeman who retired with the same salary? Would the park policeman, upon retiring, receive a larger retirement annually than the Interior Department employee?

Mr. WILLIAMS. Oh, yes. Under the provisions of the pending bill there would be a difference of at least 20 or 30 percent, in many instances. The difference would depend upon the years of service. There might be a situation in which two employees had worked the same number of years; both had paid the same amount of money into a retirement fund; but under the terms of the pending bill one would receive substantially greater benefits.

Mr. THYE. I am trying to get the answers to these questions. I do not serve on the committee. This is my first opportunity to acquaint myself with the subject.

Take, as an example, a park policeman receiving a salary of $5,000 a year. He has been employed for the required number of years to make him eligible for retirement—let us say 20 years. He is now eligible for retirement agewise. Compare him with an Interior Department employee who has drawn $5,000 as an annual wage. He has served for 20 years, and is now eligible to retire. How much more would the park policeman receive in retirement benefits than would the employee of the Interior Department? That is the only way I can get the answer clearly in mind.

Mr. WILLIAMS. I can give the Senator the answer in dollars and cents in a few minutes, but I do not have it here.

Mr. THYE. Let us have the answer in dollars and cents.

Mr. WILLIAMS. The benefits which the Metropolitan policeman would receive would be computed on the basis of 2 percent for the first 20 years and 3 percent thereafter. The benefits for the Interior Department employee would be computed on the basis of 1½ percent for the first 5 years, 1¾ percent for the second 5 years, and 2 percent thereafter. There would be no 3 percent computation.

In addition, the Interior Department employee's widow would receive about 50 percent of his annuity, whereas under this bill the widow of a District park policeman would receive a minimum of $1,800.

Mr. THYE. I am trying to confine this question to the employee himself. When we bring in the widow, we become confused. How much would the Interior Department employee receive in retirement benefits if he were a 20-year employee and had a wage of $5,000, assuming that he were eligible for retirement today? How much would the retirement amount to a year?

Mr. WILLIAMS. About 20 to 30 percent, but I would have to compute it. It would depend upon salary and years of service.

Mr. THYE. The Senator knows the figure. He is so accurate with figures that he could tell me to the fraction of a penny how much he would receive a year. That is the information I am trying to get. Would it be $1,800 a year, $1,400, or what?

Mr. WILLIAMS. It would be 1½ percent of the $5,000 for the first 5 years, 1¾ percent of the second 5 years, and 2 percent of the remaining years. This bill provides for a flat 2 percent for the first 20 years and 3 percent of salary for the years thereafter.

Mr. THYE. The Senator has the answer in his mind. I wish he would give it to us.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. JOHNSON of Texas. I wonder if the distinguished Senator from Delaware has in mind any amendments which would correct the situation to which he objects.

Mr. WILLIAMS. No, I have not. I am about to make a motion that the bill be recommitted, so as to permit the committee to adopt the proper amendments. I think that would be the appropriate course. I do not have available the necessary amendments. Until about 1 o'clock I did not receive all of the requested information from the Director of the Bureau of the Budget as to the estimated cost. Therefore I was not in a position to draft amendments on the floor of the Senate.

Mr. JOHNSON of Texas. I wonder if the suggestion which I am about to make would be agreeable to the distinguished Senator from Delaware. I think there is merit in the position which he takes. A number of Senators on both sides of the aisle would like to review the bill further. The hour is growing late. Some of us have engagements which we much keep. I wonder if it would be agreeable to the Senator from Delaware for the Senate to adjourn at this time until Wednesday, which would give the Senator an opportunity to confer with the acting chairman of the committee, to see if some of the differences could be resolved.

Mr. WILLIAMS. I believe this matter could be settled very easily in a few minutes. We are dealing with a substantial increase in connection with the pending bill. I do not believe we should haphazardly pick figures out of the air on the floor of the Senate. Instead, I believe we should sit down with the actuaries of the Civil Service Retirement Board and get a factual estimate of the cost involved. Therefore I believe the proper procedure to take in this matter would be to send the bill back to committee, without prejudice, with the understanding that the bill would be reported to the Senate within 10 days, bringing this retirement system in line with provisions of other retirement acts dealing with the retirement of other law enforcement officers. I think that is the correct procedure to take in this situation. At least we would have a bill which could be submitted to us on the basis of what it would actually cost. That is the way to proceed, instead of trying to perfect the bill on the floor of the Senate.

Mr. President, in order that we may dispose of the question I move that the bill be recommitted with instructions to the committee to report to the Senate within 10 days a bill bringing the formula in the pending bill in line with that provided for in connection with the retirement benefits of other law-enforcement officers under the Civil Service Retirement Act.

Mr. BIBLE. Mr. President, will the Senator from Delaware withhold his motion for a moment?

Mr. WILLIAMS. I withhold it.

Mr. BIBLE. I have been in the Senate Chamber the better part of the afternoon, debating the bill with the Senator from Delaware and with other Senators. It seems to me that there is much merit in the suggestion made by the majority leader, to have the bill go over until Wednesday. I believe there is a great deal of merit, also, in what the Senator from Delaware says concerning the Park Service. I am a little worried, frankly, on that point. I am sure that can be taken up and disposed of without much difficulty. As to the basic difference between the Civil Service Retirement Act and the pending bill, which comes to us from the Commissioners, it seems to me that the Senator from Delaware and I are a little bit apart. I think the suggestion that the bill go over until Wednesday, to see if we can resolve that one point of difference, is a good suggestion.

Mr. WILLIAMS. On May 22 this same measure was debated by the Senate. I then made some of these same points during the debate of the bill. At that time the bill was put over until today. Apparently as far as the committee is concerned there is very little more known about it now than there was then. I do not believe that proposed legislation of this nature can be perfected on the floor of the Senate, whether it be today or tomorrow or Wednesday. I believe the bill should be sent back to the committee, so that proper reports may be obtained from all agencies concerned, and a proper comparison made with other existing retirement systems. I assure the Senators that I will make no effort to delay the consideration of the bill when it is again reported from the committee. I would be willing to agree to a unanimous-consent request to limit debate to 1 hour on each side, or whatever other limitation might be desired. All that I ask is that the bill be properly represented to the Senate.

Mr. KNOWLAND. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. KNOWLAND. I think the Senator from Delaware has done a great service to the Senate this afternoon in calling its attention to some of the points which have been raised relative to the cost of the bill. He has stated that he did not receive some of the information on the bill until 1 o'clock this afternoon. Therefore I can see no particular reason why the distinguished Senator from Delaware should not make his motion to recommit and have it the pending motion when the Senate reconvenes on Wednesday. However, I believe that the request of the majority leader is not an unreasonable request, that the Senate take up the bill again on Wednesday, when the Senate reconvenes.

A motion to recommit is a debatable motion, of course. A number of Senators on this side of the aisle and on the other side of the aisle have indicated that, because of the lateness of the hour, they would like to have additional time to study the bill before they vote on it.

The Senator from Delaware would not be foreclosed with respect to his motion, if he decided to press it on Wednesday. However, in view of the ordinary procedures of the Senate, it is not an unreasonable request that the majority leader has made.

I might say that I had discussed this matter previously with the majority leader and I told him frankly that a great deal of additional opposition—if not opposition, at least some question—has been raised with respect to the bill as the result of what the Senator from Delaware has said. This is a matter all of us want to go into more thoroughly. At that time it might be desirable to press the motion to recommit. However, in the normal procedure of the Senate, what the majority leader suggests would be the better procedure.

Mr. WILLIAMS. I might say to the Senator from California and the Senator from Texas that I shall not insist that the Senate vote on my motion tonight if that is not desired. I was hoping that we could dispose of the matter voluntarily rather than make it necessary for me to enter my motion to recommit the bill. I was hoping the Senator in charge of the bill would voluntarily agree to take the bill back to the committee for further study. The committee is the place where the bill should receive further study and where it should be worked out. That is where the additional reports from the various agencies could be received and studied, and following such study the bill could be brought back before the Senate, together with the reports from the agencies along with an accurate estimate of the cost involved.

That is why I was asking that it be sent back to the committee. I shall not try to get action on the motion this evening if the majority and the minority leaders wish to have the matter go over until Wednesday.

I am wondering whether the Senator from Nevada does not feel that in the light of the discussion here today and the facts that have been developed that it would be better if he would withdraw the bill and take it back to committee for further study. The committee has the responsibility to do that in light of the facts developed here.

Mr. MUNDT. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. MUNDT. I should like to associate myself with the suggestion of the Senator from Delaware that the bill be voluntarily taken back to committee. This is a very complicated measure the Senate has under discussion. If the bill were voluntarily taken back to committee, there would not be any need for a motion to recommit. It is too complicated a bill to risk it to debate on the floor of the Senate, and certainly the floor of the Senate is no place where such a bill should be worked out. The committee has already missed the amount by $1,200,000,000 a year. Therefore it would be asking too much of us to amend the bill properly on the floor of the Senate during debate.

Mr. WILLIAMS. I hope the Senator from Nevada will go along with my suggestion voluntarily to take the bill back to committee. Other bills are pending before committees which propose to increase benefits for other law-enforcement officers. I believe the Senator from South Carolina [Mr. JOHNSTON] has some in his committee. The members of the Committee on the District of Columbia should confer with the Senator from South Carolina and his committee and arrive at whatever recommendations they think should be made. If we are to increase the benefits for the Metropolitan Police, we will automatically be forced to increase them for all law enforcement officers. They should all be considered together.

That is why I was hoping that the Senator from Nevada would be willing to withdraw the bill and take it back to committee for further study. I have great respect for his ability. Certainly I want it understood that my criticism of the bill is not intended as criticism of his desire to have a good bill passed.

Mr. KNOWLAND. I will say to the Senator from Delaware, in all candor, that the procedure outlined whereby the committee can take the bill back and go over it, is sounder procedure than trying to amend a complicated bill and a very highly technical bill on the floor of the Senate.

Frankly, I am very hopeful that after consultation between the ranking minority member of the subcommittee the Senator from Maryland [Mr. BEALL] and the chairman of the subcommittee, the Senator from Nevada [Mr. BIBLE], and in consultation with the majority leader, they can come to a decision before the Senate reconvenes next Wednesday. I believe we will actually save time by following that procedure. I certainly believe that would be a sounder procedure to follow.

However, the distinguished majority leader, who has a unique responsibility in the Senate in connection with the general procedures of the Senate, should be supported on the procedure he suggests. That should be the case except where a situation involves something of a very far-reaching nature. I do not believe we should get into a situation in connection with the procedures of the Senate which would call for a test on this issue. It is not an issue on which we should have such a test.

Mr. WILLIAMS. Mr. President, I have stated my reasons why I think the bill should be recommitted. However, I shall be guided by the wishes of the majority leader.

Mr. JOHNSON of Texas. Mr. President, I certainly appreciate the position taken by the distinguished minority leader, and I am grateful to the Senator from Delaware for the position he takes.

It seems to me that the suggestion he has made that the matter be reviewed by the members of the committee, and perhaps to have the bill go back to the committee, may be a good suggestion. The committee will have an opportunity tomorrow and also before the Senate meets on Wednesday to determine the course of action it wants to take. At that time, either the committee, together with the Senator from Delaware, can ask that the bill be returned to the committee, or the Senate can vote on the matter and be guided by the views of the majority of the committee.

NATIONAL SCIENCE FOUNDATION APPROPRIATION

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in continuity in the body of the RECORD five items.

The first is a letter written by me on May 24, 1957, to the senior Senator from Washington [Mr. MAGNUSON], the chairman of the Subcommittee on Independent Offices and General Government Matters of the Committee on Appropriations, concerning the National Science Foundation and the restoration of funds therefor.

In the letter I point out to the chairman of the subcommittee the importance, as I see it, of the restoration of the $65 million requested by the Bureau of the Budget for the National Science Foundation for fiscal 1958.

Second, a statement I made before the Subcommittee on Independent Offices and General Government Matters of the Committee on Appropriations in support of funds for the National Science Foundation. The statement sets forth the argument which I would have the Senate and the committee consider in this very important matter.

Third, a letter dated March 8, 1957, written to me by Leonard S. Cottrell, Jr., of the magazine Sociometry, in support of funds for the National Science Foundation.

Fourth, a memorandum dealing with the problems of juvenile delinquency as they relate to the support of social science research by the National Science Foundation.

Lastly, a letter dated March 25, 1957, written to me by Dr. L. S. Cressman, head of the Department of Anthropology, University of Oregon.

In his letter, it seems to me, Dr. Cressman sets forth unanswerable premises

in support of funds for the National Science Foundation. For example, in one part of his letter, he says:

> Two cents out of every research dollar in all the governmental sponsored research programs for social science. Think of it.

Dr. Cressman does much in his letter, I think, to supply us with the information we need in support of the plea of the social scientists for a national foundation for which Dr. Cressman argues so eloquently.

While mentioning Dr. Cressman, I wish to express my thanks to him for the great educational leadership he has given to our State during his many years of service on the faculty of the University of Oregon.

Particularly I commend him for the crusading spirit with which he has exercised great leadership in the field of social science, especially in the field of anthropology.

I think at this period of time, when there is so much of a meat-ax approach to budgetary problems, we should be very careful that we do not destroy the great research values in our country because, after all, in America we cannot afford, in my judgment, to deal any serious blows to the research programs which are being carried on as incentives to education throughout our land.

I sincerely hope the committee and the Senate will give very careful consideration to the point made by Dr. Cressman in his letter; and when the committee report comes to the floor of the Senate, I hope it will recommend the restoration of funds asked for the National Science Foundation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MAY 24, 1957.

The Honorable WARREN G. MAGNUSON,
Chairman, Subcommittee on Independent Offices and General Government Matters, Senate Appropriations Committee, United States Senate, Washington, D. C.

MY DEAR SENATOR: As you probably know, I am greatly interested in the program of the National Science Foundation, and particularly in the social science research carried on by that agency.

Upon checking into the House action with respect to the fiscal 1958 appropriations for the National Science Foundation, I was very much disturbed to observe that the budget request for the Foundation had been reduced substantially by the House.

Under the circumstances, I would appreciate it very much if the subcommittee would give very careful consideration to the attached statement in which I urge restoration of the $65 million requested in the budget for the National Science Foundation for fiscal 1958. Also, would you kindly include the statement in the printed record of the hearings on the Independent Offices 1958 appropriations.

With best personal regards,

Sincerely,

WAYNE MORSE.

STATEMENT OF SENATOR WAYNE MORSE BEFORE THE SUBCOMMITTEE ON INDEPENDENT OFFICES AND GENERAL GOVERNMENT MATTERS MAY 24, 1957

NATIONAL SCIENCE FOUNDATION

Mr. Chairman and Members of the Senate:

This year the President's budget included a request of $65 million by way of appropriations for the National Science Foundation for fiscal 1958. In view of the importance of the work carried on by the Foundation in the field of research, I am of the opinion that the budget request was quite modest. In the years ahead, the free nations of the world must depend far more on brainpower than on manpower in coping with great international problems. That is why it is important that the research foundation grant be made available in greatly increased amounts.

It was with deep concern, therefore, that I ascertained that the House had cut back the Foundation's budget to its fiscal 1957 level, $40 million. In the long run this will prove not to represent economy but a very expensive reduction. In years to come our research programs will have to be intensified, and cutbacks today will have to be made up by increases in the future. Therefore, I urge the subcommittee to give serious consideration to restoration of the budget request of $65 million.

Furthermore, I should like to urge that you give particular attention to the extremely pressing need to support, within the framework of the Foundation's general programs, an adequate program of research and fellowships in the social sciences. As one of the coauthors of the legislation setting up the Foundation and as one of the original supporters of a strong social science program within the Foundation, you will readily appreciate the urgency of providing sufficient funds to permit the Foundation to support, at appropriate levels, research and training in the many areas of basic social science which have direct bearing on the national welfare and national security.

It is my understanding that only $600,000 of this year's $65 million budget request by the National Science Foundation would be applicable to an extremely limited program of support of research in selected areas of the social sciences, plus an additional small amount for a handful of fellowships in areas of convergence of the social sciences and natural sciences. Notice that this represents less than 1 percent of the total requested budget of the Foundation, a modest request, indeed. Yet this very meager request stands in jeopardy by virtue of the recent action of the House of Representatives.

Accordingly, if it should develop, unfortunately, that the $65 million budget request is not restored in this case, I urge that at least $600,000 be appropriated to permit the Foundation to begin seriously to develop a comprehensive program for support of significant social science research. Also I urge that it be recommended that an additional $400,000 for support of graduate fellowships in the social sciences be appropriated.

I am convinced that the Foundation could profitably use several times these modest sums for its social science programs but I believe that an adequate beginning could be made next year with these additional funds. I would expect the Congress to provide additional funds in the years to come.

In support of this request, I submit for your consideration, statements I have received from a former colleague at the University of Oregon, Dr. Luther S. Cressman, one of America's most distinguished anthropologists, and from Dr. Leonard S. Cottrell, Jr., an outstanding sociologist and social psychologist, who was formerly Dean of the College of Arts and Sciences at Cornell University and is now a senior staff member of the Russell Sage Foundation. I should also like to direct your attention to the following excerpts from the recent report of the Senate Committee of the Judiciary made by its Subcommittee on Juvenile Delinquency (Rept. No. 130, 85th Cong., 1st session). I endorse wholeheartedly this committee's emphasis on the importance of more basic research in the social sciences.

SOCIOMETRY—A JOURNAL OF RESEARCH IN SOCIAL PSYCHOLOGY

MARCH 8, 1957.

The Honorable WAYNE MORSE,
United States Senate,
Washington, D. C.

DEAR MR. MORSE: My attention has been directed to the following resolution of the American Sociological Society adopted at its annual sessions in Detroit, Mich., last September:

"The American Sociological Society notes with satisfaction the extension of the program of the National Science Foundation to include research support and graduate fellowships in selected social science areas, such as Anthropology, Demography, Experimental Social Psychology, Sociology of Science, Human Ecology, and related disciplines: Be it therefore

"*Resolved*, That the American Sociological Society hereby express its appreciation of the recognition and assistance to the social sciences, and that the Foundation be further commended for its emphasis on basic research in our field; Be it further

"*Resolved*, That the American Sociological Society express its hope that the National Science Foundation's program be further broadened in the immediate future to include the social sciences proper in addition to the areas of convergence with the natural sciences."

I should like to express my wholehearted concurrence with the spirit of this resolution. In establishing the National Science Foundation, the Congress clearly authorized the Foundation to make research grants and award fellowships and scholarships in the social sciences. Quite understandably, the Foundation's initial efforts were concentrated almost exclusively in the physical and biological sciences and, quite commendably, it has moved into the social science fields cautiously and carefully and only after intensive study and analysis.

However, the world crisis and our domestic situation have underscored the pressing need for better understanding of ourselves and our fellow men.

Congress itself has authorized increased social science research activities by Federal agencies in such applied fields as social security, health, agriculture, defense, housing, and education. There is, therefore, increasingly greater urgency to train specialists and to conduct research that will provide the fundamental knowledge on the basis of which applied social programs can be properly planned and implemented.

The imperative necessities of the current social crisis suggest that excessive timidity is a luxury we cannot afford. The National Science Foundation should be encouraged to broaden its various program activities, including its research support, fellowship, scientific information, and education in the sciences programs, to provide for reasonable support of significant research and educational activities in the social sciences.

I note that, on several occasions, the Subcommittee on Juvenile Delinquency of the Senate Committee on the Judiciary, chaired by Senator KEFAUVER, has recommended that the Foundation support social science research that would shed light on the major social problems with which that subcommittee has been concerned. A similar recommendation was made last year by the Subcommittee on Economic Statistics of the Joint Committee on the Economic Report, chaired by Representative BOLLING of Missouri. In the last Congres serious consideration was given to the desirability of directing the Foundation to award fellowships in the field of city planning and housing. I mention these developments to indicate that there is some concern in Congress with the

slowness and excessive caution with which the National Science Board is proceeding in this area.

A report of the National Science Foundation indicates that of the total Federal dollar going into scientific research and development 87 cents goes for physical science research, 11 cents for life science research, and only 2 cents for social science research. The social science share is small enough, indeed, yet considerably less than 2 percent of the total budget of the National Science Foundation is currently spent on support of the social sciences.

Some years ago, a committee of the House, known as the Cox committee, after its chairman, the late Representative Cox of Georgia, concluded in its final report that:

"It is entirely possible that in a time when man's mastery over the physical sciences threatens him with possible extermination the eventual reward from the pursuit of the social sciences may prove even more important than the accomplishments in the physical sciences."

I, therefore, strongly urge and recommend that ample funds be made available for the next fiscal year to permit the National Science Foundation to broaden its program of research support and fellowships in accordance with the resolution of the American Sociological Society. If only 5 percent of the Foundation's total budget were allocated for social science research and education, this would be a modest but commendable beginning, indeed. Such action would clearly and indisputably assist in achieving the objectives of the National Science Foundation Act of 1950 which are listed in the preamble to the act as: "To promote the progress of science; to advance the national health, prosperity, and welfare; to secure the national defense."

Very truly yours,

LEONARD S. COTTRELL, Jr.

P. S. Dr. Harry Alpert of the National Science Foundation staff is primarily responsible for the social science activities of that organization. I am sure that he would be happy, upon your request, to provide you with detailed information on the programs and plans of the Foundation in this area. He should also be in position to give you some evaluation of needs for further development.

P. P. S. I have sent a similar letter to the President and others in Washington, but knowing of your special interest in the social sciences I thought you might wish to make use of this letter in connection with Senate consideration of the 1958 appropriation of the National Science Foundation.

CONGRESSIONAL SUBCOMMITTEE RECOMMENDATIONS REGARDING SUPPORT OF SOCIAL SCIENCE RESEARCH BY THE NATIONAL SCIENCE FOUNDATION

The following excerpts are taken from Juvenile Delinquency, a report of the United States Senate Committee on the Judiciary made by its Subcommittee on Juvenile Delinquency (85th Cong., 1st sess., Senate Rept. No. 130, 1957):

"MORE BASIC RESEARCH IS NEEDED IN BEHAVIORAL PROBLEMS

"The insistent demands for immediate action programs to prevent and treat juvenile delinquency should not obscure the equally important need for long-range, fundamental research on the nature of man and society. Research provides the necessary basic knowledge concerning human social behavior upon which rational, effective, action programs must be based. In the course of its deliberations, the subcommittee was impressed time and time again with the serious gaps in our knowledge of the fundamental mechanisms of human behavior in society. Such knowledge is as essential for a far-reaching solution of juvenile delinquency as it is to other pressing social problems. The subcommittee, therefore, believes that the encouragement of basic research in the social sciences must be an essential feature of any systematic program designed to meet the problems created by delinquent behavior.

"Many expert witnesses before this subcommittee have reported on various phases of research findings to date. In the testimony some solid facts have been combined with interesting speculations and revealing insights. But much remains to be known. The intricate web of interrelationships among home environment, parent-child relationships, community facilities, personality structure, broken homes, intergroup relations, school curricula, religious and spiritual values, and the contents of the mass media of communication has been noted. The exact nature and deeper meaning of these relationships, however, still remains to be unraveled.

"Do disturbed children tend to watch television more than nondisturbed children? What does this mean in terms of the future behavior of the child? What are the basic personality characteristics and family environments of nondelinquent children brought up in disorganized and undesirable neighborhoods? Do comic books reinforce, discourage, or encourage antisocial behavior? Before we can begin to probe thoroughly such questions, we must know a great deal more about the nature of human beings, the course of personality development, and the social and cultural processes that shape and direct human behavior. Basic research can do much in helping us discover and define the general patterns of human social behavior, and thus establish the larger contexts in terms of which the mosaic of questions arising from specific social problems will be seen in proper perspective.

"Research plays a particularly important role in the attack upon social problems. It permits the formulation of hypotheses that can be tested and verified by experiments and systematic observations. It leads to the removal of a body of knowledge from the realm of speculation and subjective opinion, in which each individual deems himself to be an expert, to the realm of assured and demonstrated fact. It substitutes proof for unwarranted assertions. For example, only well-designed research can provide a sound basis for evaluating the controversial allegations about the impact of television and comic books and other mass media upon the study habits and behavior of children and youths.

"Research is also needed to provide hypotheses and guidelines in terms of which practical demonstration programs in juvenile delinquency can be organized and evaluated. Thus, proposed school-community experimental programs for the reduction of delinquency require basic research to find the postulates for the foundation upon which such programs can be planned and administered.

"Likewise, research is essential in broadening and deepening our understanding of man's hopes, desires, and aspirations and our knowledge of the social processes by which human ideals can be achieved. Man has achieved mastery over nature, but now needs more than ever the fundamental knowledge about his own nature and his family and community relationships which will permit him to achieve mastery of himself. This much is axiomatic.

"In this connection, the subcommittee has, on several occasions, recommended that the research support and fellowship programs of the National Science Foundation be broadened to include support of basic research and education in the social sciences. That recommendation is reemphasized. The importance of utilizing scientific methods in the study of human social behavior is recognized by all who have given thought and study to the problem.

"The subcommittee strongly recommends that ample funds be made available for the next fiscal year to permit the National Science Foundation to embark upon a program of social science support on a reasonable scale. The Foundation already possesses legislative authority to undertake programs in the social-science fields. The subcommittee believes that such a program would clearly be in the national interest and would provide for meeting an important national need." (Pp. 127–128.)

"7. The subcommitte has been concerned by the lack of firm knowledge concerning the social and psychological consequences of youth employment and unemployment, as well as by the absence of sound information about youth's career patterns, job satisfactions, and motivations. We need to know more, also, about the attitudes of employers who either give or deny job opportunities to young people and how these attitudes may be constructively modified. It, therefore, recommends that appropriate agenices and groups, including the National Science Foundation, the Department of Labor, and the Department of Health, Education, and Welfare, support basic research studies in this important area of community life. Research is also needed to clarify the further relationship between school dropouts and delinquency." (P. 218.)

"The subcommittee recommends that the National Science Foundation consider the possibility of extending its activities into the social sciences. It is true that, so far, the National Science Foundation has restricted itself almost exclusively to matters in the physical sciences, but the pressing need for research in the area of nonphysical sciences suggests a change in policies.

"The topic with which we are dealing represents a good example of why the Foundation should do so. To this end, the subcommittee further recommends that the National Science Foundation extend its work to support research in the crucial area of the effect of mass mediums on young people." (P. 227.)

"In view of the urgent requirement that teachers have a good grounding in the social and psychological sciences so that they may better understand themselves and their students, it is important that our fundamental scientific knowledge of human social and psychological behavior be deepened. To this end, it is recommended that appropriate agencies, including such Federal agencies as the Department of Health, Education, and Welfare, and the National Science Foundation, broaden their programs of support of basic research in the social and psychological areas. In this regard, the subcommittee recommends that the National Science Foundation extend its activities into the social sciences. It is true that, so far, the National Science Foundation has restricted itself almost exclusively to matters in the physical sciences, but the pressing need for research in the area of nonphysical sciences, as indicated in the studies of this subcommittee, suggests a change in policies." (P. 242.)

UNIVERSITY OF OREGON,
Eugene, Oreg., March 25, 1957.

The Honorable WAYNE L. MORSE,
Senator from Oregon,
The Senate, Washington, D. C.

DEAR WAYNE: I have been considerably concerned, especially in the years since the close of World War II, with the developing acute problems in the general field of education, and research in particular, and I have become seriously disturbed at what seems to me to be the course which trends in research support seem to be following. I take it, however, that these simply reflect the values in our American way of life. Although we were colleagues, some 25 years ago, our paths have diverged. I am still, as it were, in the front line in the education

field and you are a Senator who is in a position of critical importance to influence national policy. It is from this relationship that I am writing you at this time.

I have been a teacher of social science for over 30 years in colleges and universities, and at the same time have been carrying out a research program both in social science and in a field which generally is considered to overlap with the natural sciences, so that I have a fairly intimate knowledge of the nature of the social sciences and the natural sciences. What seems to be happening in the field of research and the emphasis in education since World War II is inevitable and is the outgrowth, obviously, of the rather desperate situation in which this country finds itself vis-a-vis Russia. Survival in some form or other is obviously the issue at stake and no one can complain about the tremendous concentration on research in technology, the development of which may spell the difference between success or failure in the situation in which we find ourself. However, there are a great many social byproducts of this tremendously rapid rate in the development of technological processes as well as from other sources and it is at this point, it seems to me, that we are failing to recognize the nature and gravity of the social problems with which we are faced, or to take adequate steps to meet them.

A National Science Foundation report, Federal Funds for Science, V, the Federal Research Development Budget, fiscal years 1955, 1956, 1957, give us the most reliable figures we have available on the amount of money spent for research by the Federal Government; and the disparity between the different fields is startling. In physical sciences the estimated budget for research in 1957 was $2,075 millions of dollars. For life sciences, $269 million, and for the social sciences, $39 million. These figures may be presented in another way which shows how the research dollar is spent. On page 8 of this report the foundation states, "The approximate distribution of the research dollar among the major fields in the fiscal years 1955, 1956, and 1957 is 87 cents for the physical sciences (including engineering sciences), 11 cents for the life sciences, and 2 cents for the social sciences." The report goes on to state, "Funds for the social sciences, while considerably more limited than those for the other fields, shows sizable percentage increases in fiscal years 1956, 1957, 27 and 20 percent respectively. The Department of Agriculture, which provides about 40 percent of the Government's total social sciences research funds, obligated about 25 percent more for this purpose for the fiscal year 1956 than in 1955; a similar increase is anticipated in fiscal year 1957. Although the Department of Agriculture ranks first among the agencies in this field, the obligation for social sciences account for only about 15 percent of the Department's total obligation for conducting scientific research development."

"Social sciences," I am now quoting from the same report, "are those sciences directed toward an understanding of the behavior of individuals as members of a group* * *." Research in the social sciences falls into two categories, as in all other sciences, that is, what has come to be known as (1) basic research and (2) applied research and development. "Basic research is that type of research where the primarily aim of the investigator is the fuller knowledge or understanding of the subject under study, rather than a practical application thereof." It is a matter of real importance in connection with our basic research program in the social sciences that there are just two organizations in the Government which support basic research exclusively, those are the Smithsonian Institution and the National Science Foundation. If basic research in the social sciences is to be stepped up there is obviously only one place or organization which can be the active agent in such a program, and that is the National Science Foundation.

I suppose the lack of awareness for the need for basic research in the social sciences, and I mean here toward an understanding of the behavior of individuals as members of a group, is due to a variety of factors. One of these, I think, is the nature of the history of social science itself during the development of which there was a great deal of confusion between real basic research and programs which were essentially reform movements. Another difficulty was that characteristic of all sciences in the early stage of the development and that is the problem of working out a sound and effective methodology. Another reason I think is inherent in our democratic way of life in which we confuse the right of the citizen as a voter to decide on policy through the ballot with the process of investigation of a problem to determine exactly what the facts are in the relationship between two or more variables in a social situation. Basic research, of course, is not concerned with policy, and the social scientist is no more concerned than a physicist with whether the results of his investigation indicate a situation is good or bad. This is something which I think we social scientists have never made quite clear to the people we teach and to the public at large. I believe though, that the situation is changing now, certainly with regard to the development of a good group of hard-boiled social scientists who can, and do, distinguish between the basic and applied aspects of their fields. Furthermore, methods have been enormously improved for research and are constantly being raised to higher levels of discrimination so that the results that we arrive at can withstand even the sharpest kind of scientific scrutiny.

Thoughtful people in all walks of life are very much concerned with the problems that we face as human beings living together in groups. What we need to realize is that, with the tremendous stimulus that is given to research in the physical sciences, we create many problems facing us as human beings living in communities that we shall be unable to meet unless we can speed up, and speed up tremendously, effective research in the social sciences. Some people have tried to talk about establishing a moratorium on research in the physical sciences to let the program in the social sciences catch up. This is the sheerest nonsense, for it cannot be done, nor will anybody try to do it. The solution is to make every effort to reduce the gap by much stronger support of sound basic research in the social sciences. It is significant in connection with my point that the Bell Telephone Laboratories at Murray Hill, N. J., have established a department for basic research in social science.

I could list a whole series of problems from international relations to the development of automation and its economic and social significance as areas of study which are problems of extraordinary importance for the future, but there is no point in doing this, for any thoughtful person can spend a long period of time and not list all of them. With the tremendously rapid change which is so characteristics of modern life, (anyone of us who is over 50 years old can think back over his own lifetime), all the complex problems which face the human community in its efforts to lead a meaningful life are enormously increased and sharpened in their intensity; and the only approach to being some kind of a master rather than a victim of life is by basic scientific research which enables us to understand the nature of the problems and the human being concerned to provide a sound basis for intelligent action by government and an informed electorate. The basic concept which justifies universal education and the democratic process of government is that in the long run education will be an effective guide to political action. But education can only serve this end if it continues to replace fictitious with factual knowledge and, it is my firm belief that this end can only be achieved by the development of a greatly expanded program of significant, basic research in the social sciences. Two cents out of every research dollar in all the governmental sponsored research programs for social science. Think of it.

When the National Science Foundation Act was debated in the Senate in 1948, you, Wayne, were, I believe, given specific and definite assurance that the bill, as approved, permitted the Foundation to support social science research which met the scientific criteria set by the National Science Board. Yet the board has approached the social sciences with excessive caution, unaware of the contribution social science research has made toward the national welfare and defense. Not only should the National Science Foundation devote more of its research funds to the social sciences, it should also provide more fellowships to graduate students and postdoctoral scholars in the social sciences in order to insure an adequate supply of properly trained personnel in these fields. If the foundation spent only around 10 percent of its research funds and a like ratio of its fellowship funds for the social sciences, this would be extremely modest and meager, but could become the initial starting point for an important, developing program.

The Government has an obligation to support the National Science Foundation, the only Federal organization but one devoted to basic research, yes, even direct it to develop the social science field of basic research on a vastly expanded program comparable to those of the physical and the life sciences.

Sincerely yours,

L. S. CRESSMAN,
Head, Department of Anthropology.

LEGISLATIVE PROGRAM

Mr. MANSFIELD. Mr. President, for the information of the Senate, I wish to announce a list of the bills which have been cleared for floor consideration and which may be taken up on Wednesday or soon thereafter.

Calendar No. 379, H. R. 2493, to authorize the Secretary of the Interior to permit the construction of a bridge and road across Chincoteague National Wildlife Refuge, and for other purposes.

Calendar No. 381, S. 1366, to amend the act entitled "An act to authorize the construction, protection, operation, and maintenance of public airports in the Territory of Alaska," as amended.

Calendar No. 391, S. 695, providing for the revision and printing of a compilation of Federal laws relating to the regulation of carriers subject to the Interstate Commerce Act.

Calendar No. 392, S. 1027, to authorize the Secretary of Commerce to prescribe seals for bureaus and offices of the Department of Commerce, and for other purposes.

Calendar No. 393, S. 1791, to amend the Reorganization Act of 1949, as amended, so that such act will apply to reorganization plans transmitted to the Congress at any time before June 1, 1959.

Calendar No. 394, S. 1941, to authorize the payment by the Bureau of Public Roads of transportation and subsistence costs to temporary employees on direct Federal highway projects.

Calendar No. 395, S. 1536, to amend subsection 507 (a) of the Federal Property and Administrative Services Act of 1949, as amended.

Calendar No. 396, S. 806, to authorize the Administrator of General Services to quitclaim all interest of the United States in and to certain lands located in Indiana to the State of Indiana and to the board of trustees for the Vincennes University, Vincennes, Ind.

Calendar No. 397, Senate Concurrent Resultion 30, to print a compilation of studies and reports on the foreign-aid program.

Calendar No. 398, Senate Resolution 139, to print additional hearings on S. 963, control of advertising on interstate highways.

Calendar No. 399, Senate Resolution 140, authorizing the printing of additional copies of Senate Report 130, 85th Congress, 1st session, entitled, "Juvenile Delinquency."

Calendar No. 400, H. R. 790, to amend the Legislative Appropriation Act, 1955, with reference to official office expenses of Members of Congress.

Calendar No. 401, H. R. 7234, to fix the responsibilities of certifying officers and disbursing officer of the Library of Congress.

Calendar No. 402, S. 434, to provide for improved methods of stating budget estimates and estimates for deficiency and supplemental appropriations.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, June 3, 1957, he presented to the President of the United States the enrolled bill (S. 1463) to amend the Medals of Honor Act to authorize awards for acts of heroism involving any motor vehicle.

ADJOURNMENT TO WEDNESDAY

Mr. MANSFIELD. Mr. President, pursuant to the order previously entered, I move that the Senate adjourn until noon on Wednesday next.

The motion was agreed to; and (at 5 o'clock and 57 minutes p. m.) the Senate adjourned, the adjournment being, under the order previously entered, until Wednesday, June 5, 1957, at 12 o'clock meridian.

CONFIRMATIONS

Executive nominations confirmed by the Senate June 3, 1956:

DIPLOMATIC AND FOREIGN SERVICE OF THE UNITED STATES OF AMERICA

The following-named persons to be Ambassadors Extraordinary and Plenipotentiary of the United States of America to the country placed with their respective names:

Llewellyn E. Thompson, of Colorado, to Union of Soviet Socialist Republics.

Francis White, of Maryland, to Sweden.

John M. Cabot, of the District of Columbia, to Colombia.

Earl E. T. Smith, of Florida, to Cuba.

ROUTINE APPOINTMENTS

To be consuls general

Ivan B. White, of Washington.
W. Wendell Blancké, of New York.
Olcott H. Deming, of Connecticut.

To be Foreign Service officers of class 2, consuls, and secretaries

Eric E. Oulashin, of Maryland.
Philip Raine, of the District of Columbia.

To be consuls general

William C. Affeld, Jr., of New Jersey.
Mervyn V. Pallister, of Michigan.
Thomas W. Simons, Sr., of the District of Columbia.
Charles D. Withers, of South Carolina.

To be Foreign Service officer of class 3, consul, and secretary

Knox Lamb, of Mississippi.

To be Foreign Service officers of class 4, consuls, and secretaries

Roger G. Gifford, of Virginia.
Hugh C. Reichard, of California.
Edward H. Widdifield, of California.

To be Foreign Service officer of class 5 and consul

Robert H. Miller, of Washington.

To be Foreign Service officers of class 5, consuls, and secretaries

Miss Doris Meltana Luellen, of California.
Miss Josephine D. Wharton, of Florida.
Thomas A. Fain, of Oklahoma.

To be consul

Robert E. Barbour, of Tennessee.

To be Foreign Service officers of class 6, vice consuls of career, and secretaries

Dwight M. Cramer, of Nebraska.
Frank D. Durey, of Minnesota.
Andrew J. Fink III, of California.
Richard Forschner, of New Jersey.
Miss Ellen Gavrisheff, of Texas.
Ralph M. Kearney, of Illinois.
George A. Mailloux, Jr., of Rhode Island.
Mrs. Louise deCourcy O'Grady, of Florida.
Miss Geraldine M. Oliva, of Oregon.
John H. Seate, of Texas.
Miss Eleanor M. Shields, of California.
Joseph Terranova, Jr., of Maryland.

To be Foreign Service officers of class 8, vice consuls of career, and secretaries

George A. Anderson, of Iowa.
Michael S. Bank, of New York.
Richard C. Barnum, of Ohio.
Richard D. Belt, of Ohio.
Robert O. Blucker, of California.
Michael P. Boerner, of Maryland.
Miss Kathleen C. Bruguiere, of California.
Thomas E. Cummings, of California.
Ralph Estling, of California.
Miss Alta F. Fowler, of Virginia.
Rogelio Garcia, of New York.
James L. Gorman, of Oregon.
John T. Haldane, of the District of Columbia.
Ashley C. Hewitt, Jr., of California.
William P. Keasbey, Jr., of California.
Lowell C. Kilday, of Wisconsin.
Robert A. Krier, of New York.
Nelson C. Ledsky, of Ohio.
Perry W. Linder, of California.
W. Douglas McLain, Jr., of Illinois.
Miss Barbara J. Marvin, of California.
Noble M. Melencamp, of Kansas.
Alan C. Mencher, of California.
James K. Powell, of Texas.
Kenneth N. Rogers, of New York.
Peter Sebastian, of New York.
John P. Shumate, Jr., of California.
Herbert D. Swett, of California.
John J. Taylor, of Tennessee.
Richard H. Thompson, of Indiana.
John T. Vanderveen, of California.
Donald B. Wallace, Jr., of Indiana.
Leonard A. Warren, of California.
Alfred J. White, of the District of Columbia.
Edward E. Wright, of Louisiana.

The following-named Foreign Service staff officers:

To be consuls

Joe B. Cox, of Ohio.
John C. Donnell, Jr., of Washington.
N. Marbury Efimenco, of Michigan.
Clyde J. Hanna, of California.
William J. Herget, of Maryland.
Wilford J. Kramer, of Illinois.
James M. McDonald, Jr., of New Jersey.
Roger P. Ross, of California.

The following-named Foreign Service reserve officers:

Orville H. Bathe, of California.

To be Foreign Service officers of class 8, vice consuls of career, and secretaries

Donald C. Ide, of Washington.
Sanford S. Marlowe, of Virginia.
William Grant Parr, of Nebraska.
Samuel R. Sanders, Jr., of Virginia.

To be vice consuls and secretaries

Duane A. Rames, of Virginia.
Harold M. Young, Jr., of California.

To be vice consuls

Robert G. Brewster, of Illinois.
Robert K. Heathman, of Florida.
Alfred Schelp, of Missouri.
Alvin L. Smith, Jr., of Florida.

To be secretaries

John E. Baker, of Virginia.
George W. Edman, of Massachusetts.
Frank F. Friberg, of Massachusetts.
Maurice J. Gremillion, of Texas.
John H. Leavitt, of Virginia.
Joseph F. McEvoy, of Florida.
John P. McKnight, of North Carolina.
William E. Nelson, of New York.
Bruce T. Odell, of Massachusetts.
Miss Evelyn M. Schwarztrauber, of Illinois.
Howard E. Stone, of California.
Maurice F. W. Taylor, of California.
Ghosn J. Zogby, of Virginia.

HOUSE OF REPRESENTATIVES

MONDAY, JUNE 3, 1957

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Eternal God who art the source of our faith and hope, our joy and strength, bless us during this day with a sense of Thy nearness and may we never surrender to moods of doubt and denial.

Thou art here for Thou art everywhere and Thou knowest what we most need. We beseech Thee to take our wandering minds and wayward spirits and fill them with those thoughts and desires which Thou dost delight to satisfy.

Forgive us that we so frequently seek and strive for that which is only transient and temporal rather than for the good that is timeless and eternal.

May the whole purpose, passion, and power of our life find their highest fulfillment and freedom in a complete and joyous obedience to Thy holy will.

Hear us in Christ's name. Amen.

The Journal of the proceedings of Thursday, May 30, 1957, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. McBride, one of its clerks, announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H. R. 6659.—An act to extend and amend laws relating to the provision and improvement of housing to improve the availability of mortgage credit, and for other purposes.

The message also announced that the Senate insists on its amendments to the foregoing bill, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. FULBRIGHT, Mr. SPARKMAN, Mr. DOUGLAS, Mr. MONRONEY, Mr. CLARK, Mr. CAPEHART, Mr. BRICKER, Mr. BENNETT, and Mr. BUSH to be the conferees on the part of the Senate.

AUTHORITY TO DECLARE RECESS TODAY

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that it may be in order at any time today for the Speaker to declare a recess subject to the call of the Chair.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

PERSONAL ANNOUNCEMENT

Mr. HALE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Maine?

There was no objection.

Mr. HALE. Mr. Speaker, when the rollcall No. 91 on the motion to recommit the defense appropriation bill began, I was in the House radio room transcribing a broadcast to my district.

The bells do not ring in the radio room, and I was unaware of the rollcall until the second round. On learning of the rollcall I hurried to the Chamber only to hear the reading clerk call the name of HARDY. Of course, I could not qualify to vote. This I deeply regret. I voted in Committee of the Whole for all amendments to restore cuts in the budget figures. Had I voted on the motion to to recommit I should have voted "aye."

On questions of national defense I want to err on the side of too much too soon rather than on the too familiar side of too little, too late.

THE LATE HONORABLE ROBERT CROSSER

The SPEAKER. The Chair recognizes the gentleman from Ohio [Mr. VANIK].

Mr. VANIK. Mr. Speaker I regret to inform the Members of this House of the death today of the Honorable Robert Crosser, my predecessor, who represented the 21st District of Ohio for 38 years between 1912 and 1954. He was born in Scotland in 1874 and his death occurred 4 days before his 83d birthday.

Robert Crosser's career in public life began when he was elected to the Ohio Legislature in November 1910. In 1912 he was elected to membership in the Fourth Constitutional Convention of Ohio and served as chairman of the initiative and referendum committee which prepared the initiative and referendum amendments to the Ohio constitution. Mr. Crosser was a liberal spokesman for the principles of human betterment ever since.

On March 4, 1913, Robert Crosser commenced a long and brilliant Congressional career. Two years later he was instrumental in bringing about the passage of the Adamson Act, which limited the working hours of railroad employees to 8 hours a day on interstate carriers. This was the first of Robert Crosser's vigorous efforts to improve the plight of labor and in particular the railroad worker.

In Congress, he served as member of the Interstate Commerce Committee since the 69th Congress and as chairman of this great committee in the 81st and 82d Congress. He was affectionately referred to as the father of the railroad retirement law and as a firm believer in the human rights which stemmed from his devotion to Henry George and the doctrines of single tax.

In the 21st District of Ohio his great work in this Congress is household legend and will be long in the memories of our people. We regret the passing of this great and devoted public servant.

Mr. Speaker, I ask unanimous consent that all Members of the House may extend their remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. RAYBURN. Mr. Speaker, in the passing of Robert Crosser, I have lost a longtime friend and the country has lost a great citizen and one who loved his country with a great passion. He was a very positive character and was a man of deep conviction.

His was a full and useful life. His family has my deepest sympathy. With them I shall miss him very much.

Mr. McGREGOR. Mr. Speaker, I have just learned of the death of a former colleague, Robert Crosser, of Cleveland, Ohio. Bob, as he was affectionately known to all of us, was a great American, a scholar, and a gentleman in every sense of the word. His actions in Congress and the many pieces of legislation that he sponsored in behalf of his fellow men, will long be remembered. Mr. Speaker, he had a great spirit. For many years he suffered, as we all know, from a physical handicap and he appeared on the floor of this great legislative body in a condition that would have caused many to give up and take to their beds, but Bob Crosser, with the determination of the great Scotchman that he was, carried on for the benefit of mankind.

Mrs. McGregor joins with me in extending to his family our sincere sympathy in this their hour of bereavement.

Mr. CLEVENGER. Mr. Speaker, I join my colleagues from Ohio in paying tribute to the memory of Robert Crosser.

It was my privilege to have known the late Congressman Bob Crosser for the past 20 years. He was conscientious, devoted to duty and, during his entire service in the House of Representatives, rendered outstanding service to his constituents, and his State and Nation.

Mr. HARRIS. Mr. Speaker, it is with deep regret that I learn of the passing this morning of the Honorable Robert Crosser, who served in this House for 38 years as a Representative from the 21st District of Ohio. Except for a 4-year period—1919 to 1922—Mr. Crosser served in the House continuously from 1913 until his retirement in 1954. He was chairman of the great Committee on Interstate and Foreign Commerce during the 81st and 82d Congresses.

Mr. Crosser had a remarkable career. Born in a Scotch coal-mining village, he came to America in 1881 at the age of seven with his immigrant parents. His father went to work as a miner at Saline-ville, Ohio, and young Bob learned the hard lessons of poverty. The family had little of the world's goods but were rich in character and had a deep respect for knowledge. Mr. Crosser worked his way through Kenyon College, Gambier, Ohio, and the Cincinnati Law School. He devoted his energies to public service at a very early age. In 1910 he ran for the State Legislature in Ohio and was elected. He was chosen as a delegate to the State convention which rewrote Ohio's constitution.

One of Mr. Crosser's greatest achievements in the early years was putting into the State constitution the "initiative" and "referendum" provisions which gave the people of Ohio the power to make their own laws whenever they saw fit and to reject bad laws passed by the State legislature. While in Congress, Mr. Crosser achieved the everlasting friendship of railroad labor by sponsoring the first successful Railroad Retirement Act and the Railroad Unemployment Insurance Act. He also was the author of amendments to the Railway Labor Act.

Many of the Members of the House will always remember Mr. Crosser as a great liberal fighting for the benefit of the workers in this country. He was a philosopher; a man of unimpeachable character; a man whom everyone admired and deeply respected.

I think it would be most appropriate to repeat one of Mr. Crosser's favorite poems which he read to the House on many occasions:

An old man, going a lone highway,
Came, at the evening, cold and gray,
To a chasm, vast and deep and wide,
Through which was flowing a sullen tide.
The old man crossed in the twilight dim;
The sullen stream had no fears for him;
But he turned, when safe on the other side,
And built a bridge to span the tide.
"Old man," said a fellow pilgrim near,
"You are wasting your strength with building here;
Your journey will end with the ending day;
You never again must pass this way;
You have crossed the chasm, deep and wide—
Why build you the bridge at eventide?"
The builder lifted his old gray head;
"Good friend, in the path I have come," he said,
"There followeth after me today
A youth, whose feet must pass this way.
This chasm, that has been naught to me,
To that fairhaired youth may a pitfall be.
He, too, must cross in the twilight dim;
Good friend, I am building the bridge for him."

Mr. Crosser was my personal friend and I was his admirer for many years. I am saddened by his passing.

I want to extend my deepest sympathy to the members of the Robert Crosser family in their hour of loss and grief.

Mr. MARTIN. Mr. Speaker, it is with keen regret I learned of the death of

Bob Crosser. For years he was an able and popular Member of Congress. He enjoyed the good will and high regard of all with whom he came in contact. His record was crowned with success as he battled for the enactment of humane legislation and legislation which would be of great value. As chairman of the great Committee on Interstate and Foreign Commerce, he had a difficult position and he filled it with general satisfaction.

It was my privilege to enjoy his close friendship and to his family goes my deepest sympathy in this hour of bereavement.

A great legislator and a great American has passed away.

Mr. BETTS. Mr. Speaker, I am indeed sorry to learn of the death of Mr. Crosser. He and I had a strong common interest in that we were for several years the only graduates of Kenyon College in Congress. We had many pleasant conversations about our alma mater and from them I learned to know him well and we became good friends. He had a warm friendly personality. He served his country long and faithfully and I am sorry to hear of his passing.

Mr. BROWN of Ohio. Mr. Speaker, it is with deep regret that I have learned of the passing of one of my very good friends and colleagues here in the House—the Honorable Robert Crosser—who had served his community, State, and Nation with great distinction and devotion of duty for so many years.

We knew him here as Bob Crosser. He was a member, as well as chairman, of the important House Committee on Interstate and Foreign Commerce, and I had the privilege of serving with him on that committee. No man was a harder worker or a more able legislator. He was personally responsible for preparing and guiding through Congress a great deal of legislation which has been of benefit to the railroad workers of the Nation, as well as participating in the general activities of that very important committee.

Mr. Crosser also served his State ably and well as a delegate to the Ohio State Convention which rewrote and modernized the Ohio constitution nearly a half-century ago.

Robert Crosser was a man of strong character and convictions; of unusual ability, and moral courage. Born in Scotland, he believed in the traditions and virtues of his homeland. Despite long and severe illness, which for many years confined him to a wheelchair, he truly and ably represented the people of his district and State in a way that was an inspiration to many of us who served with him.

Now that his long and useful life has come to a close, I join in expressing my sympathies to his family and in saying, "Well done, my good and faithful servant."

Mr. VORYS. Mr. Speaker, the passing of our old friend, Bob Crosser, brings back memories to us, especially in Ohio, of his long and historic public service. Others have dwelt on his long and distinguished service here in the House. Many may not know of his great activity in the constitutional convention in Ohio in 1912. As a young lawyer many years after that date, I had occasion to study the debates of that convention in connection with litigation involving our Ohio constitution. I found, on page after page, the wise words of Bob Crosser, as he helped to shape the fundamental framework for our State.

From his early days as an undergraduate at Kenyon College, down through the years, he was a great student, a fighter for the causes in which he believed. In his later years his life was a tragic struggle with increasing physical infirmities that limited his bodily activity, but not his mental keenness. His long life will live long in our memories. My sympathy goes out to his fine family.

Mr. BAUMHART. Mr. Speaker, I would like to join with my colleagues in expressing my deep regret upon the passing of our former colleague, Mr. Robert Crosser. It was my pleasure to serve in the 77th Congress with Mr. Crosser.

He was dedicated to the service of his constituents and to his country. It was a real pleasure to have known and worked with him for many years.

Mrs. BOLTON. The passing of "Bob" Crosser, so long the Representative here in the House of Ohio's 21st District, brings many warm memories to those of us who knew him down the years. A dour man in many ways, there was underneath a warm heart, a sweetness which he hid under what was often an irascible exterior. He represented those responsible for his long tenure of office faithfully and well.

No father was ever more tenderly cared for by his children. To them I would like to express my appreciation for all they did for him, who was my long time friend.

Perhaps his dependence upon them will give them a curiously poignant loneliness. Yet, I shall hope—and pray—that they will find joy and peace in the release granted their beloved—my friend, the Honorable Robert A. Crosser.

Mr. MINSHALL. Mr. Speaker, although it was not my privilege to serve in this House with Bob Crosser, I knew both him and his family well. His passing is a grievous loss, not only to his loved ones but to those of us who knew him in Cleveland. He served his Congressional district with distinction and his honor and integrity were beyond reproach. I should like to express my very deepest sympathy to his family.

Mr. FEIGHAN. Mr. Speaker, it was with profound sorrow that I learned this morning of the passing of our former colleague, Honorable Robert Crosser, who so ably represented Cleveland's 21st district for about 40 years.

Mr. Crosser was devoted to his duties and to the interests of his constituents. He worked assiduously for the welfare of the working men and women and was arduous in his efforts to improve their living standards. The physical handicap under which he labored the last several years never seemed to deter his unflagging determination to render the highest type of service to his constituency and to his country.

To his family I offer my sincere sympathy.

Mr. SPENCE. Mr. Speaker, I have heard with profound regret of the death of our distinguished former colleague, Robert Crosser. He was born in Scotland in 1874 and moved to Cleveland, Ohio, with his parents when he was 7 years old. He had been a teacher of law, a member of the Ohio State Constitutional Convention, and had attained distinction in his profession before he came to Congress in 1913. Robert Crosser had a long, distinguished, and useful career in the House of Representatives where he served 19 terms. He was chairman of the House Interstate and Foreign Commerce Committee for many years and was the author of much progressive and constructive legislation. Under his chairmanship his committee explored the pioneer field of railroad retirement and unemployment insurance. He was author of laws on these subjects together with the Railway Labor Act of 1934.

Bob Crosser served his people with fidelity and zeal. He had an infinite capacity for work and an intense interest in legislation beneficial to the plain people. He was a man of genial and friendly disposition as was evidenced by his many friends in the House. The confidence and respect his people had in him is expressed by the many approvals they gave to him in succeeding elections.

The country and his community has sustained a great loss and he will be remembered with admiration and respect by all who knew him. After his long, patriotic, and devoted life, I know the great Judge of all will render His judgment, "Well done, thou good and faithful servant."

Mr. CHENOWETH. Mr. Speaker, I was greatly saddened when I learned of the passing of our former colleague, Robert Crosser. I wish to join in paying tribute to his memory.

I had the great pleasure and privilege of serving on the House Committee on Interstate and Foreign Commerce when Mr. Crosser was chairman. I soon learned to admire his sterling qualities and recognized him as an outstanding American. My service on this committee under the leadership of Bob Crosser was a most happy experience, and I shall always have pleasant memories of my association with Mr. Crosser.

He told me the story of his life and of the fight that he had to make in order to reach the pinnacle of success that he obtained. It is an inspiring and challenging story and made a deep impression upon me. He was a philosopher and a keen student of history.

I always enjoyed a visit with Mr. Crosser. He was always in good spirits, in spite of his physical ailments. I was proud to have him as a friend, and my life is richer for having known Robert Crosser.

I wish to extend my sincere sympathy to his daughter and son, and to the other members of the family.

Mr. McCORMACK. Mr. Speaker, it is with unfeigned sorrow that I have to announce to the House the death, on Monday last, at Suburban Hospital, Bethesda, of my dear and honored friend, Robert Crosser, late representative from Ohio. To you also, Mr.

Speaker, I know the news brings especial grief, as it must at the same time evoke many memories across the years, for you both became Members of this House on the same day, March 4, 1913, the day which saw the first inauguration of Woodrow Wilson as President of the United States. How far away and long ago that must seem to you.

Robert Crosser was born June 7, 1874, the son of a Scotch physician, Dr. James Crosser, of Holytown, Lanarkshire. We are told in a biographical sketch which appeared some years ago that the first book Robert ever owned was awarded him by the headmaster of the Glengowan School for learning to read well. The book was entitled "Being Afraid," a singularly inappropriate title, it would seem, for one who was never to be afraid of anything. In that same year, 1881, the family immigrated to America, settling first in Cleveland, Ohio, and later in the little town of Salineville, in Columbiana County of the same State. Here the boy grew to manhood.

As Dr. Crosser's income as a country physician was not large, Robert was obliged to fend largely for himself. His grit and ambition were early manifested. During summers he worked on farms or as a bricklayer's tender. He won a scholarship to Kenyon College from which he was graduated in 1897 with a fine record both as student and athlete.

So far back as his high-school years he set his heart upon becoming a lawyer. In the autumn following his graduation he entered Columbia University Law School, but for financial reasons was unable to complete the first year's attendance. He found temporary employment in Allegheny, Pa., and in the fall of 1898 entered the Cincinnati Law School where one of his professors was a future President and Chief Justice of the United States, William Howard Taft. After a 3-year course at the Cincinnati Law School he received his bachelor of laws degree and was admitted to the bar of the Ohio Supreme Court as attorney and counselor at law, solicitor in chancery, and proctor in admiralty. The Scotch lad was now ready to face the world, and as the first step of his career he began the practice of his profession in the office of Ford, Snyder, Henry & McGraw in Cleveland.

After 2½ years in the Cleveland firm, Crosser was appointed professor of the law of torts in Baldwin-Wallace University Law School. In 1907 he formed a partnership in Cleveland with Clyde M. White, which lasted until Crosser's first election to Congress.

Crosser had early manifested keen interest in politics. There appears to be some element in the soil and air of the Buckeye State that predisposes one to such a calling, as I am sure my distinguished colleagues from Ohio on both sides of the aisle will agree. So the presidential campaign year of 1908 found Crosser energetically stumping the State for the Democratic candidate, William Jennings Bryan and against Crosser's old professor, Taft. Two years later Crosser himself won his first public office by his election in November 1910, to the Ohio Legislature for the term 1911–12.

An indication of the rapidity of his rise in popular esteem, both in the practice of his profession and as legislator, was seen in his election to the Fourth Constitutional Convention of Ohio—a very great honor for so young a man who had been in the public eye for so brief a time. The judgment of Crosser's friends and constituents was immediately confirmed by his election by the convention as chairman of the initiative and referendum committee. It was this committee which reported those provisions of the present constitution of Ohio which are embodied in the initiative and referendum amendments. The chairman himself contributed a scholarly discussion of the committee's work to the Annals of the American Academy of Social and Political Science for September 1912.

With his interest in public affairs and the prestige he had acquired as a member of the constitutional convention, it was inevitable that Crosser should be a contender for a seat in the National Legislature, and in the elections of November 1912, which witnessed the overturn of the Republican administration, Crosser was elected as Democratic Representative at Large from Ohio to the 63d Congress.

I sought a seat in Congress—

He remarked at this time—

because I believe the best place for a man who has a philosophy of things is in the lawmaking body where he may speak openly, and freely advocate principles believed by him to be right.

Two years later Crosser was reelected, this time as Representative of the 21st Ohio District, covering several wards of the city of Cleveland. He quickly made himself felt in this House. During his first term he had attracted considerable attention by sponsoring a resolution to instruct the House Commerce Committee to report on a bill for Government ownership of the railroads which, he declared, had been "operated in a manner prejudicial to the country." Two years later, in 1916, Crosser was instrumental in bringing about passage of the Adamson Act limiting working hours of railroad employees to 8 hours a day; concomitantly, he advocated municipal ownership of public utilities. All this, at the time, was considered by many to be very drastic indeed, but Crosser never hesitated to sponsor radical measures when he thought radical measures were called for, and looking back we can see that in many respects he was ahead of his time. For instance, in his capacity as a member of the first Flood Control Committee, Crosser was "one of the first advocates of reforestation and system of tributary dams and reservoirs to control floods."

With the advent of the First World War Crosser's strongly marked traits, arising from deeply cherished convictions, came dramatically to the fore. Those of us, Mr. Speaker, who are old enough to hark back to that far-off period, can remember the irresistible wave of warlike enthusiasm, bordering at times on hysteria in certain quarters, which swept the country and did not leave this body unaffected. It has been true of every war: it has always been so, and it always will be so. Representative Crosser, along with his Ohio colleague, Representative William Gordon, could not accept the principle of conscription. To him, it was deeply repugnant: it attacked the sacred dignity of the individual—and if ever there was one who might truly be described as a symbol of rugged individualism that man was Robert Crosser, of Ohio. His conviction in this matter, it may be added, was shared by the then Speaker, Champ Clark. Crosser was 1 of 24 Congressmen who had the temerity to vote against the President's conscription bill; more, he offered to Mr. Wilson's espionage bill an amendment "for the behoof and protection of philosophical anarchists," conscientious objectors; and, finally, for the purpose of financing the war, he proposed a national single tax. His course at the time was terribly unpopular, but, while men might deplore his judgment, they were compelled to admire his courage. It is never easy, at any time, to make a Scotchman's blood quail—and Crosser was born in Lanarkshire. The inevitable happened: Crosser lost the support of the Cleveland Democratic organization and was defeated for renomination in the summer primaries of 1918 by the organization candidate. Two years later, in 1920, he ran again and was defeated by a single vote. This, considering the unpopularity of his war views, was really a great tribute: it demonstrated impressively that he still held the respect of his old constituents. Say what one will, men do respect courage.

This was presently confirmed by Crosser's reelection to the 58th Congress, and on March 4, 1923, he resumed his old place in the House. It is not the time or the place, Mr. Speaker, to review the brilliant and fruitful legislative career which followed Mr. Crosser's return to the House. In the 32 years which ensued until his retirement in 1955, Mr. Crosser achieved a record which, for constructiveness and fidelity to duty, was second to none in this Chamber. I could not hope, in a brief summary, to do it justice.

Always interested in the problems of tranportation, Mr. Crosser had the hearty support of the great railroad brotherhoods. He introduced, as early as February 1932, a bill to encourage operation of American passenger airship lines between the United States, Europe, and the Orient by amending the Merchant Marine Act to enable the Postmaster General to make mail contracts with airlines similar to those of ocean liners. Six years later, the Air Line Pilots Association, an affiliate of the AFL, conferred upon Crosser honorary membership carrying the title "Chief Pilot—International" in recognition of meritorious and unselfish service repeatedly rendered to the airline pilots when their horizons were beclouded with trouble and uncertainty.

With the return of the Democratic Party to control of Congress in March 1933, Crosser was named to the new Democratic Steering Committee in the House; he became its first chairman and was again to serve in that capacity in

the 78th Congress—1943-44. As a member of the House Committee on Interstate and Foreign Commerce, Crosser was instrumental in the passage, in 1934, of amendments to the Railroad Labor Act which, in the words of D. B. Robertson, president of the Brotherhood of Firemen and Enginemen, established the right of railroad workers to organize and bargain collectively.

Mr. Crosser's 25th anniversary was fittingly celebrated at a testimonial dinner in Cleveland upon which happy occasion the guest of honor and his fellow guests were fortunate enough to have you, Mr. Speaker, as the principal speaker. An editorial at this time, which appeared in the Cleveland Plain Dealer, hailed Mr. Crosser "an uncommon Congressman" who "with Caledonian tenacity sticks to his convictions, whether or not they are popular at the moment."

Illness forced him into a wheelchair in 1937, but he continued steadfastly to discharge his duties as a Member, and later chairman, of the Interstate and Foreign Commerce Committee. At last, as the end of his service in the 84th Congress approached, he felt it necessary to bow to the creeping infirmities against which he had battled so long and so bravely. In 1945 he had lost his wife, to whom he had been married for nearly 40 years. Two children and five grandchildren survive him. To them, I know the House extends its deep sympathy.

At the time of Mr. Crosser's retirement, Mr. Speaker, to pronounce his eulogy, you fittingly observed of Mr. Crosser that "he has performed a great service not only to the people of Ohio but to the country."

Let those words stand as his accolade as we bid our departed friend an affectionate farewell.

Mr. CELLER. Mr. Speaker, to have learned of the passing of one of our beloved former colleagues, Robert Crosser, is to learn again how life both enriches and deprives. These many years I have known Robert Crosser, and many the hour he spent with me in my office granting me the benefit of his wisdom, of his sentient observations, his grasp of essentials. I feel myself one of the beneficiaries of his wisdom, and I feel most keenly the deprivation of this friendship which I valued. He left his legacy of wisdom for all of us to share.

His passing moves me to pause and take note that it is a portion of the lot of those of us serving in the Congress to make many friends here and then suffer their loss. This is true, in a measure, of all people, but because we work in closer relationship with other Members of the Congress each departure carries with it a poignancy of personal loss.

His was an indomitable spirit, and for that, as well as for his sensitivity, his courage and his learning, we honor him. Along with his many, many friends I offer my sympathy to his beloved family.

Mr. ROONEY. Mr. Speaker, I was deeply saddened this morning to learn of the passing of our former colleague and my good friend, the Honorable Robert Crosser, of Ohio.

Bob Crosser became a Member of this House on March 4, 1913, and served for 38 years as a Representative from the city of Cleveland, Ohio. Except for a short interval he served continuously until the time of his retirement in 1954. His was a long and distinguished career. He served as a member of the Interstate and Commerce Committee since the 69th Congress and as chairman of this great committee in the 81st and 82d Congresses. He was well known for his leadership in the enactment of the Railroad Retirement Act, the Railroad Unemployment Insurance Act, and many improvements in them from time to time. He was affectionally known as "Bob" to the rail workers and millions of other workingmen and women in this country for whom he fought through his long and brilliant career.

It was my privilege to have known Bob Crosser since I first came to Congress in June 1944, and I always found him to be a kind and conscientious legislator whose chief interest was the welfare of the people of his district, his State and his adopted Nation.

His achievements are legend and all the more noteworthy when we remember the fact that for many years he suffered from a physical ailment that would have caused many another person to abandon or curtail their activities. However, his spirit and determination never diminished in his fight to carry on for his fellow man.

I have lost a good friend. I join my colleagues in extending deepest sympathy to the members of his family in their bereavement.

Mr. McCULLOCH. Mr. Speaker, I have just learned, with deep regret, of the death of my late, great friend, Robert Crosser, longtime Member of the United States House of Representatives.

Bob Crosser devoted most of his adult life to a public service, which was long and fruitful.

In addition to his long and effective service in the House of Representatives, he served with honor and distinction as a member of the Ohio Constitutional Convention which, in large part, rewrote and gave the State of Ohio a modern and model constitution.

He was a fighter for freedom with a Scotsman's courage, which never wavered. We, his friends, will miss him more than we now know.

DEPARTMENT OF COMMERCE AND RELATED AGENCIES APPROPRIATION BILL, 1958

Mr. PRESTON. Mr. Speaker, I call up the conference report on the bill (H. R. 6700) making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1958, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 495)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6700) making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1958, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 9, 15, 16, 17, 21, 23, 25, 30 and 31.

That the House recede from its disagreement to the amendments of the Senate numbered 6, 8, 12, 24, 27, 28 and 29, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows: In lieu of the number proposed by said amendment insert "44"; and the Senate agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$675,000"; and the Senate agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$181,747,800"; and the Senate agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$124,603,525"; and the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$218,000"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert $2,353,250"; and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$9,428,250"; and the Senate agree to the same.

Amendment numbered 20: That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$37,880,100"; and the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$5,489,400"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 11, 13, 14, and 18.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6700) making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1958, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

TITLE I—DEPARTMENT OF COMMERCE

Civil Aeronautics Administration

Amendment No. 1: Authorizes the replacement of 44 passenger motor vehicles instead of 40 as proposed by the House and 49 as proposed by the Senate.

Amendment No. 2: Provides $675,000 for hire of aircraft instead of $600,000 as proposed by the House and $750,000 as proposed by the Senate.

Amendment No. 3: Authorizes operation and maintenance of 92 aircraft as proposed by the House instead of 100 as proposed by the Senate.

Amendment No. 4: Appropriates $181,747,800 for "Operation and regulation" instead of $177,747,800 as proposed by the House and $190,201,000 as proposed by the Senate.

Amendment No. 5: Appropriates $124,603,525 for "Establishment of air-navigation facilities" instead of $116,561,860 as proposed by the House and $132,645,190 as proposed by the Senate.

Amendment No. 6: Appropriates $25,000,000 for "Grants-in-aid for airports" as proposed by the Senate instead of $30,000,000 as proposed by the House.

Amendment No. 7: Authorizes $218,000 for administrative expenses, air navigation development instead of $192,000 as proposed by the House and $255,000 as proposed by the Senate.

Business and Defense Services Administration

Amendment No. 8: Appropriates $5,682,000 as proposed by the Senate instead of $3,515,000 as proposed by the House.

Office of Area Development

Amendment No. 9: Appropriates $395,000 as proposed by the House instead of $200,000 as proposed by the Senate.

Bureau of Foreign Commerce

Amendment No. 10: Appropriates $2,353,250 instead of $2,261,500 as proposed by the House and $2,445,000 as proposed by the Senate.

Maritime activities

Amendment No. 11: Reported in disagreement.

Amendment No. 12: Appropriates $35,000,000 for operating differential subsidies as proposed by the Senate instead of $100,000,000 as proposed by the House. In view of the language agreed to which transfers $65,000,000 from the inactive account "War Shipping Administration Liquidation, Treasury Department" the amount available for expenditure in fiscal year 1958 under this action will be $100,000,000, the same amount as would have been expended under the House bill.

Amendments Nos. 13 and 14: Reported in disagreement.

Bureau of Public Roads

Amendments Nos. 15 and 16: Appropriate $25,000,000 for "Forest highways" as proposed by the House instead of $23,000,000 as proposed by the Senate.

Amendment No. 17: Eliminates language proposed by the Senate relating to a limitation on employment of consultants.

Amendment No. 18: Reported in disagreement.

National Bureau of Standards

Amendment No. 19: Appropriates $9,428,250 instead of $8,908,500 as proposed by the House and $9,948,000 as proposed by the Senate.

Weather Bureau

Amendment No. 20: Appropriates $37,880,100 instead of $37,480,100 as proposed by the House and $38,252,200 as proposed by the Senate. The additional $400,000 agreed to in conference is to be used for the rental of a high-speed electronic computer for meteorological research.

General provisions

Amendment No. 21: Eliminates language proposed by the Senate to authorize additional supergrade positions.

TITLE II—THE PANAMA CANAL

Amendment No. 22: Appropriates $15,765,600 for operating expenses of the Canal Zone Government as proposed by the Senate instead of $15,648,600 as proposed by the House.

Amendment No. 23: Appropriates $1,000,000 for capital outlay, Canal Zone Government, as proposed by the House instead of $1,025,000 as proposed by the Senate.

Amendment No. 24: Authorizes maximum of $100 per diem for consultants as proposed by the Senate.

TITLE III—INDEPENDENT AGENCIES

Amendment No. 25: Strikes out language proposed by the Senate to appropriate $250,000 for the Advisory Committee on Weather Control.

Civil Aeronautics Board

Amendment No. 26: Appropriates $5,489,400 for salaries and expenses instead of $5,255,400 as proposed by the House and $5,725,000 as proposed by the Senate.

Amendment No. 27: Appropriates $37,228,000 for payments to air carriers as proposed by the Senate instead of $38,754,000 as proposed by the House.

Tariff Commission

Amendment No. 28: Appropriates $1,700,000 as proposed by the Senate instead of $1,640,000 as proposed by the House.

Amendment No. 29: Corrects printing error.

TITLE IV—GENERAL PROVISIONS

Amendments Nos. 30 and 31: Restore language as proposed by the House restricting the employment of management experts and consultants.

PRINCE H. PRESTON,
ALBERT THOMAS,
JOHN J. ROONEY,
SIDNEY R. YATES,
JOHN F. SHELLEY,
DANIEL J. FLOOD,

MELVIN R. LAIRD,
JOHN TABER,
Managers on the Part of the House.

Mr. PRESTON. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

The SPEAKER. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 11: Page 8, line 14, insert the following: *"Provided*, That transfers may be made to the appropriation for the current fiscal year for 'Salaries and expenses' for administrative and warehouse expenses (not to exceed $1,700,000) and for reserve fleet expense (not to exceed $500,000), and any such transfers shall be without regard to the limitations under that appropriation on the amounts available for such expenses."

Mr. PRESTON. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 13: Page 9, line 1, insert the following: "and in addition, $65,000,000 to be derived by transfer from the appropriation 'War Shipping Administration Liquidation, Treasury Department'."

Mr. PRESTON. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 14: Page 12, line 4, insert the following: *"Provided*, That the unexpended balance of such appropriation to the Secretary of the Treasury less the amount of $10,000,000 continued available and less the amount of $65,000,000 transferred to the appropriation 'Operating differential subsidies,' by this act, is hereby rescinded, the amount of such unexpended balance to be carried to the surplus fund and covered into the Treasury immediately upon the approval of this act."

Mr. PRESTON. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 18: Page 19, line 2, strike out "$50" and insert "$100."

Mr. PRESTON. Mr. Speaker, I move that the House recede and concur in the Senate amendment with an amendment.

The Clerk read as follows:

Mr. PRESTON moves that the House recede from its disagreement to the amendment of the Senate No. 18, and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment insert the following: "$100 per diem: *Provided*, That not to exceed $10,000 may be expended for services of individuals employed at rates in excess of $50."

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the several motions was laid on the table.

Mr. PRESTON. Mr. Speaker, I ask unanimous consent that all Members be permitted to extend their remarks just before the passage of the conference report on the Department of Commerce and related agencies appropriation bill, 1958.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

NECESSITY FOR FLOOD CONTROL

Mr. EDMONDSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. EDMONDSON. Mr. Speaker, the special subcommittee on flood control of the House Committee on Public Works which inspected flood damage in the Southwest returns to Washington late Saturday night after a tour which took us over 1,500,000 acres of flood land in Texas, Arkansas, Oklahoma, and southern Kansas. Preliminary damage estimates by the Army engineers placed the damage total in Texas and Oklahoma alone at well over $100 million. I have little doubt that it will exceed $150 million in these two States when the final tabulations are made. While existing flood control projects prevented approximately $118 million in damages, presently authorized projects which have not yet been built would have prevented at least $50 million more in damage which occurred in those two States. Some way must be found to expedite these projects and eliminate the present time lag in their construction.

I think some way also must be found, Mr. Speaker, to expedite our flood disaster measures in this area and to present a program to meet the distress—the tragic distress of our farm people—on the basis of more generous proportions than presently planned, if we are to prevent financial ruin to literally thousands of farmers in the flood area.

In this connection, I understand the President's disaster funds are now practically exhausted and recommendations have been sent to this House for additional disaster relief funds by the Executive.

I earnestly hope that the House will soon have the opportunity to provide these additional and urgently needed funds.

HON. BROOKS HAYS

Mr. DAVIS of Tennessee. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. DAVIS of Tennessee. Mr. Speaker, all of us are made happy when any of our colleagues receive outstanding recognition, appreciation, and honor. On occasions it has been our good fortune to recognize our majority leader and other Members of his religious faith for outstanding contributions to the church.

Today we add to that list of our warm friends the name of BROOKS HAYS. Last week he was elected president of the Southern Baptist Convention at its meeting in Chicago. This is one of the largest Protestant denominations in our land. It includes more than 8½ million church believers in its membership. Rarely has this body elected a layman as its chief officer.

All of us recognize that BROOKS HAYS does his very best to lead a sincere, quiet, and humble religious life. That is a real test imposed upon one with whom others associate daily.

That he may have the strength and the grace to fulfill this high office with continued credit to this body of good men, and that his influence for good may be ever far-reaching, is our genuine prayer.

IMPORTATION OF WOOLEN TEXTILES

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I express great appreciation to the Speaker because he is recessing the House in order that the Republicans may see the President.

Mr. Speaker, this morning I appeared at a hearing conducted by the Office of Defense Mobilization on the effect of the importation of woolen textiles upon the American woolen industry and the threat to our national security.

I pointed out the amount of woolen goods that is used in our national defense. I pointed out the fact that 146 woolen industries have been liquidated within the last 8 or 9 years. You can picture the loss of wages to the workers, the loss to the shops, and the great hardship that would ensue. I pointed out that our economy cannot survive if we keep on liquidating our industries. I believe that this Board will grant some relief. We should certainly scrap our trade agreements if they are going to ruin our great woolen industry. My complete statement will appear in the CONGRESSIONAL RECORD today.

TELEVISION AND RADIO PROGRAM POLICIES

Mrs. BOLTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

Mrs. BOLTON. Mr. Speaker, I am very much interested in what is going on over the air waves. The headlines of this morning's papers tell of Khrushchev's broadcasting over our air waves.

I am just wondering how many of our men are going to be permitted to broadcast over the Russian air waves.

I think it would be interesting to know the purpose of the broadcast.

Mr. WALTER. Mr. Speaker, will the gentlewoman yield?

Mrs. BOLTON. I shall be happy to yield.

Mr. WALTER. Does the gentlewoman know whether or not provision has been made by the broadcasting companies that broadcast this poorly disguised attempt to fool the American people to give somebody the opportunity for rebuttal?

Mrs. BOLTON. That is a most interesting question, I may say to my colleague from Pennsylvania. I do not know the answer but would be happy to have it explained.

BRITAIN'S TRADE POLICY WITH CHINA AND RUSSIA

Mr. GROSS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. GROSS. Mr. Speaker, I call attention to the fact, as most Members of the House know, that the British Government has now seen fit to tear down practically all the barriers that have been in effect against the shipment of strategic materials to Red China.

This should come as no particular surprise, for it was announced not long ago a combine of British businessmen would move into Russia and build in that Communist country the largest tire and rubber-products plant outside of the United States.

Mr. Speaker, I wonder if this administration will continue to ignore the Battle Act; will continue to say that it is in the enlightened self-interest of this country to continue to subsidize the British, while they come to the aid of Red China and Red Russia with the strategic materials necessary to wage war?

COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. HARRIS. Mr. Speaker, I ask unanimous consent that the Committee on Interstate and Foreign Commerce

may have permission to sit during the sessions of the House this week.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

CONSENT CALENDAR

The SPEAKER. This is Consent Calerdar Day. The Clerk will call the first bill on the Consent Calendar.

SETTLEMENT FOR CERTAIN INEQUITABLE LOSSES SUSTAINED BY OFFICERS OF THE COMMISSIONED SERVICES UNDER EMERGENCY ECONOMY LEGISLATION

The Clerk called the bill (H. R. 293) to authorize settlement for certain inequitable losses in pay sustained by officers of the commissioned services under the emergency economy legislation, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. FORD. Mr. Speaker, reserving the right to object, I would like to ask the chairman of the Committee on the Judiciary whether or not he has been successful in getting a rule for this proposed legislation?

Mr. CELLER. No; I may say to the gentleman, but it is proposed to ask to suspend the rules and pass the bill.

Mr. FORD. Under those circumstances, the gentleman would have no objection to the bill being stricken from the calendar?

Mr. CELLER. I cannot say I would have no objection. I hope it will be passed on the Consent Calendar. If the gentleman objects, and it is a proper objection, I will have to have recourse to suspension of the rules.

Mr. FORD. I may say to the chairman of the Committee on the Judiciary that several weeks ago I did object, but I would prefer to have it stricken from the calendar. At the gentleman's request I will not seek to have it stricken at this time but under the circumstances when the next Consent Calendar is called we will ask to have it stricken. It does not qualify under the Consent Calendar rule, as the gentleman knows.

Mr. CELLER. I understand that.

Mr. FORD. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

LIMITING PAYMENTS TO CERTAIN BENEFICIARIES OF CERTAIN VETERANS

The Clerk called the bill (H. R. 72) to amend section 21 of the World War Veterans' Act, 1924, to provide for the disposition of certain benefits which are unpaid at the death of the intended beneficiary.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice. A rule has been granted. There are very dangerous provisions in the bill.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

THE KLAMATH TRIBE OF INDIANS

The Clerk called the bill (S. 469) to authorize the United States to defray the cost of assisting the Klamath Tribe of Indians to prepare for termination of Federal supervision, to defer sales of tribal property, and for other purposes.

Mr. CUNNINGHAM of Iowa. Mr. Speaker, a rule has been granted on this bill, therefore I ask unanimous consent that it be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

THE BOY SCOUTS OF AMERICA

The Clerk called the bill (H. R. 6881) to authorize the Secretary of Defense to lend certain Army, Navy, and Air Force equipment and provide certain services to the Boy Scouts of America for use at the Gold Rush '57 Jamboree of the Boy Scouts of America, and for other purposes.

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

EXCHANGE OF LAND BETWEEN THE UNITED STATES AND THE STATE OF CALIFORNIA

The Clerk called the bill (H. R. 787) to authorize the exchange of certain lands between the United States of America and the State of California.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Army is authorized to convey to the State of California all of the right, title, and interest of the United States of America in and to that certain real property located in the county of Alameda, State of California, as more particularly described in section 2 of this act, and in consideration for said conveyance, to accept on behalf of the United States of America all of the right, title, and interest of the State of California in and to that certain real property described in section 3 of this act. Said conveyances shall be made by, and accepted on behalf of, the United States of America subject to (1) all reservations, rights, and easements hereinbelow set forth, and (2) to such other and further terms and conditions as may be expressly agreed upon by the parties thereto.

SEC. 2. The property to be conveyed by the United States of America to the State of California is all of that property situated in the city of Alameda, county of Alameda, State of California, described as follows:

Portions of tracts 35, 36, and 39 as said tracts are shown on the map of Alameda marshlands filed July 30, 1900, in book 25 of maps, at pages 74 to 78, inclusive, in the office of the county recorder of Alameda County, said portions being described as follows:

Parcel A: Commencing at the southeasterly corner of that certain parcel of land designated as tract 25A described in deed dated August 27, 1948, and recorded September 2, 1948, in book 5597, page 433, official records of Alameda County; thence along the southerly line of said parcel north 87 degrees 12 minutes 43 seconds west (recorded bearing, north 88 degrees 20 minutes west), 482.41 feet; thence leaving said southerly line along a curve to the right from a tangent which bears north 14 degrees 28 minutes 13 seconds west, with a radius of 1,434 feet, through an angle of 7 degrees 07 minutes 56 seconds, an arc distance of 178.51 feet to a point of compound curvature; thence along a tangent curve to the right with a radius of 1,222 feet, through an angle of 31 degrees 53 minutes 47 seconds, an arc distance of 680.28 feet to a point of compound curvature; thence along a tangent curve to the right with a radius of 60 feet, through an angle of 63 degrees 17 minutes 05 seconds, an arc distance of 66.27 feet to a point on a curve concentric with and distant 50 feet westerly, measured radially from the "N" line of the department of public works' survey for the Webster Street tube in Alameda County, road IV-Ala-226-Ala-Oak; thence along said concentric curve to the right from a tangent that bears north 23 degrees 00 minutes 12.2 seconds east, with a radius of 30,047.89 feet, through an angle of 0 degrees 56 minutes 00 seconds, an arc distance of 489.47 feet to the northerly boundary line of that certain 1.480-acre parcel of land designated as parcel 3, tract 15, in the deed from Central Pacific Railway Company, a corporation, and Southern Pacific Company, a corporation, to United States of America, dated July 24, 1945, and recorded August 9, 1945, in book 4757, page 138, official records of Alameda County; thence from a tangent that bears south 77 degrees 17 minutes 52 seconds east, on said northerly boundary line along a compound curve, to the right having the following radii, central angles and arc distances:

Radii	Recorded radii	Central angles	Arc distance	Recorded distance
Feet	Feet	° ′ ″	Feet	Feet
719.29	719.343	1 10 59	14.85	----------
576.10	576.140	3 00 00	30.17	30.17
480.65	480.683	3 36 00	30.20	----------
412.48	412.51	19 58 10	143.76	----------

to the westerly line of Webster Street; thence along the last said westerly line the following courses: South 0 degrees 18 minutes 46 seconds west (recorded bearing south 0 degrees 50 minutes east) 628.05 feet; along a tangent curve to right with a radius of 26.32 feet (recorded radius, 26.32 feet), through an angle of 43 degrees 15 minutes 00 seconds, an arc distance of 19.87 feet to a point of reverse curve; along a tangent curve to left with a radius of 40.0 feet, through an angle of 33 degrees 25 minutes 00 seconds, an arc distance of 23.33 feet; south 10 degrees 08 minutes 46 seconds west (recorded bearing, south 9 degrees 00 minutes 00 seconds west) 60.98 feet; along a tangent curve to left with a radius of 79.99 feet (recorded radius, 80 feet) through an angle of 9 degrees 50 minutes 00 seconds, an arc distance of 13.73 feet; south 0 degrees 18 minutes 46 seconds west (recorded bearing, south 0 degrees 50 minutes east) 65.50 feet; along a tangent curve to the left with a radius of 126.84 feet (recorded radius, 126.85 feet), through an angle of 20 degrees 46 minutes 12 seconds (recorded central angle, 20 degrees 46 minutes 40 seconds), an arc distance of 45.98 feet (recorded arc distance, 46.0

feet) to a point of reverse curve; along a tangent curve to the right with a radius of 126.84 feet (recorded radius, 126.85 feet), through an angle of 20 degrees 46 minutes 12 seconds (recorded central angle, 20 degrees 46 minutes 40 seconds) an arc distance of 45.98 feet (recorded arc distance, 46.0 feet) south 0 degrees 18 minutes 46 seconds west (recorded bearing, south 00 degrees 50 minutes east) 285.43 feet, and south 6 degrees 52 minutes 06 seconds west, 72.30 feet (recorded bearing and distance, south 7 degrees 08 minutes 11 seconds west 72.55 feet) to the point of commencement.

Containing 13.131 acres, more or less; subject, however, to an easement 20 feet in width to be reserved by the United States for railroad purposes across the northerly portion of said parcel.

Parcel B: Commencing at the northeasterly corner of that certain parcel of land designated as parcel 2, tract 1, described in deed to the United States of America dated December 4, 1944, recorded December 18, 1944, in book 4663, page 35, official records of Alameda County; thence along the northerly line of said parcel north 88 degrees 00 minutes 44 seconds west (recorded bearing, north 89 degrees 09 minutes 30 seconds west) 142.93 feet to a curve concentric with and distant westerly 50 feet, measured radially, from the "N" line of the department of public works' survey for the Webster Street tube, in Alameda County, road IV–Ala–226–Oak; thence along said concentric curve to the left from a tangent that bears south 24 degrees 11 minutes 16.5 seconds west, with a radius of 30,047.89 feet, through an angle of 0 degrees 12 minutes 27 seconds, an arc distance of 108.82 feet to the southerly line of that certain 0.523 of an acre parcel of land designated as parcel 2, tract 14, in that certain deed to United States of America, recorded August 9, 1945, in book 4757, page 138, official records of Alameda County; thence along said southerly line on a compound curve to the right from a tangent that bears south 76 degrees 57 minutes 08 seconds east, having the following radii, central angles, and arc distances:

Radii	Recorded radii	Central angles			Arc distance	Recorded distance
Feet	Feet	°	′	″	Feet	Feet
741.79	741.843	0	50	15	10.84	
598.60	598.64	3	00	00	31.34	31.35
503.15	503.183	3	36	00	31.61	31.62
434.98	435.01	17	30	49	132.96	

to the westerly line of Webster Street; thence along last said line north 00 degrees 18 minutes 46 seconds east 180.06 feet to the point of commencement.

Containing 0.516 of an acre, more or less; subject, however, to an easement 60 feet in width to be retained by the United States for street and roadway purposes across the northerly portion of said parcel.

SEC. 3. The land to be conveyed to the United States of America by the State of California is all of that real property situated in the city of Alameda, county of Alameda, State of California, described as follows:

Parcel 1: A portion of tract 39, according to the map entitled, "Map of Alameda Marsh Land, as partitioned among the owners thereof in the suit numbered 8923 and entitled, 'Pacific Improvement Company, plaintiff, against James A. Waymire, et al., defendants,' Superior Court of Alameda County, State of California," filed July 30, 1900, in the office of the recorder of Alameda County and of record in map book 25, pages 74, 76, and 78, said portion being described as follows:

Commencing at the northwesterly corner of certain parcel of land described in the deed to the United States of America, dated July 6, 1944, recorded July 21, 1944, in book 4499, page 401 of official records of Alameda County; thence along the westerly line and its southerly prolongation south 2 degrees 47 minutes 17 seconds west (recorded bearing, south 1 degree 40 minutes west) 1,505.42 feet to the northern boundary line of that certain 76.15 acre parcel of land described in declaration of taking, case numbered 30735, recorded December 21, 1951, in book 6618, page 339 of official records of Alameda County; thence along said northern boundary line north 87 degrees 12 minutes 43 seconds west (recorded bearing, north 88 degrees 20 minutes west) 537 feet to a line parallel with the said westerly line; thence along said parallel line north 2 degrees 47 minutes 17 seconds east, 1,497.80 feet to the southern boundary line of that certain parcel of land described in deed from Oakland Water Front Company to Central Pacific Railway Company, dated March 7, 1904, and recorded March 9, 1904, in book 952, page 293 of official records of Alameda County; thence along last said boundary line south 88 degrees 01 minute 30 seconds east (recorded bearing, south 89 degrees 16 minutes east) 537.05 feet to the point of commencement.

Excepting therefrom that certain 0.3004± of an acre parcel of land described in the deed to the United States of America recorded September 2, 1948, in book 5597, page 433 of official records of Alameda County.

Containing 18.193 acres, more or less.

The bearings and distances used in the above-described parcel are on the California coordinate system, zone 3.

Parcel 2: A portion of tracts 39 and 40, as shown on the map filed in book 25 of maps, at pages 74 to 78, inclusive, in the office of the Recorder of said Alameda County, and entitled "Map of Alameda Marsh Land," more particularly described as follows:

Beginning at the northwest corner of that certain 18.193-acre parcel of land, deeded to the State of California by the regents of the University of California, by deed, recorded February 14, 1955, in book 7567, page 119, official records of Alameda County, said corner being on the southerly line of the parcel of land described in that certain indenture dated March 7, 1904, between the Oakland Water Front Company and the Central Pacific Railway Company, recorded March 9, 1904, in book 952 of deeds, page 293, records of Alameda County; thence north 89 degrees 16 minutes west along last said line, a distance of 694.19 feet to the most easterly corner of that certain parcel of land deeded to the Central Pacific Railway Company by the regents of the University of California by deed dated June 28, 1946, and recorded September 21, 1946, in book 4980, page 383, official records of Alameda County; thence westerly along the southerly line of last said parcel of land the following courses and distances: From a tangent which is the last described course on a curve to the left, having a radius of 1,130.43 feet, through a central angle of 4 degrees 42 minutes an arc distance of 92.73 feet (chord bears south 88 degrees 23 minutes west 92.70 feet) to a point; thence tangent to curve at last said point, south 86 degrees 02 minutes west a distance of 74.85 feet to a point; thence from a tangent which is the last described course, on a curve to the right, having a radius of 1,161.59 feet, through a central angle of 2 degrees 19 minutes an arc distance of 46.97 feet (chord bears south 87 degrees 11 minutes 30 seconds west 46.96 feet) to a point; thence tangent to curve at last-mentioned point, south 88 degrees 21 minutes west a distance of 183.18 feet to a point; thence from a tangent which is the last described course, on a curve to the left, having a radius of 557.56 feet, through a central angle of 15 degrees 51 minutes, an arc distance of 154.24 feet (chord bears south 80 degrees 25 minutes 30 seconds west 153.75 feet) to the most westerly corner of last said parcel of land; thence southwesterly leaving last said southerly line, and along the southerly line of said railway company's land from a tangent that bears south 72 degrees 30 minutes west, on a curve to the left, having a radius of 955.37 feet, through a central angle of 1 degree 14 minutes 55 seconds an arc distance of 20.82 feet (chord bears south 71 degrees 52 minutes 32½ seconds west 20.82 feet) to the most northerly corner of that certain parcel of land, deeded to the United Engineering Company, Limited, by the regents of the University of California, by deed dated May 8, 1944, and recorded June 27, 1944, in book 4558, page 285, official records of Alameda County; thence south 1 degree 39 minutes east along the easterly line of last said parcel, a distance of 28.0 feet; thence north 75 degrees 51 minutes east a distance of 80.37 feet to a point; thence north 89 degrees 05 minutes 09 seconds east a distance of 1,183.53 feet to the westerly line of said 18.193-acre parcel of land, deeded to the State of California; thence north 1 degree 32 minutes 47 seconds east along last said line a distance of 28.0 feet to the point of beginning.

Containing 1.103 acres, more or less.

The bearings and distances used in the above described parcel are on the California coordinate system, zone 3.

Parcel 3: A piece or parcel of land, situate, lying, and being in the city of Alameda, county of Alameda, State of California, and being a portion of tracts 39 and 40 as shown on the map filed in book 25 of maps, at pages 74 to 78, inclusive, in the office of the recorder of said Alameda County, and entitled "Map of Alameda Marsh Land," more particularly described as follows:

Beginning at the northwest corner of that certain 18.193-acre parcel of land, deeded to the State of California by the regents of the University of California by deed, recorded February 14, 1955, in book 7567, page 119, official records of Alameda County, said corner being on the southerly line of the parcel of land described in that certain indenture, dated March 7, 1904, between the Oakland Water Front Co. and the Central Pacific Railway Co., recorded March 9, 1904, in book 952 of deeds, page 293, records of Alameda County; thence north 89 degrees 16 minutes west along last said line and along the northerly line of property now or formerly owned by the regents of the University of California, a distance of 694.19 feet to the most easterly corner of that certain parcel of land described in deed to the Central Pacific Railway Co. from the regents of the University of California, dated June 28, 1946, and recorded September 21, 1946, in book 4980, page 383, official records of Alameda County; thence westerly along the southerly line of last said parcel of land, the following courses and distances: From a tangent which is the last described course on a curve to the left, having a radius of 1130.43 feet, through a central angle of 4 degrees 42 minutes an arc distance of 92.73 feet, (chord bears south 88 degrees 23 minutes west 92.70 feet) to a point; thence tangent to curve at last said point, south 86 degrees 02 minutes west, a distance of 74.85 feet to a point; thence from a tangent which is the last described course, on a curve to the right, having a radius of 1161.59 feet, through a central angle of 2 degrees 19 minutes an arc distance of 46.97 feet (chord bears south 87 degrees 11 minutes 30 seconds west 46.96 feet) to a point; thence leaving the southerly line of last said parcel of land, north 1 degree 51 minutes 40 seconds west a distance of 10.00 feet to a point; thence north 86 degrees 02 minutes east, a distance of 238.51 feet to a point; thence easterly from a tangent which is the last described course on a curve to the right, having a radius of 1136.01 feet, through a central angle of 3 degrees 03 minutes 09 seconds an arc distance of 60.52 feet (chord bears north 87 degrees 33 minutes 34½ seconds east, 60.51 feet) to a point; thence tangent to

curve at last mentioned point, North 89 degrees 05 minutes 09 seconds east parallel with and distant 20.00 feet measured at right angles southerly from the northerly line of land of said Central Pacific Railway Co., a distance of 1,216.24 feet to a point; thence continuing parallel with last said northerly line and 20.00 feet distance southerly at right angles therefrom, South 89 degrees 16 minutes east, a distance of 367.67 feet to a point; thence easterly from a tangent which is the last described course, on a curve to the right, having a radius of 563.14 feet, through a central angle of 6 degrees 00 minutes 30 seconds an arc distance of 59.05 feet, (chord bears south 86 degrees 15 minutes, 45 seconds east, 59.03 feet) to a point; thence tangent to curve at last mentioned point, south 83 degrees 15 minutes 30 seconds east, parallel with and distant 22.50 feet measured at right angles southerly from last said northerly line, a distance of 335.29 feet to a point on the southerly line of land of said Central Pacific Railway Co., said point being south 1 degree 00 minutes 30 seconds west, 97.70 feet and south 88 degrees 59 minutes 30 seconds east, 186.29 feet from a monument marked by a standard traverse station disk stamped "Stand A 1947"; thence north 88 degrees 59 minutes 30 seconds west along last said southerly line a distance of 827.87 feet to a point, said point being south 1 degree 00 minutes 30 seconds west, 109.78 feet and south 88 degrees 59 minutes 30 seconds east, 194.32 feet from a monument marked by a standard traverse station disk, stamped "Stand B 1947"; thence south 1 degree 36 minutes 30 seconds west along the boundary line of land of the Central Pacific Railway Co., a distance of 20.79 feet to a point on the southerly line of said parcel of land described in indenture to the Central Pacific Railway Co. dated March 7, 1904, last said point being the northeast corner of said 18.193-acre parcel of land deeded to the State of California by the regents of the University of California; thence north 89 degrees 16 minutes west along the northerly line of said 18.193-acre parcel and along last said southerly line, a distance of 537.05 feet to the point of beginning.

Containing an area of 1.581 acres, more or less.

Subject to: Sewer easement as shown in decree from United States District Court, Northern District, Southern Division, case No. 22606-F.

Easement for sewer line to East Bay Municipal Utility District as recorded in book 6498, official records, page 537, Alameda County records.

With the following committee amendment:

On page 2, line 4, after "conditions as" insert the words "have been or."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

STATE OF WASHINGTON

The Clerk called the bill (H. R. 2224) providing for payment to the State of Washington by the United States for the cost of replacing and relocating a portion of secondary highway of such State which was condemned and taken by the United States.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the State of Washington the sum of $581,721.91. The payment of such sum shall be in full satisfaction of the claim of the State of Washington against the United States for the cost of replacing and relocating a portion, 28 miles in length, of secondary Highway No. 11A of the State which was condemned and taken by the United States in 1943 for use in connection with the construction and operation of the Hanford atomic energy project.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MEAT-PRODUCTION PROGRAM

The Clerk called the bill (H. R. 7244) amending the Packers and Stockyards Act, 1921, to permit deductions for a self-help meat-production program.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BAILEY. Mr. Speaker, reserving the right to object, I would like to have someone, either the author of this bill or someone on the committee, make an explanation of just what this legislation proposes. I have been getting a number of letters from certain of my people back in the State of West Virginia. One of these comments goes something like this: "It seems to me that the meat industry may need a shot in the arm to stimulate sales but I cannot see that it is up to the impoverished farmer of the present day to provide the pecuniary measures and assistance necessary to carry out this legislation."

Will someone be kind enough to tell us about this legislation?

Mr. POAGE. Mr. Speaker, we hope to bring this matter before the House under a rule. It has been my understanding we would bring it up under a rule. I realize the Farm Bureau is opposed to the legislation, and that even though most livestock producer groups favor the bill, there are a number of Members who desire to follow the views of the bureau. This bill authorizes for the livestock industry exactly the same opportunity of self-help which every other segment of agriculture enjoys today. All other segments of agriculture have the right to make contributions to any kind of fund they want. Why should we deny any group of producers the right to use their own money to promote the sale of their own product? For instance, the National Cotton Council has operated for many years. It is supported by a checkoff of practically every gin in the United States. The gins deduct from every bale of cotton. The dairy people carry on the same kind of program. Every group of agricultural producers has the right to do it except the livestock growers, and the reason the livestock growers do not have that right is because of the act of 1920. The Packers and Stockyards Act specifically prohibits the marketing institutions on the posted markets from making any deduction. This bill simply relates to posted yards. It does not relate to general markets all over the country, because they have the right to make this kind of checkoff now. The Livestock and Meat Board has been getting this kind of a checkoff from a good many yards over the United States without any objection on the part of the Department of Agriculture. This would simply place everybody on the same basis so far as promotion of their products is concerned, and would give the meat producers some little degree of protection in that it limits the amount that can be checked off, although nobody can be forced to contribute.

This bill would not require a checkoff of any individual who objects to it. Neither does it require any marketing agency to make any checkoff at all unless it wants to. The bill leaves it entirely to the institution that is making the checkoff. The institutions can refuse to make any checkoff at all. The institutions can decide whether they consider the promotion agency worthwhile or not. The producer can decide for himself whether he wants his money so used. In fact unless this bill is passed we will have slammed the door in the face of a group of producers who ask only the opportunity to help themselves—the one and only group of producers who are now denied that right.

Mr. BYRNES of Wisconsin. Mr. Speaker, I demand the regular order.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. WEAVER. Mr. Speaker, in view of the fact that a rule has been requested, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

REPEALING SECTION 1157 OF TITLE 18 OF THE UNITED STATES CODE

The Clerk called the bill (H. R. 3836) to repeal section 1157 of title 18 of the United States Code, as amended.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That section 1157 of title 18 of the United States Code, as amended, is repealed.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

AMENDING ACT OF AUGUST 24, 1912, AS AMENDED

The Clerk called the bill (H. R. 3837) to amend the act of August 24, 1912, as amended, with reference to educational leave to employees of the Bureau of Indian Affairs.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the proviso of the act of August 24, 1912 (37 Stat. 519, 25 U. S. C. 275), as amended by the act of August 24, 1922 (42 Stat. 829, 25 U. S. C. 275), and by the act of May 8, 1928 (45 Stat. 493, 25 U. S. C. 275), is hereby amended to read: *"Provided,* That hereafter teachers and other employees who give instruction in schools operated by the Bureau of Indian Affairs may be allowed, in addition to annual leave, educational leave not to exceed 30 workdays per calendar year, or 60 workdays in every alternate year, for attendance at educational gatherings, conventions, institutions, or training schools, if the interest of the Government requires, under such regulations as the Secretary of

the Interior may prescribe; and no additional salary or expense on account of such leave of absence shall be incurred."

With the following committee amendment:

Page 1, line 7, strike out "and other employees who give instruction."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

TRANSFER OF COYOTE VALLEY INDIAN RANCHERIA

The Clerk called the bill (H. R. 6692) to authorize the transfer of the Coyote Valley Indian Rancheria to the Secretary of the Army, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the following described land which was acquired by the United States pursuant to the acts of June 21, 1906 (34 Stat. 325, 333), and April 30, 1908 (35 Stat. 70, 76), for the use of landless Indians in California, together with the improvements thereon, is hereby transferred from the Secretary of the Interior to the Secretary of the Army for use in connection with the Coyote Valley Dam:

All that certain lot, piece or parcel of land, situate, lying and being in the County of Mendocino, State of California, and bounded and particularly described as follows, to wit: That portion of lot numbered 149 of the Yoyako Rancho, described as follows: Beginning at the northwest corner of lot 149 of the Yoyako Rancho, said point being in the center of channel of the East Fork of the Russian River; thence south along the west line of said lot 32.69/100 chains; thence east 28 chains; thence north and parallel with the west line of said lot 149 38.49/100 chains to the center of the county road leading from Ukiah to Lake County; thence south 56 degrees west 1.44/100 chains; thence south 86 degrees west 1.14/100 chains; thence north 83 degrees west 3.79/100 chains to a point in the center of said road; thence north, and leaving said road 2.12/100 chains to the center of the channel of the East Fork of Russian River; thence westerly through the center of the channel of said East Fork of Russian River to the point of beginning, lying in the northwest corner of said lot 149 of the Yokayo Rancho, containing approximately 100 acres.

The appraised value of such land and improvements, which is hereby determined to be $54,000, shall be transferred from the appropriation available to the Corps of Engineers for the construction of the Coyote Valley Dam to the Secretary of the Interior for distribution among the Indians who have assignments on the land. Such sum shall be distributed by paying to each assignee the appraised value of the land assigned to him and the appraised value of the improvements thereon. The remainder of the sum, representing the value of the unassigned portion of the land, shall be distributed equally among the assignees.

SEC. 2. All reimbursable indebtedness charged by the United States against the land described above or the improvements thereon is hereby canceled.

With the following committee amendments:

Page 1, line 9, following the words "Coyote Valley Dam" add "of the Russian River Basin project, California."

Page 2, line 23, following the words "Coyote Valley Dam" add "of the Russian River Basin project, California."

Page 3, line 5, add a new sentence reading: "The payment or distribution of the proceeds from any sale or condemnation pursuant to this act shall not be subject to any lien, except for debts owed to the United States or to Indian organizations indebted to the United States, and shall not be taxable."

The committee amendments were agree to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT

The Clerk called the bill (H. R. 5110) to amend the Federal Property and Administrative Services Act of 1949, as amended, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Federal Property and Administrative Services Act of 1949, as amended, is hereby further amended as follows:

By designating paragraphs (2) and (3) of subsection (a) of section 507 as paragraphs (3) and (4) and adding a new paragraph (2) to read as follows:

"(2) to direct and effect the transfer to the National Archives of the United States of any records of any Federal agency that have been in existence for more than 50 years and that are determined by the Archivist to have sufficient historical or other value to warrant their continued preservation by the United States Government, unless the head of the agency which has custody of them shall certify in writing to the Administrator that they must be retained in his custody for use in the conduct of the regular current business of the said agency."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FOUR HUNDREDTH ANNIVERSARY OF SETTLEMENT IN FLORIDA

The Clerk called the resolution (H. Con. Res. 117) to commemorate the quadricentennial anniversary of the establishment of the first settlement in Florida.

There being no objection, the Clerk read the resolution, as follows:

Whereas August 15, 1959, will mark the 400th anniversary of the first recorded attempt to establish a European settlement in what is now the continental United States; and

Whereas, on August 15, 1559, Don Tristan de Luna landed his Spanish colonists in Florida at Pensacola; and

Whereas the city of Pensacola now commemorates annually the Fiesta of Five Flags in observance and celebration of this anniversary, which has gained national and international recognition; and

Whereas this occasion reestablishes and reemphasizes the ties of friendship and heritage between the nations of the Western Hemisphere: Therefore be it

Resolved by the House of Representatives (the Senate concurring), That the Congress of the United States joins the people of Florida in commemorating the quadricentennial anniversary of the first attempt to found a European settlement in Florida at Pensacola.

SEC. 2. A copy of this resolution, suitably engrossed and duly authenticated, shall be transmitted to the Governor of Florida, the mayor of Pensacola, and the Fiesta of Five Flags Association, Pensacola, Fla.

The resolution was agreed to.

A motion to reconsider was laid on the table.

AMENDING SECTION 20b OF THE INTERSTATE COMMERCE ACT

The Clerk called the bill (H. R. 3775) to amend section 20b of the Interstate Commerce Act in order to require the Interstate Commerce Commission to consider, in stock modification plans, the assents of controlled or controlling stockholders, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That paragraph (2) of section 20b of the Interstate Commerce Act, as amended (49 U. S. C. 20b (2)), is amended by striking out the fifth and sixth sentences and inserting in lieu thereof the following: "The Commission shall have the power to make such general rules and regulations and such special requirements in any particular case in respect of the solicitation of assents, opposition, assurances of assent, acceptance, approval, or disapproval of such holders (whether such solicitation is made before or after approval of the proposed alteration or modification by the Commission), as it shall deem necessary or desirable; and no solicitation shall be made, and no letter, circular, advertisement, or other communication, or financial or statistical statement, or summary thereof, shall be used in any such solicitation, in contravention of such rules, regulations, or special requirements. The Commission may direct that the assents (and any revocations thereof) of such holders to the proposed alteration or modification shall be addressed to a bank or trust company, approved by it, which is incorporated under the laws of the United States or any State thereof, and which has a capital and surplus of at least $2 million, and is a member of the Federal Reserve System. Any bank or trust company so approved shall certify to the Commission the result of such submission and the Commission may, in its discretion, rely upon such certification as conclusive evidence in determining the result of such submission. If the Commission shall find that as a result of such submission the proposed alteration or modification has been assented to by the holders of at least 75 per centum of the aggregate principal amount or number of shares outstanding of each class of securities affected thereby (or as to any class (1) where 75 percent thereof is held by fewer than 25 holders, or (ii) which is entitled to vote for the election of directors of the carrier and the assents of the holders of 25 percent or more thereof are determined by the Commission to be within the control of the carrier or of any person or persons controlling the carrier, such larger percentage, if any, as the Commission may determine to be just and reasonable and in the public interest), the Commission shall enter an order approving and authorizing the proposed alteration or modification upon the terms and conditions and with the amendments, if any, so determined to be just and reasonable."

SEC. 2. Paragraph (3) of section 20b of the Interstate Commerce Act, as amended (49 U. S. C., sec. 20b (3)), is amended by striking out the last sentence and inserting in lieu thereof the following: "For the purposes of this section a security (other than a security entitled to vote for the election of directors of the carrier) or an evidence of indebtedness shall not be deemed to be outstanding if, in the determination of the

Commission, the assent of the holder thereof to any proposed alteration or modification is within the control of the carrier or of any person or persons controlling the carrier. The Commission shall, for the purposes of this section, divide the securities to be affected by any proposed alteration or modification into such classes as it shall determine to be just and reasonable."

SEC. 3. The amendments made by this act shall take effect on the first day of the fourth month following the month in which this act is enacted.

With the following committee amendments:

Page 3, line 10, strike out "any" and insert "any,".

Page 3, line 11, strike out " 'reasonable'." and insert " 'reasonable.' "

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

VIRGINIA TOBACCO

The Clerk called the bill (H. R. 7259) relating to marketing quotas and price supports for fire-cured, dark air-cured, and Virginia sun-cured tobacco.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That section 301 (b) (15) of the Agricultural Adjustment Act of 1938, as amended, is amended by adding the following new proviso at the end thereof: "*Provided further,* That with respect to the 1958 and subsequent crops, type 21 (Virginia) fire-cured tobacco shall be treated as a 'kind of tobacco' for the purposes of all of the provisions of this title, except that for the purposes of section 312 (c) of this title, types 21, 22, and 23, fire-cured tobacco shall be treated as one 'kind of tobacco'."

SEC. 2. Section 2 of the act of July 28, 1945 (59 Stat. 506), is amended by adding the following proviso: "*Provided,* That, beginning with the 1958 crop, the levels of support for such kinds of tobacco shall not exceed the higher of (a) the level applicable to the 1957 crop or (b) 90 percent of the parity price."

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

REINSURANCE OF PUERTO RICAN COFFEE CROP INSURANCE

The Clerk called the bill (H. R. 632) to amend the Federal Crop Insurance Act, as amended.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That section 508 of the Federal Crop Insurance Act, as amended (7 U. S. C. 1508), is amended by adding a new subsection (f) to read as follows:

"(f) Notwithstanding any other provision of this title, the corporation is hereby authorized, under such terms and conditions as it deems consistent with sound reinsurance principles, to provide reinsurance on any crop or plantation insurance provided in Puerto Rico by a duly authorized agency of the Commonwealth of Puerto Rico: *Provided,* That, no application for reinsurance authorized herein shall be approved, unless the corporation shall have determined that the reinsurance deemed necessary is not available from recognized private sources at reasonable cost."

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

The SPEAKER. That concludes the call of the Consent Calendar.

PRIVATE CALENDAR

The SPEAKER. This is the day set aside for the call of the Private Calendar. The Clerk will call the first bill on the Private Calendar.

MRS. ELISE T. KIRK

The Clerk called the bill (H. R. 1412) for the relief of Mrs. Elise T. Kirk.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. AVERY and Mr. VAN PELT objected, and, under the rule, the bill was recommitted to the Committee on the Judiciary.

PETER V. BOSCH

The Clerk called the bill (S. 189) for the relief of Peter V. Bosch.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Peter V. Bosch, of Rugby, N. Dak., the sum of $175, representing the value of his Holstein cow which died shortly after and as a result of injuries sustained by her while undergoing an examination for disease conducted by representatives of the Disease Eradication Branch of the Agricultural Research Service of the Department of Agriculture on May 6, 1955: *Provided,* That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. AVERY. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

MRS. RHEA SILVERS

The Clerk called the bill (H. R. 2070) for the relief of Mrs. Rhea Silvers.

There being no objection, the Clerk read the bill as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Mrs. Rhea Silvers, Baltimore, Md., the sum of $105.40. The payment of such sum shall be in full settlement of all claims of Mrs. Rhea Silvers against the United States for reimbursement of the amount which her late husband, Jacques Silvers (serial number 37050836), was required to refund to the United States because he received such amount while he was an alien enlisted man in the Army of the United States from January 24, 1941, to May 23, 1941: *Provided,* That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Strike all after the enacting clause and insert "That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Mrs. Rhea Silvers, Baltimore, Md., the sum of $173.40. The payment of such sum shall be in full settlement of all claims of Mrs. Rhea Silvers against the United States for reimbursement of the amount which her late husband, Jacques Silver (serial number 37050836), was required to refund to the United States because he received such amount as pay from January 24, 1941, to June 30, 1941, while serving as an alien enlisted man in the Army of the United States: *Provided,* That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ALBERT A. HEINZE

The Clerk called the bill (H. R. 2075) for the relief of Albert A. Heinze.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Albert A. Heinze, Fostoria, Ohio, the sum of $5,000, as a gratuity for the death of his son, Harold A. Heinze (Veterans' Administration claim No. XC-3159865), who died on March 24, 1943, while serving on active duty with the Army of the United States: *Provided,* That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdeameanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WILLIAM R. AND ALICE M. REARDON

The Clerk called the bill (H. R. 2340) for the relief of William R. and Alice M. Reardon.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to William R.

and Alice M. Reardon the sum of $904.07, such sum being the difference between $958, the price they actually paid the United States for the 43.14 acres of land described in section 2 of this act, and $53.93, the price at which they could have purchased such land under the provisions of the act entitled "An act to authorize the Secretary of the Interior to issue patents for certain lands in Wisconsin bordering upon inland lakes or rivers," approved August 24, 1954 (43 U. S. C., secs. 1221–1223), had they been able to defer such purchase until the date of enactment of such act, as was the case with other landowners in the same locality.

SEC. 2. The land referred to in the first section of this act is more particularly described as follows:

"Lot 8 in section 8, township 39 north, range 18 east, located in Florence County, Wis., being 43.14 acres of land on the shore of Lake Emily in said county."

SEC. 3. No part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

Mr. LANE. I offer a committee amendment.

The Clerk read as follows:

Committee amendment offered by Mr. LANE of Massachusetts.

On line 6, page 2, change the comma to semicolon and add the following: *"Provided*, That the said William R. and Alice M. Reardon shall, as a condition of payment, present to the Secretary of the Treasury an affidavit executed by any persons who acquired title to such land through the said Reardons setting forth that the original payment to the United States of $958 was made by the said Reardons, and not by affiants, and releasing the United States from any further liability thereon to any one of the persons involved."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

CLARA M. BRIGGS

The Clerk called the bill (H. R. 5719) for the relief of Clara M. Briggs.

There being no objection, the Clerk read the bill as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Clara M. Briggs, the sum of $5,945.47, in full satisfaction of her claim for compensation for damages from burns received by her when a fire of unknown origin occurred on April 5, 1947, in Alcott Hall in the District of Columbia, a temporary barracks owned and operated by the United States, and there being no showing of tort negligence on the part of the United States which would bring the claim within the purview of the Federal Tort Claims Act, as amended: *Provided*, That no part of the amount appropriated in this act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

JOSEFA KUSIAK

The Clerk called the bill (S. 895) for the relief of Josefa Kusiak.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Josefa Kusiak shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LYDIA ANNE FOOTE

The Clerk called the bill (S. 1203) for the relief of Lydia Anne Foote.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That any period of time in which Lydia Anne Foote may reside in France within 5 years after the date of enactment of this act shall not be deemed to be residence in a foreign State within the meaning of section 352 (a) (1) of the Immigration and Nationality Act.

The bill was ordered to be read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

The SPEAKER. That concludes the call of the Private Calendar.

RECESS

The SPEAKER. The Chair declares the House in recess until 2:30 p. m.

Accordingly (at 12 o'clock and 37 minutes p. m.), the House stood in recess until 2:30 p. m.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker, at 2 o'clock and 30 minutes p. m.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. McBride, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6700) entitled "An act making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1958, and for other purposes."

The message also announced that the Senate agrees to the amendment of the House to Senate amendment number 18 to the above-entitled bill.

PUBLIC ASSISTANCE MEDICAL CARE PROVISIONS OF SOCIAL SECURITY ACT

The SPEAKER. The Chair recognizes the gentleman from Tennessee [Mr. COOPER].

Mr. COOPER. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 7238) to amend the public assistance provisions of the Social Security Act so as to provide for a more effective distribution of Federal funds for medical and other remedial care.

The Clerk read as follows:

Be it enacted, etc., That part I of title III of the Social Security Amendments of 1956 (including the amendments made thereby) is repealed, effective August 1, 1956.

SEC. 2. Section 3 (a) of the Social Security Act is amended by striking out the final period and inserting in lieu thereof the following: ", and (4) in the case of any State, an additional amount equal to one-half of the total of the sums expended during such quarter (but not counted in computing the amount payable to such State for such quarter under clause (1) or clause (2)) as old-age assistance under the State plan in the form of medical or any other type of remedial care (including expenditures for insurance premiums for such care or the cost thereof), not counting so much of such expenditure for any month as exceeds the product of $6 multiplied by the total number of individuals who received old-age assistance under the State plan for such month. In computing the amount payable to any State for any quarter under clause (1) or clause (2), sums expended under the State plan during such quarter as old-age assistance in the form of money payments shall be taken into account before sums expended under such plan in any other form."

SEC. 3. Section 403 (a) of the Social Security Act is amended by striking out the final period and inserting in lieu thereof the following: "; and (4) in the case of any State, an additional amount equal to one-half of the total of the sums expended during such quarter (but not counted in computing the amount payable to such State for such quarter under clause (1) or clause (2)) as aid to dependent children under the State plan in the form of medical or any other type of remedial care (including expenditures for insurance premiums for such care or the cost thereof), not counting so much of such expenditure for any month as exceeds (A) the product of $3 multiplied by the total number of dependent children who received aid to dependent children under the State plan for such month, plus (B) the product of $6 multiplied by the total number of other individuals who received aid to dependent children under the State plan for such month. In computing the amount payable to any State for any quarter under clause (1) or clause (2), sums expended under the State plan during such quarter as aid to dependent children in the form of money payments shall be taken into account before sums expended under such plan in any other form."

SEC. 4. Section 1003 (a) of the Social Security Act is amended by striking out the final period and inserting in lieu thereof the following: "; and (4) in the case of any State, an additional amount equal to one-half of the total of the sums expended during such quarter (but not counted in computing the amount payable to such State for such quarter under clause (1) or clause (2) as aid to

the blind under the State plan in the form of medical or any other type of remedial care (including expenditures for insurance premiums for such care or the cost thereof), not counting so much of such expenditure for any month as exceeds the product of $6 multiplied by the total number of individuals who received aid to the blind under the State plan for such month. In computing the amount payable to any State for any quarter under clause (1) of clause (2), sums expended under the State plan during such quarter as aid to the blind in the form of money payments shall be taken into account before sums expended under such plan in any other form."

SEC. 5. Section 1403 (a) of the Social Security Act is amended by striking out the final period and inserting in lieu thereof the following: "; and (4) in the case of any State, an additional amount equal to one-half of the total of the sums expended during such quarter (but not counted in computing the amount payable to such State for such quarter under clause (1) or clause (2)) as aid to the permanently and totally disabled under the State plan in the form of medical or any other type of remedial care (including expenditures for insurance premiums for such care or the cost thereof), not counting so much of such expenditure for any month as exceeds the product of $6 multiplied by the total number of individuals who received aid to the permanently and totally disabled under the State plan for such month. In computing the amount payable to any State for any quarter under clause (1) or clause (2), sums expended under the State plan during such quarter in the form of money payments shall be taken into account before sums expended under such plan in any other form."

SEC. 6. The amendments made by sections 2, 3, 4, and 5 shall become effective July 1, 1957.

The SPEAKER. Is a second demanded?

Mr. REED. Mr. Speaker, I demand a second.

Mr. COOPER. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. COOPER. Mr. Speaker, I ask unanimous consent that all Members desiring to do so may extend their remarks in the RECORD just prior to the vote on the pending bill.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. COOPER. Mr. Speaker, I also ask unanimous consent that all Members may have 5 legislative days within which to extend their remarks on the bill, H. R. 7238.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. COOPER. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, H. R. 7238 was introduced by the gentleman from Massachusetts [Mr. MCCORMACK] and is designed to correct an unintended result stemming from the public assistance medical care provisions of the 1956 amendments to the Social Security Act. The 1956 amendments, if not changed prior to July 1, 1957, will operate to penalize some States with respect to their public assistance medical care programs.

The problem is somewhat involved, and I believe it can be expressed in its simplest terms by reviewing very briefly the background out of which it arises. As Members will recall, prior to the 1950 social security amendments, Federal matching for State expenditures for old-age assistance, aid to the blind, and aid to dependent children was limited to unrestricted money payments made directly to the needy recipients. The 1950 amendments to the Social Security Act made two important changes. First, it added a new program, aid to the permanently and totally disabled, to the three programs I have just mentioned. Second, it expanded the area of Federal participation beyond unrestricted money payments directly to recipients, and permitted the inclusion of payments for medical care in determining the amount of assistance for each recipient with respect to which the Federal Government would participate. In short, the 1950 amendments permitted Federal matching for the payment for medical care, with such payments being made either directly to the person rendering the medical care—vendor payments—or to be included in the unrestricted money payment to the recipient.

Last year the administration recommended the institution of a new formula for matching vendor expenditures for medical care for public assistance recipients under the four programs. The Committee on Ways and Means conducted hearings on these and other proposals in the spring of 1956. In the meantime, it was our informal understanding that the Senate Finance Committee would probably add the administration recommendations for this new formula to the then pending social security bill. This in fact happened, the new formula being added by the Senate Finance Committee and accepted by the Senate, and subsequently accepted with minor modifications by the House conferees.

Under the new formula, effective July 1, 1957, Federal matching for "vendor payments" for medical care will be limited solely to Federal participation in one-half of the cost of such care up to an average expenditure of $6 per month for each adult, and $3 per month for each dependent child, receiving assistance either in the form of money payments or medical care. Effective July 1, 1957, there will be no Federal matching for "vendor payments" for medical care for recipients within the maximum for individual recipient as has been true since October 1950.

Information presented to your committee clearly indicates that some States are faced under the 1956 formula with substantial losses of Federal funds. In addition, still other States which have well developed programs for medical care will be faced with having to institute undesirable and administratively costly procedures in order to avoid losing any Federal funds.

It is this situation which will arise under the 1956 formula that your committee's bill is designed to correct. This correction would be accomplished by permitting the States to have expenditures in the form of payments to suppliers of medical care taken into account for purposes of determining Federal participation in any 1 of 3 ways, the method to be selected by the State:

First, under the 1956 formula alone;

Second, under a combination of the 1950 and the 1956 formulas; or

Third, under the 1950 formula alone.

In other words, Mr. Speaker, your committee's bill would guarantee to the States the right to take advantage of the funds which the Congress intended to make available to all the States in such a way as to not impose upon the States administratively costly and undesirable changes in their medical programs or accounting procedures. It would also insure that no States will incur any financial losses with respect to their public assistance medical care programs.

The method which your committee has chosen in solving this problem arising under the 1956 formula was considered to be the most feasible and most desirable of the several alternatives which were presented. It is considered to be a sound approach to the matter, and I urge that the House speedily approve this legislation.

The SPEAKER. The Chair recognizes the gentleman from New York [Mr. REED].

Mr. REED. Mr. Speaker, I speak in support of H. R. 7238 and urge my colleagues in the House to join in obtaining favorable consideration of this necessary legislation. The need for the legislation arises from an inadvertent oversight in connection with the Social Security Amendments of 1956. As my esteemed friend and distinguished chairman, the Honorable JERE COOPER of Tennessee, has already explained to you, this legislation would permit States to receive Federal matching within the limits of the $60 statutory maximum matchable amount per recipient for vendor payments made with respect to an individual on the assistance rolls. Effective July 1, 1957, present law provides that such vendor payments cannot be included within the $60 statutory maximum. Instead, the only matching that would be allowed in the case of vendor payments would be under the new averaging formula provided by the 1956 amendments, applicable only to medical care expenditures and providing that a State and the Federal Government shall share equally medical care expenses up to an average medical payment maximum of $6 in the case of public assistance for adults and $3 in the case of aid to dependent children. There are a few States with existing well-developed medical care programs involving vendor payments that will find the Federal matching inadequate under the $6 and $3 limitations to maintain their existing programs. In addition, there are several States whose medical care programs may progress to the point in the foreseeable future where these maximums would preclude realization of the Federal matching intended by the Congress.

If H. R. 7238 does not become public law, those States which would be threatened with the loss of Federal funds that Congress intended they should have, would, in order to avoid the loss of such funds, be compelled to abandon the vendor payments made in connection with their medical care programs and resort to cash payments to assistance recipients that would include an allowance for medical care or to sustain the loss of the extent of Federal participation in the State program. Such an event would entail either a curtailment in the medical care programs of the affected States or would impose upon the States the need for adopting cumbersome and costly procedures with respect to program administration.

Mr. Speaker, it is a matter of evidencing our good faith to those States that would be adversely affected by the Social Security Amendments of 1956 that necessitates favorable action on the legislation before this House today.

Mr. COOPER. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts [Mr. LANE].

Mr. LANE. Mr. Speaker, under the social security formula that goes into effect on July 1, 1957, the Federal Government will match one-half of State medical care expenditures for public assistance recipients, up to specified maximums.

Even though the cost of living has gone up for the eighth straight month, and this includes increases in the cost of drugs, doctors' fees, and group medical plans, 1956 amendments to the Social Security Act would curtail the help given by the Federal Government to the States for medical care to persons on public assistance.

This is economy at the expense of the needy aged, the blind, the permanently and totally disabled, and dependent children.

The irony in this situation is that a few States will lose Federal funds, beginning July 1, as compared with the amount of Federal aid they are currently receiving.

Because these States are currently spending money for medical care—and receiving Federal sharing—at a rate in excess of the maximum specified in the new legislation.

In other words, those states with advanced programs, are being told that the humane decisions of their own legislatures, made with due consideration of their own financial responsibility, do not meet with the approval of the Federal Government. To point up this attitude, a penalty is attached. Over and above the stated maximums, the Federal Government will withdraw its support.

The net result is that these few States with a "social conscience" will lose $8.6 million dolars a year in Federal grants, effective July 1, unless the law is changed before that date.

I recognize that the economic circumstances within many States, do not permit them up date their public assistance programs to the extent that they would prefer, and that the evolution of social legislation would warrant.

That is no reason, however, for slowing down those States that are in the vanguard. Rather, we should encourage them to experiment, so that the lessons learned from their practical experience shall serve as a guide and as an encouragement to those that follow.

Mr. MASON and I have filed bills which are substantially the same as the one by Mr. MCCORMACK that has been reported favorably by the Committee on Ways and Means.

The proposed legislation retains the formula established under the 1956 amendments to the Social Security Act, plus "the difference, if any, between the total expenditures which could be counted if each individual received the maximum matchable money payment under the program involved, and total expenditures for money payments which are counted in computing the amount payable to the State under that program."

Massachusetts is one of the States that will stand to lose Federal aid for such purposes. This is an inequity that cannot be overlooked.

As public assistance for the aged—as distinguished from public assistance to the blind, the permanently and totally disabled, and dependent children—will decline as more people qualify for old-age and survivors insurance which they have earned through their own contributions and those of their employers, outlays for old-age assistance will automatically lessen. With the expanding economy and the increase in the working population, this is no time for reducing medical care under the public-assistance program. It is a form of retreat, when we are but halfway toward our goal. It falsely assumes that we are cutting back on a complete program. With the rising cost of living, this inflicts real hardship on the recipients of public assistance, who were not getting adequate medical care even before the restricting amendments that will become effective on July 1, 1957.

Our purpose is to expand rather than contract the medical care that should be available to them. And to make certain that those States that are expanding such programs, shall not be cut off from Federal aid because they are making progress toward a well-rounded program that inevitably will be recognized, and shared in, by the Federal Government.

Mr. MCCORMACK's bill, H. R. 7238, will "provide for a more effective distribution of Federal funds for medical and other remedial care."

At the same time, it will protect those States that are in danger of losing Federal funds for the incongruous reason that they understand, and are trying to meet the realities of our present day welfare program for those who are unable to help themselves.

We shall be going about economy the wrong way, if in our haste, we slash or freeze those basic obligations of the Federal Government in this modern age.

Medical care for persons eligible for public assistance, is a poor place "to swing the ax."

Instead, we should make moderate progress by supporting the aims of H. R. 7238.

Mr. REED. Mr. Speaker, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. VAN ZANDT] to speak out of order.

Mr. VAN ZANDT. Mr. Speaker, I speak for economy. Not for the kind of economy which whittles and slices at this or that appropriation bill with hoping and longing to save a few million dollars. No. I speak for long-term continuing, self-perpetuating economy which will save many billions of dollars while at the same time paying a bonus of increased national defense.

On several occasions I have introduced legislation aimed at rectifying the compensation of the personnel of our Armed Forces. I say with determination that I intend to go on introducing such bills until we have achieved a state of equity in the realm of military pay; until we reward the members of the uniformed services with pay comparable to that received by their nonmilitary counterparts. I do not say commensurate with their value to national defense for I nor any other man can make an appraisal of the security of the United States.

Recently I introduced H. R. 7574 to change the method of computing basic pay for members of the uniformed services. Founded on the recommendations of the Defense Advisory Committee on Professional and Technical Compensation—the Cordiner Committee—the bill is aimed at instituting a modern concept of military pay and concurrently achieving the greater combat effectiveness of our defense forces.

I do not claim this as the bill to end all military pay bills or that it is the panacea for all the manpower problems of our Armed Forces. It is also not a patchwork and piecemeal approach to a problem which canont be solved in small parts but which must be treated as one inseparable whole. My bill is a beginning and a basis for us, the Members of Congress, to take the greatest step toward real economy. As the Committee Chairman, Mr. Ralph J. Cordiner, said, "We must begin somewhere to halt and reverse the inflationary trend toward ever higher costs of Government, and here, for a small initial investment, is a very promising place to start."

On May 14, 1957, President Eisenhower addressed the Nation on the size of the budget. He emphasized the gamble involved in reducing that portion which contributed to national security, and specifically to that part allotted to the Department of Defense. Relief from world tension, he said, is about the only way to reduce military spending. The statement is absolutely true when applied to the quantity and quality of arms and equipment we must have to maintain our edge of strength over the Soviet Union and international communism. But the statement is partially misleading when applied to the personnel who use those arms and equipment. Let me explain this paradox.

Today, 2,800,000 men and women make up our Armed Forces, Not all of these are engaged in supplying direct military defense for the country. Roughly 500,000 members are involved in formal training activities, while other hundreds of thousands are undergoing on-the-job training in operational units. This trainee force is a corps of ama-

teurs in an otherwise professional organization. If the time should come when our Army, Navy, Air Force, and Marine Corps were thrown into combat—and let me say that there will be little warning—those trainees would be of little or no help to the effort.

It is taking 500,000 trainees just to maintain an effective combat force and to support the services of 2.3 million. In other words, 22 percent of our personnel strength is noneffective, not combat-ready. Why is this so? Because of the high turnover rates in professional and technical skills. Because these skilled people leave the services and obtain employment with higher wages in companies working in fields related to technical military specialties. The Armed Forces are creating and maintaining an expensive training ground for industry. Not only this, but the turnover is costing the country not less than $2 billion a year.

The implications are obvious. This is a poor business practice, inefficiency. Any good businessman will tell you that a 22-percent personal loss is poor employee utilization; it is nonproductivity and waste.

One of the country's outstanding businessmen, Ralph J. Cordiner, president of General Electric, has pointed out the guidelines for not only eliminating this waste but of improving the combat effectiveness of the services as well. Our objectives, he says, are first, to offer genuine incentives in order to retain the high quality officers and enlisted men in the services and thereby second, to build a professional force.

Ours is a country of free enterprise. Here the individual citizen is our prime concern. In this democratic atmosphere our people have the opportunity to develop their talents and are free, even encouraged, to go to those jobs or positions which offer them higher pay and greater benefits.

Human motivations must be recognized. Among them patriotism is a strong force. Fortunate for the Nation, patriotism has held many of the dedicated and devoted in the Armed Forces during peacetime and given us their great leadership in time of war. Patriotism is, however, a nebulous thing, manifesting itself most frequently in times of crisis. Cold wars do not have the impelling force of a crisis, and patriotism is pitted then against compensation.

The compensation practices in the services today are contrary to human motivations. They were adopted from the British Navy in 1812, and are as outmoded now as the 1812 navy itself. Without a doubt, those practices are the major impediment to national security.

The more of the 2.3 million trained people we can induce to remain in the services, the fewer trainees we will need to build a professional force. In fact, this professional force can be achieved only by increasing the retention rate. Expensive as it is to build and maintain, the professional force is by far the cheapest and most effective in the long run. Rather than composed of members forced by law to serve, it will be made up of career-professional members wanting to serve.

The problem in its basic form is manpower. Manpower is mindpower, brainpower. The human brain still remains the inventing and guiding force behind the machine. And never can the machine substitute for man. As one of our Air Force leaders said, "You can't build creative ability into a machine. You can't design a circuit to take the place of courage. Above all, you can't enclose dedication to freedom in a magic black box." Plainly then, our most precious national resource is our men and women.

The manpower problem, and the coordination of manpower and machines, is our most compelling concern. It is more important than providing increasing amounts of money for complex equipment because that equipment becomes only a metallic heap when trained hands are not available to use it.

This bill will provide a long-term solution to the basic manpower problems of the Armed Forces.

It will result in about a 15-percent improvement in the combat capability of the Armed Forces.

It will bring about sharp reductions in training accidents now, and in military and civilian losses in the event of war.

It will reduce the number of military personnel required to produce a given level of national security.

Finally, and significantly, it will result in savings up to $5 billion annually by 1962, in the cost of producing our present levels of combat capability.

Let me pronounce again, the purpose of the bill is to change the method of computing basic pay. Those who believe that this is nothing more than a general pay raise for military personnel have been misled by misinformation. If they see the bill as inflationary, they are incorrectly reading the label. This is a bill for readjustment pay computation. It is a bill for increased management efficiency and for savings. It is a bill for reducing the cost of defense, the largest single item in the Federal budget.

The Cordiner report upon which my proposal is based has received the approval of the Secretary of Defense, the Secretaries of the three military services, and the Joint Chiefs of Staff. The Department of Defense has even agreed to absorb the entire cost of the program for the first year without an increase of its budget.

Failure of the Congress to act on this manpower and defense problem will have dire consequences. Those members of the armed services who have been waiting for this pay adjustment, and who have remained in service expecting it, will find no further cause to remain. Enlistments will drop sharply. Officers in large numbers will ask for release. Combat efficiency will decline with the shrinking of what we now have to a professional force.

I urge immediate action on this proposal. I ask that we not be penny-wise and pound-foolish, but that we recognize the long-term investment in annual savings of billions and in increased combat effectiveness. I ask that we think big and act boldly. This proposal is not limited, idealistic, or unsound. It is broad in scope, realistic, and purely economical.

The Nation's security is at stake.

Mr. COOPER. Mr. Speaker, I have no further requests for time.

Mr. REED. Mr. Speaker, I have no further requests for time.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

SETTLEMENT FOR CERTAIN INEQUITABLE LOSSES SUSTAINED BY OFFICERS OF THE COMMISSIONED SERVICES UNDER EMERGENCY ECONOMY LEGISLATION

Mr. CELLER. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 293) to authorize settlement for certain inequitable losses in pay sustained by officers of the commissioned services under the emergency economy legislation, and for other purposes.

The Clerk read as follows:

Be it enacted, etc., That upon application of any officer or former officer (including the widows and legal representatives of such officers who are deceased) of the services mentioned in the Joint Pay Act of June 10, 1922, who, upon advancement in rank, did not receive an increase in the rates of pay or allowances for any part of the period beginning July 1, 1932, and ending June 30, 1934, by reason of the application in the case of such officer of section 201 (except as to longevity increase provided for in the 10th paragraph of section 1 of said Joint Pay Act) of the Legislative Appropriation Act for the fiscal year ending June 30, 1933, the Comptroller General shall determine the aggregate amount of pay and allowances, in addition to that otherwise accruing, which would have accrued to such officer if such section had not been applied in his case (except as to longevity) and pay to such officer the amount so determined. Applications under this act shall be made in such form and contain such information as the Comptroller General may prescribe, but an application under this act not filed in the General Accounting Office prior to the expiration of 2 years from the date of enactment of this act shall be of no effect. Any officer of the United States is authorized and directed upon request of the Comptroller General to supply any information from the records in the custody of such officer to aid the Comptroller General in passing upon applications under this act.

SEC. 2. There is hereby authorized to be appropriated such a sum as may be necessary to carry out the provisions of this act.

The SPEAKER. Is a second demanded?

Mr. ALLEN of Illinois. Mr. Speaker, I demand a second.

Mr. CELLER. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CELLER. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, this bill is identical with one that passed in the last Congress.

It has the approval of the Department of Defense and its purpose is to restore certain inequitable losses sustained by officers who were promoted in rank between the years 1932 and 1934.

In the Economy Act of 1932 it was provided that employees in the Federal Government, both civil and military, would not be entitled to automatic increases in pay. As this law was interpreted, the Federal civilian employees were authorized to receive the increased pay incident to promotion from one grade to another grade; however, in a very strained construction of the law by the Comptroller General it was ruled that officers of the uniformed services who were nominated by the President and confirmed by the Senate were not allowed the pay which should have gone with the advanced rank. This was contrary to the intent of Congress, as shown in the report on the original bill. In other words, we have the inconsistency where under that Economy Act, civilian employees, although not entitled to automatic increases where they were advanced in rank, were given increases, whereas the officers in uniform who advanced in rank were not given any increases, increases that they were entitled to because of an advance in rank.

Mr. ALLEN of Illinois. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Illinois.

Mr. ALLEN of Illinois. Has the gentleman taken this up with the gentleman from New York [Mr. KEATING], the ranking Republican member of the Committee on the Judiciary?

Mr. CELLER. Yes, I have taken the matter up with the gentleman from New York [Mr. KEATING]; also with the gentleman from Massachusetts [Mr. MARTIN], the minority leader last week. The bill was reported unanimously by the subcommittee and also unanimously by the full Committee on the Judiciary. I do not know of any objection to the bill except the objection of the so-called professionals who handle the Consent Calendar who felt it was not the type of bill that should be considered in connection with the Consent Calendar. For that reason I am asking for suspension of the rules to pass the bill.

Mr. MASON. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Illinois.

Mr. MASON. This, then, is to correct an inequity that was passed away back in 1932 in the Economy Act?

Mr. CELLER. That is correct.

Mr. GROSS. Mr. Speaker, if the gentleman yields, I cannot find a copy of the bill or the report over here. I wonder if this bill should be considered until we have something, at least, that we could look at.

The SPEAKER. The Chair has a report in his hands which was filed some time ago.

Mr. GROSS. It is not available at the desk, Mr. Speaker.

Mr. CELLER. I will furnish the gentleman a copy.

Mr. ALLEN of Illinois. Mr. Speaker, I have no requests for time.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954

Mr. O'NEILL. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 264 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 6974) to extend the Agricultural Trade Development and Assistance Act of 1954, and for other purposes. After general debate, which shall be confined to the bill and continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. O'NEILL. Mr. Speaker, I yield myself 30 minutes, and at the conclusion of my remarks, I will yield 30 minutes to the gentleman from Illinois [Mr. ALLEN].

Mr. Speaker, House Resolution 264 provides for the consideration of H. R. 6974 to extend Public Law 480, the Agricultural Trade Development and Assistance Act of 1954.

The resolution provides for an open rule and 2 hours of general debate on the bill.

Title I of Public Law 480 authorizes the President to enter into agreements with friendly nations, or organizations of friendly nations, for the sale of surplus agricultural commodities for foreign currencies, to be used mainly for market development, foreign assistance, and payment of United States obligations abroad. The act originally provided for an authorization of $700 million for the sale of surpluses abroad for foreign currencies. The authorization was increased to one billion five hundred million in 1955, three billion in 1956, and this bill further increases the authorization to a total of $4 billion.

The bill also provides for an increase in the authorization under title II of $300 million. This title of the act authorizes a program by which we can help friendly foreign people in time of need.

The termination date of these programs under titles I and II is extended from June 30, 1957, for 1 year until June 30, 1958.

No change is made in the provisions of title III of the act which deals with barter and the permanent surplus disposal and donation programs embodied in the Agricultural Act of 1949.

I urge the adoption of House Resolution 264 so the House may proceed with the consideration of H. R. 6974.

I note in the Saturday Evening Star, a Washington paper, an AP dispatch, and in talking about farm losses it says:

The Agriculture Department reports that it lost $1,056,900,000 in farm price support programs in the 10 months ending April 10. That was the biggest loss for any such period in the history of Government farm price support operations.

Losses are incurred largely through the sale at less than cost of surpluses acquired from farmers under price-support loans.

There has been heavy movement of surpluses abroad during the past year.

Losses for the comparable period last year totaled $771,958,909.

The bill proposes that this year we go into the pockets of the taxpayer for another $1 billion.

Mr. MASON. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield.

Mr. MASON. The gentleman referred to the fact that this bill covers exchanges with friendly nations. Would the gentleman be willing to define for me, in the light of present-day conditions, what a "friendly nation" is?

Mr. O'NEILL. It is very difficult to say what a "friendly nation" is. I am one of those who believes that you cannot buy friends. The policy of this Government for years has been to try to buy friends. What you find out is that they resent your helping them.

Mr. MASON. That is right.

Mr. O'NEILL. If you do not give from a friendly heart, you do not have a friend. America gives to other countries of the world, for its own protection, because of its greed. We think we are protecting ourselves. We are not giving to the other countries of the world in order to help them, although that is the real purpose behind legislation of this type.

It is interesting to note some figures of the Commodity Credit Corporation. Incidentally, this bill was reported out of the Committee on Rules about 2 weeks ago, but, because of the appropriation bill for the armed services being in the House, it was not reported to this House. I called on the Department of Agriculture because I was interested in the question of these surplus sales that have been made. I asked to have sent up to my office the record of the sales from Commodity Credit Corporation stocks that were made that amounted to over $100,000. The record is very interesting on that. This all comes under title I.

For example, in 1955 there were sales amounting to $72,496,847 of CCC surplus commodities. Three international cartels handled approximately 68 percent of these transactions. From July 1955 through April 1957 they sold surplus commodities amounting to $233,258,935. Three of the cartels handled 65 percent of those goods.

Those companies are Cargill, Inc., which handled 19 percent or $45 million; Continental Grain, which handled over $77 million or 33 percent of the program; and Leval, which handled over $30 million, or 13 percent of the program.

You can see the same pattern all through the transactions of the Commodity Credit Corporation. There were

1 or 2 or 3 or 5 companies at the most. Thirty-seven different companies have handled these transactions, but the bulk of them is locked in the hands of 3 companies, 2 of which are not American-controlled companies.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman.

Mr. GROSS. Can the gentleman give us any idea of the services that these three cartels performed?

Mr. O'NEILL. I am sure the gentleman is aware of how this operation works. Technically speaking our Government would go to a foreign government that is in need of one of these surplus commodities. Then we arrange to sell X million bushels of grain or of corn or of wheat or of cotton. Then after we have agreed on that, we make the sale to the Government. Then one of the cartels steps in and acts allegedly as a purchaser, but is in fact a broker in the deal since our Government and the purchasing government have already agreed on the sale. Their profit, of course, is at the expense of the United States taxpayer. Actually I do not know what the profit is, but there must be a tremendous amount of profit on over $233 million worth of goods which represents only a part of the total sales since the beginning of these operations.

An interesting thing about these cartels in this. One of these companies has 15 subsidiaries and agents in various countries in the world. One would be in India or in Pakistan or Italy, Greece, and so forth. They go to these governments probably before our officials. They say to the Government of Greece or the Government of Lebanon or the Government of Pakistan or the Government of India or any one of these other governments, "You need this United States surplus or that United States surplus." The cartel's agent induces them to buy the surplus. We are not offering them these things. These various cartels have their agents throughout the world. They are producing business. Under agreements made between the American Government and different countries with which we are doing business, the cartels come in and bid among themselves. They are the ones then who distribute these products to the foreign nations.

Mr. GROSS. That is exactly the point. I do not understand why these people should come in as middle men. As a Government do we not maintain all kinds of foreign attachés, a very army of foreign employees in various agencies?

Mr. O'NEILL. I certainly agree with the gentleman.

While I was doing a little research on this piece of legislation I secured and have here the report of the United States contributions to international organizations. As you know, under this particular bill we are being paid in foreign currencies. For example, if we were to sell X millions of dollars worth of wheat to India, we would be paid in the monetary system of India, which I believe is rupees. Those rupees would be left there, part of them used as counterpart funds. The record shows that others we lend back to India on a 30-year loan, and they can pay us in rupees again at the end of that time.

As to this contribution of the United States to international organizations, you will note as we have gone along in the past few years that we originally, about 3 years ago, paid $95 million for the support of the organizations. In 1956 we paid $105 million for the support of the organizations. Now, in 1957, we are paying $127 million for the support of the organizations. In 1958 it is going to be even higher.

I believe that this foreign currency credited to the account of the United States pursuant to transactions carried out under Public Law 480 but not already obligated should be used as payment in whole or in part of the United States contributions to international organizations in lieu of United States dollars, whenever said payment in foreign currencies credited to the account of the United States under this act has been determined by the President of the United States to be such as not to impair the functions of any or all of the international organizations which are to receive United States contributions, in whole or in part, in the form of foreign currencies. All United States departments or agencies making contributions to international organizations by virtue of appropriated funds, or otherwise, should henceforth reimburse the Commodity Credit Corporation with the dollar value of the foreign currency funds used in lieu of United States dollars in the payment of the United States contributions to international organizations.

I had intended to offer what I just stated as an amendment to the bill. I have already been informed that the amendment is out of order. Whether it should be considered by the Committee on Banking and Currency or the Committee on Foreign Affairs, is not clear but certainly something should be done with this money that we have lying around in the equivalent amounts of hundreds of millions of dollars, in all the nations of the world; and then we pay into these international organizations something that is mounting year after year after year. This year, in 1957, we are spending $127 million. In 1958 it is going to be more.

Mr. ALLEN of Illinois. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield.

Mr. ALLEN of Illinois. The full Committee on Agriculture has held hearings for two days on this intricate problem of surpluses. I know the gentleman would agree with me that when you go into the field of just what to do with surpluses you really have a job on your hands. I believe the full Committee on Agriculture had 2 days of hearings on this matter and then unanimously reported this bill.

Mr. O'NEILL. I agree with the gentleman. The Committee on Agriculture did unanimously report this bill.

Mr. ROONEY. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from New York.

Mr. ROONEY. I have a question I should like to propound to the distinguished gentleman from Massachusetts or a member of the Committee on Agriculture. On page 12 of the committee report on the bill H. R. 6974 we find the following language:

> In many countries additional physical facilities, including perhaps a more suitable residence, would be of assistance to the agricultural attaché in selling American agricultural products.

I should like to inquire what is meant by this, and whether or not we are under the terms of this bill creating another Foreign Service, a super Foreign Service, where from the proceeds of these agricultural commodities under Public Law 480 we will be building ambassadors' residences for the agricultural ambassadors.

Mr. O'NEILL. I cannot answer the question of the gentleman as to whether we are going to set up another organization such as the gentleman stated, but I do know this—the Commodity Credit Corporation has been reimbursed only to the extent of $52,650,241 out of expenditures under this act that total $1,590,618,866 out of CCC funds. In other words, we received back approximately 3 percent of the money. I do not know what you can do with these rupees or pesos and these foreign currencies. Perhaps, they can be used for wallpaper or something like that. But, on the other hand, it may be best if it was used to build buildings in these foreign countries rather than to let the money just pile up—I just do not know.

Mr. ROONEY. But this idea of having Agricultural Department buildings all over the world. I thought our representation in the various countries of the world was under the Secretary of State.

Mr. O'NEILL. I agree with the gentleman. One thing I can see here is that we are asking for an authorization of another $1 billion. We are losing on this thing steadily, steadily, and steadily. We are not getting any return. We are not getting any value out of it. In my opinion, we are not getting any value out of it. But, I realize something must be done with these surpluses. I have already mentioned to you these international cartels that pass themselves off as purchasers, but who in fact appear to be brokers at the expense of the United States taxpayers in these matters. Certainly, I think the Committee on Agriculture or the Committee on Foreign Affairs or the Committee cn Banking and Currency or whoever has jurisdiction over these matters should do something to eliminate or restrict these agents—who are not even the agents of American controlled corporations but who are making huge profits out of our surplus commodities.

Mr. COOLEY. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield.

Mr. COOLEY. I would just like to say to the gentleman from New York, that in the first place, our agricultural attachés are not merely salesmen. In this section, we are talking not about surplus commodities but about surplus funds,

counterpart funds, which, as the gentleman from Massachusetts has indicated, are accumulating in enormous amounts. Is it better to permit the funds to accumulate throughout the world, or is it better to take a part of those funds and invest the funds in real estate—even, perhaps, a residence for our agricultural attachés, most of whom now are not adequately housed or adequately financed.

Mr. O'NEILL. The matter of building residences for our representatives abroad comes under the jurisdiction of the gentleman from New York so far as appropriations are concerned since the gentleman is the chairman of the Subcommittee on State, Justice and the Judiciary Appropriations.

Mr. COOLEY. The Federal Government is paying out enormous sums in American dollars for the rental of buildings.

Mr. ROONEY. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield.

Mr. ROONEY. I wonder at the statement of the distinguished gentleman from North Carolina, my friend, who is chairman of the great House Committee on Agriculture when he says that the agricultural attaché is not a salesman. In his report on this bill, he states, "suitable residences would be of assistance to the agricultural attaché in selling American agricultural products."

Mr. COOLEY. I agree with the gentleman on that. Recently, the Congress took the agricultural attachés out from under the State Department so to speak, and they now report directly to the Secretary of Agriculture. That is the way I think it should be. I think the agricultural attaché is stationed in a foreign country for the purpose of collecting information for our own Department of Agriculture, for the purpose of pointing out to American businessmen the possibilities of trading in foreign countries, and to assist Americans to find markets for its products. But, certainly, the agricultural attaché is not a salesman in the usual sense of the word. He has nothing to sell and he has no authority to consummate the sales on any commodity; but certainly a big part of his job is to help American agriculture find foreign markets for its commodities.

Mr. MASON. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield.

Mr. MASON. It is a fact, is it not, that the Committee on Agriculture voted unanimously in support of this bill?

Mr. O'NEILL. That is true.

Mr. MASON. And it is also a fact that the Committee on Agriculture has as its main objective the benefit of the American farmers in getting rid of these surpluses; is that not a fact?

Mr. O'NEILL. That is true.

Mr. MASON. In view of those two facts, the Committee on Agriculture cannot be expected to have in mind the economic welfare or the general well-being of the people of this Nation. They can only keep in mind the welfare of the farmers, and getting rid of these surpluses for these counterpart funds which are no good to anybody and which we ought to be able to use, as the gentleman says at least to get some benefit out of, such as paying the rent for these agricultural attachés, if necessary, or providing them with homes. But we ought to get some good out of these counterpart funds in order to get a little return on the tax money we have spent to accumulate them.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield.

Mr. GROSS. This being an off year, as far as elections are concerned, I wonder how much will be left this time next year when the junketing parties get through.

Mr. O'NEILL. They use only a small part of these funds. As a matter of fact, you could have half of America go on a junket and they could not spend all the money they set up in these situations.

Mr. GROSS. About 3 years ago we turned over to the British Government more than a billion dollars in counterpart funds to retire their debt. That is a good way of taking care of that difficulty.

Mr. O'NEILL. I yield to the gentlewoman from New York [Mrs. KELLY].

Mrs. KELLY of New York. On page 10 of the report:

> It is an emergency law designed for the sole purpose of making the best of a bad situation by providing for the disposal of agricultural surpluses in a manner which will return some benefit—if possible, a permanent benefit—to the United States.

I do not call surpluses a bad situation. I am just wondering if at this time it would not be advisable to consider defeating the rule on this matter, for one other reason. I am deeply concerned over the fact that the Members of this House do not know that which is involved in this bill. What is involved in this bill is much deeper than the simple bill before us, of an increase from $3 billion to $4 billion. What is involved in this bill is a fundamental basis which we should decide. That is, the present negotiations for Polish aid is involved in the passage of this law. Saturday the State Department gave a release, and that which was involved, as far as this law is concerned, is in the sale of surpluses to Poland. On April Fools' Day—it is a rather good day as far as this is concerned—the law was declassified by the State Department claiming Poland no longer under the domination of the Soviet regime. It certainly was true on April Fools' Day. On that basis negotiations were held, but that which was made public is only a small portion of the real negotiations. I think it is most unfair to the membership of this House to vote on a law or a bill in which they do not know the fundamental and true facts of the negotiations with Poland.

Mr. O'NEILL. No change has been made in title III of this act which deals with barter and permanent disposal programs, and donation programs embodied in the Agricultural Act of 1949. As this act passes here, as I understand it, you could not barter with Poland, or any country behind the Iron Curtain at this time, but I understand that in April the Senate passed a bill stating there would have to be——

Mrs. KELLY of New York. Just let me amplify that. It is true that 103 and 304 are not changed under the basic law. But under that the executive branch can decide if a nation is friendly. So, under the determination of December 20, they determined that Poland was a friendly nation. Therefore negotiations could be held with Poland. I am not disputing that right of the Government to consider trading with Poland. But using this law as a basis for negotiations, the State Department went further in their negotiations than the trading of surplus commodities.

Regarding that I cannot address the House for the simple reason that it is classified.

Mr. COOLEY. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield.

Mr. COOLEY. I do not know what classified information the fair lady from New York has that she cannot disclose to the House, but I think that the situation she is grieved about resulted from an interpretation of the Polish situation by the officials of the State Department when they declared that Poland was now a friendly nation, and having declared Poland as a friendly nation the State Department or some other officials of some other department of the Government has now entered into negotiations.

But the fact remains that there is no provision in this bill which has changed the situation which she has in mind. Of course, if no funds are provided there would be nothing to trade with. I understand exactly what her objection is and that is that the State Department has interpreted the situation in Poland contrary to her own idea of what the situation really is and perhaps contrary to my idea, because I do not consider that the Polish Government is a friendly government. I do not consider that the Polish Government is not dominated by the U. S. S. R. If it is dominated by the U. S. S. R. they have no right to negotiate with them if they are in fact negotiating.

Mrs. KELLY of New York. Mr. Speaker, will the gentleman yield further?

Mr. O'NEILL. I yield.

Mrs. KELLY of New York. I would like to say as a member of the Committee on Foreign Affairs that I cannot divulge that which is classified. But I can also say that before the session this afternoon one of the members of the Committee on Agriculture told me he was acquainted with what I considered classified matter, and that the Department had told him parts of it. If he wants to divulge it on the floor that is up to him.

Mr. DORN of New York. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield.

Mr. DORN of New York. I wonder if the distinguished chairman of the Committee on Agriculture, in view of the statement he made, would accept an amendment to the effect that under this bill Poland is considered an unfriendly

nation, so it would be in black and white in the bill itself.

Mr. COOLEY. No; I would not accept the responsibility of defining a friendly nation or an unfriendly nation.

Mr. DORN of New York. There is a definition of "friendly nation" in the bill. Under my interpretation of the bill Poland would not be a friendly nation, but the State Department interprets it differently. I think in view of the gentleman's reasoning it should be set out in the bill itself.

Mr. COOLEY. I said I am inclined to agree with the position of the gentleman, but the fact is that the situation might drastically change at any time, and in the event there were a drastic change and the Polish Government did in fact become a friendly government, then I would be in favor of dealing with her as a friendly nation.

Mr. DORN of New York. Cannot that be set forth in the bill? Because if the bill remains as it is now we are going to not have that. I think it should be in the bill.

Mr. COOLEY. If the gentleman will let me proceed for just a minute, in the law now there is a restriction and a limitation to the effect that we cannot trade with Iron Curtain countries. We have been urged to remove that restriction from the law. The Secretary of State wants to remove it, the Secretary of Agriculture wants to remove it, and perhaps the entire executive branch wants it removed. The Senate, I understand, has removed the limitation, but the House committee had declined to take action although it was carefully considered. We eliminated it from the bill that was transmitted to us from the Secretary of Agriculture. It did contain the provision. I deleted that provision from the bill during committee consideration. That question is not now before us. If the gentlewoman from New York desired to put in a limitation that we cannot deal with Poland and name Poland, she has the right to do so.

Mr. DORN of New York. Do I understand from what the gentleman says that he would favor such an amendment?

Mr. COOLEY. No. I think I am inclined to favor what I know now to be in the law and leave the interpretation to somebody in the executive branch who is better prepared than I would be on the information available to me.

Mr. DORN of New York. It has been indicated that the belief is that Poland is a friendly nation.

Mr. COOLEY. I think they have actually declared that and I think the gentlewoman from New York can inform the House in very clear and unambiguous language as to where we stand in that regard.

Mr. O'NEILL. Mr. Speaker, I would like to direct my remarks to the Chairman of the Committee on Agriculture. The act originally provided for an authorization of $700 million for sales abroad to foreign countries. The authorization was then increased to $1,500,000,000 and to $3 billion in 1956. This bill further increases the authorization under the title to $4 billion. I want to know when you are going to stop. I am asking the gentleman from North Carolina, Chairman of the Committee on Agriculture. There is no answer to that, but I think there are a lot of people would like to know when it is going to stop.

Mr. COOLEY. The gentleman is asking me?

Mr. O'NEILL. I said that in 1955 the original authorization was for $700 million, which was increased to $1,500,000,000, then to $3 billion and now to $4 billion. I want to know when it is going to stop.

Mr. COOLEY. That situation is detailed in the report and I assume the gentleman is reading from the committee report. We made a full disclosure of the situation. The gentleman must be aware of the fact that the executive branch of the Government presented these figures. The executive branch recommended the increase of $1 billion in one place and $300 million in another place. This bill was reported by the committee unanimously. It was considered in an atmosphere that was free from partisan politics. The gentleman asks the question when are we going to stop? My answer is I do not know.

Mr. O'NEILL. That is a fair answer.

Mr. BOW. Mr. Chairman, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from Ohio.

Mr. BOW. Last week the Congress adopted a conference report on appropriations for the State Department and other agencies which contained an international exchange item, translation of publications and information and education items as well. Can the gentleman explain to us to what extent these funds are used for the purpose of these items that we have already appropriated large sums to be used by the State Department and USIA?

Mr. O'NEILL. There is a breakdown in the report as to how much of it is used. Actually only about 15 percent of this foreign currency is used by the Government for any purposes.

The SPEAKER. The time of the gentleman from Massachusetts has expired.

Mr. ALLEN of Illinois. Mr. Speaker, I yield the gentleman 5 additional minutes.

Mr. O'NEILL. Mr. Speaker, I want to conclude my remarks by making the following statement:

Commodity Credit Corporation sales records—of all sales in excess of $100,000—for a 22-month period from July 1955 to, and including, April 1957, reflect that the total dollar-value of commodities sold under title I, Public Law 480, to be in the amount of $233,258,935. Thirty-seven companies participated in these purchases but three of the companies allegedly bought about 65 percent, or almost two-thirds of the over $233 million sales made by CCC under this title.

Two of the three companies that control the bulk of these purchases are known to be integral parts of international cartels. One of the three companies purchased in a 3-day period in February 1956 over $11 million worth of title I commodities in addition to over $5 million of surplus commodities from the CCC for a 3-day total purchase from CCC of $16,580,775. This situation hardly gives much opportunity to American businessmen.

These international cartels that control the bulk of Public Law 480 sales are nothing more than brokers, since the sale is agreed to between the United States and the purchasing country before, at least theoretically before, the international cartel enters the picture. I say this because it appears that despite the prohibition against bidding before the purchase authorization is announced by the Department of Agriculture, these international groups have already commenced their operations through contacts in the foreign country, long prior to the agreement between nations.

I think the Committee on Agriculture or whatever committee has jurisdiction of this matter certainly should look into it and something should be done.

Mr. COOLEY. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from North Carolina.

Mr. COOLEY. I would just like to say that some of these transactions involve as many as three nations, and unless you know all the facts and circumstances it is difficult to say whether there is anything evil involved or not. The gentleman used the word "cartel." I know that there are transactions now in the bill, so to speak, that have actually been approved by the National Defense Committee of this House that involve far more than the items mentioned there. I think one is a military-housing project that involves about $50 million.

Mr. O'NEILL. I am not saying that these are not legitimate transactions, but my curiosity is certainly aroused when the CCC handles $233 million worth of sales and 65 percent of it is handled by 3 companies, 2 of them not United States corporations, and I think it is time that this Congress look into the matter.

Mr. COOLEY. I assure the gentleman that the devoted members of our committee are very much interested in the subject he has discussed and we will do our dead level best to investigate and to study each of these proposals.

Mr. O'NEILL. I thank the gentleman.

Mr. ROONEY. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from New York.

Mr. ROONEY. In regard to the very pertinent question asked by the distinguished gentleman from Ohio [Mr. Bow] awhile ago concerning the items set forth at page 8 of the committee report in regard to this bill, and in particular the $7.4 million for information and education, which would be on top of the appropriation just passed by this body and the other body for that purpose and $1.75 million for translations and publications, I should like to say in regard to the figure of $17.15 million in the international education exchange program that that amount compares with not more than $1.5 million at the present time and in this very fiscal year. It would seem to me as though we are just

going hog wild with the use of these funds, and I think it should be called to the attention of the House, particularly the comparison between not over $1.5 million in the present year and $17.15 million as provided under this authorization.

Mr. O'NEILL. May I ask the distinguished chairman of the Subcommittee on Appropriations for Foreign Affairs what he thinks of this proposal, in view of the fact that at the present time we are giving to the United Nations and special agencies $27 million; North Atlantic Treaty Organization, $1,150,000; Inter-American Organization, $6,448,000; other international organizations, $428,000; temporary organizations or organizations in which the United States participates, $26,000; special programs financed by voluntary United States contributions, a total of $126,045,000, that we use some of this surplus commodity money that is lying in these different nations, and instead of paying out cash dollars each year to the amount of now $126 million, and next year it is going to be around one-hundred-and-thirty-odd million dollars, that we use these funds ourselves.

Mr. ROONEY. I would say to the distinguished gentleman from Massachusetts that if that could be achieved in proper fashion I would most certainly favor it. However, it should not be done through this method of bringing a bill such as this to the floor. This seems to me like a beautiful mess of porridge, with everybody waiting to get into it with a huge spoon. That is what is happening with regard to these funds. I do not think they should be used to increase a program from $1,500,000 in the current year to $17 million plus as authorized under this bill.

Mr. O'NEILL. I thank the gentleman.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 5 minutes to the gentleman from Wisconsin [Mr. LAIRD].

CALL OF THE HOUSE

Mr. TABER. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. COOPER. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 93]

Alexander	Dennison	Holt
Anfuso	Diggs	Holtzman
Barden	Dixon	James
Bass, N. H.	Dollinger	Jenkins
Beamer	Donohue	Kearney
Blitch	Durham	Keogh
Bonner	Eberharter	Kilday
Bowler	Engle	Knox
Boykin	Evins	Landrum
Brooks, La.	Farbstein	Lankford
Brownson	Fino	Latham
Buckley	Flood	McConnell
Celler	Flynt	McCormack
Chiperfield	Fogarty	McGovern
Christopher	Fountain	Mack, Ill.
Cole	Frazier	Miller, Md.
Coudert	Green, Pa.	Miller, N. Y.
Cretella	Halleck	Montoya
Curtis, Mass.	Hays, Ohio	Morano
Curtis, Mo.	Healey	Morrison
Davis, Ga.	Hers	Moss
Dawson, Ill.	Holifield	Norblad
O'Brien, N. Y.	Roosevelt	Utt
O'Konski	Scott, N. C.	Wharton
Patterson	Scott, Pa.	Williams, N. Y.
Philbin	Seely-Brown	Wilson, Ind.
Powell	Sheehan	Wolverton
Prouty	Shelley	Wright
Rains	Teague, Tex.	
Rivers	Teller	

The SPEAKER. On this rollcall 325 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954

The SPEAKER. The gentleman from Wisconsin [Mr. LAIRD] is recognized.

Mr. LAIRD. Mr. Speaker, I strongly support enactment of H. R. 6974, a bill which would extend title I of Public Law 480 for 1 year and increase the authorization by $1 billion. It would also extend the title II famine relief authority for 1 year and increase the authorization by $300 million.

On May 23, 1957, I addressed the House on the need for this legislation and outlined in detail the operations of this law since its enactment by the Republican 83d Congress.

Mr. Speaker, I have just seen the Department of Agriculture's estimate of agricultural exports for the first 10 months of the current fiscal year. Already they total in excess of $4 billion. We are well on our way to setting a new alltime high in farm product exports. The total for the current year will probably exceed $4.5 billion. The foreign currency sales program under title I has made a major contribution to this export gain.

During 1956 and 1957, it is resulting in the movement of about 160 million bushels of wheat, 16 million bags of rice, over 600 million pounds of soybean and cottonseed oil, 1.5 million bales of cotton, as well as quantities of other products such as cheese, powdered milk, butter, feed grains, tobacco, lard, tallow, fruit, meat products, and vegetable products.

The whole milk reconstitution program that is being carried on in Japan at the present time is a direct result of this 480 legislation which was passed originally in the 83d Congress.

For the first time in years, expanded exports including those made under title I are helping reduce price depressing surpluses of Government inventories in the hands of the Commodity Credit Corporation. The foreign currency exports are helping swell rice and vegetable oil shipments to new alltime highs. The wheat shipments are helping make possible a record or a near record wheat export year. Cotton shipments are expected to be the highest in three decades.

As of March 1, the Commodity Credit Corporation investment in price support stocks is down about $500 million as compared with the same date a year earlier. By June 30, the investment should be about $800 million less than it was 12 months earlier.

Title I has been particularly helpful in that it makes possible the movement of surplus commodities to those countries of the world which limit their commercial purchases because of a lack of sufficient foreign exchange. The program also helps to maintain our markets in other countries of the world which suffer temporary foreign exchange problems. In general, title I has immediate benefits by helping move the surpluses into constructive use abroad. It also helps build longer time demands for our farm products.

TOTAL UNITED STATES AGRICULTURAL EXPORTS AND TITLE I OF PUBLIC LAW 480

I am sure all of us heartened by the progress which has been made in expanding agricultural exports. These exports have increased in value from about $2.8 billion in 1952–53 to $3.5 billion in 1955–56. On a volume basis, the increase was even more impressive. Last year's exports were the highest in quantity for the last 30 years.

The gain in exports is proceeding at an accelerated rate during the current season. For the first 8 months of 1956–57, overseas shipments totaled about $3.2 billion in value. This is 50 percent higher than the export total on the same date last year. It appears that for the entire 1956–57 season our agricultural exports could total as much as $4.5 billion. The attainment of such a level would mean new alltime highs in both value and volume, far above previous records.

The improved export outlook results from many factors including a stepped-up program to dispose of price support stocks and more competitive export pricing policies, particularly for cotton, greater needs abroad because of poor crop conditions, some forward buying abroad because of the uncertainty resulting from the situation in Suez and behind the Iron Curtain, and the effects of special surplus disposal programs especially those undertaken under title I of Public Law 480.

Very briefly, it appears that the title I program has had the following major commodity effects:

First. The program is largely responsible for the commitment of the rice surplus accumulated from the 1953, 1954, and 1955 crops and a part of the potential surplus from the current crop—this has materially strengthened marketing conditions for rice producers during the current season.

Second. Title I has made a major contribution to a tremendous expansion in wheat and wheat flour exports during the current season which could total as much as 450 million bushels. This would make possible a reduction in surplus wheat stocks of about 50 million bushels, the first reduction in carryover in 5 years.

Third. Exports of nearly 600 million pounds of cottonseed and soybean oil moved under the foreign-currency program during 1955–56, which helped to raise our total exports of vegetable oils to a new record level—this was the major factor in maintaining firm soybean prices to producers last year and it kept soybeans and cottonseed out of CCC hands under the support program.

Fourth. Title I exports of over 100 million pounds of lard made in 1955–56 have been of material help along with

other actions taken by the Department of Agriculture in the present strength in hog prices.

Fifth. Public Law 480 exports of 71 million pounds of tobacco last year represented about three-fifths of the increase in tobacco exports as compared with the previous year and helped push exports to the highest level in 10 years.

Sixth. Title I programs were responsible for the movement of over 20 percent of total cotton exports last year despite the fact that prices were not competitive most of the year and the movement of as much as 1½ million bales of cotton this season which will help swell cotton exports to the highest level in 23 years.

TITLE I, PUBLIC LAW 480, COMMODITY HIGHLIGHTS

DAIRY PRODUCTS

Dairy products sales for foreign currency under title I of Public Law 480, are helping us keep the commodities (butter, cheese, nonfat dried milk) under the price-support program down to a current basis. Out of 800 million pounds of nonfat dried milk, over 15 million pounds are disposed of under title I, Public Law 480. India is expected to import about 10 million pounds of this 800 million pounds. Twenty to twenty-five million pounds out of 150 million pounds of butter will be disposed of under this program. It is expected that about 5 million pounds of cheese will be taken under title I during the next fiscal year. During the program to date the major countries involved in programing the cheese have been Israel, Greece, and Korea. USDA is now able to take care of the surpluses on a seasonal basis so that it can dispose of everything acquired by CCC under the price-support program.

RICE

The story on rice must certainly be most welcome to rice producers. At the beginning of the current year about 22 million bags on a milled rice basis were in CCC inventory or under loan. By June 30, CCC stocks should be cut in half. This huge reduction in surpluses will result from a record export year of about 25 million bags. And about two-thirds of these exports are being made under title I programs with India, Korea, Pakistan, and Indonesia. Thus, in the space of 12 months expanded export disposals largely stimulated by Public Law 480 are resulting in the liquidation of the rice surplus accumulated from the 1953, 1954, and 1955 crops, and a substantial part of the potential surplus from the current crop. Rice producers are benefiting from improved marketing conditions for the current crop and 1957 marketings will not be depressed by the weight of heavy surpluses.

WHEAT

The surplus holdings of wheat have grown larger each year since 1952–53. But in 1956–57 for the first time in 5 years the surplus should be reduced by about 50 million bushels.

The reversal in surplus accumulations is due almost entirely to expanded exports which have risen from 220 million bushels in 1953–54 to 344 million last year. The Department of Agriculture some time ago estimated wheat and flour exports for the current season at a minimum of 415 million bushels. Now it appears that exports should reach 450 million bushels.

A large share of the credit for this gratifying outlook must go to Public Law 480 and particularly to title I. Exports for foreign currency have increased from 24 million bushels in 1954–55 to 93 million bushels last year and are expected to equal or exceed 150 million bushels this year. Much of these shipments are going to countries like India which is finding it possible to expand consumption of wheat as the result of their ability to make purchases in their own currency.

The possibility of a cut in the surplus wheat stockpile is even brighter for 1957–58. With prospects good for continued high-level exports and a substantial reduction in wheat production because of the soil-bank program, the reduction in the wheat carryover at the end of next season should be much larger than the 50 million bushels in sight this year.

COTTONSEED AND SOYBEAN OIL

The programing and shipment of cottonseed and soybean oil under title I in 1955–56 was the key factor in keeping cottonseed and soybeans out of CCC hands. These activities have added millions of dollars to the incomes of soybean and cottonseed producers. Nearly 600 million pounds of these oils were shipped abroad under the foreign currency program last year and this helped push edible oil exports to a record level of almost 1.2 billion pounds, about 55 percent higher than the previous record level. The large exports of oils together with record exports of soybeans kept soybeans and cottonseed above support levels last year. Despite the fact that farmers placed about 30 million bushels of soybeans under price support in 1955–56, only a few thousand bushels were taken over by CCC and these were sold easily.

The record 1956 harvest of 456 million bushels of soybeans, almost 84 million bushels higher than last year's level, made marketing conditions look dark last fall. But again title I has proved of great help. For the entire season, combined exports of cottonseed and soybean oil should approximate last season's record with the continued strong help of Public Law 480.

LARD

Lard exports which totaled about 625 million pounds in 1955–56 have done much to ease the pressure on the livestock industry. Public Law 480 title I shipments accounted for 100 million pounds of this total. This was of material assistance in reaching this export total. It is expected that lard exports under the foreign currency program will be at the same level this year. These exports helped to bolster lard prices during the last few months which in turn contributed to the improvement in prices that hog producers have been experiencing.

TOBACCO

Tobacco exports last year of about 580 million pounds were the highest in 10 years and about 115 million pounds more than in 1954–55. About three-fifths of this increase over the previous year resulted from exports financed under the title I program. The program helped to increase stocks in a number of countries, such as the United Kingdom. It also opened up a new postwar market for tobacco in Korea. The usual marketing requirements under the program have been an important factor in helping increase dollar sales, which accounted for 88 percent of our total tobacco exports in 1955–56.

This year tobacco exports, although expected to be high, may be down to 500 million pounds. The decrease will result from greater competition from other exporting countries, and foreign-buyer resistance to price rises in stronger flavored tobacco and to those varieties of flue-cured tobacco produced last year, which lacks flavor and aroma. The title I program will help to prevent a further decline in exports by moving about 55 million pounds of tobacco abroad this year.

COTTON

The big news in cotton is without doubt that American cotton is fully competitive in world markets. This has been the outstanding factor in prospects for exports of at least 7 million bales this year, more than triple last year's low level. Additional factors were rising consumption abroad and a desire to add to low inventories. This sharp change in export outlook means that for the first time in 6 years instead of adding to the existing surplus, carryover stocks should be reduced by more than 2 million bales.

But title I helped to move cotton last season, and the large programs negotiated last year are helping considerably with the strong export movement this year.

In 1955–56 we exported only 2.2 million bales of cotton. This was primarily because our prices were not competitive in world markets during most of the season. But title I helped to keep exports from going lower. Such foreign currency shipments were responsible for about 22 percent of last year's exports. And it is interesting to note that countries with which there were title I cotton programs last season took 99 percent as much cotton as they did the season before, whereas non-Public Law 480 countries took only 40 percent as much cotton in 1955–56 as the year before.

Japan is an outstanding example. We exported 833,000 bales to that country for dollars and yen in 1955–56 which was almost 30 percent higher than exports in the previous year. The United Kingdom, on the other hand, with which there was no program, reduced their takings from us by 64 percent.

I repeat that this year, the major reason exports are zooming is because of competitive pricing and so far 7 million bales have been sold for export by CCC. But the fact that title I agreements were outstanding on August 1, 1956, for the movement of about 1.2 million bales of cotton gave considerable strength to the market. Traders could buy with confidence that in addition to improved dollar markets mainly in Europe, cotton

purchased could be moved in large volume to title I countries which in most cases are short of foreign exchange. This year it appears that exports under the title I program may be as high as 1½ million bales. And much of this is going to countries like India, Spain, Indonesia, Burma, and Pakistan whose purchases of cotton from us would otherwise be severely limited because of foreign exchange difficulties.

WHY THE TITLE I, PUBLIC LAW 480, EXTENSION SHOULD BE LIMITED TO 1 YEAR AND $1 BILLION

The Department of Agriculture has requested a 1-year extension in the time in which new agreements may be negotiated under title I of Public Law 480, and an increase of $1 billion in title I funds.

There as general agreement that this disposal program has worked effectively. However, some have suggested that the program should be extended for 2 or 3 years and the funds increased by $2 or $3 billion, rather than the limited extension and addition proposed by the Department of Agriculture.

I believe we should support the recommendations of the Department of Agriculture for the following reasons:

First, and additional $1 billion will permit the same or a larger rate of shipments in 1957–58 as during the current year. This year title I shipments will be about $700 million. Of the agreements already signed, a balance will remain for shipment in fiscal year 1958 of about $400 million. The additional $1 billion will result in new programs totaling about $650 million at export value. About two-thirds of this amount should be shipped in fiscal year 1958. So it is evident that actual shipments next year will be at least as large as this year.

Second, the rate of new programing at a $1 billion annual rate compared favorably with the rate of new agreements signed in the past. Some have assumed that the Department of Agriculture's request represents a decrease in the rate of new agreements, since about $1.4 billion in new agreements have been negotiated since last July 1. We should keep in mind that of this total about $500 million represents second- and third-year portions of the 3-year agreements with India and Brazil. Thus, the $1 billion request compares favorably with the programing done during the current year if the fiscal year 1957 and 1958 parts of 3-year agreements are excluded.

Third, a 1-year extension assures that the Congress will take another look at this law during the next session of Congress to decide if it should be extended further or altered. After all, our major aim is to sell our agricultural products for dollars. Public Law 480 was passed as a temporary measure to help move the accumulated surplus into channels which did not have dollars to pay us. We are making progress in whittling down the surplus. I think it is healthful for us to have a periodic review of the progress made in surplus disposal. During this review we can also take a close look at the way in which the disposal tools are being used, and whether any changes should be made.

And fourth, and this is entirely a personal reason, I am happy to support request for an authorization from an agency which says do not give us more money than we request. It is refreshing and most unusual. The people in the Department of Agriculture know this program. If they thought they should use more funds effectively, I am sure they would have asked for more. They have done a good job—let us go along with their recommendation.

HOW TITLE I, PUBLIC LAW 480, FOREIGN CURRENCIES ARE USED

Now, it might be interesting to see just how the foreign currencies are used under Public Law 480.

Commodities are sold under title I of Public Law 480 for foreign currencies. The $3 billion current authorization will result in payments of approximately $2 billion. The $1 billion difference reflects the cost of commodities to the Government under the price support program and the lower world market prices at which commodities are sold for foreign currency.

In round figures, about one-fourth of the $2 billion total will be used to meet United States expenses abroad. This use will return dollars to the Commodity Credit Corporation. Examples of such use are the construction of United States military bases in Spain and Turkey, and the construction of housing for United States military personnel and their dependents in the United Kingdom. About one-tenth will be given to our allies to strengthen their military forces. These funds are being used in the same way as foreign aid defense support funds, and certainly they cut down on the amount of foreign aid dollars that would otherwise have to be appropriated for this purpose.

I believe that we can make our full commitments to our friendly nations throughout the world for economic support and for defense support through the use of these funds rather than the direct appropriation of United States aid dollars.

About 6 percent of the $2 billion will be used for a variety of purposes including the purchase of strategic materials for the United States national stockpile; the purchase of goods for other friendly countries; grants for economic development; the international educational exchange program; and for help to American colleges abroad.

Somewhat less than 2 percent of the total will be used by the Department of Agriculture to develop longer-time commercial markets for agricultural commodities abroad. This program clearly supplements the regular market development work carried on by the Department. These activities are conducted in cooperation with United States trade associations and they give promise of helping boost commercial exports long after the Public Law 480 program has ended.

The largest part of the currency, over half the total, will be loaned to participating countries for economic development. There is no question that these loans help to reduce the amount that the Congress would otherwise have to appropriate for the foreign-aid program. And certainly it makes sense to use our surpluses as capital to help in the development of other friendly countries. As their economies expand, they will be better commercial customers for our farm products.

I would like to point out that many people have referred to title I as a give-away program. This is not true. Many of the countries receiving loans of foreign currency under title I are also receiving loans, primarily for the import of American industrial materials, from either the Export-Import Bank or the World Bank. If Public Law 480 loans are not regarded as a sound investment, then none of the loans made directly or indirectly with United States funds are a sound investment to these countries. Furthermore, it should be pointed out that the loans are to be repaid, and as repayments take place, they may be used to meet the dollar expenses of the United States in the participating countries.

I believe, Mr. Speaker, that these funds must be carefully supervised by the appropriate committee of Congress, but I feel it is much better to use the food stocks of the Commodity Credit Corporation, exchanging them for foreign currencies abroad and using this type of program to help our friendly countries.

Mr. BOW. Mr. Speaker, will the gentleman yield?

Mr. LAIRD. I yield to my friend, the gentleman from Ohio.

Mr. BOW. Will the gentleman say what appropriate committee of the Committee on Appropriations handles the international exchange, translations, publications, information, and education funds?

Mr. LAIRD. The committee that it should come under the jurisdiction of, it seems to me, is the Department of State and Justice Subcommittee of the House Appropriations Committee.

Mr. BOW. I agree with the gentleman it should, but I do not believe it does. What committee is now handling the distribution and control of these funds generated by this program in these areas?

Mr. LAIRD. I think the gentleman plans to offer an appropriate amendment to the bill so that there will be proper controls, and I certainly agree that there should be. I intend to support such an amendment which I believe will improve the present law.

Mr. BOW. Does the gentleman agree with me that at this time there is no committee of the Committee on Appropriations that is policing these funds?

Mr. LAIRD. I think it has been handled very loosely and should be improved, and I believe an appropriate amendment can be inserted to strengthen the control of the use of these funds. I am confident that the administration will follow a policy of using these funds only after receiving budgetary approval of the Appropriations Committee.

Mr. HOSMER. Mr. Speaker, will the gentleman yield?

Mr. LAIRD. I yield to the gentleman from California.

Mr. HOSMER. The portion of the money that goes to foreign assistance, is that a transfer between the foreign aid

funds, or is it in addition to the regular foreign aid appropriation?

Mr. LAIRD. The committee, in handling the bill, can appropriate these funds in the foreign aid program.

Mr. HOSMER. In addition to the regular foreign aid program?

Mr. LAIRD. In addition to the regular foreign aid funds. I believe it can be substantially cut down as for as direct appropriation of United States dollars, and that these counterpart funds should be appropriated for that purpose.

Mr. HOSMER. One other question, with respect to the exchange rate that is used when the foreign people purchase; is that an artificial exchange rate, established by foreign governments for their currency, or is it the actual exchange rate as reflected by a free market?

Mr. LAIRD. It is the actual exchange rate. The gentleman understands that the commodities are sold at the world market price. That is the reason there is the difference in the amount of money that has been collected under the program; $2 billion is available from commodities sold, $3 billion was transferred in commodities from the Commodity Credit Corporation. The $1 billion loss reflects the difference between the United States support prices and the world market prices for the commodities.

Mr. VURSELL. Mr. Speaker, will the gentleman yield?

Mr. LAIRD. I yield to the gentleman from Illinois.

Mr. VURSELL. Mr. Speaker, I would like to point out that counterpart funds are being used to pay our own expenses in Turkey, for instance, in the amount of $51,500,000; in Japan over $65 million, which money we would otherwise have to spend in dollars. Instead of dollars, counterpart funds are being used.

Mr. ALLEN of Illinois. Mr. Chairman, I yield 4 minutes to the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN. Mr. Speaker, will whoever is in charge of this bill on the Democratic side tell me, is this an Eisenhower program?

Mr. O'NEILL. I do not know; apparently it is an Eisenhower program.

Mr. HOFFMAN. Does the leadership on the Republican side agree that this is an Eisenhower measure?

Mr. MARTIN. It is a measure that has been submitted by the Department of Agriculture; yes.

Mr. HOFFMAN. That will be helpful. I hope the Congressional Quarterly will take notice, if someone is not here and does not vote; that it will not do as it has been doing in the past, charge it up against that Member as a vote against the administration. That has been a fraudulent practice on the part of the Congressional Quarterly.

It has not been my effort to have anything to do with what it publishes or does not publish. The point that I have been urging against that publication is that it is sailing under a false flag. It is just like a pirate ship; it does not tell the truth about how a man votes. That is all I want it to do.

Now back to this program. As I understand, this bill adds $1,200,000,000 of authorization; is that right? May I ask that question of some gentleman on the Democratic side?

Mr. COOLEY. One billion three hundred million dollars.

Mr. HOFFMAN. That goes, part of it, for the purchase of cotton, does it not, if I may ask the gentleman again?

Mr. COOLEY. Certainly not.

Mr. HOFFMAN. Is not cotton in surplus?

Mr. COOLEY. Yes; but it is not restricted to cotton.

Mr. HOFFMAN. I know, but cotton is in it, is it not?

Mr. COOLEY. Absolutely; yes.

Mr. HOFFMAN. I notice that in 1955 and 1956 one former Member of Congress from the South, a Democratic Member, got $230,734.68 under that cotton program. That same provision is in the law today, for the cotton grower and the wheat grower, is it not?

Mr. COOLEY. The gentleman says that some Member of Congress got that much?

Mr. HOFFMAN. A former Member of Congress. But I say that that provision, enabling a cotton grower to get a subsidy of that amount in 1 year, is still in the law; all he has to do is to grow enough cotton.

Mr. COOLEY. Yes; but Mr. Benson has not advocated the repeal of the law to which the gentleman refers.

Mr. HOFFMAN. He has not?

Mr. COOLEY. No.

Mr. HOFFMAN. Would the gentleman support it if he did?

Mr. COOLEY. I am not sure that I would.

Mr. HOFFMAN. No; I guess not. Of course the gentleman would not.

Here is the thing that bothers me a little bit. The President said in his state of the Union message that if we did not watch our step we were going to ruin ourselves by spending too much money.

Then he said the other day, if I got it right, that if we did not go along with this defense appropriation, if we cut that any substantial amount, we were in danger of losing our freedom, that our national security was in danger.

Of course, we all know that somewhere there is a ceiling on the number of tax dollars we can collect. I want to go along with the President. I want to support the Eisenhower program if I can. But what puzzles me is, if there is a ceiling on the number of dollars and if we cannot take any away from defense, is it wise for the administration to come up here with another $1,300,000,000 to take care of the farmers' surplus? That is a question I have been thinking about. I do not know whether anyone else has or not.

Can I follow a President, keeping in mind his state of the Union message, who says we must watch our step about appropriations but that we cannot cut defense? Of course, I think we can. We can squeeze enough water out of, cut enough fat off, our defense appropriations.

About this bill, is someone else going to tell us where we are going to get that extra $1,300,000,000 and take in payment foreign currencies? I can understand how that is helpful to Congressmen who go abroad and get these counterpart funds.

Mr. JUDD. Mr. Speaker, will the gentleman yield?

Mr. HOFFMAN. I yield to the gentleman from Minnesota.

Mr. JUDD. This bill does not authorize the appropriation of an additional $1,300,000,000, it authorizes the sale for foreign currencies of a billion dollars' worth of surplus ccmmodities that have already been bought and paid for——

Mr. HOFFMAN. By us.

Mr. JUDD. And the grant for relief purposes of $300 million worth which has already been bought and paid for by the taxpayers. It does not authorize or appropriate additional money.

Mr. HOFFMAN. Of course, we could use that money to replace some of these other expenditures.

Mr. JUDD. Yes; if we abandon the program of agricultural price supports. But the money has already been appropriated and spent by the Commodity Credit Corporation when it bought the surplus commodities. When we can use these commodities in our foreign-aid program, the dollars appropriated for foreign aid are used to repay the Commodity Credit Corporation. It requires just that much less to restore the capital or purchasing capacity of the CCC.

Mr. HOFFMAN. Does the gentleman mean that we take the foreign currency, counterpart funds, instead of getting it in dollars?

Mr. JUDD. If the countries are unable to pay in dollars, yes, we get foreign currencies instead of dollars.

Mr. HOFFMAN. When the gentleman and I go across we get it.

Mr. JUDD. Otherwise we get nothing.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 4 minutes to the gentleman from New York [Mr. DORN].

Mr. DORN of New York. Mr. Speaker, I am opposed to this rule. I am opposed to it particularly because under it we will be giving aid to Communist Poland.

How will we be giving aid to Communist Poland? Contained in title 1, Public Law 480, which the bill H. R. 6794 continues, is section 107, which states in part:

> That as used in this act "friendly nation" means any country other than (1) the U. S. S. R. or (2) any nation or area dominated or controlled by the foreign government or foreign organization controlling the world Communist movement.

On December 28, 1956, Assistant Secretary Robert C. Hill, of the State Department, wrote to Senator Walter F. George and stated in part as follows:

> The Secretary has also determined, on the basis of a careful examination of the Polish situation since October 1956, that Poland is not now dominated or controlled by the U. S. S. R., and accordingly qualifies as a friendly nation within the meaning of section 107 of the Agricultural Trade Development and Assistance Act of 1954, as amended.
>
> He intends to inform the Secretary of Agriculture that Poland is eligible for title I and title III, Public Law 480, transactions.

So that this bill, if passed, will provide agricultural surpluses to Poland.

Senator KNOWLAND, in the other body, stated:

The figures indicate that during the past few years the Soviet Union has drawn out of Poland agricultural resources of the value of approximately 16 billion rubles. At the current rate of exchange—and I realize, of course, that the ruble is overvalued by any legitimate standard—that means about $4 billion.

In other words, the Soviet Union, as is customary, is stripping its satellite states of their resources. What we are proposing to do is to bolster the Soviet economy and enable it not only to undermine our friends abroad but also neutral nations because we would replenish the stocks of countries behind the Iron Curtain which the Soviet Union is stripping of their resources.

In order to help feed the population within the Soviet Union, it has been necessary for the Kremlin to withdraw foodstuffs from the captive nations for consumption within the Soviet Union. It is impossible to earmark or identify a ton of wheat or a ton of corn or anything else. The commodities are withdrawn from Poland, from Hungary, and from Czechoslavakia and put into the granaries of the Soviet Union. Then, Mr. Khrushchev says:

Our latest 5-year plan on agriculture has been a great success.

Under this program, we would replenish those stocks in the satellite countries. If we did so, there is no assurance that the Soviets would not withdraw what we send in there. There is no assurance that the Soviets would not draw such American stocks for use in the Soviet Union.

The SPEAKER. The time of the gentleman from New York has expired.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois [Mr. SPRINGER].

Mr. SPRINGER. Mr. Speaker, I just want to get one thing straight, which I think the Members of the House should be acquainted with. When this bill was originally introduced, it is true it was in a Republican Congress, in the 83d Congress. But, I may say this was very much a bipartisan arrangement. Let me list the Members of the House who introduced the bills, all of which were identical and which were requested by all three of the farm organizations.

Mr. POAGE, of Texas, introduced one of the bills.

Mr. BURLESON, of Texas, introduced one of the bills.

Mr. JUDD, of Minnesota, introduced one of the bills.

I introduced one.

Mr. HARRISON of Nebraska introduced the fifth one.

These are all identical bills having the same purpose in mind. There was never at any time any intention for this to become a partisan matter. This bill was concurred in unanimously by every Member of the Committee on Agriculture, both Democratic and Republican. May I say, too, this bill was requested when it was introduced and passed, by the American Farm Bureau Federation, the National Grange, and the National Farmers Union. In other words, it was concurred in by all of the farm organizations as being necessary, if we were to dispose of these surpluses overseas. I did want to point that out to the House because I do not think the debate on this bill ought to take out on a partisan or political nature on either side of the aisle.

Mr. VURSELL. Mr. Speaker, will the gentleman yield?

Mr. SPRINGER. I yield.

Mr. VURSELL. The purpose of this bill was to remove farm surpluses. Members on both sides of the House, at least many of them, said it would be better for agriculture if they were all dumped into the sea. This program has served a useful and important purpose. I want to point out one purpose here, which I think is important. In barter alone, under Public Law 480, we have benefited by selling $229,180,000 worth of farm products for which we have received strategic materials and stockpile materials. That is just exactly the same as cash, because it is on a dollar-cash basis. That is only one of the many benefits of getting rid of surpluses and getting something back for it.

This bill has done more to encourage exports and to help hold up farm prices, and is of more interest to the farmers of this Nation than probably anything else in the agricultural life at the present time.

Mr. SPRINGER. The gentleman is right. I endorse this bill because I think it has all the characteristics which have been described, as far as benefit to the agricultural population of this country generally is concerned.

Mr. FULTON. Mr. Speaker, will the gentleman yield?

Mr. SPRINGER. I yield.

Mr. FULTON. As a member of the Committee on Foreign Affairs, I heartily recommend the passage of this bill, and join with the gentleman in his statement. Ninety-five percent of the population of Poland is Catholic, and has now been able to stand independently and save the $600 million that Russia has been taking away from them. So we need an independent Poland.

The SPEAKER. The time of the gentleman from Illinois [Mr. SPRINGER] has expired.

Mr. ALLEN of Illinois. Mr. Speaker, I yield the remainder of the time to the gentleman from Massachusetts [Mr. O'NEILL].

Mr. O'NEILL. Mr. Speaker, I simply want to clarify myself. A portion of this act Public Law 480 is very loosely drawn, I believe. There are certain nations of the world who would buy commodities in the world market, and are now getting it under the Surplus Commodity Act. They are hurting our program. I do not believe we should allow these foreign funds to stack up in foreign countries the way they are stacking up over there, and only use them as counterpart funds. I do not believe there should be a monopoly, and that we should allow two or three international cartels to handle the operation and the delivery of these goods. But I believe there is a lot of merit to the bill. For example, the Fulbright scholarships come under this bill. There are distressed areas in the Nation; the miners of West Virginia and Pennsylvania have benefited by the results of this bill in the past, and other sections of the country who have been economically hurt. For that reason I advocate the passage of this rule, and I hope that after the rule is adopted there will be amendments offered that will tighten up this act.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. COOLEY. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 6974) to extend the Agricultural Trade Development and Assistance Act of 1954, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 6974, with Mr. HAYS of Arkansas in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from North Carolina [Mr. COOLEY] will be recognized for 1 hour, and the gentleman from Minnesota [Mr. AUGUST H. ANDRESEN] will be recognized for 1 hour.

The CHAIR recognizes the gentleman from North Carolina [Mr. COOLEY].

Mr. COOLEY. Mr. Chairman, I yield myself 15 minutes.

Mr. Chairman, I think at the outset I should make it perfectly clear that this is not an authorization bill; it is not an appropriation bill, but it is a bill that authorizes the sale of property that is now already owned by the United States Government, and the bill in effect is a limitation upon the sale of the property referred to in the measure. We know the property that I mentioned consists of agricultural surplus commodities.

I want to congratulate, Mr. Chairman, the gentleman from Massachusetts [Mr. O'NEILL] for the splendid manner in which he has presented the rule to the House. I think he demonstrated that he had a thorough knowledge of all the pertinent facts and circumstances involved, and that he was impressed with the importance of the subject with which we are dealing.

It is true that the bill authorizes the sale of an additional $1 billion under title I, which is the title authorizing sales for foreign currency. There is also an additional $300 million under the donation provisions of the law, title II.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield for a question?

Mr. COOLEY. I yield for a question; yes.

Mr. WHITTEN. In times past I have been very much disturbed by the operations of this bill because, unfortunately, it was used in substitution for sales through normal channels. I ask the gentleman as chairman of the Committee on Agriculture if it is not correct

that he and his committee feel that the provisions of this bill should be used in addition to regular sales through normal channels and certainly not be used in substitution of sales through regular channels?

Mr. COOLEY. I am sure my friend knows that that is exactly what is contemplated by the law; it is what the law itself provides, that donations cannot be made, and sales transactions cannot be made in a manner which will disrupt the normal channels of commerce.

Mr. WHITTEN. I appreciate the gentleman's statement. I wanted that in the RECORD. I wanted to point out that my opposition arose 2 years ago at a time when the Secretary refused to offer United States commodities in world trade through normal channels. I call attention to the discussions we had in the consideration of this bill. I certainly do not wish to return to that and I think it perhaps good to let the RECORD be clear here as to the stand of the gentleman and his committee.

Mr. COOLEY. I have just talked with one of the officials of the Department of Agriculture today, and he assured me that it was the purpose of the Department of Agriculture to protect the normal channels of trade and to sell for dollars wherever it was possible to sell for dollars these agricultural commodities which are now in surplus supply.

The purpose of this program has been to expand foreign trade in agricultural commodities. The bill was presented to the committee and reported by the committee I think unanimously. There was one controversial section in the bill which came up from the executive branch and that was the section which removed the restriction now in the law prohibiting barter with Iron Curtain countries. That subject was very controversial in our committee and the committee decided to not insert that section. I had already deleted it before introducing the bill sent up by Secretary Benson. I thought when we did that we would eliminate all possible controversy and avoid a fight on this measure.

Mr. DORN of New York. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from New York.

Mr. DORN of New York. I appreciate the gentleman yielding. Does not this bill as it stands enable the Executive to give aid to Poland, to sell agricultural surpluses to Poland?

Mr. COOLEY. I wanted to ask the gentleman a moment ago if he was not reading from a communication signed by an official of the State Department. That is what I wanted to ask.

Mr. DORN of New York. That is right.

Mr. COOLEY. In that communication it was clearly indicated that the State Department had decided that Poland was no longer an unfriendly nation but, on the contrary, was a friendly nation, which means that because of the interpretation placed upon the Polish situation by the officials of the State Department, they are now negotiating with Poland for a considerable volume of these surplus commodities.

Mr. DORN of New York. That is the reason I cannot support this bill.

Mr. COOLEY. The gentleman did not support the rule. Now he is called upon to support the bill or not support the bill, but even if we stop where we are, even if this bill is recommitted or defeated, you are not going to stop the negotiations which you are now complaining about unless you can get the officials of the State Department to reverse their decision. I do not want to delegate to myself the authority to define friendly and unfriendly nations. I do not believe any Member of Congress is as well prepared or is as well fortified to make those important decisions as are the officials of the State Department who have at their disposal all of the classified information and all of the data that bear upon the subject.

Mr. DORN of New York. The gentleman means that Congress has not got sufficient intelligence or has not sufficient information to make the decision?

Mr. COOLEY. I think we have the intelligence but perhaps we do not have all of the information and I do not delegate to myself the right to make the decision.

Mr. DORN of New York. Does not the gentleman think that Congress should have the information, and it is available, too. It shows that the head of Poland at the present time is an atheist Communist, that Poland is completely under the domination of Russia. We as an intelligent body should prevent the Executive from doing what you think is proper from the knowledge that we have.

Mr. COOLEY. Suppose in the coming autumn when the Congress is not in session they establish a very democratic government in Poland that needed assistance. We would have to call a special session of Congress to pass upon the question as to whether or not we would come to the aid of that country.

Mr. DORN of New York. It is not a matter that is coming up in September. It is that fact that at the present time, without any question, Poland is a Communist nation and we are aiding Poland.

Mr. COOLEY. Why does the gentleman not take that up with his own President?

Mr. DORN of New York. I am taking it up with the Members of this Congress right now who have the power to vote and should vote.

Mr. COOLEY. The gentleman wants this House today to say that Poland is an unfriendly nation.

Mr. DORN of New York. I want this House to say today that we should not give any aid or comfort to Poland, a nation dominated by the U. S. S. R. That is what I want this House to say today.

Mr. COOLEY. Will the gentleman let me answer? I will not yield further, Mr. Chairman. The gentleman saw I was trying to make an observation, and he took the words out of my mouth. He is trying to make a speech on my time. I am going to make my speech in my own way, and I am going to say this. I am saying we have no right to put the proposition up to this House as to whether or not you want this Congress to repudiate here on the floor of the House today the decision that you read here a moment ago which was rendered by the officials of the Department of this Government who are charged with our foreign policy, and I, for one, on that issue, am not willing to even repudiate Mr. Dulles or Mr. Eisenhower in that regard until I have more information than I now have.

Mr. DORN of New York. The gentleman just a few minutes ago said something like this.

Mr. COOLEY. I am not yielding further, Mr. Chairman.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Pennsylvania.

Mr. FULTON. I believe you are correct in your statement that the question concerning the government of a foreign country is a matter of foreign policy which under the Constitution is decided by the President and the Secretary of State. Likewise the decision is in conformity with the provision under this statute which has been passed by the Congress which authorizes this decision to be made. It has been legally made by the President that Poland is a friendly country by the highest foreign policy authority of the United States, the President.

Secondly, on this comment by the gentleman from New York that Poland is now a completely dominated Communist nation, dominated by Soviet Russia, I believe from my knowledge of the facts as a Member of the House Foreign Affairs Committee, that is not correct.

As a matter of fact, since the events that took place last October in Poland, Poland has been able economically to stand up and take a bargaining position with Russia and say that she will not sell Russia any more coal at 90 percent below world market prices, and that Russia must now give Poland equivalent value of products based on the world market prices. So, this means that Poland will save approximately $600 million in the next few years by her ability to stand up. So, by this bill we are really sustaining Poland's independent position in her dealings with other Communist nations.

May I further say that the agencies of the Catholic Church recommended their members in Poland to support the election by Gomulko and Cardinal Wyszynski has been released by the present government. Ninety-five percent of the fine Polish people are Catholics to this day, and freedom of religion has been restored in Poland. While I am an American, I admire the good Polish people for standing up for their faith and, God bless them, we in America ought to help them when they are without food and clothing in these difficult times. We have no better friends through the years than the Polish people.

Mr. COOLEY. Does not the gentleman agree with me that if we put a prohibition in here now in this bill which would stop the negotiations with the Polish representatives, that we, in effect, would be repudiating the foreign policy of this administration?

Mr. FULTON. That is exactly right. And, may I say further that a prohibition in this bill will not stop the negotiations, because already in past statutes now on the records there have been grants authorized which can, under present legislation, be given. Likewise, under our United States Government financial institutions like the Export-Import Bank, there can be loans made which will accomplish the same purpose. I firmly believe the gentleman is right.

The Polish issue should not be fought in this bill, which simply provides a continuation of the means of keeping the Polish people from starving to death, giving them fats, oils, grains, and cotton to use for clothing. I do not believe the American people will or have come to the time when we should use as a method of foreign policy the art of starving people. I believe that whether you are a child or an adult and you need help against starvation and disease, whether you are before or behind the Iron Curtain, we have a duty to perform as citizens of a nation of high principles.

Mr. COOLEY. Does not the gentleman agree if we should defeat this law that we might be cutting off relief where it is most needed and will do the most good? Our aid to our own needy people in the United States is under our permanent law now by action of Congress last year, rather than the extension of Public Law 480 now under debate.

Mr. FULTON. But if this bill is defeated, it will mean additional money will be necessary for the United States foreign aid program. If we do not well dispose of our surplus United States agricultural commodities, it will hurt our United States farmers. It will likewise continue the storage costs of commodities that are being held by the Commodity Credit Corporation. So, of course, we should make proper disposals of surplus commodities both for our own people at home and likewise for the friendly people who are so near starvation in Poland. We should not destroy the faith the average people of Poland have in us, nor lose their basic historic friendship to the United States.

Mr. BENTLEY. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Michigan.

Mr. BENTLEY. It is not my intention at this time to discuss this question of aid to Poland. I expect to do that a little later. But, I would like to clarify one thing, if I may. Am I correct that when last December the State Department found that Poland was not a country dominated by international communism, it therefore fell into the category of a friendly nation which qualified it for assistance under Public Law 480 and permitted the undertaking of negotiations in February?

Mr. COOLEY. I am sure the gentleman is correct in his statement. As to whether or not I would have made the same finding, I am not in a position to say. But likewise I am not in a position to criticize that decision because I am lacking woefully in the accurate information concerning it. I think this House should hesitate before we fly right in the face of our own foreign policy by saying to Mr. Eisenhower, to Mr. Dulles and to the rest of them that they may not go further with their negotiations.

Mr. BENTLEY. Inasmuch as I happen to have had the good fortune to visit Poland briefly only about 6 weeks ago, I hope to contribute a little bit to the understanding of this situation later on.

Mr. BELCHER. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman.

Mr. BELCHER. If we on the floor of this House were to attempt to make a determination of who are the friendly or unfriendly nations of the world, would we not have to go into the background of every nation, and not just pick out Poland?

Mr. COOLEY. We would.

Mr. BELCHER. We might disagree with the State Department as to their decision concerning a great many nations. So if we are to pick out one nation, we would have to take all of them.

Mr. COOLEY. Certainly, and that would be the case whether it was Yugoslavia or Vietnam, and there would be no end to it.

Mr. BELCHER. Not only that, but conditions are changing constantly in these various nations.

Mr. COOLEY. And they may change soon after we adjourn, when we would be in recess and we would find ourselves greatly embarrassed because we had restricted the executive branch.

Mrs. SULLIVAN. Mr. Chairman, will the gentleman yield for a question?

Mr. COOLEY. I yield to the lady.

Mrs. SULLIVAN. The gentleman said that this bill takes care of our own needy people. Would the gentleman explain how the bill takes care of our own needy people in this country?

Mr. COOLEY. Under amendments embodied in Public Law 480, these surplus commodities are made available to charitable organizations and needy people in this country.

Mr. POAGE. Mr. Chairman, would the gentleman yield to me to answer the question the gentlewoman asked?

Mr. COOLEY. I yield to the gentleman.

Mr. POAGE. The lady will remember that about a year ago the Committee on Agriculture brought into this House, at the request of the gentleman from West Virginia and under the authorship of the gentleman from Virginia [Mr. JENNINGS], a bill specifically to allow the grinding of wheat and of corn and the providing of packaged food under the terms of this bill. That is a domestic relief program and it is an amendment to Public Law 480.

Mrs. SULLIVAN. Is that under title I or title II or title III?

Mr. COOLEY. It is in the general provisions under title III.

Mrs. SULLIVAN. I just wanted to know if it affected anything under title III—that is, this bill we are working on right now.

Mr. COOLEY. No; it does not.

Mrs. SULLIVAN. It was my understanding from the reading of the bill that it would just affect the distribution of food to foreign countries. I did not know that it affected anyone in our own country.

Mr. COOLEY. The lady is right. This is a bill "to extend the Agricultural Trade Development and Assistance Act of 1954, and for other purposes," but the provisions of law to which she refers are permanent amendments to the Agricultural Act of 1949 made by title III of Public Law 480 and are not affected by this bill. They have no termination date. The purpose of this bill is to extend the authority of the act and to raise the limitations upon the sale and barter and the foreign donation of these commodities.

Mrs. SULLIVAN. So it does affect only titles I and II?

Mr. COOLEY. Yes.

Mrs. SULLIVAN. I thank the gentleman.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman.

Mr. FULTON. May I say to the gentlewoman that the currently proposed negotiations now pending with Poland do not refer to title III. Title III of the bill refers to barter. The proposals are with respect to sale to the Polish people for their own Polish currency.

Mrs. SULLIVAN. I was not interested in the point as to whether Poland should or should not get it. When the gentleman mentioned it was to help take care of our own needy people here in the United States, it was not my understanding that was involved in the bill.

Mr. FULTON. If the gentlelady will yield, I want to answer that the original distribution of surplus United States food to needy persons in the United States was originally authorized under the Agricultural Act of 1949, but the present method of distribution was changed in Public Law 480. It is now in the permanent law so this extension of Public Law 480 would not directly affect United States surplus distribution.

Mr. BOW. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Ohio.

Mr. BOW. Can the gentleman tell us whether there is any representation allowed for our entertainment allowance in this bill? Are the funds used for that purpose abroad?

Mr. COOLEY. Not in this particular bill, as I understand it. I am quite certain that under the provisions of the Agricultural Trade Development and Assistance Act of 1954 some counterpart funds could be used for that purpose, if they were meeting American obligations abroad.

Mr. BOW. Does the gentleman have the amount of representation allowances and the amount used for entertainment purposes?

Mr. COOLEY. No, I do not.

Mr. FULTON. If the gentleman will yield again, when these funds are obtained as counterpart funds there nevertheless now under the currently involved statutes must in major categories be a specific appropriation. We are not really debating the particular items that these

funds will be appropriated and used for here; that will come generally under the appropriation bill procedures.

Mr. COOLEY. No. The gentleman has in mind the possibility of using some of these counterpart funds for entertainment purposes. As such, I have no information regarding that particular subject, but I am quite certain that these funds could be used to pay American obligations in foreign countries, and might, therefore, be used as the gentleman suggests if the incurring of such an obligation were otherwise authorized.

Mr. FULTON. Only by a specific appropriation in major matters such as military, and so forth, or payment of United States obligations, but there are exceptions in certain categories, and where the President waives the requirement by deciding it is necessary.

Mr. BOW. I believe the gentleman from Pennsylvania is in error. This bill when originally passed specifically waived section 1415, or the Rabaut amendment to the Appropriation Act, which does take all of these funds away from specific appropriations, so they are no longer appropriated, as the gentleman said.

Mr. COOLEY. May I say it is my understanding that perhaps in some instances you do have to have specific authorizations, but certainly you would not in all circumstances. I know that these funds could be used, for instance, for the purpose of paying traveling expenses for Congressmen away from here on official business. I have personally never used a dime of any counterpart funds, but I do not see anything wrong in using counterpart funds to pay the expenses of a Congressman if he is traveling on official business for his Government.

I regret that that is a very poor answer I have given the gentleman and I will try to obtain the information to ascertain if any part of the counterpart funds have been used for official entertainment.

Mr. BOW. I thank the gentleman.

Mr. JENSEN. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Iowa.

Mr. JENSEN. On the first page of the committee report appears this paragraph:

> Title II originally authorized the expenditure of not more than $300 million for foreign donation programs. This was later increased to $500 million and this bill would again increase this amount to a total of $800 million.

Does any of this money come back to this fund in any way, shape or form? Further, why does the committee feel it necessary to increase this fund from $500 million to $800 million?

Mr. COOLEY. In the first place, the larger part of the first $500 million has been spent. My recollection is that about $300 million has been spent. We are now increasing the amount to the original $500 million.

Mr. JENSEN. No, you are increasing it to $800 million, from $500 million to $800 million.

Mr. COOLEY. That is right.

Mr. JENSEN. That is what the report says.

Mr. COOLEY. That is right, but it merely restores the amount available to the President to about $500 million.

Mr. JENSEN. Does this mean that the American taxpayers are going to have to foot this bill for $300 million more annually or for the next year?

Mr. COOLEY. Out of agricultural surplus commodities that we have on hand, yes.

Mr. POAGE. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield.

Mr. POAGE. We have already bought these agricultural commodities. They are the property of the United States Government today. We have no market for them in the normal channels of trade. The question before us now is—are we going to continue to hold them at a rather substantial cost to the Government every month and every year with no prospect of a favorable market developing at any time in the foreseeable future or are we going to sell them in those places where we can do so without interfering with the normal channels of trade, as is required under the act, and get for them foreign currencies where we cannot get American dollars? That is really all that is involved. It is not a matter of appropriating an additional $300 million. It is simply an authorization to use these commodities for which we have already paid $300 million to the extent of $300 million worth of commodities. We do not put up an additional $300 million until such time as the gentleman and his committee and the Committee on Appropriations must make an appropriation to restore the capital stock of the Commodity Credit Corporation, and I think you will have less to restore if we move these commodities out now than you will if we keep them in storage next year.

Mr. JENSEN. All right, I appreciate the gentleman's answer to my inquiry. So, in fact, the facts are that this is not an expenditure of funds, but simply an authorization of $300 million worth of more commodities that we already have to be distributed in the manner in which it is proper to distribute them normally in the distribution program.

I thank the gentleman.

Mr. OSTERTAG. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield.

Mr. OSTERTAG. I just want to make clear one point as to title II about which the gentleman from Iowa has been talking that that is strictly a donation or giveaway program, and that there is no return to the Treasury as a result of it.

Mr. COOLEY. That is right.

Mr. HARRISON of Virginia. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield.

Mr. HARRISON of Virginia. I would like to inquire about the commodities that are included. I have read the report of the committee in connection with this bill. It is certainly very clearly the intent of the Congress to cover any agricultural product in surplus supply including poultry or anything else, and whether it is a basic crop or not. So that that intent will be clear to the administrators of the law and to make certain that the poultry sales program which commenced in Germany last year under this act will continue through the fiscal year 1958, I would like to ask the gentleman whether this measure does provide for the continuance of that program in Germany, and the sale of poultry products under this law to any friendly country where a market can be found.

Mr. COOLEY. I say to my friend, the gentleman from Virginia, my interpretation of the law is that the program should be continued. I believe I reflect the views of the committee when I say that the program should be continued, and I believe the Department of Agriculture will continue it. I have been assured by officials of the Department of Agriculture that they will carry on this program and it seems to me that they have an opportunity here to carry on a transaction under Public Law 480 which will pay substantial dividends not only by making available a foreign currency for which we will get full dollar value but in establishing a consumer demand and a market for American products that will result in profitable dollar trade in the future.

Mr. HARRISON of Virginia. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. HARRISON of Virginia. Mr. Chairman, I want to go on record in supporting the views of the committee as expressed in its report that greater emphasis be placed on the development of new commercial markets for surplus agricultural products for which market opportunities appear to exist.

Public Law 480 should certainly be extended. It provides a unique opportunity to develop new markets for United States agricultural products which are in surplus supply and thereby strengthen our domestic economy. If we are to take full advantage of this opportunity it is important that poultry, as well as other surplus agricultural products, be programed for sale under this extended authority. Poultry is the third largest producer of cash farm income. It is now in surplus supply and poultry farmers are in a distressed condition. A great market potential has been demonstrated to exist for poultry in Germany, Italy, and a number of other countries. Yet to date the poultry programed has amounted to only three hundredths of 1 percent of the total value of all commodities programed under the act. This is not commensurate with the importance and value of poultry to our farm and national economy. It is one of our most important farm crops. It also serves as the principal outlet for all of our commercial feedstuffs. Every pound of poultry meat exported is the equivalent of exporting 4 pounds of grain. The per capita consumption of poultry abroad is very low, amounting to only a few pounds per

person as compared to our own consumption of about 30 pounds per person. If per capita consumption abroad can be increased only slightly, say one pound per person, the market which would be opened up would be very substantial. There is every reason to believe that this can be done. We have succeeded in doubling the per capita consumption of poultry in the United States in recent years, during which time there has been an abundance of other foods also available to the general public. The German and Italian trade who have had limited opportunity to acquaint themselves with United States poultry have evidenced a willingness to invest their money to purchase, handle, and merchandise United States poultry, in the belief that a substantial market exists which can be developed. We should capitalize on this opportunity.

I want to commend the chairman of the Committee on Agriculture for his clear statement that poultry products as well as other surplus agricultural products will be given full opportunity to find and develop new markets under the authority of this act and that the poultry program for Germany will be continued. The program to date has shown that a substantial market exists which can be developed. But it can only be developed through a program which guarantees the shipment of high-quality product together with effective promotion to acquaint the German consumer with the values of high-quality ready-to-cook United States poultry.

The poultry industry of the United States in cooperation with the Department of Agriculture is presently carrying out a poultry market development program in Germany. During this market developmental stage it is essential that shipments be continued under Public Law 480 so that the German consumer can be made fully acquainted with the advantages of the new type, high-quality, ready-to-cook United States poultry. The continuation of the program is also essential to assure the German trade which must invest and carry stocks of poultry that low-priced undergrades will not be shipped. These assurances can only be given under Public Law 480. Once this market development work has been carried out, it will be possible to seek dollar liberalization and complete free trade for poultry products for which a German market will have been established.

Mr. HILL. Mr. Chairman, I yield myself such time as I may require.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield at this point?

Mr. HILL. I yield for a question.

Mr. WHITTEN. I would like to announce, with the gentleman's permission, that I have sent an amendment to the desk, because for 2 or 3 years we have sold under Public Law 280 and we have refused to sell for dollars. That has since been corrected, and we are selling those commodities for dollars now. For several years this bill was used in substitution for normal sales. I am simply calling attention to an amendment which I expect to offer at the bottom of page 1. Add the following proviso:

Provided, That no commodity of which the Commodity Credit Corporation has a supply, and which commodity is not being offered for sale in world trade through normal channels at competitive prices for dollars shall be eligible for sale to foreign countries under the provisions of this act.

That means you have to offer them for dollars first. History has proven that we should have that proviso here, because for several years that course was not required.

Mr. HILL. I thank the gentleman. In my remarks I shall attempt to cover that subject.

Mr. Chairman, 3 years ago the Congress enacted Public Law 480 as a temporary measure to "expand international trade among the United States and friendly nations, to facilitate the convertibility of currency, to promote the economic stability of American agriculture and the national welfare, to make maximum efficient use of surplus agricultural commodities in furtherance of the foreign policy of the United States, and to stimulate and facilitate the expansion of foreign trade in agricultural commodities produced in the United States by providing a means whereby surplus agricultural commodities in excess of the usual marketings of such commodities may be sold through private trade channels and foreign currencies accepted in payment therefor."

To accomplish these objectives the legislation provided that surplus commodities could be sold at competitive prices in foreign markets for local currency, could be bartered for strategic materials needed by the United States, and could be given as outright grants for emergency assistance to friendly peoples of other nations to meet famine or other disasters. The legislation also expanded the availability of surplus food for needy persons in the United States and the school-lunch program.

Under our agricultural programs, we are producing vast quantities of food and fiber that is in excess of our domestic market needs. These surpluses are being stored and warehoused at tremendous expense to the taxpayer while we continue to increase the production of the same commodities.

Public Law 480 was designed to help eliminate these surpluses so as to restore to a more normal condition our domestic markets. With the surpluses hanging over the heads of the farmer, he is subject to a depressed market that has not kept pace with the general rise in other segments of our economy.

The program has been successful, as far as it has gone, and all this bill does is extend it for another year. Each year under its operation the disposal program has accelerated until in the last 12 months we have reduced the holdings of the Commodity Credit Corporation by approximately $1,300,000,000 from its peak $8,900,000,000 in February of 1956.

At the same time, our export trade in agricultural commodities is higher than it has been at any time except for the Korean war year of 1952–53.

Further reductions of Commodity Credit holdings are likely as a result of the combined effects of continued surplus disposals if this program is continued.

The bulk of our disposal has been under title I, and the foreign currency accumulated therefrom may be used for our Government expenses abroad. Part of the money is being spent to develop new markets for our surplus products throughout the world. Continued success of the program will assist in eliminating surplus Government stocks and, at the same time, increase the demand for commodities in foreign markets. Properly controlled and directed, much of this foreign market will be directed into actual dollar sales.

Although we all are gratified with the quantity of surplus farm products which has been sold for foreign currency under title I of Public Law 480, we must never lose sight of the fact that our primary goal in developing foreign markets is to develop dollar markets for our products which will be moved through regular commercial channels.

For example, title I sales have been made to certain West European countries which have generated local currencies that are now available for market development purposes. Such funds can of course be used to develop markets for commodities other than those which are sold to generate the funds in the first place. Moreover, the funds can be used for market development purposes over a period longer than the 1 year in which the Public Law 480 commodities were moved into the country. In this way, the funds can be and should be used to promote the expansion of dollar markets through commercial channels. It is my understanding that this is what is meant, for example, by the language on page 13 of the Report No. 432 dealing with the extension of Public Law 480, where the report makes specific reference to the poultry program which was started in Germany last year. Using this case as an illustration, I understand that local currency funds are available for continued market program activities this year. If those activities can be directed to expansion of a dollar market for United States poultry in West Germany, for example, then this kind of program will have accomplished one of the primary purposes that Congress had in mind when we enacted Public Law 480 during the 83d Congress.

Mr. SPRINGER. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield.

Mr. SPRINGER. Is it not fair to say, to bring this down to a realization of its effect upon the farm population of this country that if this bill had not been in operation during the calendar years 1955 and 1956, that meats, particularly pork; cotton, soy beans, wheat, rice, and 1 or 2 other commodities would have been selling on the local market at very substantially lower prices than they did during those 2 calendar years?

Mr. HILL. The gentleman is exactly correct.

Mr. SPRINGER. May I just make one addition statement: It is estimated that in my congressional district—and this will be true I think in every district

where soy beans are raised—that if it had not been for the 65 million bushels that were sold overseas in the calendar year 1956, soy beans would have been selling in the open market from 50 to 75 cents a bushel lower than they did.

Mr. HILL. I thank the gentleman.

I would like to turn for one moment to the testimony given before our committee on this bill, then I will be glad to yield. I think we get tangled up in our thinking as to what this bill is supposed to do. First of all, it is a bill to dispose of surplus products that we already own. It is not a purchase program, in any sense of the word. We are trying to dispose of the surpluses that are now in the bins, bought, paid for, and under the control of the Commodity Credit Corporation.

Mr. BROWN of Missouri. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield to the gentleman from Missouri.

Mr. BROWN of Missouri. In view of the gentleman's statement that here we have something we do not need, something that is costing us money to store, and, further, it is depressing the value of some things we have that could be more valuable if it were not for the surpluses, it would look to a country boy that if we got nothing but a pocketknife or an airplane trip for Secretary Dulles out of it we have gained by cutting down on the surplus storage expenses.

Mr. HILL. There is no question about that statement because of the fact that we already own this product.

Now, Mr. Chairman, here is something that most of us forget. We are paying storage every day amounting to hundreds of thousands of dollars. Now, let us take corn. In my area we have from 500,000 to 1 million head of stock on feed. Not a single feeder would look at corn that was over 4 years old. You are going to take that loss. Everyone in the United States is going to take that loss.

Let me make another statement about wheat. How many in this room know that after you have had wheat from 10 to 14 years in storage you would not get a single copper per bushel for it? You are going to lose that. This program takes the top off of the surpluses that we have paid for and that are now in storage.

Mr. O'NEILL. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield to the gentleman from Massachusetts.

Mr. O'NEILL. The truth of the matter is if you take off the surpluses and send them overseas, as soon as you get more storage space in the bins you buy more surpluses, and the storage bins are always full.

Mr. HILL. Does the gentleman believe that?

Mr. O'NEILL. I do; yes.

Mr. HILL. The gentleman thinks that because he does not know the figures. These are true and the gentleman can check them if he wants to. A year ago we had more than $600 million worth of wheat stored. That is your wheat, that is my wheat. It is already paid for. Does the gentleman know what we have today? He will be surprised. A little over $325 million. That is a wonderful record. I do not think we are going to do what the gentleman said.

Mr. O'NEILL. But you are asking for an additional billion dollars this year, is that so?

Mr. HILL. Yes.

Mr. O'NEILL. In the report there is shown that of the money in the various nations overseas, for example we spent $7,500,000 for the purchase of strategic materials, and also for military procurement.

Mr. HILL. Do not quote strategic material figures to me because that is not what I am talking about.

Mr. O'NEILL. I want to ask this question: The Defense Department spends money for the military program or it spends money for the purchase of strategic materials. Now do they in turn pay that money back to the Commodity Credit Corporation?

Mr. HILL. The gentleman asks a double barreled question. Of course, they do to a certain extent. In Spain alone they are using these counterpart funds up to 25 to 30 percent. In country after country they are using these funds that we have purchased in other countries. We are using them for the purchase of, let us just make it plain, airplane strips or let us say they are for buildings that we must have, not only to house our military men but to house some of our other personnel.

Mr. O'NEILL. I appreciate the problem of farm surpluses, make no mistake about that. I realize it is a terrific problem. Whether this is the correct way I doubt very, very much, when I see all of this money piled up over there the way it is in the various nations of the world.

Mr. ALBERT. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield to the gentleman from Oklahoma.

Mr. ALBERT. On the question of buying additional commodities, the law fixes the requirement for the purchase of commodities under the price-support program, and the Commodity Credit Corporation will purchase those commodities or take them under loan regardless of any Public Law 480 program, so it will not add at all to the number of purchases made by the Commodity Credit Corporation.

Mr. HILL. Of course, there is no question about that. There is no one against this program if they understand it. I make that statement without fear of contradiction.

Mrs. KELLY of New York. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield to the gentlewoman from New York.

Mrs. KELLY of New York. Since we have the surpluses which we cannot use here in the United States to a greater degree, would it not be better to give these surpluses to these nations abroad who are on the borderline of diverting or defecting from Communist control? In that way we would have the right to distribute them, thereby making sure that the people of that nation received our aid.

Mr. HILL. Using the old TV gag, I am glad the lady asked that question. Nothing could be more true than what she said. But, we are doing that, and I have always felt in my own heart if we had done the thing the lady suggests in the beginning with surpluses and put no strings onto any hungry people, whoever they were or wherever we could find them, and gotten the surpluses to them, I think we would have been money ahead. But, we did not. Now, we have a complex program. It is working excellently not only in the way I suggest, but it is the very thing that the gentlewoman suggested. Time after time in disasters in foreign countries the Secretary of Agriculture has done a magnificent job in seeing that these surpluses get into the area that is in distress. And, he has done the same thing in these United States. Now, that answers the gentlewoman's question completely.

Mrs. KELLY of New York. It has been a good program, I agree, and I would vote for it, but I cannot see selling it to governments and thereby relieving the necessity of the Soviet regime in bearing the responsibility for the failure of their economic theory.

Mr. HILL. That is a fine suggestion, and I wish we would have started out on it, but we did not. We are not going back; we are going forward, and I am glad the gentle lady said she would support it.

Mr. PELLY. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield to the gentleman from Washington.

Mr. PELLY. I would like to ask the gentleman if these agricultural commodities must go, at least up to 50 percent of them, on American ships.

Mr. HILL. As I understand, that is legislation that passed in this House and it is still on the books. I would have to ask the chairman of our committee: Are half of these supplies shipped in our own bottoms?

Mr. COOLEY. Donation supplies go 50–50.

Mr. PELLY. Anything financed by our Government must go at least 50 percent in American ships?

Mr. HILL. I think that is correct.

Mr. PELLY. Does the gentleman know of any effort that has been made in connection with the legislation to eliminate that 50–50 provision?

Mr. COOLEY. We have eliminated it a few times, and if I had my way, I would eliminate it again. But, they have put it back each time.

Mr. PELLY. Some of us would like to know if there will be any amendment offered to that effect.

Mr. COOLEY. I do not know.

Mr. HILL. I doubt if we could eliminate it on the floor of this House.

Mr. NEAL. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield to the gentleman from West Virginia.

Mr. NEAL. I would like to get a little more clarity on this question of where the United States comes out on this thing. I understand that before these commodities can be distributed, the Government must purchase those things from the Commodity Credit Corporation. Is that true?

Mr. HILL. Let me read the gentleman a paragraph that will answer his question fully. I was just going to read

it and I am glad the gentleman asked the question. This is testimony delivered before our committee. I believe these 10 or 12 lines will answer the gentleman's question:

Title I agreements are reached through the coordinated efforts of several Government agencies affected by the sale. Although the Secretary of Agriculture is authorized to determine the countries with whom agreements shall be negotiated and the commodities and quantities which may be included in these negotiations programs are developed in consultation with such agencies as the Department of State, the International Cooperation Administration, the Bureau of the Budget, the Department of Defense and other departments and agencies. This coordination is necessary because Public Law 480 is a complex act. It combines many purposes which affect domestic and foreign economic policies and involves activities of several departments and agencies.

I think the report will show how many agreements we have made with these countries. I hear some of our friends talking about this and one would think that this was a free, open, dumping program. It is nothing of the kind. A foreign country makes an agreement, signs up saying that it will do a certain thing. We make a contract that we will furnish the surplus commodity that we own, to which we have title—you and I and the taxpayers of America.

Have I answered the gentleman's question?

Mr. NEAL. When the agency makes that contract it does not own that commodity. It belongs to the Commodity Credit Corporation; is that right?

Mr. HILL. That is right. It never passes out of the control of the Commodity Credit Corporation until it passes through the Export-Import Bank, if I recall the testimony that was given to our committee. They are the financial agency for this activity. I am sure I am right on that.

Mr. NEAL. As the financial agent——

Mr. HILL. Our financial agent.

Mr. NEAL. As our financial agent do they repay to the Commodity Credit Corporation the cost of these commodities?

Mr. HILL. Any dollars they get back, yes. Sometimes they do not get dollars back. That is all right, because in the course of the next 2 or 3 or 5 years we will be able to use those funds in the trades that we are making with that country. In other words, we will get back at least 25 percent or 50 percent in dollars, which dollars we would have had to provide if we did not have the currencies of those nations.

Mr. NEAL. Insofar as we are able to use the currencies of the foreign nations to our advantage we will benefit by that much, by not having to appropriate dollars to take care of certain things?

Mr. HILL. That is right.

Mr. NEAL. The difference between the actual cost to the Government of the commodities it purchased and stored and the amount of money we receive, represents the loss that the Government takes which it has to pay to the Commodity Credit Corporation.

Mr. HILL. You are putting money back into the Commodity Credit Corporation right in this bill to make up for some of those losses. And you will never spend money to any greater advantage than in that effort, in my own personal opinion.

Mr. HIESTAND. Mr. Chairman, will the gentleman yield on that very question?

Mr. HILL. I yield to the gentleman.

Mr. HIESTAND. Do I understand that the appropriations for such expenditures are to come from other subcommittees, such as the subcommittee handling foreign aid, or the subcommittee handling domestic aid, or whatever the subcommittee may be? Or will the appropriation have to come from the Subcommittee on Agriculture, because this is an agricultural bill?

Mr. HILL. The gentleman is talking about what kind of an appropriation now? I do not quite understand the gentleman.

Mr. HIESTAND. This authorizes expenditures, as I understand it.

Mr. HILL. This authorizes the sale of surplus commodities up to a definite amount.

Mr. HIESTAND. That is correct. Can the gentleman assure me that there will be no additional expenditures necessary because of the passage of this bill?

Mr. HILL. The gentleman means there will be no money taken out of the Treasury; yes. There will be no additional cost or funds expended for the surpluses.

Mr. HIESTAND. I thank the gentleman.

Mr. OSTERTAG. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield to the gentleman from New York.

Mr. OSTERTAG. I should like to return to the question raised by the gentleman from Massachusetts in regard to what happens when these commodities are sold or bartered or given away to foreign countries.

Mr. HILL. The gentleman does not mean to say "given away" because these are not given away, unless the gentleman assumes that the currency is no good; and the gentleman is not making that assumption.

Mr. OSTERTAG. There are provisions in this bill for donations.

Mr. HILL. That is right.

Mr. OSTERTAG. To me, "donation" means "give away."

Mr. HILL. For disaster; that is right.

Mr. OSTERTAG. The gentleman from Massachusetts referred to the fact that as fast as you sell these commodities or barter or trade or give them away, the bins and the storehouses of America are continuously filled. That is true. We all agree about that, except that unless this bill passes and this program goes forward we will not have storeroom enough to take care of the surplus that is continuing to develop and exist.

Mr. HILL. Of course the gentleman is correct. If we are going to carry on that type of program, which I do not think we will, the bins in our country will be too small to hold what we are going to produce. As a unit, our entire farm program needs overhauling. But that is no reason why we should not pass a bill like this that will help us in our immediate need. We are now searching for a better agricultural program. I think it will come in time.

Mr. OSTERTAG. In other words, it will cost us more for storage than it does today if something like this program is not passed?

Mr. HILL. Of course.

Mr. BOW. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield to the gentleman from Ohio.

Mr. BOW. The gentleman said a few minutes ago there is confusion about this bill. I admit there is some, and I am confused somewhat.

The gentleman said this is to get rid of surplus property. I notice it is said in the report, among other things, that Spain has received canned hams. I assume from that that we are in surplus in canned hams. At the same time, we can go into our markets and buy Polish ham, Holland ham, and other ham shipped in here. Can the gentleman explain that confusion to me, why we have the surplus we are sending out under this, yet these Polish, Holland, and other hams are coming into the country?

Mr. HILL. In order to answer the gentleman intelligently I would have to know why the Federal Government through its operations, and I include all the departments, sold hams to Spain, and I would naturally assume that we may not have been short, but the Department of Agriculture feels and I feel this very day that the price of pork is on a fairly stable level at this time. If they could use more ham shipped into Spain, where we are spending plenty of hard dollars, it might have been a good business deal regardless of what the gentleman says.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield to the gentleman from Pennsylvania.

Mr. FULTON. For the purposes of our own defense we are building tremendous bases in Spain, putting millions and millions of dollars in there for United States security so of course there are many transactions back and forth. Under this bill the International Cooperation Administration has the power to make the grants and set up loans under State Department policies. So that is part of our foreign policy, a part of our United States security.

Mr. HILL. I would say to the gentleman from Ohio [Mr. Bow], and I think he is entitled to the information, and I know I am entitled to it, that we shall ask the Department to give him, with a copy to me, a full and complete report, because I have the feeling that this is a legitimate deal, and probably the gentleman would be happy that the Department made it.

Mr. BROWN of Missouri. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield.

Mr. BROWN of Missouri. I believe the distinguished gentleman's point was, Why are we still importing hams from foreign nations when we have it in surplus enough to include it in the agricultural disposition of surplus act?

Mr. HILL. We have talked that over in our committee time on time. So far

as I know we have never had it answered. The truth of the matter is that the amount of pork produced in this country compared with what little ham you have shipped in from other countries is so small that really and truly, it has never made any imprint. It is just something to talk about, but it is something that so far as having any effect on our agricultural economy is concerned, amounts to nothing. I think I can prove that by the amount of pork that we produce and use.

Mr. BROWN of Missouri. I thank the gentleman.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield.

Mr. GROSS. Would it be possible for Poland under the terms of this bill to buy feed grains at bargain prices from the United States?

Mr. HILL. Well, No. 1: Do you know what feed grain is in surplus?

Mr. GROSS. What feed grains are in surplus? Why, wheat and corn are in surplus.

Mr. HILL. How much?

Mr. GROSS. A good many bushels, I am sure.

Mr. HILL. Just because corn is in storage in American storehouses in the United States is no reason to come to the conclusion that corn is in surplus. I am of the opinion that you do not have too large a surplus of corn—although I could be wrong.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield to the gentleman if he has the answer to that question.

Mr. COOLEY. I think our committee was advised that the surplus in corn amounted to about 120 days supply.

Mr. HILL. I think you will find there is no surplus there so really corn is out. Let us get on to something else.

Mr. GROSS. May I ask the gentleman this question then. Are we exporting any corn under this surplus program?

Mr. HILL. Very little corn is being exported. I did not read the record, but I have it here. Very little corn, as I recall it, was exported. Corn does not lend itself, and this is a strange statement to make, to exportation. Why?

First. They are not used to feeding it. Corn was an Indian food and it has never been able to work its way into European consumption.

Second. It does not ship as well—it draws moisture a little more than wheat does.

Mr. GROSS. Of course, I am talking about corn for feed purposes and I based my question to you originally along that line.

Mr. HILL. For feed? Do you mean people?

Mr. GROSS. I mean feed for livestock.

Mr. HILL. I did not see, when I visited Europe, any corn being fed to livestock.

Mr. GROSS. I assume that hogs in Europe will eat corn, will they not?

Mr. HILL. My guess would be that they do not feed too much corn to hogs anywhere in Europe.

Mr. GROSS. They could eat it and they would eat it, if they could get it at bargain prices.

Mr. HILL. But, corn is not in great surplus and would not fit much into this program.

Mr. GROSS. I do not know what you mean by much.

Mr. HILL. There is not a surplus of corn in the world market, let us put it that way.

Mr. GROSS. I will get some time on my own tomorrow and try to get the answer to my question.

Mr. HILL. I am sure the gentleman will find just exactly what I said is true.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield.

Mr. FULTON. Under title I of this program, 75 million bushels of feed grains were shipped so the answer to the gentleman from Iowa is that there were feed grains shipped under this program, but not any large amount.

Mr. HILL. We would have to break that down and see what was corn and what was maize and how much was in other types of grains. We could get that for the gentleman from Iowa, and I can get him the actual number of bushels.

Mr. JUDD. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield.

Mr. JUDD. I do not know whether this answer applies to the question raised about the Polish and Dutch hams and why we are importing these hams when we have our own American canned hams in surplus. But with reference to certain other commodities, the reason is that there are Americans who will pay their money to buy through the channels of private trade certain foreign products which they prefer to our American products. We think Minnesota blue cheese is the best blue cheese in the world, but we have people in Minnesota who will buy blue cheese from Denmark even though we have our cheese stored here in caves which we have bought under the surplus commodity program. It could well be that there are people who like Polish and Holland hams enough that they will buy them. Unless we are going to regiment our economy, we cannot forbid them from buying them through the ordinary processes of international trade.

That leaves us sometimes with wonderful hams cured by our American packers, which we must dispose of abroad before they spoil.

Mr. HILL. There is also the possibility that by selling hams we might be able to sell other products that are in tremendous surplus, which would be a good deal as far as the United States is concerned.

Mr. COOLEY. Mr. Chairman, I yield such time as he may desire to the gentleman from Illinois [Mr. GORDON].

Mr. GORDON. Mr. Chairman, I wish to support this legislation. Among the many reasons for my support is that this measure will enable the United States to furnish much-needed assistance to the Polish people in their struggle to become free and independent.

Under Gomulka we have seen the Polish people begin to progress away from domination by the Soviet tyrants and toward achievement of a free and independent Poland. Anything we can do to assist in the achievement of this goal will be valuable to the United States. When we assist another nation in achieving independence from the Soviet Union we are in effect assisting the United States. To the degree that Poland can become independent of complete dependence on the Soviet Union economically and politically we are working for the national interest of the United States. Not only are we helping Poland to become free but we are setting an example for the other satellites.

It is my understanding that the executive branch has already determined that no change is necessary in existing law to permit the sale of agricultural surpluses to Poland. Title II of Public Law 480 already permits the gift of such surpluses. Therefore, it is not necessary to amend this bill for that purpose.

I hope, and I am sure, that some of the surpluses authorized to be disposed of by this bill will be used to assist Poland in her struggle. I support that purpose.

Mr. COOLEY. Mr. Chairman, I yield such time as he may desire to the gentle- from Chicago, [Mr. KLUCZYNSKI].

Mr. KLUCZYNSKI. Mr. Chairman, I take this time to speak out of order to invite all Members of this august body, ladies and gentlemen, Democrats and Republicans, to come to Chicago in the early days of October, the 1st, 2d, 3d, and 4th, for the purpose of attending the World Series with the Chicago White Sox.

Mr. BOLAND. I want to compliment the gentleman for his generous invitation. Let me say also I compliment him specifically for his warm enthusiasm for the White Sox. It so happens that this is only the 40th game, completed yesterday. There are 114 games to go.

May I ask you whether the invitation you gave extends to eating at the Syrena Restaurant on Archer Avenue?

Mr. KLUCZYNSKI. Oh, it certainly does. They can go and eat all they want.

Mr. BOLAND. Is it on the house?

Mr. KLUCZYNSKI. Oh, no. You have to pay.

Mr. BYRNE of Illinois. I would like to associate myself with the gentlemen's remarks. I cannot think of a greater ball club to win the pennant than the Chicago White Sox. If the National League should win the pennant, I would like to see them go to Milwaukee.

Mr. BOLAND. Was it not last year that the White Sox were on top at this stage, and when the end of the season came they were last?

Mr. KLUCZYNSKI. Oh, no. Last year we were five games behind at this time. Right now we are five games ahead. We are going to win the championship.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COOLEY. I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose, and the Speaker having resumed the Chair, Mr. HAYS of Arkansas, Chairman of the Committee of the Whole House on the

State of the Union, reported that that Committee, having had under consideration the bill (H. R. 6974) to extend the Agricultural Trade Development and Assistance Act of 1954, and for other purposes, had come to no resolution thereon.

BILATERAL AIR TRANSPORT AGREEMENT WITH GERMANY

Mr. BOW. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. BOW. Mr. Speaker, ever since the negotiation by the United States in 1955 of the bilateral air transport agreement with Germany, the subject of the policy of the Department of State in the negotiation of these air agreements has been of increasing concern to the interested committees and individuals in Congress.

We have reason to be proud of our United States-flag air transport system, and of the marked progress which it has made over the years in becoming free of subsidy. This subsidy-free status, however, is not one which can be achieved and maintained in the face of foreign air route grants by the Department of State taken in total disregard of the economics of international air transport.

In the domestic field, careful consideration is given by the Civil Aeronautics Board to the award of competitive services. Similar considerations must be taken into account in the grant of routes to foreign countries. We must have a policy which results in sensible, controlled regulation of entry into the United States market. We cannot have one which results in every country in the world operating an airline to the United States.

It is for these and other reasons that I hope the Department of State will deny the request which I understand the Government of Australia has made for an extension of its route beyond San Francisco to New York and on to London and around the world. This is a service which is not economically needed. To grant such a route to the Australians would destroy the equity of the present route exchange between the two countries, and would result in a decided imbalance in favor of Australia. It would be wrong to grant this route to Australia, and I trust the Department of State will not permit it to be done.

HELLS CANYON DAM

Mrs. GREEN of Oregon. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentlewoman from Oregon?

There was no objection.

Mrs. GREEN of Oregon. Mr. Speaker, due in great measure to the yeoman work of the distinguished senior Senator from my own State—Senator WAYNE MORSE—the American public is becoming increasingly aware of the exact meaning of the term "fast tax writeoff" as applied to the Idaho Power Co.'s proposal for the inadequate development of the Snake River as a sham substitute for the high Hells Canyon Dam. We who have been fighting the battle for the proper development of Oregon's great natural resources have in recent weeks been highly criticized because of our estimate that this fast tax writeoff to the Idaho Power Co. amounted to an interest-free loan of $329 million. We were told that our figures were wrong.

The figures were wrong. We underestimated the size of this loan by the taxpayers to the Idaho Power Co. by some $10 million based on figures supplied only the other day to the Kefauver Committee by the Federal Power Commission's own chief accountant. The total of the interest-free loan is not $329 million, but rather $339 million.

With this in mind, Mr. Speaker, I ask unanimous consent that there be printed in the CONGRESSIONAL RECORD House Joint Memorial No. 18, passed by the Oregon State Legislature, memorializing the President of the United States to reconsider and to deny or substantially reduce the fast tax writeoff granted to the Idaho Power Co.

House Joint Memorial 18

To His Excellency, the Honorable President of the United States, and to the Honorable Senate and the House of Representatives of the United States of America, in Congress assembled:

We, your memorialists, the 49th Legislative Assembly of the State of Oregon, in legislative session assembled, most respectfully represent as follows:

Whereas Idaho Power Co. has been allowed an acceleration of depreciation on a major part of the construction costs to be expended for dams in Hells Canyon; and

Whereas such allowance was made under a 1951 act passed during the Korean war, in the interest of national security; and

Whereas Idaho Power Co. is able to finance expansion without this type of Government assistance, which assistance results in an increased burden on other taxpayers; and

Whereas the benefits accruing to the company will not in turn ultimately accrue to the taxpayers either from the standpoint of national security or from the standpoint of reduced rates: Now, therefore, be it

Resolved by the House of Representatives of the State of Oregon (the Senate jointly concurring therein), That the President of the United States hereby is memorialized to direct appropriate Federal officials to reconsider and to deny or substantially reduce the allowance of the fast write-off made to the Idaho Power Co. in connection with its dams in Hells Canyon; be it further

Resolved, That the Congress of the United States be memorialized to repeal the 1951 act which was passed as a national security measure and which is now outmoded and unnecessary; and be it further

Resolved, That copies of this memorial be sent by the Chief Clerk of the House to the President of the United States and to all members of the Oregon congressional delegation.

Adopted by house May 7, 1957.
Adopted by senate May 15, 1957.

EDITH BYNON LOW,
Chief Clerk.
PAT DOOLEY,
Speaker of House.
BOYD R. OVERHULSE,
President of Senate.

O'MALLEY'S TAXPAYER-BUILT DODGER BALL PARK

Mr. ROONEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ROONEY. Mr. Speaker, I have really reached the saturation point with regard to the nonsense in connection with the threatened transfer of the Brooklyn Dodgers' franchise to the west coast. Following adjournment of the House on Thursday last I found this item on the front page of that day's Washington Evening Star:

MAYOR WAGNER GIVEN BRUSHOFF BY O'MALLEY

NEW YORK, May 30.—Neither the Brooklyn Dodgers nor the New York Giants have announced definite moves to the west coast as of today, but both have made it plain that the old saying "Be it ever so humble, etc.," is definitely passe.

* * * * *

O'Malley, long of the opinion that he and the Dodgers have been snubbed by city officials in their request for a new stadium, got around to doing some snubbing of his own yesterday. While New York Mayor Wagner discussed the problem with Manhattan and Brooklyn borough presidents, O'Malley huddled with Norris Poulson, the dapper Los Angeles mayor.

Wagner had requested a chat with O'Malley, but was turned down.

"Tomorrow is a holiday," O'Malley told Wagner, "and I have a lot of things to clear up at my office."

O'Malley, a heavy-jowled, cigar-smoking poker player, instead sat back calmly talking with Poulson, holding a pat hand.

* * * * *

Wagner talked 90 minutes with his borough subordinates, then announced:

"We will seek immediate assurance from O'Malley that he intends to stay in Brooklyn. If he tells me he is not going to stay, I will ask him to reconsider."

Wagner also made it clear that "the city does not permit itself to be blackjacked into anything," in reference to the National League vote which gave the Dodgers and Giants permission to move their franchises to the west coast.

Now, I think the time has come to clearly express one's thoughts on this business. For years the Brooklyn Baseball Club has coined money for the few stockholders of its closely held stock. The owners never shared any of their profits with the fans. They took advantage of the Dodger fans at every turn over the years. They moved part of their schedule to Jersey City. They presently threaten to move in toto to Los Angeles. I say let them move to Los Angeles if the alternative is to succumb to an arrogant demand to spend the taxpayers' money to build a stadium for them in Brooklyn.

I am opposed to uprooting decent citizens living in my congressional district in the vicinity of the Long Island Railroad depot at Flatbush and Atlantic Avenues in order to put more money in the pockets of my dear friend Walter O'Malley and the private profitmaking Brooklyn Baseball Club stockholders. I would rather have a loyal AA club or

even a loyal III league team representing Dodgertown.

Let Walter O'Malley and his stockholders who have no civic pride for Brooklyn, where they made their money, move to the west coast in quest of more almighty dollars. And remember that when we talk of big-league baseball being covered by the antitrust laws Walter and his big-league cronies portray themselves as great sportsmen, as eleemosynary characters imbued with great civic pride for their communities. The present hassle over the Dodger franchise move may come to have a great deal of bearing on whether or not big-league baseball should be exempt from our monopoly laws.

On Thursday, May 23, 1957, the following article was published here in the Washington Evening Star:

ONLY TWO SITES CONSIDERED FOR DODGER STADIUM

NEW YORK, May 23.—A special committee appointed by Mayor Wagner to work with the Brooklyn Sports Center Authority has announced that only two sites for a possible stadium for the Dodgers are under consideration.

Five sites have been suggested by various city officials. But the committee said only a site immediately north of the intersection of Atlantic and Flatbush Avenues in Brooklyn and another almost directly opposite it on Atlantic Avenue are being considered.

The committee announcement yesterday stated that both the committee and the sports authority have been given to understand either would be acceptable to the Dodgers.

Is it not sickening to learn that we have to tear down properties, move families, and spend taxpayers' money in a manner "acceptable to the Dodgers"? I repeat, leave the folks living in the vicinity of the depot alone and stop all this nonsense.

O'Malley will never truly transfer the Brooklyn Dodgers to Los Angeles, for they will not be the Brooklyn Dodgers once they leave Brooklyn—they will be O'Malley's former Brooklyn Dodgers.

THE ROYAL NONESUCH OF LIFE MAGAZINE—AN UNFAIR ATTACK ON THE COTTON PROGRAM

Mr. POAGE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. POAGE. Mr. Speaker, the recent editorial in Life magazine on King Cotton is appropriately subtitled "The Royal Nonesuch" for truly there is nonesuch program as described. One should not be too critical of the editor of Life on account of his lack of understanding of the cotton problem, when less than 2 weeks ago the Secretary of Agriculture himself, his Undersecretary, an Assistant Secretary and their whole staff of statisticians soberly insisted before the House Committee on Agriculture that we picked an average per acre of 530 pounds of lint cotton in Texas in the year 1956. As every cotton farmer knows, this is pure nonesuch and is just about twice what we actually produced, but they continued to stand by their figure even after I, as a Texan, had disclaimed this brag. At last it developed that they were quoting the figures on American-Egyptian cotton which bears about the same relationship to commercial cotton that buckwheat bears to wheat and which for purposes of the support and acreage control laws is not cotton at all. Clearly the Department of Agriculture either does not know or does not care much about cotton or cotton producers. After reading the editorial, I doubt that Life magazine either knows or cares as much as the officials of the Department.

As an illustration, the editorial refers to the losses involved in last year's cotton export program, but it fails to mention the fact that for 20 years prior to 1953 the cotton loan program had been operated at a profit and had placed over a quarter of a billion dollars into the Treasury or that all of this has been dissipated and substantial losses have accrued since the present Secretary took over. Flexible supports have not decreased the Government's losses. They have only decreased the producer's income.

This is not to say that any support price above the world market does not tend to restrict our sale of cotton. Everyone agrees that it does and 18 months ago I introduced legislation designed to let cotton move at the world price and at the same time to maintain farmer income at some reasonable percentage of a fair living standard. Recently several other representatives of cotton-growing areas have introduced rather similar bills but neither Life magazine nor the Secretary of Agriculture has suggested any plan. All they seem to be able to think of is to reduce the price. Admitting that we must reduce the price, what do they propose to do about the farmer? So far, neither have proposed to do anything but to reduce him also. To move him to the city or to let him starve.

The similarity of the arguments in this editorial and those which have been coming out of the Department of Agriculture indicate that there may be more than mere coincidence to the present rash of criticism of the cotton program and of cottongrowers. Why do we hear no such criticism of the wheat program? Every bushel of wheat that leaves American shores carries at least an 80-cent subsidy. Why do we hear no similar criticism of the corn program? Of course, there is no effective production control of corn. On the contrary, last year the President authorized the support, in the commercial corn area, of noncompliance corn—corn grown in violation of acreage allotments—at the rate of $1.25 a bushel. Farmers in this area who complied with their allotments got supports at $1.50. In contrast, cotton planters who overplanted their allotments were penalized 50 percent of the support price of the overproduction. Corn farmers of the commercial area alone received 79 cents out of every dollar spent for the soil bank in 1956 and they still overplanted their allotment and were given support loans for doing so. At the same time, there were 600 million bushels of corn and 800 million bushels of corn equivalent—other feed grains—grown outside the commercial corn area for which no comparable program was available. All cotton is subject to the same controls wherever it is grown.

Apparently, the first objective of the Department of Agriculture has been to set consumer and producer at odds. Instead of pointing out that the American housewife is able today to buy more and better food for fewer hours of her husband's labor than ever before, the Department and its partisan spokesmen have tried to emphasize that certain food products are still bringing reasonably high prices on the retail market. very rarely, indeed, are we told that the that much of the retail price is the result of the increased and improved processing that the housewife demands. Very rarely indeed are we told that the percentage of the housewife's dollar which goes to the producer of food has steadily fallen from well over one-half to just over one-third. If there were not a deliberate desire on the part of the Secretary of Agriculture and of Life magazine to widen the breach between producer and consumer, why do they not give the public these facts?

If there is not a deliberate attempt to widen the breach, between groups of American farmers, why this concerted effort to make the cotton program look bad in the eyes of the public? If the Department or Life magazine had any real idea of improving the lot of the cotton farmer, why have they not offered some constructive suggestion rather than to merely repeat the demand for lower and even lower prices?

True, Secretary Benson has criticized the wages of American workers, but as far as I know, he is the only individual in a responsible position who takes the position that we can destroy the American wage scale and maintain our standard of living. No more can we destroy the income of our farmers and maintain our standard of living. It is true that American labor certainly cannot work for the 10 to 20 cents an hour wage scale of Japan, of Hong Kong, or of India. It is equally true that American farmers cannot produce cotton at prices which might be acceptable in Egypt, in Pakistan, and in Nigeria.

When the American wage scale was threatened we passed maximum hour laws. What is the basic difference between a 40-hour work week and a cotton allotment that cuts the amount of cotton the farmer can produce by 30 percent? But we were careful when we reduced the work week to keep the weekly wage just as high as it we before the cut in hours. We have cut the farmer's total effective working hours when we limited his plantings. With 90 percent of parity supports we figured we would maintain his buying power within 10 percent of what he had been making before the Government limited his acres, but Mr. Benson now wants to reduce the farmer's weekly and annual wage by reducing his support price.

Those of us who have suggested a direct payment as a substitute plan believe that it would be cheaper than what we are doing now—at least the Department of Agriculture's own figures indicate it would be something like $100 million a year cheaper, that it would get the Government out of the cotton business completely; that it would put the trade back in private hands; that it would increase the income of cotton farmers by half a billion dollars; and that it would provide at least some reduction in the cost of cotton goods to consumers and it would let all American cotton move into consumption both at home and abroad at competitive world prices.

The best the Department has been able to say in opposition to this is that "it would work so well that other farm crops would demand the same kind of program." So what? Why should they not have such a program if it works well and why should the people of the cotton South not have a program that works as well as the programs for the major crops of the State of Utah—wool and sugar? Both wool and sugar producers receive direct payments. Wool has been supported at 106 percent of parity, sugar at approximately 98 percent of parity. I voted for both programs. Secretary Benson supported both programs. Both programs seemed to be working rather satisfactorily. Why should the cotton farmer, or any other farmer for that matter, not be treated as well as these Utah farmers?

Of course, Life magazine doesn't even offer the slightest hint of a solution to the problem. They say they are not "agin" the farmer, but they have nothing to offer the farmer except criticism and sarcasm. They say the present program "keeps the marginal, uneconomic, hillside farmer turning out poor cotton that isn't needed." Again, I would like to indulge in some Texas brags, but the hard facts are that the average quality of the cotton from small farms is just as high, or higher, than it is from our large scale operations on the plains of Texas. The magazine then says:

> It (the support program) keeps them at it when if left to their own devices, they could go to town and work at a useful job.

Apparently Life's editor doesn't realize that the cotton program doesn't compel anybody to grow cotton. Nobody is denied the right to go to town under the present program or any that is proposed, but if we adopt his program of no help which is exactly what we had 30 years ago that little farmer would have no choice. He would then be compelled to go to town and apparently this is really what both Life magazine and Secretary Benson want to force the farmer to do.

Fundamentally, all of these critics of the cotton program fail to understand that a man who depends on cotton or any other cash crop for his livelihood does not have the freedom of choice that a businessman running an industry has. They doubtless assume sincerely that if a cotton farmer—a man dependent entirely upon cotton for the support of his family—finds himself faced with the certainty of a much lower price he will reduce or abandon his cotton plantings. This may be sound economics for the big-business man and even for the corporate farmer, but it is not sound economics for the head of a family with five little mouths to feed. All he can do if he stays on the farm is to seek to make up by additional volume what he is losing in price. The result is that he plants more, not less, cotton—or wheat or tobacco.

The cotton history of the United States records that the largest crop we ever grew was produced when we had a support price of 52 percent of parity. It seems to me that if the Secretary's reasoning were even partially correct we would have had to import cotton that year for every cotton producer knew that 52 percent of parity was a ruinously low return, but every cotton producer felt that he had to plant more cotton when faced with those low prices. This is the fundamental error of the Eisenhower administration as it relates to agriculture. Flexible supports flexing ever downward have not led to that "100 percent of parity in the market place" and by themselves they never will.

Let us admit that we should make the price of cotton competitive. Let us make it competitive just like the price of wool and sugar in Utah is competitive with the world price, but let us maintain the cotton farmer's living standards just as we maintain the living standards of the beet sugar grower and the sheepman.

If there is some better way of handling the cotton program, surely the least we should expect of the Secretary of Agriculture and the editor of Life magazine is to suggest what that better method is. Until they come forward with something constructive, it seems to me that they might at least keep their mud in their own backyard and not throw it at those who are trying to suggest a practical way to handle a difficult situation.

DEPARTMENT OF AGRICULTURE APPROPRIATION BILL—1958

Mr. MARSHALL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. MARSHALL. Mr. Speaker, when the bill making appropriations for the Department of Agriculture for fiscal year 1958 was before the House, an amendment was offered to eliminate the $239 million loan authorization for the Rural Electrification Administration. The Committee of the Whole rejected this proposal by a vote of 58 to 26, and I pointed out that not a single Member on the Democratic side of the aisle rose in support of the amendment.

This, however, was apparently only a small beginning in the drive to increase interest rates to the farmers who have worked together to build a system of electric cooperatives which have revolutionized American agriculture and which have played a major role in providing the abundance enjoyed by American consumers in the time of war or peace.

President Eisenhower and his congressional leaders at a recent conference announced that the administration is preparing legislation to block loans by the REA at present interest rates which are fixed by law. In spite of the serious cost-price squeeze under which farmers are suffering, the administration seems determined to further burden farm families with additional costs in their operations.

It was stated that new legislation would directly affect the 2 percent interest rate on funds loaned by REA. Whether it is the administration bill or not, such legislation has been introduced. It was also stated after the President's conference that the plan has already been approved by the Bureau of the Budget and is now being reviewed by the Treasury Department.

The argument has been made that rates must be increased to meet the higher interest charges the Government itself has to pay on borrowed money. Let us examine a few facts about this jacked-up interest rate.

First of all, it is not true that the Government has to pay 3½ percent on all the money it borrows. As a matter of fact, the Treasury Bulletin reports that for February 1957, the latest figures available, the Government paid an average cost of money of 2.719 percent.

Fact No. 2 is that the hard-money policy now in effect is a contrived policy. To be sure, the average cost of money to the Treasury has increased from 1.9 percent in 1948 to the current 2.7 percent. The hard-money policy has been contrived by the Treasury Department, the Federal Reserve Board, the big bankers of the country and big business—as one can only conclude from an analysis of who benefits from the policy and who suffers. And what a reason they give for the jacked-up contrived interest-rate increase—they tell us it will halt inflation—it will restrict the supply of credit. But inflation goes on and the farmers and consumers of the Nation continue to suffer.

In every year down through 1951, since the start of the REA in 1935, the rural electric cooperatives have paid a rate of interest higher than the average cost of money to the Government on marketable securities. Prior to the passage of the Pact Act, the rural electric cooperatives paid interest costs as high as 3 percent, and at times the average cost of money to the Government on marketable securities has been as low as 1.718 percent.

From 1952 to date the average cost of money to the Government has been above 2 percent, although not appreciably so until beginning in 1953. Since 1953, the average cost of money to the Government has increased by leaps and bounds—as a result of the contrived hard-money policy.

The rural electric cooperatives have a most enviable repayment record. It is doubted that any other lending agency can claim as good a repayment record as the Rural Electrification Administration. As of April 1957, the rural electric cooperatives have paid back $410 million in principal and $272 million in interest to the Federal Government. Payments

in advance of due date amounting to $105 million have also been made. There is only $195,000 overdue more than 30 days, and the Administrator of REA has stated that he was confident that this money would be repaid shortly. This delinquency amount equals less than one-twelfth of 1 percent of all funds loaned to the rural electric cooperatives.

As a result of the fact that interest rates paid by the rural electric cooperatives over the years have been higher than the cost of money to the Federal Government, the Rural Electrification Administration reported that as of the end of fiscal 1956 the agency has net income from lending operations of $47.5 million. The Federal Government has not lost money on its rural electrification loans—it has made money.

If a bill is enacted to raise REA interest rates to 3½ percent, amounting to a 75-percent increase, it would make many of the existing and proposed projects of the rural electrification and rural telephone cooperatives infeasible. In addition, the right and opportunity of the co-ops to generate their own power, where necessary, will be adversely affected, and the bargaining position of co-ops which purchase power from commercial power companies will also be adversely affected.

The rural electric cooperatives now pay 9 percent of their operating revenue in interest charges. A 75-percent interest increase, raising the cost of money to $35,000 per million borrowed as compared to the current $20,000 per million, would devastate the rural electrification and telephone programs.

At the same time the President is criticizing the REA interest rate, he has just renegotiated a loan with the British Government bearing an interest rate of 2 percent. But this renegotiated loan has some other interesting sidelights. The British wanted to waive its interest and principal payments on their original loan. In the original loan, provisions had been made not only to defer principal payments for the first 5 years—but no interest at all was charged for the initial 5-year period. Moreover, the British, under the renegotiated loan, are entitled to waive up to 7 of the annual principal and interest payments, which has the effect of stretching out the loan for an additional 7 years—therefore, the loan can run through the year 2007. This makes an interesting comparison.

In other words, the President will grant a 2-percent loan to the British, and give them other financial beneficial considerations, but at the same time he charges that the farmers' rural electrification interest rate is subsidized and should be raised.

In amending the income-tax laws in 1954, enormous concessions were made to big business. For example, the accelerated amortization program was extended and a liberalized depreciation amendment was added to the Internal Revenue Code. Under these two provisions alone the power companies have been granted interest-free loans under the accelerated amortization program, which, over the next 33⅓ years, will amount to $4.9 billion subsidy. And, under another liberalized depreciation provision, they will get an additional estimated $18 billion subsidy over the next 20 years.

Was the 2-percent British loan indefensible? One could also argue that it seems somewhat strange to grant interest-free loans to private-power companies when the farmers' rural electric and telephone cooperatives must pay 2 percent on the money they borrow.

MOBILIZING RELIGIOUS INFLUENCE

Mr. ZELENKO. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include therewith a letter to the President.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ZELENKO. Mr. Speaker, on May 29, 1957, I wrote to President Eisenhower requesting him to assume world leadership in mobilizing religious influence in the fight for the minds and conscience of mankind.

It is my opinion that the continued expenditure of monies for armaments and foreign aid is necessary, but is of defense value only since in these areas the Communist world has apparently been able to match us to a stand-off posture. Our great strength and our greatest opportunity of victory is to effectively revitalize man's sense for self-respect and dignity so that he can gain a deep religious satisfaction from his own role for the fight against atheistic communism. This role can most appropriately be carried out by religious rather than political leaders. I have, therefore, requested the President to call and facilitate a world convocation of leaders of all religious faiths and sects, who can operate completely free of political direction, to organize and issue a positive universal credo against atheistic communism, to which religious men of all creeds all over the world can aspire, consistent with their own religious traditions. In my communication with the President, I have also expressed the thought that if he deems my suggestion a favorable one I would present legislation for the appropriation of necessary funds for such a convocation. The sum involved would cost our Government less than one jet bomber.

I submit herewith the text of the letter to the President:

MAY 29, 1957.

The PRESIDENT,
The White House.

MY DEAR MR. PRESIDENT: We have reached a critical stage in the war with the Communists for the minds and conscience of mankind. I write to you as our Commander in Chief in this struggle, in which we have expended so unsparingly our economic resources and our ingenuity. Our great strength has dictated an unprecedented mobilization of weapons of destruction and the beneficence of financial aid to every ally and potential ally on the horizon.

It is the tragedy of our times, Mr. President, that in the areas where we have chosen to demonstrate our muscle to the Communist world, our adversaries have demonstrated a willingness to match us weapon for weapon, promise for promise, missile for missile and bomb for bomb. As fought so far, the issue remains in doubt and the prognosis for the future is guarded.

It is my belief, Mr. President, that in our preoccupation with our materialistic and intellectual strengths we may possibly have overlooked our greatest logistical resource in the struggle against communism—the spiritual fiber of men and women all over the world.

It is this God-given spark which fires men to place their sense of dignity above the lure of the free handout. Belief in God, regardless of the form that such belief may take, is the antidote to the poisonous materialistic theology of Karl Marx. If this struggle for man's spirit is to be resolved it will have to be on the philosophical level, for with each passing day it becomes increasingly apparent that the alternative fields of combat, namely, economic warfare and military warfare, will bring with it the extinction of our civilization.

There is a desperate need for the leadership of the Free World to mobilize our most potent allies, the spiritual leaders of the world, whom we have sadly neglected. Our most effective skirmishes with atheistic communism have been won by men of the cloth of every religion, fighting alone in their parishes and missions, in Warsaw, in Budapest, and all over the world. Marx, Lenin, and Stalin most desperately feared and most violently condemned these brave soldiers of God, whom they recognized had to be crushed before man's conscience could be entrapped.

I now recommend that you take the leadership in an all-out effort to enable the religious leaders of the world to organize a collective security pact for the protection of the souls of mankind. To that end, I ask that you call for such a convocation in Washington in 1958. All governmental participation in such an endeavor should be avoided, for obvious reasons. Aside from furnishing the facilities, the transportation expenses, the time, and the place for such a meeting, the entire problems of organization and agenda should be left to the religious leaders of the various denominations and sects. We may hope at the best for a permanent world organization of men in religion; at the least, regardless of agenda, there would be a manifesto from such a conference that would represent a philosophical rallying point for men of spiritual belief everywhere, which would affirmatively extoll a life of freedom.

By this kind of spiritual offensive we can end the isolation of individual religious groups who may respectively feel that they are alone in the struggle. With each other's convictions thus reinforced, mankind may well record its greatest triumph.

I look forward to the day when the role of the individual man or woman in the fight against godless communism can become a rich and deeply rewarding religious experience. This is the one weapon which the Communists can never effectively resist on either side of the Iron Curtain.

If you agree with this proposal in principle it would be one of my proudest moments to introduce a bill in Congress appropriating the funds requisite for such a history-making convocation.

Respectfully yours,

HERBERT ZELENKO,
Member of Congress.

LONG-RANGE FARM PROGRAM

Mr. HILL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks, and include a statement by Secretary Benson.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. HILL. Mr. Speaker, in May, Secretary of Agriculture Ezra Taft Benson

appeared before the House Committee on Agriculture and gave a very excellent statement on matters concerning a long-range farm program.

In his statement he suggested that modern and improved agricultural production methods as well as sale promotion plans must all be brought up-to-date to meet modern business methods now being used at home and abroad.

I shall place in the CONGRESSIONAL RECORD the testimony given on May 16, 1957.

During the years previous to World War II our agricultural legislation was based on the depression then existing in agriculture.

The basic Agricultural Act of 1938 set apart 6 crops: Wheat, corn, cotton, rice, tobacco, and peanuts, and gave special treatment to these products. By the time the 1938 act came into full operation we were catapulted into World War II.

During the war years demand was high for all types and kinds of farm production. That is the usual effect of war on our economy. Expanding markets followed World War II and the Korean war. It seemed as if farm prices would never drop and consumption would continue to rise.

Many farmers and agricultural experts felt that we could continue to guarantee farm prices at 100 percent of parity. However, with increased production it appeared to even a casual observer that 100 percent of parity could not be maintained.

Of course, no farm program is sound when products are placed in federally owned or controlled storage. They are still a threat to the market, as legislation that places crops in storage could be changed overnight, freeing these products, thereby destroying the market.

The results of the 100 percent parity price have been disastrous to farmers who wish to produce for an open and free market.

Many experts on agricultural legislation felt, and still do, that acreage control and crop production sale control would be necessary if we were to continue 100 percent of parity. This position, of course, has not been supported by farmers.

To develop a farm price support system that will work in peacetime is a difficult task.

We have been trying to hold our world markets under the support price system for our domestic market and we have failed.

Secretary Benson's remarks are worth serious consideration. Some may disagree with him; however, I am sure everyone will be stimulated by reading and considering his thought-provoking suggestions made to our Committee on Agriculture.

STATEMENT OF SECRETARY OF AGRICULTURE EZRA TAFT BENSON BEFORE THE HOUSE COMMITTEE ON AGRICULTURE, MAY 16, 1957

Mr. Chairman and members of the committee, I appreciate this opportunity to join with you in considering matters of long-range farm policy referred to on May 2 in my letter to Senator ELLENDER.

In that letter and also in my comments yesterday before the Senate Committee on Agriculture and Forestry, three points were made:

1. Controls are not effective in reducing overall agricultural production, despite the severe restrictions they impose on farmers' freedom to produce and market.

2. Agricultural products are likely to continue to be abundant. Under such conditions they cannot be priced as if they were scarce.

3. The present legal formulas governing acreage allotments and price supports are proving obsolete.

My comments were based on the fact that a technological revolution is occurring on American farms. This creates a new dimension in farm policy, making it virtually impossible to curtail agricultural output with the type of controls acceptable in our society.

In my letter attention was called to the fact that reduction of our stocks through the surplus disposal program and the soil bank is going forward rapidly, and I expressed gratification to the Congress for providing this necessary legislation. However, this reduction in surpluses will mean that the price formula escalators in the present laws will soon operate to stimulate and expand production, which will create new surpluses and require tight production controls.

As we move out surplus No. 1, governing legislation sets the stage for surplus No. 2.

My letter pointed out that our price support and production control programs have twice been bailed out of difficulty by war—once during World War II and once during the Korean war. Now, in time of peace, shortcomings are showing up.

The high cost of existing farm programs is a matter of increasing concern. Programs primarily for the support of farm prices and farm incomes in fiscal 1956 showed a net realized cost of $1.9 billion. This year the figure will be much larger. These costs are boosted by the inability of our production controls to hold production within bounds. They are high because we report costs when commodities are disposed of, not when they are acquired. Many of the stocks now being moved were acquired years ago.

The total agricultural budget now before the Congress is in the neighborhood of $5 billion. During this spring's debate on the corn bill it was pointed out on the floor of the House that this is the equivalent of nearly half the net income of our farm people. I hasten to add that this budget includes loans which will be repaid, permanent improvements in the agricultural plant, and exports of farm products used for economic and military operations abroad. Many of these activities are not for the primary purpose of supporting farm prices and farm income. But however, computed, the cost of the price support—acreage control program is great and growing.

Few would object seriously if these heavy costs were temporary and if the problems were being solved permanently. Instead, however, with the formulas in governing legislation, costs seem likely to continue high with little progress toward a permanent solution.

I outlined in my letter and the supporting document the difficulties which confront our farm people. They are being subjected to the forces generated by the technological revolution. They are adjusting from wartime to peacetime demands. Their markets are burdened by surpluses which result at least in part from past wartime programs. With the reduction of surpluses, farmers will feel that acreage allotments should be increased, and will present this view with considerable logic and with increasing vigor. Under present law, however, farmers are unlikely to receive increased allotments for most of the basic crops, despite surplus reduction. Hence, under present law, disappointment awaits many farm families. Allotments to individual farms, based largely on history, depart to a considerable degree from considerations of equity and wise land use. It is extremely difficult to fit millions of diverse farm operations into a pattern based on a legal formula.

The program we have had leans unduly upon the parity concept, a weak measuring rod. Parity prices do not indicate what can be sold at satisfactory prices nor that competition can be satisfactorily met, either at home or abroad. Programs which are economically sound, administratively feasible and financially supportable simply do not flow from fixed formula calculations.

A quarter of a century ago, before the program of restricted production, the basic commodities brought in 26 percent of our farm income. Last year this share was reduced to 23 percent.

In recent weeks I have spoken to audiences in Louisiana, Illinois, and North Dakota regarding our three great crops: cotton, corn, and wheat. These are some of the facts I reported regarding the impact of past programs for these crops:

COTTON

Twenty-five years ago, before the acreage control program, cotton grew on more than 40 million acres of United States farmland. This year the allotment is 17.6 million acres. Three million acres of that allotment have gone into the soil bank. The actual acres of cotton produced this year seem likely to be about one-third as many as before the control program began.

Twenty-five years ago, before American cotton growers began to hold the price umbrella for foreign cotton producers, cotton production abroad totaled 11 million bales. This past year foreign cotton production was twice as great, 25 million bales.

World production of synthetic fibers has increased during the past 25 years from an insignificant quantity to an equivalent of more than 14 million bales, an amount larger than the 1956 United States cotton crop. Most of the growth in the world market, resulting from increased population and increased per capita consumption, has gone to foreign cotton and to manmade fibers. This growth has been marked. The worldwide per capita increase in consumption of all fibers during the past 20 years was from 8.2 pounds to 9.6 pounds. And the world population during this period increased by approximately 500 million persons.

Undoubtedly production of manmade fibers would have increased and foreign cotton production would have risen during the past 25 years even if there had been no program to restrict supplies and raise prices in the United States. But it is equally certain that the cotton program served to encourage our competition and speed its expansion.

While the growth in their markets has largely been captured by the competition, cotton farmers have been restricted in their decisions as to management of their farms.

Controls breed controls. Cotton production has been restrained from moving to the most efficient farms. Allotments to individual farms, whether based on history or on tillable cropland, are frequently considered unfair.

It is extremely difficult to fit nearly a million diverse cotton operations into a pattern based on a legal formula.

Cotton producers and agriculture in general should not sacrifice the efficient use of agricultural resources on the alter of price support. To do so would discredit price supports, which are and can be a useful stabilizing tool. As matters now stand, cotton growers are operating on a part capacity basis. Some producers have continued planting marginal acres to cotton for the main purpose of maintaining their historical acreage base.

With acreage controlled, producers have simply fed the land more fertilizer, used

more insecticides, and used other devices to produce almost as much cotton as before on far fewer acres. We should never overlook the ingenuity of the American farmer—the most efficient in all the world.

Not only have we kept marginal land in cotton, we have kept marginal producers in cotton, hurting both themselves and cotton growers in general. The result is to push up the national average unit cost of production of cotton to a level which handicaps American cotton in competing effectively against foreign cotton and synthetics.

Some marginal producers, of course, have withdrawn from cotton production. Some took jobs in the expanding industries of the South. Others went into the production of meat animals, dairy products, poultry, eggs, and other commodities. By and large, those who got out of marginal cotton production have improved their situation.

The decline of cotton has had many secondary effects. Small towns and trade centers which once serviced 40 million acres of cotton now service 15 million. Some of our transportation facilities are no longer needed, employment opportunities for local labor in the cotton industry have been reduced, the cottonseed industry has suffered.

What has been the cause of the difficulties experienced by farmers, rural tradesmen, and the cotton trade generally?

The major cause is that for many years, agricultural legislation has focused on a single objective, a high level of price support.

The legislative goal of a high support price based on parity, ignores the fact that cotton farmers are interested in net income, not just price per pound. And it is income that farmers spend, not price. Net income is the result of price times production minus costs.

Present legislation seeks to maintain the support price per pound through drastic restrictions on the right to produce and market. Inevitably this raises production costs per pound. The long-run result of reduced volume and higher unit costs of production is to reduce net income.

Back in 1929, before we embraced the single objective of high price supports, cotton lint brought in 13.4 percent of our farm income. Last year cotton brought in only 7.5 percent of our farm income.

Twice the cotton program has been rescued by war. Were it not for that fact, its shortcomings would have been highlighted long before now. Carryover built up to 13 million bales before World War II, and was substantially reduced following the end of the war. Carryover built up again prior to the Korean war, and the demands of war pulled down our stocks. From 1952 to 1956, we experienced the greatest inventory buildup of all time. This buildup is now being liquidated at tremendous cost, in a time of peace and abundance instead of a time of war and scarcity.

CORN

The present mandatory price support-acreage control program for corn, based on legal formulas, has not worked and is unworkable. Its objective is scarcity. Corn acreage, cut back by the control program, is now at the lowest level in 66 years. This program has reduced corn acreage in the Corn Belt and increased it in California, Washington, Oregon, and other areas. To a degree the Corn Belt has forgone its natural advantage in feed-grain production and has defaulted to the West, the South, and the Northeast. The corn-producing area has been spread out and diluted. Nineteen years ago, when the commercial corn area was laid out for acreage control purposes, it included parts of 12 States. Now it includes parts of 24. Originally it included 566 counties; now it includes 894.

But even more amazing is the size of the corn allotment in the commercial area. In 1938, the allotment totaled 40 million acres; for 1957, the allotment is 37 million acres. With a smaller pie being cut into more pieces, is it any wonder that most corn producers in the Corn Belt prefer to ignore their allotments?

Corn is the major feed grain, far exceeding in importance all the other feed grains combined. But the other feed grains are moving up. By cutting back on corn, the program has provided an opportunity for an expansion in the acreage of competing feed grains such as barley and sorghum grain.

Are corn farmers willing to move in the direction of competitive pricing, more freedom, and growing markets?

It appears that they are. More than 61 percent of the corn farmers who voted in last fall's referendum expressed a preference for greater freedom to plant, coupled with greater flexibility of price supports. Yet, because the law required a two-thirds vote to carry, corn farmers today continue under a program which the majority of them have disapproved.

Clearly, the corn farmers have given leadership in the direction of freedom and enterprise, the institutions which have made America great.

WHEAT

The level of price support has been a major incentive for overplanting, for planting merely to protect existing allotments and for excessive stimulation of yields. Last year, 1 out of every 3 wheat farmers in the United States considered it profitable to plant more than his allotment, and did so. More than 100 million bushels of wheat were produced on the excess acreage on farms which exceeded their allotments. In some cases, wheat producers found the price sufficiently attractive that they deliberately overplanted their allotments and paid a penalty of $1.12 per bushel.

Foreign nations, thinking about bread for their teeming millions, look at our high price and restrictions on production. They then expand wheat production even on rocky hillsides, while wheat production on our fertile prairies is prohibited. From 1928–29 to 1954–56, United States wheat production increased 18 percent while production in the rest of the world increased 42 percent. And much of the United States production during 1954–56 went into storage or was exported with the assistance of Government programs.

Back in 1925–29, before the control program, wheat brought in 7.5 percent of cash farm receipts in the United States. After nearly a quarter century of controls and supports, this percentage has fallen to 6.1.

Many wheat farmers have too small an allotment to be efficient or to earn a satisfactory income. Advancing technology makes it possible—indeed, almost imperative—for small wheat farmers to increase their acreage. But this will be practically impossible so long as we restrict production in an effort to achieve a high level of price support.

Farmers have the established right, in cooperation with Government, to undertake programs which increase the prices of their products if they wish to do so. As much as any other group, they have the moral right to influence supply and price in what they deem their own interest. They are entitled to the sympathetic help of their Government in meeting their economic problems, the same as any other group.

There hard-won rights should not be used in behalf of a program which has the long-run effect of losing markets and restricting farmers' rights to make their own decisions.

The price support program for the basic commodities was originally designed to combat the effects of a general depression, and had considerable justification on that basis. Strong measures were needed in those days.

The program was overhauled during the war for the purpose of expanding production, a need which it served in acceptable fashion.

Our present need is not that of combating a general depression, not of stimulating production to meet the needs of war. Our need is for agricultural adjustments to accommodate the tremendous technological revolution through which agriculture is passing.

There is much evidence that farmers themselves do not want the kind of regimentation that would really be needed to keep output under effective control. This attitude on the part of farmers has been reflected in actions taken by the Congress and by the executive branch from time to time. A partial list includes: minimum national allotments, minimum individual allotments, checking compliance on the basis of harvested rather than planted acres, use of an outmoded formula in computing the acres needed to provide a normal supply, and production on acres diverted out of the basic crops.

The Agricultural Act of 1954 was a necessary forward step. It established a beachhead of rationality in the setting of price support levels. No one ever maintained that it was an answer to all our farm problems. With the tremendous changes brought on by the technological revolution, no legislation can answer all the problems, or keep them answered.

The Agricultural Act of 1956 successfully defended the ground gained in 1954 and in addition provided a temporary weapon, the soil bank, for dealing directly with our heavy stocks.

We have made substantial progress with the help of these laws. The long downward slide of the farm economy has been checked and reversed. Farm prices have risen, farm incomes have increased, and surpluses have been reduced. Markets have been expanded. This is gratifying to the farmers and to the Nation. We now have an economic climate in which further remedial legislation can be considered objectively; this would have been impossible without the improvements brought about by the Agricultural Acts of 1954 and 1956. If I were content to look only at the present, I would report progress achieved rather than a problem unsolved.

We have many of the tools we need to reduce our surpluses and get agriculture into better balance. We have one tool that we don't need but which the old basic law requires us to use. That is the requirement that price supports be increased as soon as surpluses are moved. The real difficulty lies in the fact that with the price support formulas in the old basic law, once Government warehouses are emptied, the stage will be set to fill them again.

If market conditions warrant, the level of price support should flex upward, as I have often said, but an automatic legal formula lacks the necessary discernment.

The law does not provide adequate opportunity to meet the problems of advancing technology. For example, on the 55 million acre minimum national allotment we now produce more than enough wheat for all our needs, domestic and exports. On an allotment calculated to produce 10 million bales of cotton, we grew almost 15 million. On the smallest corn acreage allotment we ever had, and with a drought in the western Corn Belt, and with the beginnings of a soil bank, 1956 corn production approached an all-time record. And there is no sign that the current phase of the technological revolution in agriculture has run its course.

This, I say, is the new dimension in farm legislation.

The basic question to be answered regarding any price support legislation is this: Are the supports intended to stabilize and undergird the farm economy? Or are they intended to hold prices continually and substantially above competitive levels?

If the purpose is permanent high-level price support, then inevitably decision-making must be taken out of the hands of farmers and placed in the hands of Government. And Government must demonstrate willingness and ability, greater than has hitherto been shown, to make decisions that are necessary, though unpopular, and to make them stick.

The evidence is convincing that we should move in the direction of more freedom for our farmers to produce, coupled with less reliance on the establishment of price support levels by means of formulas.

There are various ways in which this might be done.

Authority for establishing support levels could be vested in the executive branch, with general guidelines provided by the Congress, as is now the case for most farm products.

This discretion could be within wide limits, as at present for the nonbasic commodities like the feed grains.

It could be within a range prescribed by law, as presently for a few designated nonbasic commodities.

Regardless of the range prescribed for establishing price supports, the present rigid formulas in price support legislation should be eliminated.

There are more than 200 farm products for which we are authorized to provide price supports. For six of these, the basic commodities, programs are in effect to control production and to support prices according to a legal formula. Yet for these six commodities, surpluses are greater, costs are higher, infringements on farmer decisions are more extensive and farmer complaints are more vociferous than for all the other 200 commodities combined.

As price supports move toward a more competitive level, acreage allotments could be increased. We would hope that in time they could be eliminated, crop by crop, as conditions warrant. This would have to be gradual, of course. The soil bank and the surplus disposal program would ease the adjustment; it would be well to begin moving away from controls while the soil bank and the surplus disposal program are operative.

We have all heard the argument that a reduction in the level of price support will result in increased production by causing farmers to plant more acres as they strive to maintain income. I know of no competent research which supports this view. I am impressed with the fact that when the Congress really wanted increased production, as during the war, it raised supports. When reduced production was wanted, as for potatoes some years ago, supports were reduced.

When technology is going forward and production is increasing very rapidly, as at present, an important function of a lower support level may be merely to slow the rate of the increase. When a car is moving forward rapidly, one may apply the brakes to reduce the rate of speed.

It will not be easy to win back markets. Markets lost over a period of 25 years cannot be regained overnight. A quarter century of sheltered existence is poor conditioning for the rough-and-tumble of market competition.

As I have often said, the present and prospective difficulties of our farm people are traceable at least in part to actions of their Government. Farmers were asked for all-out production during the war, and they responded magnificently. Production once expanded is difficult to contract. It would be unfair to ask 22 million farm people to bear the burden of adjustment for which the whole community is responsible.

I do not wish to appear to infer that agriculture's problems are exclusively the result of legislation. The post-war adjustment and the impact of the scientific revolution would be enough, by themselves, to cause serious problems, even with the best possible farm program, whatever that might be.

The American people will gladly undertake costs of great magnitude in order to solve a problem, but not to carry it indefinitely.

As we consider further changes in basic legislation, we must beware lest we fly from the known shortcomings of present programs to the unknown but possibly greater evils of other programs. In present circumstances, every remedy, good and bad, will be put forward. Old and new programs will be offered. These should be examined with open mind and with reference to known principle and established history. The farmers themselves, directly and through their organizations, should be given an opportunity to express themselves, since they are directly concerned.

A question has been promoted in the minds of some by my letter to Senator ELLENDER: Does the letter mean that the Secretary would like to scrap farm programs and return farmers to the unrestricted forces of the free market?

The answer to that question is an emphatic "No." Farmers need the enlightened help of their Government. They cannot be expected to submit to the full force of the competitive system when other major vocations are insulated from it to a greater or less degree. They cannot be expected to extricate themselves, without help, from a situation which is a national responsibility.

Farmers have fought a good fight, these past 25 years, for the right to equal economic status, before the law, as compared with other groups. They have been successful in that fight, and this committee has helped in that cause. I applaud and defend that victory.

There must, however, be better ways of using that victory than in behalf of programs which lose markets, restrict the opportunity for farmers to make their own decisions and pile up surpluses. I am ready to join with you in search of further needed improvements.

Price supports are only one of a large number of Government programs which help farm people. Research, education, sales promotion, market building, credit, marketing agreements, and conservation are worthwhile programs that should be continued and in some cases expanded. For those rural people on the lowest rungs of the economic ladder, the Rural Development Program can open new doors of opportunity.

Price supports, as they have operated for a number of commodities, including some of the feed grains and the oilseeds, have been generally helpful. I am not proposing that we scrap farm programs or that we scrap price support programs. I am saying that we need to revise some of our programs so that they better serve the needs of our farm people. We are now ready to take the next step in this direction.

My objection to the kind of price support we have had for the basic commodities is that it gives farmers not too much but too little. It gives them too small a market, too few of their own decisions, too small a net income and too little chance to meet their competition at home and abroad.

What farmers need is a program which will add to markets, increase net income, liberalize the opportunity to make their own decisions, and protect their hard won rights for equality of bargaining power.

I do not want to take anything away from farmers. Farm people and those who represent them should ask themselves whether a program of restriction and intended scarcity can ever mean as much in the long run as a program involving more freedom for market growth.

Mr. Chairman, I shall be happy to respond to such questions as you may have.

THE PRICE SUPPORT PROGRAM

Mr. BYRNES of Wisconsin. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. BYRNES of Wisconsin. Mr. Speaker, I have today introduced H. R. 7862 to amend section 22 of the Agricultural Adjustment Act.

Section 22 was designed to regulate imports of agricultural commodities when the duties imposed by the Tariff Act of 1930 are insufficient to protect program operations of the United States Department of Agriculture, with particular reference to the price support program. It has been made uncertain in application, however, due to the fact that our policy respecting foreign trade improvement through the tariff concessions and our policy regarding agricultural price supports appear at times to be antagonistic. Congress has never spelled out just how these two policies are to be correlated. As a result, there is a great deal of administrative confusion and pulling at cross purposes between those who conduct the programs of the Government to improve the economic position of our farmers and those who carry out the authority granted them by the Congress to remove barriers to our foreign trade through tariff concessions and other means.

In addition, the procedure under section 22 as it now stands is cumbersome, uncertain, and in many instances it is not invoked until harmful results with respect to the price support program have already taken place, and as currently administered, the section and the proclamations which have been issued by the President thereunder are subject to considerable evasion by importers.

These factors all have led to more costly operations under the price support program, the encouragement of unusual items of import into this country as part of the evasive techniques that have been developed by importers, and continual harassment of the industry as a result of such evasion.

At the present time, for example, we are confronted with a most flagrant evasion of a quota established pursuant to the present section 22.

On January 15 of this year, the United States Tariff Commission held a hearing to consider putting import quotas on butter oil. This commodity had never been imported into this country but when butter exporting nations found that butter oil was not subject to the quotas previously established under section 22, they started shipping this commodity. After the hearing, the Tariff Commission recommended to the President that butter oil and dairy products containing more than 45 percent butterfat be subject to quotas. The President, acting on this recommendation, placed a quota of 1,800,000 pounds on the importation of such commodities for the present calendar year, and 1,200,000 pounds per year thereafter.

In this connection, it is to be noted that the proclamation of the President

placed the quota on "butter substitutes, including butter oil, containing 45 percent or more of butterfat and classified under paragraph 709 of the Tariff Act of 1930, as amended."

This proclamation was issued April 18, 1957, and almost immediately there arrived in this country about 9 million pounds of a new commodity called exylone. Analysis indicates that this commodity contains 76.6 percent butterfat, 15.2 percent moisture, 8.2 percent sugar, and a trace of vanilla. The Customs Bureau classified this commodity under paragraph 1158 of the Tariff Act apparently holding it was neither butter, a butter substitute, or butter oil. Of course, the commodity will move immediately into use in ice cream manufacture, where the factor of flavor and some sugar will be of no consequence. The case of butter oil, and now the case of exylone, demonstrates the ease with which quotas established under present law can be evaded. The effect of such evasion upon the price support program is readily apparent. Every 4 pounds of exylone imported into this country eliminates the market for 3 pounds of butter which then must be purchased by the Government under the support program. When it is remembered that about one billion pounds of butter move in international commerce each year, and that it is very easy indeed to shift from the production of butter to the production of commoditise such as exylone, it should be apparent that the continuation of such a situation can easily wreck the price support program.

Bill H. R. 7862 has three major purposes:

First. It established some degree of coordination between our foreign-trade policy and our domestic agricultural power. As things stand now, and have for many years, there is no clearcut line of demarcation as to where the price policy regarding domestic agriculture and our foreign-trade policy begins or ends. The bill makes it clear that in no event should imports exceed the 5-year average as long as the price of such commodities in the United States is below 90 percent of parity.

Second. Since much of the time of the dairy industry and other industries in proceedings before the Tariff Commission has been consumed by arguments as to whether a given commodity is competitive or noncompetitive with a similar commodity in this country, a determination of this question will be made by the Secretary of Agriculture.

Third. The bill would stop the peculiar twists and turns in our foreign trade in dairy products under which commodities are imported into this country, not on the basis of need for them, or as a part of our usual market supply, but solely to evade and circumvent our import regulations. Any commodities which had not previously been imported into the United States and which are found by the Secretary of Agriculture to be competitive with or substitutable for any agricultural commodity under the support program would automatically be embargoed during the period of a quota restriction.

The provisions of H. R. 7862 may be summarized as follows:

Subsection (a): Statement of policy.

Subsection (b): Imposes a quota equivalent to the average imports for the preceding 5 years on any commodity with respect to which a support program is being conducted. This quota to remain in effect as long as the market price of such supported commodity is below 90 percent of parity.

Subsection (c): Makes subsection (b) applicable to any product not previously imported into the United States or any newly developed product which the Secretary of Agriculture finds is competitive with or substitutable for any agricultural commodity being supported under the price-support program.

Subsections (d), (e), (f), (g), (h), and (i) are continuations of the present provisions of section 22. The only change in the current language of section 22 as covered by these subsections is the elimination of the emergency powers of the President under section 22 to take action to apply quotas and limitations prior to a hearing before the Tariff Commission.

Section 2 continues, in effect, current quotas as proclaimed by the President under the present provisions of section 22 of the Agricultural Adjustment Act, where such quotas provide greater protection than the application of the automatic quotas under subsection (b).

PHILIPPINE MEMORIAL HOSPITAL

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I wish to call attention to the very fine editorial which appeared in the New York Times today regarding the importance of expanding the Veterans' Memorial Hospital in the Philippines. It might become a great research center for the entire eastern part of the world. I visualize the importance and far reaching value of such a project in many ways.

The people of the Philippines have expressed deep gratitude for the hospital. I instantly think of their great contribution to us in loyalty and fighting men—we owe them much—they have been our best friends.

The editorial follows:

A PHILIPPINE MEMORIAL

There is now an opportunity greatly to expand the functions and scope of the Veterans' Memorial Hospital in Manila. Thus far, operating in a sense as an adjunct of the United States Veterans' Administration inasmuch as its costs have been reimbursed, the hospital has been obliged to work in a limited field. This can be modified as the Philippines take over complete responsibility for the service, which under present law will take place by 1960.

Meanwhile, modest amendments to existing legislation and perhaps some new authorization can make it possible to embark on a much more ambitious program. What has been suggested in the Philippines and what will probably be discussed at this session of Congress is the creation of a great Asian medical center with the Veterans' Memorial Hospital as its nucleus. Its primary service for veterans would not be changed, but it could be enlarged and thrown open to others.

Most important, it could be made an invaluable place for research and training in the field of tropical medicine. The possibilities presented are enormous and the hospital and medical center could become the greatest and most useful memorial to the fruitful Philippine-American association. The background for such a project is almost ideal. The Philippines have been a magnificent laboratory in the field of tropical medicine for almost three generations. In addition to this scientific background, however, is the geographical background. Manila could become a training point for young men from Thailand, Vietnam, Cambodia, Laos, and even Indonesia and Malaya. It could become a truly "Asian" health center. This is not an idle dream. It is a practical possibility.

GENERAL IMPORT QUOTA BILL

The SPEAKER. Under the previous order of the House, the gentleman from West Virginia [Mr. BAILEY] is recognized for 30 minutes.

Mr. BAILEY. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include related matter.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. BAILEY. Mr. Speaker, on request of the House Committee on Ways and Means, the Departments of State and Commerce have recently made reports on the general import quota bill introduced by myself and other members of this body.

At this point, Mr. Speaker, I wish to insert in the RECORD comments of the Department of State on the legislation in question:

APRIL 8, 1957.

The Honorable JERE COOPER,
Chairman, Committee on Ways and Means, House of Representatives.

DEAR MR. COOPER: This is in reply to your letter of March 25, 1957, signed by Mr. Irwin, in which you requested the views and recommendations of the Department of State on H. R. 2566 and H. R. 2776, bills "To regulate the foreign commerce of the United States by establishing import quotas under specified conditions, and for other purposes." After a careful examination of H. R. 2566 and H. R. 2776 this Department has concluded that their enactment would be harmful to the national interest.

The United States has generally avoided the use of import quotas as a means of regulating international trade. This policy has been based on its conviction that import quotas create more problems than they solve.

The establishment and operation of an import quota is inherently complex. It requires the meticulous definition of the product which it to be subjected to the quota, and the establishment of numerous import regulations and licenses, and the periodic determination of the size of the quota in terms of its quantity and value, and often in terms of the countries of origin of the product.

The complex character of an import quota system is illustrated by the proposed legislation which would require the classification of all foreign industries exporting merchandise to the United States into seven

categories based on the average wage payments made to the workers in those industries. In view of the thousands of industries throughout the world which export some of their products to this country, the statistical and analytical problems raised by this requirement would appear to be formidable and may well be insuperable. The same may also be said regarding the provisions of the bills relating to the reallocation of the country quotas to reflect alterations in the wage levels of the industries exporting to the United States. The complexity of these features of the bills would appear to pose substantial administrative problems for the Government agencies concerned. For the American foreign trade community they would make long-term planning extremely difficult by making uncertain the status of foreign export industries under the law.

In establishing import quotas, extensive efforts are required to reconcile the interests of the domestic producers, importers, and consumers of the product involved. These efforts are rarely successful since a purpose of an import quota is to give one segment of the population an economic advantage which it would not normally possess under the free enterprise system. The attempts of Government to balance these interests and to enforce the control system are not only time consuming but also costly to the extent that they require special staffs and regulations. Thus, in addition to their complexity, import quotas may also lead to a widening of the powers of the Federal Government over the economy. This was noted by Secretary of State Dulles in his testimony before the Ways and Means Committee on H. R. 1 on January 17, 1955, when he declared that the use of quotas "* * * tends toward the socialization of an industry" and that the process of distributing quotas imposes upon those who are subjected to them "almost a cartel system, and an allocation of the market."

Import quotas are also objectionable in that they invite retaliation by foreign governments. The United States has made substantial progress since the end of World War II in obtaining the elimination of import quotas imposed by many foreign governments for balance-of-payments reasons. This program must be maintained and continued, but it would be placed in jeopardy if the United States were to adopt a trade policy distinguished by the extensive use of quotas directed against imports since other governments could be expected to anticipate problems for their exporters under the United States legislation and to prepare legislative or administrative measures permitting prompt retaliation against imports from the United States when those problems would arise.

The prosperity of the United States is importantly associated with its merchandise export trade, which amounted to approximately $17 billion dollars last year. This Department would not wish to see legislation enacted which could jeopardize the continued sound expansion of that trade by inviting retaliation against our exports. This Department believes that enactment of H. R. 2566 and H. R. 2776 would lead to such retaliation.

In this connection it is noted that the bills would permit the imposition of quotas notwithstanding any international agreement relating to tariffs or trade entered into by the United States or to be entered into hereafter. This section would, in effect, notify foreign governments that none of the benefits they had expected to obtain from the United States in return for benefits granted by them could be counted on to continue. Thus, the bills in question would raise doubts in the minds of other governments regarding the good faith of the United States with respect to obligations freely undertaken by it under the trade agreements program established by the Congress.

It is noted that H. R. 2566 and H. R. 2776 provide that a Tariff Commission order establishing a tariff quota or an absolute quota or modifying either shall become effective as law within 15 days from the date of its preparation. These provisions overlook the broad foreign policy and national security considerations which might make it undesirable for a quota to be proclaimed. For many countries located in areas of strategic and political importance to the United States, the maintenance of a sound export trade with the United States means the difference between a stable and an unstable political system. Because of its concern for the strengthening of the free world, the United States has fostered a policy designed to expand international trade among the nations of the free world on a mutually advantageous basis. This Department believes that the President alone is in a position to weigh the various considerations of domestic and foreign policy which should be taken into account before any measure, potentially as far-reaching in its impact on our foreign relations as an import quota, is established.

It is certain that the political and other benefits which have accrued to the United States as a result of its policy of eliminating unnecessary barriers to world trade could not be maintained if this country were to reverse that policy and accept the restrictive import policy which H. R. 2566 and H. R. 2776 would require.

In his testimony before the Ways and Means Committee, which was referred to above, Secretary of State Dulles made the point that import quotas often produce more evils than those which they were designed to cure. Their basic complexity, their adverse impact on the free enterprise system, the retaliation they invite against our imports, and the disturbing affects they can have on our political and other relations with friendly governments support the Secretary's view. It is for these reasons that this Department is opposed to the enactment of H. R. 2566 and H. R. 2776.

The Department has been advised by the Bureau of the Budget that there is no objection to the submission of this report, and for the reasons indicated above enactment of this legislation would not be in accord with the program of the President.

Sincerely yours,

ROBERT C. HILL,
Assistant Secretary
(For the Secretary of State).

I would also like, Mr. Speaker, to insert the comments of the Department of Commerce at this point:

THE SECRETARY OF COMMERCE,
Washington, April 18, 1957.

Hon. JERE COOPER,
Chairman, Committee on Ways and Means, House of Representatives, Washington, D. C.

DEAR MR. CHAIRMAN: Reference is made to your letter of January 29, 1957, in which you request the views of this Department regarding H. R. 961 and H. R. 2821, bills to regulate the foreign commerce of the United States by establishing import quotas under specified conditions, and for other purposes.

This will also reply to your letter of March 25, 1957, requesting our views on H. R. 2566 and H. R. 2776, which are similar bills.

These bills would authorize the Tariff Commission to establish import quotas, and in the case of H. R. 2821 to adjust import duties, when there is injury to a domestic industry as defined by the provisions of the bills. Injury is determined in accordance with a fixed set of rules based on changes in the percentage share of imports in domestic consumption. The import quotas are also based on the percent of domestic consumption provided by imports, with an adjustment factor for changes in the wage levels paid by the foreign producers as compared with domestic wage scales.

These bills assume that all competitive imports in excess of fixed percentages of domestic consumption are automatically injurious to domestic business. No consideration is given to the differences in the availability of domestic production to fill consumption demands. The method of determining import quotas gives no consideration to the levels of import dutites or prices.

The trade agreement legislation currently in force, the Trade Agreements Act of 1934 and the Trade Agreement Extension Act of 1951, as amended and extended, contains safeguards such as the "peril point" injury caused by imports. The variety of conditions affecting domestic industries require that full investigations of possible injury be made, as provided in current legislation, rather than restricting consideration to the arithmetical relationship between imports and consumption.

In the long run such a tariff system would result in a series of rigid import quotas on all competitive imports. It is our belief that a wide extension of the use of import quotas would seriously hamper our foreign trade without benefit to our domestic economy. Such rigid restrictions could also have a disastrous effect on our export trade should other countries adopt similar systems of import quotas.

For these reasons we recommend against the enactment of these bills.

We have been advised by the Bureau of the Budget that it would interpose no objection to the submission of this report to your committee, and further that the enactment of these bills would not be in accord with the program of the President.

Sincerely yours,

WALTER WILLIAMS,
Acting Secretary of Commerce.

That these reports from the executive branch would be unfavorable was a foregone conclusion. Our State Department has crusaded against import quotas for two decades and in 1947 succeeded in writing into the General Agreement on Tariffs and Trade or GATT a general ban on import quotas. This ban was the outgrowth of one particular view on a question that is controversial.

The Department, of course, had not the least right to commit this country to such a ban. We do not treat controversial problems by banning them from consideration. The State Department's action was the same as agreeing on behalf of Congress, and without asking Congress, that this body would give up a useful, practical, and effective method of regulating our foreign commerce because such method was not to the Department's liking. It is amazing that the State Department could advance any such preposterous renunciation for Congress. What notion the Department could have about the functions of Congress as defined in the Constitution must remain a mystery unless the Department holds the Constitution and the people whose rights it defines, in very low esteem.

The Congress under the Constitution is empowered to regulate the foreign commerce of this country. No one can deny that import quotas are a means of regulating foreign commerce. The Department of State has never satisfactorily explained where it derived the

authority to renounce import quotas on behalf of the United States. It has merely made noises. Obviously not even Congress itself could authorize the State Department to act for Congress in this manner. Congress cannot renounce doing what the Constitution says it is to do. Nor can it authorize the executive to make international agreements that will impair, ensnarl or compromise this express power fixed by the Constitution.

Yet this is what the State Department did in Geneva in 1947 when it signed GATT on behalf of the President. By agreeing to a contractual commitment with other countries not to impose import quotas, that is, not to establish or maintain them, the State Department interposed an international obligation between the legislative power of Congress and the freedom to exercise that power.

The ability of the State Department through an executive agreement thus to frustrate Congress would enable that Department to drive Congress out of its own domain and reduce it to an estate of mumbling futility.

The evident obstinacy of that Department as revealed in its letter to the Ways and Means Committee merits the sharpest rebuke. Far from recognizing the pernicious character of its act in 1947 the State Department makes bold to drive home the very argument that should reveal to it the very impudence of its position.

Says the Department's letter, dated April 8, 1957:

> Thus, the bills in question (i. e., the import quota bills) would raise doubts in the minds of other governments regarding the good faith of the United States with respect to obligations freely undertaken by it under the trade agreements program established by the Congress.

I can only ask by what theory of government the State Department could arrive at such an interpretation. The statement proves completely what I have just said, namely, that the Department elects to act as if Congress had authorized it to make an international agreement under the terms of which Congress renounced its right to legislate as it sees fit. True, the Department denies that it has done this. It says Congress still has the right to legislate as it sees fit.

This is, of course, an intolerable interpretation. The right to legislate at the expense of violating our solemn commitments is no right at all; and the State Department should not suggest that it is. In saying that it is a right the Department indicates that either it seeks to fool Congress and the electorate or other countries. It cannot have it both ways.

If our international commitments are solid, as I hope they are, and as they should be, then Congress has no right whatsoever to break them. To say that Congress has such a right represents duplicity, or concealment, or both, or something worse.

It must be that the Department has never looked this proposition in the face. Its acceptance would make it appear that the creators of our Constitution were agents of duplicity and intrigue, or indeed architects of Government in which craftiness and underhanded schemes were accepted methods of dealing. Delegations of power under this view open into dim labyrinths where nobody can be identified and concealment is a part of the game.

It is abhorrent to think that the leading executive department of our Government should have talked itself into such an untenable and infamous position.

I shall ask the Secretary of State to take time out from his excursions to the "brink" to think through the proposition that the State Department may make executive agreements that place an international obligation between the right of Congress to legislate and its actual freedom to do so. Also I shall ask the Secretary to sit down long enough to tell us whether Congress itself, be it the 74th Congress, or the 85th, or any other, can authorize the executive to make international agreements in which it is a condition of compliance that a future Congress will not carry out its function under the Constitution.

Until now the State Department has evaded completely the far-reaching and noxious implications of such a proposition. It is time for a showdown. If the Department can make end runs around Congress in this fashion there is no point in even trying to legislate. By hook or crook the State Department will nullify every intent of Congress that is not in accord with State Department policy.

Let me quote a little further from the State Department letter. It says:

> In this connection it is noted that the bills would permit the imposition of quotas notwithstanding any international agreement relating to tariffs or trade entered into by the United States or to be entered into hereafter.

The general import quota bill would indeed permit the imposition of import quotas under conditions set forth in the bill. Where else is the authority to legislate to be found? Must we go to GATT to find out whether and in what manner we may legislate?

If so, do we now live under two constitutions?

One thing is sure. Our own Constitution authorizes Congress to impose import quotas. Then from what other source must Congress get its power? From Geneva? If so, by what channel did such power move to Geneva?

Did Congress at any time shift any part of the Constitution to Geneva? Or, more specifically, could Congress itself by any mere enactment shift our Constitution anywhere or change any part of it? Or would any change in our basic law have to be brought about by amendment in accordance with its own provisions?

These questions answer themselves.

Yet the State Department complains that the import quota bills "would permit the imposition of quotas notwithstanding any international agreement relating to tariffs or trade."

Very well; but who went so far out of line as to make such an inexcusable agreement? Who so far forgot that we even had a Constitution as to enter into an agreement such as GATT? Are the clear words of the Constitution mere mouthings of irresponsible opportunists or do they mean what they say?

The State Department is completely out of line and if they have anyone in their legal department who is worth his salt they must know it. Unquestionably the Department hopes it can cow and intimidate Congress. And the Department obviously will not hesitate to ride roughshod across the lines of legislative power if we let it do so.

As I said in the beginning, it was a foregone conclusion that the State Department and any or all of the other satellite executive departments would oppose the import-quota bills. No one who has anything to do with foreign trade would long remain on the rolls of such departments if he did not bow and say "amen" to the top policy.

The only question was what objections would be raised to the bills. In order to give some of the answers, it was evidently necessary to misread the provisions of the bills or to misinterpret them. I shall not go into the details of the two letters. Some of my colleagues who also introduced the bill may have something to say about the objections raised by the State and the Commerce Departments.

I do want to say that we have come to a pretty pass when the State Department draws on powers delegated to it through the President to tell the Congress that it must not or cannot legislate against the wishes of the Department. The Department in a moment of forgetfulness or exaggerated sense of power, told other countries that Congress would not do what the State Department tells it not to do. Now, are we in our consitutional position to be bound by such State Department foolhardiness? I say it is time we told the Department to get back on the track of straight dealing and, above all, to stop making such ill-advised and trouble-breeding agreements as GATT.

At this time, Mr. Speaker, I desire to yield to the gentleman from Nebraska [Mr. WEAVER].

Mr. WEAVER. Mr. Speaker, I ask unanimous consent that the gentleman from Pennsylvania [Mr. VAN ZANDT], may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. VAN ZANDT. Mr. Speaker, I number myself among the sponsors of the general import quota bill and I support fully what my colleague, the gentleman from West Virginia [Mr. BAILEY], has said.

There can be no question about the State Department's right nor that of the Department of Commerce to comment or give a report on bills before Congress. All our committees send bills to the executive departments for reports.

But something has gone far wrong when the State Department says, as it does in its letter to the Ways and Means Committee, that our proposed legislation would violate obligations freely undertaken by the United States.

It is no healthy state of affairs when a bill that lies entirely within the enumerated powers conferred upon Congress by the Constitution, such as the regulation of foreign commerce, would, if enacted, breach the foreign obligations freely undertaken by the United States. We ask ourselves, how can this be?

The answer is that in signing the General Agreement on Tariffs and Trade in 1947 the State Department agreed to outlaw import quotas. But how can a mere executive agreement such as the general agreement—GATT—narrow the field of legislation of Congress? Such agreements do not bind Congress; at least that is the usual interpretation.

The warning in the State Department's letter must therefore spring from some new doctrine. Under this doctrine that Department could soon become supreme in our Government. What should stop the Department from making international agreements on immigration and then warning Congress against proposed legislation? Or on civil rights or even taxation? There need be no limit to the indirect legislative power that might thus be taken over by the Department of State.

The basis of the warning issued by the State Department in the present case, to repeat, is to be found, as the gentleman from West Virginia [Mr. BAILEY] has also pointed out, in the general agreement. GATT is the instrument that the State Department has been pushing for 10 years as the international instrument for controlling our commerce.

Let us see where we stand. The State Department continues publicly to disavow any intention to trench upon the powers of Congress in shaping our tariff and trade policies. Yet almost every official pronouncement of the Department on this subject betrays its real intent. The letter to the Ways and Means Committee merely shows how deeply rooted is the thinking on this point. Despite the general disavowals of intent the contents of this letter are a dead giveaway. They cannot be read without getting the impression that the Department feels quite secure in its obvious presumption that the field of tariffs and trade is its own private domain; and that in entering it or seeking to reenter it Congress is guilty of trespassing.

Let us examine the letter itself.

The Department complains in it that the establishment and operation of import quotas "is inherently complex." Coming from the Department that generated the barbed-wire entanglement known as GATT this seems a strange objection indeed.

The fourth paragraph of the letter says that the import quota bill would require the classification "of all foreign industries exporting merchandise to the United States into seven categories based on the average wage payments made to the workers in those industries."

To say this the writer must have failed to read the bill. The bill says that foreign industries "may be classified" in the manner specified. As a practical matter actual classification would be necessary only in individual cases, as when a foreign industry claimed that it was entitled to a larger quota because its wages had increased sufficiently to qualify under the bill. To claim as the State Department did in its letter, that "the statistical and analytical problems raised by this requirement would appear to be formidable and may well be insuperable" is about as accurate as saying that our immigration laws require us to know his name and address of all people in the countries from which immigrants might come. It would be just about as sensible to keep a record of wages paid in the various industries in other countries for the purposes of the import quota bill as it would be to keep a card catalog of all persons in the world eligible to emigrate to the United States as a means of enforcing our immigration laws.

Of course, what the State Department might better have done, rather than slugging blindly, would have been to say that no matter what kind of a bill was submitted to it, the Department would object to it and oppose it so long as it authorized the use of import quotas. The Department's mind is hermetically sealed against the entertainment of any kind of an import quota bill. It made up its mind 20 years ago. Its political philosophy froze solid at that time and neither commonsense nor experience will prevail against it.

I believe that the real complaint of the State Department is to be found in the sentence which reads:

> This Department believes that the President alone is in a position to weigh the various considerations of domestic and foreign policy which should be taken into account before any measure, potentially as far-reaching in its impact on our foreign relations as an import quota, is established.

Here we have the Department's view in a nutshell; and we should not forget that the President looks to that Department as his guide and his source of information.

The real sense and meaning of this view is that the Constitution is wrong. The President and not Congress should regulate the foreign commerce of the United States.

Fortunately the Constitution cannot be changed by a mere bureaucratic assertion. The State Department's declaration that the President alone is in a position to deal with the question of import quotas does not change the Constitution; nor does the declaration alter the fact that not everybody agrees with the idea that the President alone is in such and such a position.

In spite of this the State Department seeks to have its own particular view prevail.

Beyond the assertion about the President's unique position, the State Department makes it clear that it believes that tariffs and quotas should be regarded as pawns in the conduct of foreign relations. Says the Department:

> Because of its concern for the strengthening of the free world the United States has fostered a policy designed to expand international trade among the nations of the free world of a mutually advantageous basis.

There is nothing in the general import quota bill that would stand in the way of sharing our market with imports. In fact the bill contemplates exactly that. It makes provision for that very thing. What it does not contemplate is laying our market for any product open to progressive capture by imports. We do not believe that we owe to other countries any such prospect, nor do we think that any other country has a right or even an expectation that we should let them drive our industries out of business.

The import quota combined with the tariff or the import quota by itself is the very instrument that is needed to prevent imports from taking the whole market from our own producers of certain products, or such a large share of it that many of our producers would knock each other out in competing for what was left of the market.

I do not believe that we owe it to other countries to allow such a state of affairs to develop; nor do we owe it to those of our producers who export to other markets. It is not sensible policy to expose some of our producers to ruin in order to make foreign trade more profitable for others.

Experience during the past 10 years has shown that the use of the tariff alone as a means of regulating import competition leaves much to be desired. In many cases the amount of tariff increase that would be possible under the escape clause of the Trade Agreements Act would be wholly inadequate. This is especially true, as in the case of residual fuel oil, where the duty is specific rather than ad valorem. The sharp rise in prices since the end of World War II has almost nullified the protective effect of our specific duties. On top of that many of them have been reduced.

The general import quota bill would permit the establishment of tariff quotas. This would make it possible to allow imports to come in at the reduced rate up to a specified level. Beyond that a higher rate would apply. Then, if necessary, a secondary dam could be erected to keep imports within limits. Specific rates could be brought into line with the price increases. If, for example, the price of a product has doubled, the specific rate could be doubled when used in conjunction with a tariff quota. In this way its protective effect would be maintained instead of leeched away by the inflation of prices. If the price of the product in question in 1930 was $1 per pound and the specific duty was 25 cents per pound, and if since then the price has risen to $2, the duty beyond a specified volume of imports could be raised from 25 cents to 50 cents to compensate for the price increase. This higher rate would, however, not apply to the import volume allowed to come in at the existing rate. It would apply only to imports in excess of that level.

Depending on the postwar record of imports, a volume equal to 10 percent, 15 percent, 30 percent, 50 percent or even a higher share of the market might be allowed to come in before the higher rate would apply.

Thus it is clear that the general import quota bill is not designed as a restrictive trade measure. One of its purposes is to introduce some order and

predictability into import competition without stifling trade. Another purpose is to offset the high vulnerability created for our industries by the national policies that have greatly increased the costs of production in this country.

The bill in principle is no more than extension of the benefits of section 22 of the Agricultural Adjustment Act to industry—and for reasons just as sound as those that justify section 22. The high rigid costs that have been saddled on our industries by a combination of various national laws make our industries just as vulnerable to import competition as are our agricultural producers.

Mr. Speaker, I am not impressed by the State Department objections to the general import quota bill.

That the demand for import quotas has grown tremendously as a result of postwar experience with import competition cannot be denied. The time has come for serious consideration of legislation that would authorize a competent agency of Congress to impose import quotas under conditions specified by Congress.

The Ways and Means Committee should hold hearings during this session of Congress on the bill that I along with others have introduced to reshape and make more effective our tariff and trade regulatory measures. It is not only not necessary to wait until the second session of this Congress to begin such hearings; they should be gotten underway without further delay.

Mr. LANHAM. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I shall be glad to yield to the gentleman from Georgia, one of the coauthors of the legislation.

Mr. LANHAM. Mr. Speaker, I have a great deal of interest in the establishment of import quotas. Last year I introduced a general bill that would have empowered the Tariff Commission to impose absolute quotas if it found that the trend in imports of a particular product was as described in the bill.

This year I introduced a modified bill to include tariff quotas as well as absolute quotas. I believe that tariff quotas are more easily administered than absolute quotas and also would be more flexible.

My interest in import quotas was aroused by the great increase in imports of textiles, principally from Japan in recent years. Before that time I had fully supported the trade-agreements program in Congress on the grounds that it promoted trade and was a good thing. Also I guess I listened a little too credulously to the assurances of the executive branch, particularly the State Department, that no domestic industry would be allowed to be seriously injured by imports.

Well, I have learned my lesson, along with many others from my section of the country who have also had their eyes opened.

We found that the escape-clause procedure and section 22 of the Agricultural Adjustment Act were apparently only so many words that did not really mean what they said.

At the same time we woke up to the fact that the tariff rates that could be applied even if the escape clause worked, would be wholly inadequate to correct the situation.

These considerations drove me and others to seek other methods of preventing imports from wholly disorganizing and disrupting our market for textiles by saturating it with ever-increasing volumes of imports. This quest led us to the import quota and after considerable inquiry I introduced the first bill in the 84th Congress. I am convinced that in the quota system lies the answer, even though not a perfect one, to our problem.

For this reason I was greatly interested in the reaction of the two executive departments, State and Commerce, to the import-quota bills introduced by myself and others. I agree with the gentleman from West Virginia [Mr. BAILEY] that it was obvious beforehand that neither department would have a good word to say about import quotas. It was only a question of what they would be able to say against the identical bills that have been introduced.

I was amazed at the extent of misinterpretation reflected in the replies.

The Department of Commerce said:

> These bills assume that all competitive imports in excess of fixed percentages of domestic consumption are automatically injurious to domestic business.

The bills do not assume such injury. They create a presumption to that effect but the presumption is subject to rebuttal by facts to the contrary. Also it is wrong to say that imports in excess of "fixed percentages" of domestic consumption are assumed to be injurious. The bills fix no percentages.

The share of the market that must be supplied by imports in order to create a presumption of injury may differ from product to product. The bills aim at the trend in the share of the market captured by imports, not at the share of the market itself.

Obviously it is the trend in the share of the market supplied by imports that tells us something about the competitive situation. If imports have stood still since 1948, which is the point of departure fixed in the bill, or have increased no more than the domestic consumption itself has expanded, they cannot be regarded as very harmful, unless indeed they got a jump on our own producers during the war and captured a heavy share of the market while our producers devoted themselves to war production. There is special provision in the bills to meet that kind of a situation.

On the other hand, if imports successively captured an increasing share of our market, that is, gained more than our own producers, even if the latter also expanded, then obviously some decided competitive advantage must have boosted imports.

I am convinced that the competitive advantage in the case of textile imports lay principally if not exclusively in the very low wages paid in Japan compared with those paid by our own industry. Japanese mills have modern machinery and equipment and are therefore in an excellent position, considering their low wages, to produce at a cost far below our own.

This gap between their costs and ours enabled the Japanese to expand their exports to this country very rapidly. By leaps and bounds they captured larger and larger shares of our market for particular kinds of textiles and textile garments, such as velveteens, ginghams, damasks, blouses, sport shirts, and so forth. The import quota bill that I have introduced, and those like it, would make it possible to put a quota on the particular textile product in question, such as velveteens or damasks, while leaving alone those that are not in trouble.

It is a situation of the kind found in textile imports in the past several years that would make a product eligible for an import quota. The tariff by itself would do very little unless it were raised to a higher point than would be possible under the escape clause. Should the latter be done by legislation it would unnecessarily hurt the overall import trade.

What my bill proposes is to let imports up to a level ascertainable by the provisions of the bill come in at the present low rate of duty. Imports above that level would become subject to the 1930 rate of duty. Should this not be high enough to check imports, as it might well fail to do in some cases, a secondary dam, so to speak, 50 percent higher than the 1930 rate would be applied to all imports above this secondary level.

What percentage of the market must have been captured by imports in order to create eligibility for an import quota under the bill obviously cannot be predetermined for any product. It is a question of fact to be ascertained in each case. The determining factor is the upward swing in the share of the market captured by the imports.

There is good reason for this. It is the gain made by imports, especially if it is startling, that causes alarms among the domestic producers. It is the upward trend of imports that throws planning for the future out of gear. The uncertainty and justified fear that such a trend provokes, disrupt orderly marketing and destroy confidence. The low prices at which imports are offered upset all production and inventory calculations.

Now, if by limiting imports through application of the brakes at ascertainable but unfixed levels, these disorganizing and upsetting factors could be brought under control, that is what we should do. That is the purpose of these bills.

If a tariff quota would not remedy the situation an absolute quota could be used. Under the bills introduced this could be done only if imports had already captured 25 percent or more of the market. This was provided because absolute quotas, limiting as they do, the imports to a specified quantity, require more administrative work and supervision than tariff quotas. The bills provide that absolute quotas are to be used only if in the judgment of the Tariff Commission a tariff quota would not remedy the injury and then only if imports supply 25 percent or more of the market.

It is difficult, in view of what I have just said, to understand or to explain

the Department of Commerce's observation that:

> In the long run such a tariff system would result in a series of rigid import quotas on all competitive imports.

This seems to me like complete nonsense. I repeat, it looks as if the Department had not read the bills very carefully. There would be no rigid quotas at any time. Not even the absolute quotas would be rigid. They would be geared to domestic consumption.

Also I am sure that quotas would not be extended to all competitive imports. Only some of them would qualify under the eligibility rules.

Elsewhere the Commerce Department letter says that current trade agreement legislation "contains safeguards such as the 'peril point.'" It seems unnecessary to answer such an observation. Members of Congress know all too well the nullification of the escape clause and similar administrative remedies that has occurred at the hands of the President since 1951 when the escape clause was enacted, to be fooled by any such assurance and safeguards. It seems strange that the Department of Commerce would chafe our sensibilities in this manner.

By and large the Commerce Department's report to the Ways and Means Committee can hardly be taken seriously.

What of the State Department's reply? The Member preceding me has already paid his respects to this reply in clear terms. I agree with his conclusion that the State Department is concerned above all with retaining unto itself the regulation of our foreign commerce.

This was well demonstrated when it accepted the so-called arrangement with Japan whereby that country agreed to place a quota limitation on its cotton textile exports to the United States.

Now, a quota limitation is a quota limitation whether it is in the form of an export or an import quota. The State Department is opposed to quotas. It went to great lengths to prevent our own laws on the subject from being applied. Why then was it agreeable to making an arrangement with Japan that had the same result?

In my opinion what was at stake in the State Department's mind was not the principle of a quota limitation, which the Department accepted, but rather State Department control of our foreign trade. The Department preferred violating its own policy toward quotas to the application of a remedy controlled by law and therefore by Congress.

This is the real battle over the quota bills. The State Department's letter to the Ways and Means Committee, which has been inserted into the Record for reference, strikes me very much as the reaction of a spoiled child that refuses to give up what does not belong to it but the possession of which it has enjoyed over a period of time.

"The President alone," says the letter, "is in a position to weigh the various considerations of domestic and foreign policy that should be taken into account" before such a thing as an import quota is established.

Congress is not competent; the Tariff Commission is not competent—neither is in a position, according to the State Department, to do what the Constitution tells the Congress to do.

This is the very heart of the issue. The State Department, seeing the possible loss of its influence over the regulation of our foreign commerce, is willing to throw over the Constitution. The notion that the welfare of our industry, our farmers and the workers employed by them, should be thrown into the churning pot of foreign relations has become so deep seated in the State Department that it easily outweighs constitutional considerations in its eyes. For that Department foreign affairs are the beginning and end of things. They rise above all other considerations.

I do not agree.

Foreign affairs are, indeed, important but so are other considerations. Of course, the State Department might be embarrassed if its power over our foreign trade were broken; but only so if it has over the years misrepresented to other countries the true state of affairs. It may be—in fact, it is probable—that State Department representatives have slightly exaggerated their powers in conferences with foreign countries, and presumed to speak for the United States in matters in which it was not their place nor within their authority to commit the United States.

This sort of irresponsibility or lack of proper regard for the division of authority should not, however, place the State Department in a position to lay down the law to Congress. Quite the contrary. Having by misinterpretation or willful usurpation of power moved itself into a position of embarrassment should Congress legislate constitutionally in its own field, why should the State Department be in a position to lecture Congress on its functions?

The Department's report states that Secretary of State Dulles in his testimony before the Ways and Means Committee made the point that import quotas often produce more evils than those they were designed to cure.

This is, of course, purely a naked assertion, but it has some truth in it if the quotas referred to are the kind used so extensively by other countries. I will be the first to admit that import quotas imposed at will, arbitrarily, might be as they have been, destructive of trade, and forerunners of retaliation. But that fact does not condemn quotas as such any more than the possible lethal character of a knife condemns all cutlery.

The quota system that others and myself have proposed is far from arbitrary. It is designed to meet the stubborn problems that have been cast up in recent years under the trade agreements program and that have not otherwise been solved. The State Department's attitude of rule or ruin as reflected in its report is of no help.

The Ways and Means Committee itself should hold hearings in order to open the subject to legislative consideration. This should be done in the near future, since this session is moving along toward the deadline. I have requested such a hearing and hope that it will be granted so that this subject will get the attention to which it is entitled.

Mr. Speaker, I ask unanimous consent to revise and extend my remarks.

The SPEAKER pro tempore [Mr. THORNBERRY]. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield to the gentlewoman from Massachusetts.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I would like to express my appreciation for the tremendously fine work that the gentleman has always performed in protecting the industries of our country. I would like to remind the gentleman that in the case of the velveteens a month or two ago the State Department was very helpful in bringing about a restriction in the imports of that particular commodity.

Mr. BAILEY. I appreciate the comments of the gentlewoman from Massachusetts very much.

FEDERAL RESERVE CALLED UPON TO PROTECT UNITED STATES TREASURY IN CRISIS; ALSO TO PREVENT FURTHER REPUDIATION OF MARKETABLE BONDS

The SPEAKER pro tempore (Mr. THORNBERRY). Under previous order of the House, the gentleman from Texas [Mr. PATMAN] is recognized for 15 minutes.

Mr. PATMAN. Mr. Speaker, last Friday I sent a telegram to Chairman William Martin of the Federal Reserve Board. It discusses the following:

First, resignation of Secretary Humphrey and nomination of Mr. Robert Anderson to be his successor.

Second, asking that entire Open Market Committee study critical financing situation confronting the incoming Secretary.

Third, deploring the fact that the Federal Reserve refuses to facilitate Treasury borrowings.

Fourth, formidable refinancing task now confronting Treasury in tightest money market in recent times.

Fifth, recommending commencement of purchases of Government bonds until they are restored to par.

Sixth, suggesting one of many alternatives which could be used to prevent inflation instead of increasing interest rates and depressing bond prices.

Seventh, Russia repudiates her bonds 100 percent, and we are condoning repudiation equal to 12 percent of our own long-term marketable bonds. A copy of the telegram is as follows:

WASHINGTON, D. C., *May 31, 1957.*

Hon. WILLIAM MCC. MARTIN, JR.,
Chairman, Board of Governors,
Federal Reserve System,
Washington, D. C.:

I am taking this particular opportunity, presented by the resignation of Secretary of the Treasury Humphrey and the nomination of Mr. Robert Anderson to be his successor, to ask you and the entire Open Market Committee of the Federal Reserve System to carefully study the critical financing situation that confronts the incoming Secretary. I am asking you as chairman of the Open

Market Committee and Chairman of the Board of Governors of the Federal Reserve to carefully weigh the consequences both for the Treasury and the Federal Reserve of the continued refusal of the Open Market Committee to facilitate Treasury borrowings. The Treasury is faced with a formidable refinancing task in the immediate period ahead. It is confronted by one of the tightest money market in recent times. A repetition of the attrition experienced by the Treasury on its last refinancing will surely have critical repercussions throughout the entire bond market.

The Federal Reserve stands at an historical crossroads. Its actions will be closely watched by the business community, by the people of the country and above all by the Congress of the United States, whose agent it is. The time has come for the Open Market Committee to make a decision. Will the Federal Reserve be restored to its intended function of providing the economy with the money and credit necessary to carry on commerce and trade, and of aiding the Treasury in its borrowings at such times as may be necessary, or shall the System insist on standing aloof, ignoring its responsibilities to the people and the Government, and let the money market become the master instead of the servant?

I fervently hope that you will use your great influence, Mr. Chairman, with the members of the powerful Open Market Committee and bring home to them the gravity of the situation with which the Treasury is now confronted, and the opportunity for the System to make a wonderful contribution to the country. I urge you, Mr. Chairman, to recommend that the Open Market Committee commence purchases of Government bonds until they are restored to par. If it is deemed necessary to offset inflationary credit expansion, there are several alternatives, including raising reserve requirements and other methods of immobilizing bank reserves.

Russia repudiates her bonds 100 percent. The Federal Reserve Board representing a majority on the Open Market Committee is permitting and causing our people who are holding marketable United States Government bonds to be required to accept 12 percent discount on their bonds if sold today, which is 12 percent repudiation.

This is certainly a national disgrace, and I hope the Board takes firm, positive action at once to remove this blight on our economy and the reflection on our great system of government.

WRIGHT PATMAN,
Member of Congress.

From 1935 to 1951, the outstanding United States Government marketable bonds were not allowed to go below par. When necessary they were supported by the Open Market Committee of the Federal Reserve System. This committee is composed of the 7 public members who are on the Board of Governors and 5 presidents of the Federal Reserve Banks. The latter are elected by their respective boards of directors, a majority of whom are representatives of the private commercial bankers. In early 1951, an "accord" was reached between the Treasury and the Open Market Committee. This accord was for the purpose of giving notice that while the Federal Reserve Open Market Committee would no longer rigidly support the market on Government bonds at par it would nevertheless work out jointly with the Treasury a program of Government financing as well as maintain an orderly market for Government securities. This resulted in some of the long-term issues falling slightly below par during the year 1951–52. But it was not until 1953 that the Federal Reserve withdrew complete support and permitted some of our long-term Government marketable bonds to fall below 90. At this time many of them are down to 88. The Open Market Committee could have supported these bonds without cost to the Federal Reserve, without cost to the taxpayers or the United States Government, and such support would have greatly benefited the entire Nation. But the Treasury's debt manager, Under Secretary Burgess, did not want any Federal Reserve support and when he came in at the end of 1952 he gave them complete freedom to boost rates and depress bond prices.

INFLATION CHARGE

The charge that it would have caused inflation to support Government bonds is the usual charge that is made to justify a reactionary course. There are better and more effective ways to stop inflation than sharply increasing interest rates. In fact it has been proven that increasing interest rates is not only worthless, it is even harmful, in a fight against inflation. There is abundant evidence that increased interest rates have increased capital costs, which in turn have forced up prices and added to the inflationary pressures rather than diminishing them. In other words, it is much like using gasoline to put out a fire.

Not only has the high interest rate tight money policy been proven futile as an anti-inflation weapon but it has been disastrous for the Government's financing as well. Barron's, a national business and financial weekly, in a front page editorial today, June 3, 1957, states:

Specifically, in the exercise of one of its most strategic functions, management of the public debt, the Treasury has suffered painful reverses. It has been compelled to raise money with distressing frequency and at steadily rising costs. At the same time, its serious financial straits have posed a mounting threat to overall economic stability. In short, while the Nation remains as solvent as ever, debt management has come perilously close to bankruptcy. Putting the United States fiscal house in order will be perhaps the greatest—and surely the most pressing—task of the new Treasury Secretary.

It is further stated in this editorial:

Last month, to illustrate, in exchange for maturing securities, the Treasury offered a 1-year certificate and a 4¼-percent-year note, bearing interest rates of 3½ to 3⅝ percent, respectively, highest in a generation. Despite the handsome return available, nearly one-third of the amount outstanding was turned in for cash—perhaps the worst market rebuff ever suffered by the United States Government.

There is no way to intelligently estimate how high the interest rate will have to be on the next Treasury financing if the Federal Reserve continues to fail to perform its public duty by refusing to come to the rescue of the people by aiding their Government in a time of crisis.

The truth of the matter is that the Treasury will be unable to meet its borrowing needs without the help of the Federal Reserve.

Mr. Speaker, it cannot be said that the situation we face today was not foreseen. I do not wish to appear to be saying "I told you so" but I do think it is timely to point out to the Members what the report of the Patman Committee on Monetary Policy and the Management of the Public Debt—July 3, 1952—said on this question: Discussing the composition and independence of the Federal Reserve and its Open Market Committee the report warned that the influence of the private bankers "might result on some future occasion in the adoption of an open-market policy not compatible with the overall economic policy of the United States as approved by Congress"—page 54.

And addressing itself further to this question of monetary policy the report warned of the danger that "the advantages of restrictive monetary policy may be overemphasized due to an unconscious institutional bias on the part of the Federal Reserve staff"—page 59.

WHAT IS THE FEDERAL RESERVE SYSTEM AND HOW DOES IT FUNCTION?—OBLIGATION OF THE FEDERAL RESERVE AND THE TREASURY DEPARTMENT TO WORK TOGETHER—INTEREST RATES AND GOVERNMENT BONDS

Mr. PATMAN. Mr. Speaker, during the year 1951, Senator O'MAHONEY, chairman of the Joint Committee on the Economic Report, appointed a Subcommittee on Monetary Policy and the Management of the Public Debt. The subcommittee was composed of the following members: Senators DOUGLAS and FLANDERS; Representatives BOLLING and WOLCOTT, and Representative WRIGHT PATMAN, chairman.

The investigation lasted about 18 months. During that time, all the important questions concerning the Federal Reserve System and the Treasury Department of the United States were gone into and carefully discussed by those in authority. The so-called accord between the Treasury Department and the Federal Reserve Board received much attention, and a copy of the correspondence between the President, the Chairman of the Federal Reserve Board, and the Treasury Department is included in the compendium. It is my belief that a public service will be rendered by inviting to the attention of the Members of the House and Senate the value of these two books, constituting the compendium.

The Government Printing Office has sold a large number of these volumes. The first volume sells for $1.75 a copy, and the second volume is $2.50 a copy. The volume of hearings sells for $2.25 a copy at the Government Printing Office.

I believe the best way to explain the contents of these volumes is to insert the table of contents from each volume.

The titles of these volumes are "Monetary Policy and the Management of the Public Debt—Their Role in Achieving Price Stability and High-Level Employment," "Replies to Questions and Other

Material for the Use of the Subcommittee on General Credit Control and Debt Management."

The following is the table of contents of volume 1:

CONTENTS

Foreword.
Chapter I. Reply by the Secretary of the Treasury.
A. Congressional policy directives.
Question:
1. Directives bearing upon economic objectives.
2. Economic policy of Treasury.
3. Emphasis of Employment Act on high-level employment and price stability.
4. Need for additional economic policy directives.
B. Policy formulation in the executive branch.
Question:
5. Powers over operations of Federal lending agencies.
6. Desirability of additional authority over Federal lending agencies.
7. Resolution of policy conflicts between Treasury and lending agencies.
8. Powers over operations of Federal Reserve System.
9. Resolution of conflicts between other agencies and Federal Reserve System.
10. Possibility of continuing conflict in policies.
C. Expenses for the purpose of influencing public opinion.
Question:
11. Expenses to influence public opinion on controversial matters.
D. Credit and debt management policy.
Question:
12. Monetary powers.
13. Functions with respect to incoming gold and silver.
14. Influence of Treasury deposits on the monetary situation.
15. Coordination of monetary policies with those of Federal Reserve System.
16. Development of legislative authority on public debt matters.
17. Issues involved in policy discussions with Federal Reserve between end of war and "accord."
18. Description of Treasury-Federal Reserve accord.
19. Differences concerning fundamental economic objectives between Treasury and Federal Reserve.
20. Differences concerning procedures and techniques between Treasury and Federal Reserve.
21. Cooperation with Federal Reserve in matters of common interest.
22. Role of general credit policy in counteracting inflation or deflation.
23. Comparative effectiveness of general credit controls under differing circumstances.
24. Appropriate roles of general and selective credit controls under differing circumstances.
25. Effect of direct physical controls on need for general credit control.
26. Influence of interest rates on nonbank demand for Government securities.
27. Desirability of a stable long-term Government bond market.
28. Treasury actions affecting interest rates on Government securities.
29. Interest on the public debt as a budgetary cost.
30. Effect of growth of public debt on appropriate monetary and credit policy.
31. Effect of economic changes on traditional Federal Reserve operations.
32. Influence of Treasury on money market through choice of maturities of new securities.
33. Relation of decisions on interest rates of new securities to decisions on other terms.
34. Effect of higher interest rates on sale of Series E bonds.
35–36. New types of reserve requirements.
37. Advantages and disadvantages of marketable and nonmarketable securities.
38. Recommended types of securities for Government borrowing.
39. Insulation of public debt securities from effects of general credit policies.
40. Compulsory sale of Government securities.
41. Advisability of issuing a purchasing power bond.
E. International comparisons.
Question:
42. Relationship between Executive, Treasury, and Central Bank in foreign countries.
43. Use of selective and general credit controls by foreign countries.
44. Insulation of Government securities from private credit market in foreign countries.
Appendix:
List of questions.
Memorandum on Treasury management improvement program.
Chapter II. Reply by the Chairman of the Board of Governors of the Federal Reserve System.
A. Congressional policy directives.
Question:
1. Directives bearing upon economic objectives.
2. Economic policy of Federal Reserve System.
3. Principal credit policy actions since date of organization.
4. Role of credit and monetary policy in combating inflation and deflation.
5. Emphasis of Employment Act on high-level employment and price stability.
6. Need for additional economic policy directives.
B. Relationship to executive branch.
Question:
7. Responsibility of members of Board of Governors to the President.
8. Are Board of Governors and Open Market Committee parts of executive branch of Government?
9. Functions of directors and presidents of Reserve banks.
10. Are the Reserve banks part of the executive branch of Government? What are the implications of ownership of Federal Reserve bank stock?
11. Are reports to Congress on pending legislation submitted to the Bureau of the Budget?
12. Coordination of policies with agencies operating under direction of the President.
13. Common interests with other agencies.
14. Role of Federal Reserve in formulating international financial policy.
C. Distribution within the Federal Reserve System of authority on credit policies.
Question:
15. Authority over discount rates.
16. Historical development and significance of open market operations.
17. Allocation of authority over various credit control instruments.
18. Coordination of credit control instruments.
D. Organization of the Board of Governors.
Question:
19. Qualifications required for appointment.
20. Geographical apportionment of members.
21. Tenure of office.
22. Number of members.
E. Earnings and expenses of the Federal Reserve System.
Question:
23. Annual expenses of the Board and Reserve banks.
24. Provision for audit.
25. Gross earnings of the Reserve banks.
26. Analysis of expenses of the Reserve banks for past 5 years.
27. Expenses to influence public opinion on controversial matters.
F. General credit and monetary policies.
Question:
28. Influence of credit policies over changes in quantity of money.
29. Issues involved in policy discussions with Treasury between end of war and accord; description of accord.
30. Effects of rising yields of short-term Governments, August 1950 to March 1951.
31. Role of general credit policy in counteracting inflation or deflation.
32. Responsiveness of bank lending to credit policy measures.
33. Credit policy in relation to Treasury borrowing.
34. Influence of interest rates on nonbank demand for Government securities.
35. Use of rediscounting privileges by member banks.
36. Effects of credit restriction on national defense and standard of living.
37. Role of bank supervision in furthering objectives of Employment Act.
38. Selective credit regulation in general.
39. Regulation of stock market credit.
40. Regulation of consumer credit.
41. Regulation of real estate credit.
42. The voluntary credit restraint program.
43. Moral suasion as an instrument of credit control.
44. Function of bank reserves and present reserve requirements.
45. Application of reserve requirements to nonmember banks.
46. Basing reserve requirements on type of deposit.
47. Secondary reserve requirements.
48. Ceiling reserve plans.
49. Basing reserve requirements on assets rather than liabilities.
50. Statutory authority for, and usefulness of, credit "rationing."
G. Internal comparisons.
Question:
51. Relationship between Executive, Treasury, and Central Bank in foreign countries.
52. Use of selective and general credit controls by foreign countries.
53. Insulation of Government securities from private credit market in foreign countries.
H. The banking structure.
Question:
54. Changes in banking activities since establishment of Federal Reserve System.
55. Changes in banking facilities since establishment of Federal Reserve System.
56. Earnings and expenses of member banks since 1919.
57. Analysis of banking facilities in relation to population, 1920–50.
I. Availability of capital for small business.
Questions:
58. Availability of credit and capital to small business.
59. Effects of bank examination on lending to small business.
Appendix (list of questions.)
Chapter III. Reply by the Chairman of the Federal Open Market Committee (in collaboration with the Vice Chairman.)
Questions:
1. Limitation of dealings to a small number of recognized Government securities dealers.
2. Extent to which open market operations are impersonal.
Appendix (list of questions.)
Part 2 contains the replies by—
Federal Reserve bank presidents.
The Council of Economic Advisers.
The Comptroller of the Currency.
The Chairman of the Federal Deposit Insurance Corporation.
The Administrator of the Reconstruction Finance Corporation.
State bank supervisors.
Economists.
Bankers.
Life insurance company executives.
United States Government security dealers.

Statement by conference of university economists sponsored by the National Planning Association.

The contents of volume 2 are as follows:

CONTENTS

Report of the four-member committee (Charles E. Wilson, chairman), appointed on February 26, 1951, and reporting on May 17, 1951.

Reserve bank reserve requirements and Federal Reserve credit.

Schedule of hearings (announced before opening).

Treasury Department, preparation of answers to questionnaire.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. FOUNTAIN (at the request of Mr. KITCHIN) on account of official business.

To Mr. PROUTY (at the request of Mr. MARTIN) for 2 days because of illness in family.

To Mr. MILLER of Maryland (at the request of Mr. MARTIN) for the balance of the week on account of illness.

To Mr. LANKFORD (at the request of Mr. ALBERT) for today, Monday, June 3, 1957, on account of illness.

To Mr. POWELL (at the request of Mr. CELLER) for an indefinite period on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. PATMAN, for 15 minutes, today.

Mr. SMITH of Wisconsin, on tomorrow, for 30 minutes.

Mrs. ROGERS of Massachusetts, for 10 minutes, on tomorrow, June 4.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. LANE and to include extraneous matter.

Mrs. KEE in two instances.

Mr. WALTER and to include an address he delivered in Baltimore.

Mr. BAILEY and to include extraneous matter.

Mr. ENGLE in two instances and to include extraneous matter.

Mr. PATMAN to revise and extend his remarks and include certain extraneous matter on the special order for today.

Mr. DOYLE in two instances and include extraneous matter in each instance.

Mr. ROGERS of Florida and include extraneous matter.

Mr. VURSELL and include extraneous matter.

Mr. HARRIS and include a speech he made to the conference of presidents and other officers of State medical societies at the American medical convention on yesterday.

ENROLLED BILL SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 6700. An act making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1958, and for other purposes.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1463. An act to amend the Medals of Honor Act to authorize awards for acts of heroism involving any motor vehicle.

ADJOURNMENT

Mr. LANHAM. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 43 minutes p. m.), the House adjourned until tomorrow, Tuesday, June 4, 1957, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communcations were taken from the Speaker's table and referred as follows:

909. A communication from the President of the United States, transmitting proposed supplemental appropriations for the fiscal year 1958 in the amount of $149,500,000 for the Post Office Department (H. Doc. No. 190); to the Committee on Appropriations and ordered to be printed.

910. A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation entitled "A bill to facilitate and simplify the work of the Forest Service, and for other purposes"; to the Committee on Agriculture.

911. A letter from the Acting Archivist of the United States, transmitting a report on lists or schedules covering records proposed for disposal by certain Government agencies, pursuant to the act approved July 6, 1945 (59 Stat. 434); to the Committee on House Administration.

912. A letter from the Chairman, Civil Aeronautics Board, transmitting a draft of proposed legislation entitled "A bill to provide for Government guaranty of private loans to certain air carriers for purchase of aircraft and equipment, and for other purposes"; to the Committee on Interstate and Foreign Commerce.

913. A letter from the Chairman, Civil Aeronautics Board, transmitting a draft of proposed legislation entitled "A bill to amend the Civil Aeronautics Act of 1938, as amended, so as to prohibit certain practices regarding passenger-ticket sales and reservations"; to the Committee on Interstate and Foreign Commerce.

914. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill to amend section 5 of the Flood Control Act of August 18, 1941, as amended, pertaining to emergency flood-control work"; to the Committee on Public Works.

915. A letter from the Under Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to provide for the leasing of oil and gas deposits in lands beneath inland navigable waters in the Territory of Alaska"; to the Committee on Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, pursuant to the order of the House of May 29, 1957, the following bill was reported on May 31, 1957:

Mr. COOPER: Committee on Ways and Means. H. R. 7238. A bill to amend the public assistance provisions of the Social Security Act so as to provide for a more

effective distribution of Federal funds for medical and other remedial care; without amendment (Rept. No. 496). Referred to the Committee of the Whole House on the State of the Union.

[*Submitted June 3, 1957*]

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BURDICK: Committee on the Judiciary. H. R. 1942. A bill for the relief of the Sergeant Bluff Consolidated School District; with amendment (Rept. No. 522). Referred to the Committee of the Whole House on the State of the Union.

Mr. LANE: Committee on the Judiciary. H. R. 1061. A bill to amend title 10, United States Code, to authorize the Secretary of Defense and the Secretaries of the military departments to settle certain claims for damage to, or loss of, property or personal injury or death, not cognizable under any other law; with amendment (Rept. No. 523). Referred to the Committee of the Whole House on the State of the Union.

Mr. MURRAY: Committee on Post Office and Civil Service. H. R. 5836. A bill to readjust postal rates and to establish a congressional policy for the determination of postal rates, and for other purposes; with amendment (Rept. No. 524). Referred to the Committee of the Whole House on the State of the Union.

Mr. McMILLAN: Committee on the District of Columbia. H. R. 7249. A bill to improve and extend, through reciprocal legislation, the enforcement of duties of support in the District of Columbia; without amendment (Rept. No. 525). Referred to the Committee of the Whole on the State of the Union.

Mr. McMILLAN: Committee on the District of Columbia. S. 768. An act to designate the east 14th Street highway bridge over the Potomac River at 14th Street in the District of Columbia as the Rochambeau Memorial Bridge; without amendment (Rept. No. 526). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. POFF: Committee on the Judiciary. S. 407. An act for the relief of Julian D. Dycaico; without amendment (Rept. No. 497). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. S. 1008. An act for the relief of Col. Benjamin Axelroad; without amendment (Rept. No. 498). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. S. 1206. An act for the relief of Antoine Velleman; without amendment (Rept. No. 499). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H. R. 1492. A bill for the relief of Gillous M. Young; without amendment (Rept. No. 500). Referred to the Committee of the Whole House.

Mr. BOYLE: Committee on the Judiciary. H. R. 1634. A bill for the relief of Antonio Ranalletta; without amendment (Rept. No. 501). Referred to the Committee of the Whole House.

Mr. CRAMER: Committee on the Judiciary. H. R. 1861. A bill for the relief of George W. Arnold; with amendment (Rept. No. 502). Referred to the Committee of the Whole House.

Mr. BOYLE: Committee on the Judiciary. H. R. 2058. A bill for the relief of the Franklin Institute of the State of Pennsylvania; with amendment (Rept. No. 503). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H. R. 2302. A bill for the relief of Phyllis L. Ware; without amendment (Rept. No. 504). Referred to the Committee of the Whole House.

Mr. BOYLE: Committee on the Judiciary. H. R. 2592. A bill for the relief of Lucy Rolandone; with amendment (Rept. No. 505). Referred to the Committee of the Whole House.

Mr. POFF: Committee on the Judiciary. H. R. 2740. A bill for the relief of Mrs. Harriet Sakayo Hamamoto Dewa; with amendment (Rept. No. 506). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H. R. 2928. A bill for the relief of Harry and Sadie Woonteiler; with amendment (Rept. No. 507). Referred to the Committee of the Whole House.

Mr. BOYLE: Committee on the Judiciary. H. R. 2937. A bill for the relief of Clarence L. Harris; without amendment (Rept. No. 508). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H. R. 2985. A bill for the relief of Alton B. York; with amendment (Rept. No. 509). Referred to the Committee of the Whole House.

Mr. BOYLE: Committee on the Judiciary. H. R. 3280. A bill for the relief of Mrs. Grace C. Hill; without amendment (Rept. No. 510). Referred to the Committee of the Whole House.

Mr. BOYLE: Committee on the Judiciary. H. R. 3309. A bill for the relief of Harry Gold; with amendment (Rept. No. 511). Referred to the Committee of the Whole House.

Mr. BURDICK: Committee on the Judiciary. H. R. 3899. A bill for the relief of William E. Heilmann; with amendment (Rept. No. 512). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H. R. 4335. A bill for the relief of Ramon Tavarez; without amendment (Rept. No. 513). Referred to the Committee of the Whole House.

Mr. POFF: Committee on the Judiciary. H. R. 4541. A bill for the relief of Leslie A. Batdorf; without amendment (Rept. No. 514). Referred to the Committee of the Whole House.

Mr. BURDICK: Committee on the Judiciary. H. R. 5288. A bill for the relief of Orville G. Everett and Mrs. Agnes H. Everett; without amendment (Rept. No. 515). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H. R. 5627. A bill for the relief of Mrs. Emma Hankel; without amendment (Rept. No. 516). Referred to the Committee of the Whole House.

Mr. BURDICK: Committee on the Judiciary. H. R. 6176. A bill for the relief of Fouad George Baroody; without amendment (Rept. No. 517). Referred to the Committee of the Whole House.

Mr. BURDICK: Committee on the Judiciary. H. R. 6621. A bill for the relief of Mrs. Jane Barnes; without amendment (Rept. No. 518). Referred to the Committee of the Whole House.

Mr. CRAMER: Committee on the Judiciary. H. R. 7014. A bill for the relief of Madame Henriette Buaillon and Stanley James Carpenter; without amendment (Rept. No. 519). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H. R. 7213. A bill for the relief of Louis S. Thomas and D. Grace Thomas; with amendment (Rept. No. 520). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H. R. 7554. A bill for the relief of Edward Neal Fisher; without amendment (Rept. No. 521). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H. R. 1446. A bill for the relief of Philip J. Denton; with amendment (Rept. No. 527). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H. R. 4992. A bill for the relief of Michael D. Ovens; without amendment (Rept. No. 528). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. House Resolution 260. Resolution providing for sending the bill H. R. 3320 and accompanying papers to the Court of Claims; without amendment (Rept. No. 529). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BYRNES of Wisconsin:

H. R. 7862. A bill to amend section 22 of the Agricultural Adjustment Act, as amended; to the Committee on Agriculture.

By Mr. ALLEN of California:

H. R. 7863. A bill to amend the District of Columbia Alcoholic Beverage Control Act; to the Committee on the District of Columbia.

By Mr. BARTLETT:

H. R. 7864. A bill to amend the act of May 4, 1956 (70 Stat. 130), relating to the establishment of public recreational facilities in Alaska; to the Committee on Interior and Insular Affairs.

By Mr. CARNAHAN:

H. R. 7865. A bill relating to the acquisition of certain land in Pulaski County, Mo., adjacent to the Fort Leonard Wood Military Reservation; to the Committee on Armed Services.

By Mr. CELLER:

H. R. 7866. A bill to amend title 28, United States Code, relating to the Court of Customs and Patent Appeals; to the Committee on the Judiciary.

By Mr. CHAMBERLAIN:

H. R. 7867. A bill to amend title II of the Social Security Act so as to permit the State of Michigan to provide for the extension of the insurance system established by such title to service performed by certain policemen and firemen in such State; to the Committee on Ways and Means.

By Mr. DOOLEY:

H. R. 7868. A bill to encourage the establishment of voluntary pension plans by self-employment individuals; to the Committee on Ways and Means.

By Mr. ENGLE:

H. R. 7869. A bill to promote the increase and diffusion of knowledge of the Antarctic; to the Committee on Interior and Insular Affairs.

By Mr. FALLON:

H. R. 7870. A bill to amend the act of July 1, 1955, to authorize an additional $10 million for the completion of the Inter-American Highway; to the Committee on Public Works.

By Mr. McGREGOR:

H. R. 7871. A bill to amend the act of July 1, 1955, to authorize an additional $10 million for the completion of the Inter-American Highway; to the Committee on Public Works.

By Mr. FINO:

H. R. 7872. A bill to provide opportunity for Government employees to produce and examine witnesses in connection with actions involving dismissal from the service, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. GATHINGS:

H. R. 7873. A bill to increase farm income and to expand markets for cotton by enabling cotton to be sold competitively in domestic and foreign markets; to the Committee on Agriculture.

By Mr. HEMPHILL:

H. R. 7874. A bill to encourage the establishment of voluntary pension plans by self-

employed individuals; to the Committee on Ways and Means.

By Mr. HUDDLESTON:

H. R. 7875. A bill to establish the Civic Health Through Athletic and Mental Proficiency Society of the United States; to the Committee on Education and Labor.

H. R. 7876. A bill to permit bad debt deductions for payments by guarantors of corporate obligations which had become worthless; to the Committee on Ways and Means.

By Mr. MARSHALL:

H. R. 7877. A bill to authorize the partition or sale of inherited interests in trust and restricted allotted lands and restricted purchased allotted lands in the State of Minnesota, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MULTER:

H. R. 7878. A bill to amend the Small Business Act of 1953, as amended, and for other purposes; to the Committee on Banking and Currency.

By Mr. O'HARA of Illinois:

H. R. 7879. A bill to amend the public assistance provisions of the Social Security Act to eliminate certain inequities and restrictions and permit a more effective distribution of Federal funds; to the Committee on Ways and Means.

By Mr. PORTER:

H. R. 7880. A bill to establish on public lands of the United States a national wilderness preservation system for the permanent good of the whole people, to provide for the protection and administration of the areas within this system by existing Federal agencies and for the gathering and dissemination of information to increase the knowledge and appreciation of wilderness for its appropriate use and enjoyment by the people, to establish a National Wilderness Preservation Council, and for other purposes; to the Committee on Interior and Insular Affairs.

H. R. 7881. A bill to amend the Bonneville Project Act to authorize the Administrator to establish priorities and preferences so as to benefit the general public and to promote diversified economic development fairly and equitably throughout the several States of the Columbia River Basin; to the Committee on Public Works.

By Mr. ROBERTS:

H. R. 7882. A bill to provide that seat belts sold or shipped in interstate commerce for use in motor vehicles shall meet certain safety standards; to the Committee on Interstate and Foreign Commerce.

By Mr. UTT:

H. R. 7883. A bill to authorize the restoration of time taken from patents covering inventions whose practice was prevented or curtailed during certain emergency periods by service of the patent owner in the Armed Forces or by governmental controls; to the Committee on the Judiciary.

By Mr. MILLS:

H. R. 7884. A bill to encourage the discovery, development, and production of manganese-bearing ores and concentrates in the United States, its Territories, and possessions, and for other purposes; to the Committee on Interior and Insular Affairs.

H. R. 7885. A bill to encourage the discovery, development, and production of manganese-bearing ores and concentrates in the United States, its Territories, and possessions, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BUCKLEY:

H. J. Res. 347. Joint resolution authorizing and requesting the President to invite the several States and foreign countries to take part in the Fourth International Automation Congress and Exposition to be held in the New York Coliseum at New York, N. Y., from June 9, to June 13, 1958; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By Mr. McINTIRE: Memorial of Maine Senate and House of Representatives supporting Senate Resolution 64 relating to unjustified price increases of crude oil and refined petroleum products; to the Committee on Interstate and Foreign Commerce.

By the SPEAKER: Memorial of the Legislature of the State of California, memorializing the President and the Congress of the United States relative to changing the method of computing the basic pay for members of the Armed Forces; to the Committee on Armed Services.

Also, memorial of the Legislature of the State of California, memorializing the President and the Congress of the United States relative to the establishment of a domestic minerals program to stimulate the mining and production of strategic minerals and metals in the interests of national defense; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of California, memorializing the President and the Congress of the United States relative to issuance of a centennial stamp in commemoration of discovery of the Comstock lode; to the Committee on Post Office and Civil Service.

Also, memorial of the Legislature of the State of California, memorializing the President and the Congress of the United States relative to the study, design, and construction of the Parks Bar Dam on the Yuba River; to the Committee on Public Works.

Also, memorial of the Legislature of the State of California, memorializing the President and the Congress of the United States relative to the interest rate on veterans' home loans; to the Committee on Veterans' Affairs.

Also, memorial of the Legislature of the State of Florida, memorializing the President and the Congress of the United States to enact legislation providing for the repeal of the Federal excise tax upon the transportation of passengers and freight; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of Oregon, memorializing the President and the Congress of the United States relative to requesting passage of H. R. 358 without delay; to the Committee on Veterans' Affairs.

Also, memorial of the Legislature of the State of Texas, memorializing the President and the Congress of the United States relative to proposing an amendment to the Constitution granting the power to the several or individual States the right to conserve and regulate the exploration, production, and distribution of their petroleum products, water, sulfur, and all other minerals and natural resources; to the Committee on the Judiciary.

Also, memorial of the Legislature of the State of Texas, memorializing the President and the Congress of the United States relative to endorsing the principles of judicial review embodied in S. 1629 and urging early enactment of such legislation; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CHAMBERLAIN:

H. R. 7886. A bill for the relief of Martha Csak; to the Committee on the Judiciary.

By Mr. CHELF:

H. R. 7887. A bill for the relief of Shu-Yuan Yen (Jane Yen); to the Committee on the Judiciary.

By Mr. CRAMER:

H. R. 7888. A bill to authorize the sale and conveyance of certain of the publicly owned lands of the United States to the American Federation of the Physically Handicapped Institute for Human Engineering; to the Committee on Agriculture.

By Mr. KING:

H. R. 7889. A bill for the relief of Annette Pamela Cooke; to the Committee on the Judiciary.

By Mr. MADDEN:

H. R. 7890. A bill for the relief of Pejo Sever; to the Committee on the Judiciary.

By Mr. MULTER:

H. R. 7891. A bill for the relief of Jacob Naggar; to the Committee on the Judiciary.

By Mr. NIMTZ:

H. R. 7892. A bill for the relief of Mrs. Elly Schmidt Pietrzak; to the Committee on the Judiciary.

By Mr. ROONEY:

H. R. 7893. A bill for the relief of Domenica Buttaro; to the Committee on the Judiciary.

By Mr. SCUDDER:

H. R. 7894. A bill for the relief of Wong Yick Shue; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

Floods and Tornadoes in the Southwest

EXTENSION OF REMARKS

OF

HON. A. S. MIKE MONRONEY

OF OKLAHOMA

IN THE SENATE OF THE UNITED STATES

Monday, June 3, 1957

Mr. MONRONEY. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a statement I have prepared concerning damage caused by floods and tornadoes in Oklahoma, Texas, Arkansas, and other parts of the Southwest.

I ask unanimous consent also to have printed following my statement, the text of a letter, dated May 31, 1957, I have received from Welcome W. Wilson, regional administrator of civil defense, containing a summary of the damage as of May 22, 1957.

I ask unanimous consent also to have printed in the CONGRESSIONAL RECORD an article entitled "Loss in Floods Is $32 Million," written by Allan Cromley, and published in the Oklahoma City Times of June 1, 1957, and an article entitled "Congressmen See Bulging State Dams, Flood Havoc," written by Joseph E. Howell, and published in the Tulsa Tribune of May 31, 1957. These articles give estimates of the flood damage and describe the terrible devastation which has been created by the unprecedented floods, the worst in Oklahoma history.

Mr. Howell's article details the devastation which was revealed on the trips made by Members of the House Subcommittee on Public Works, as they surveyed the flood damage from the air on a recent trip to Oklahoma.

There being no objection, the statement, letter, and articles were ordered to be printed in the RECORD, as follows:

FLOODS IN OKLAHOMA

Mr. President, on Friday, our distinguished majority leader told the Senate something of the tragedy that has hit the Southwest in the form of floods and tornadoes. He related some of the experiences of the House Public Works Subcommittee as its members visited Texas.

Today's and Sunday's newpapers brought news of new furies lashing at Oklahoma and Texas, with new warnings of additional flooding on our already swollen rivers. The Oklahoma City Times carried a dispatch by Allen Cromley describing the testimony of Army engineers at a hearing, in Tulsa, Okla., that dams and levees already built had reduced the flood's damage in Oklahoma and adjoining strips of Texas, Kansas, and Arkansas nearly $12 million, but estimating the overall disaster cost thus far at $32 million.

Congressional inquiries to the Denton, Tex., regional office of the Federal Civilian Defense Administration, which has been coordinating State and Federal activities in this disaster, brought a reply a few minutes ago, which includes an estimate for the overall damage in Oklahoma alone at $40 million, a larger figure. That is the figure given by Mr. Tom Brett, Oklahoma State civil defense director, who has included agricultural damages over the States. He lists 61 of our 77 counties with damages severe enough to make them eligible as disaster counties, and 28 cities, including the three biggest cities in the State, as disaster cities under Public Law 875, the 1950 Disaster Act.

Five persons were killed, according to Red Cross preliminary estimates, although news stories have now listed 9 deaths, and 88 were injured, while families suffering loss were listed as 1,877 with nearly 2,000 homes or buildings damaged. Continued rainfall and flooding has made it impossible to survey damage adequately, but between 60 and 75 percent of the counties in my State have damaged roads. I have a map with 110 crosses on it indicating damage to the State highway system.

A newspaper report in the Tulsa Tribune of Friday describing a visit of the House subcommittee in Tulsa, with reports of the first part of its trip through Oklahoma, describes the spectacular but tragedy-packed scenes observed by the congressional party more vividly than I can picture it.

DENTON, TEX., *May 31, 1957.*

Hon. MIKE MONRONEY,
Senate Office Building,
Washington, D. C.

DEAR SENATOR MONRONEY: Thank you for your letter of May 22 with regard to the Oklahoma flood situation.

Tom Brett, Oklahoma State civil defense director, has estimated the overall damage at $40 million. Included in this estimate are agricultural damages over most of the State, particularly along the main streams and their tributaries.

Mr. Brett indicated the following counties and cities have sustained damage that will be eligible under Public Law 875, commonly known as the Disaster Act of 1950: Counties: Adair, Alfalfa, Atoka, Beckham, Blaine, Bryan, Caddo, Canadian, Carter, Cherokee, Choctaw, Cleveland, Comanche, Craig, Creek, Custer, Dewey, Ellis, Garfield, Garvin, Grady, Grant, Greer, Harper, Haskell, Hughes, Jefferson, Johnston, Kay, Kingfisher, Kiowa, Leflore, Lincoln, Logan, McClain, McIntosh, Major, Marshall, Mayes, Murray, Muskogee, Noble, Nowata, Oklahoma, Okmulgee, Osage, Pawnee, Payne, Pittsburg, Pontotoc, Pottawatomie, Pushmataha, Roger Mills, Rogers, Seminole, Sequoyah, Stephens, Tulsa, Wagoner, Woods, Woodward.

Cities: Alva, Bixby, Canton, Coyle, Dover, Elk City, Enid, Fort Gibson, Guthrie, Haskell, Hennessey, Jenks, Kingfisher, Lawton, Lexington, Lindsay, Moffett, Muskogee, Nowata, Oklahoma City, Owasso, Pauls Valley, Sayre, Shawnee, Stillwater, Tulsa, Wanette, and Waurika.

Mr. Brett estimates that between 60 and 75 percent of the counties have damaged roads. Some of the major highways are still blocked and damage to the Federal-aid road systems is estimated at between $4 million and $5 million. Approximately 110 locations on Oklahoma highways have bridge and other flood damages affecting traffic. These are located on the Federal-aid systems, for the most part, however, and do not include any rural and county roads. A newspaper article and drawing showing the damaged facilities is enclosed.

Preliminary reports of the American Red Cross indicate the following statistics up to May 22:

(NOTE.—Much more damage to persons and property, especially homes has occurred since.)

Persons killed, 5; persons suffering minor injuries, 88; dwellings destroyed, 18; dwellings with major damage, 217; dwellings with minor damage, 1,355; other buildings destroyed, 12; other buildings with major damage, 50; other buildings with minor damage, 178; the total number of families suffering loss, 1,877.

Requests for surveys for specific damages have been made by Alva, Canton, Elk City, Lawton, and Stillwater, for damages to sewerage disposal plants; Guthrie, damage to water mains; Stillwater, damage to school; Fort Gibson, damage to water plant; Sayre, damage to water lines.

One Federal team composed of 2 engineers from the Corps of Engineers, 1 health and sanitation representative from the Department of Health, Education, and Welfare, and a Federal Civil Defense Administration representative is now in the field and other teams are being formed and sent to the cities as rapidly as possible.

At the present time, it is somewhat difficult to estimate the total amount of Federal funds that will be needed for Oklahoma. As you undoubtedly know, civil-defense survey teams go into each damaged area and make every precise inspection. In many instances, the surveys have not been possible yet because of continued rainfall and flooding. The most severe damages have apparently been to roads and bridges. Federal funds will be provided for the temporary repair of those not on the Federal-aid system. Some funds will also be necessary for the control of mosquitoes, flies, rodents, and for the purification of wells and other health measures. When we have been able to make a fairly accurate estimate of the total amount needed, we will be happy to advise you.

Sincerely,

WELCOME W. WILSON,
Regional Administrator.

[From the Oklahoma City Times of June 1, 1957]

STATE TALLIES UP: LOSS IN FLOODS IS $32 MILLION

(By Allan Cromley)

TULSA.—The United States Army Engineers Saturday estimated flood damage totals $32 million in 8 river basins of Oklahoma.

Col. John D. Bristor told a visiting congressional flood inspection team and approximately 200 persons at a public hearing that the damage would have been $43,800,000 if existing flood control projects had not been in place.

He said the total would have been $21,900,000 if all authorized large flood control projects had been completed.

TEXOMA CRITICAL

He said there is a critical problem at Lake Texoma, where too much rain above the dam and too much water below the dam are combining to threaten further widespread damage.

He said there was a 6-inch rain Friday night on the lake itself and that water is 1.6 feet over the spillway. The levee was .4 feet Friday when the congressional investigators flew over the lake on a 1,600-mile aerial survey of flood damage in Texas, Oklahoma, eastern Arkansas, and southern Kansas.

Brig. Gen. L. E. Seeman, division engineer, Fort Worth, told the group Saturday morning, "this flood season is still not over." He urged the lawmakers to approach the flood control problem on a broad river basin basis.

STORM TOLL SET

A regional civil defense official estimated that floods and tornadoes have caused $40 million damage in the State. Gaines F. West director of educational services, civil defense regional headquarters, Denton, Tex., said this is a very conservative figure.

United States Army engineers at Fort Worth Thursday told the committee damage in Texas was almost $70 million. This brings the official estimate of the region total to more than $100 million.

Ironically, rain was pouring down outside the building here where the hearing was held, and a number of would-be witnesses telephoned that they would be unable to attend because of the weather.

MAYORS ON HAND

Some 20 mayors of cities in the Oklahoma flood region were prepared to detail devastation in their areas.

Bristor broke his official flood damage estimate into 8 river basins which either flow into, through, or out of Oklahoma.

He listed the damage as follows: Red River, $6,250,000; Arkansas and minor tributaries in Kansas and Oklahoma, $15,700,000; Cimarron River, $5,900,000; Verdigris River, $1,420,000; Grand River, $870,000; Illinois River, $75,000; Poteau River, $235,000; and Canadian River, $1,885,000.

ONE MILLION DOLLARS MINOR

Bristor estimated Red River flood damage would have been $9,300,000 without the protection afforded by Lake Texoma and Altus Reservoir.

He said the $1 million already advanced by the Federal Government to the State for storm disaster relief "seems a very minor sum."

He said civil defense officials probably will advise Governor Gary to request another million.

West estimated 11,500 persons in Oklahoma have been evacuated from flood areas, some of them more than once.

ELEVEN LOSE LIVES

He said 11 persons have lost their lives in floods, 4 in tornadoes, and 150 have been injured. He said 1,400 homes have been partially or completely destroyed by Mother Nature.

He said a total of 152 bridges have been damaged by floods, and estimated a $5 million to $6 million loss on highways and for which the State receives Federal aid funds.

West estimated agriculture losses from floods at about $20 million.

Bristor said his flood damage estimates do not include losses in headwater areas.

FIGURE NOT COMPLETE

Bristor said his estimates do not include secondary losses such as those sustained by merchants who suffered business reverses through decreased income of persons flooded.

He said loss of income and manpower hours are not included. He explained that the estimates are based on figures gathered in previous floods, and an actual determination of loss cannot be made until a year or two.

Representative ED EDMONDSON, Muskogee, 1 of 3 visiting members of the House Public Works Committee, said, "Knowing acreage destroyed, and municipal damage, I have a feeling the estimate is very conservative and that damage exceeds $50 million in the State."

[From the Tulsa Tribune of May 31, 1957]

TULSA HEARING SATURDAY—CONGRESSMEN SEE BULGING STATE DAMS, FLOOD HAVOC

(By Joseph E. Howell)

Scenes which in theory at least will not be reenacted for 100 years, spread out today before a congressional subcommittee inspecting flood damage and flood control work in the Southwest.

The committee flew over giant Lake Texoma, which recently has filled for the first time since it was completed 13 years ago.

"This is a sight we may never see again in our lifetime," said Joe Brennan, engineer consultant for the House Committee on Public Works.

He explained the Denison Dam was built to exactly hold a flood of the size which has filled it this month and that the studies which the engineers made in designing the dam based on the flood history of the Red and Washita Rivers, indicated this flood would occur but once in a century.

Brennan said, however, the fact the flood had occurred this year is no guarantee it will not occur again next year or every year for 10 years.

He said that when the experience this year goes into the record books and a new analysis made, it may develop that it will be considered an 80-year flood instead of a 100-year flood.

The subcommittee members flew 600 miles over flooded river valleys between Fort Smith and Tulsa this morning.

After leaving Forth Worth, where they saw streets filled from curb to curb when 2.22 inches of rain fell Thursday night, the party flew north to Ardmore and then down the Washita arm of Lake Texoma to the Denison Dam.

There, they saw about 5,000 cubic feet of water per second going through the 2,000-foot uncontrolled spillway and more than 30,000 cubic feet per second being discharged through the penstocks.

Below the mouths of these giant tubes, the water roared out in a great mass of foam, filling the river below the dam bank to bank.

Down the river for more than 200 miles, the Congressmen flew before they again found the Red River in flood near Idabel and on down to Index and Fulton, Ark.

Roy Penix, chief of technical liaison for the southwestern division of the Army engineers, said the water being discharged from Texoma will flow down the valley of the Red behind the flood which is spreading out today at Fulton.

The Congressional party saw the proposed sites of a series of dams in the Kiamichi Mountains, designed to hold back the mountain streams which have been causing the flooding on the lower Red River.

The Millwood site where a controversial dam has been proposed on Little River just before it joins the Arkansas, came in particularly for attention. Thousands of acres of timberland spread out below the Army plane carrying the party, and the water standing on the ground around the trees was plainly visible from the air.

From Millwood, the tour went up Little River and Mountain Fork across the mountains and over Lake Wister.

Wister, like Texoma, is full to the brim and discharging water over an uncontrolled spillway, but the Poteau River below the dam appeared to be back within its banks.

There still were patches of water in the low places in the Moffet Bottoms at Fort Smith where the Arkansas has been nearly 7 miles wide, but the Arkansas itself appeared to be back within banks today.

The flight continued up the Arkansas River, past the Short Mountain Dam site to the point where the junction of the South Canadian and the Arkansas was visible on one side of the Army plane and the lake behind Tenkiller Ferry, at the highest level in its history, was visible on the other side.

There was some water being discharged at Tenkiller.

A more spectacular sight was provided by the Fort Gibson Reservoir which had nearly all of its gates open and was creating some flooding in the Grand Valley.

The Arkansas, Verdigris, and Grand Rivers were clearly defined as they met at a common junction northeast of Muskogee.

Congressman ED EDMONDSON, of Oklahoma, and JIM WRIGHT, of Texas, spent a busy morning checking the Red and Arkansas Rivers flood problems with the help of Brig. Gen. E. L. Seeman, the division engineer for the Army from Dallas.

The third Congressman, Representative EMMETT BYRNE, Republican, of Chicago, took a much less active interest in the southwestern flood scene.

Seeman said the trip "stresses again the extremes of nature and of the vast amount of water that flows unused out of Texas and Oklahoma."

He said it calls attention of taking advantage of the occasion when nature is bountiful.

"You go from many years of drought to a flood very suddenly," Seeman related.

"The reverse is not true of drought. Drought creeps up on you."

The general said the trip has given "the Congressmen a real bird's-eye view of the problems we face.

"We couldn't have done it from the ground."

From the airship the flooded streams below seemed more like a giant model on which the engineers can work out flood control measures.

The Congressional party by noon today had flown areas which have suffered $118 million in damages since arriving in Texas Wednesday night, Representative WRIGHT said

It was estimated that by the time the committee had completed its 2-day tour it would have seen a million acres of flooded land.

Wright said his first reaction as he looks at the flood scene is to think of the problems of the people whose property has been inundated. He said it gives you a weird feeling to step from a motorboat to the roof of a house as he has done in the last few days and to see the stunned expressions on the faces of people who have been evacuated or have refused to leave their homes.

Wright lived in Seminole as a boy and delivered the Tulsa Tribune there.

The Congressional party was scheduled to fly over the Cimarron Valley and upper Arkansas in the afternoon. Its itinerary included Enid, the Great Salt Plains Reservoir, the Toronto and Oologah dam sites on the Verdigris River, Hulah Reservoir on Caney River and Grand Lake.

A public hearing will be held beginning at 9 a. m. Saturday in the Tulsa Chamber of Commerce Building.

In addition to the Congressmen, Brennan, Seeman, and Penix, the touring party includes Fichard J. Sullivan, chief counsel for the House committee on public works, and Lt. Col. Robert W. Dalrymple, Assistant Chief of Civil Works for the Army engineers.

Progress Report on Saline Water Research Program

EXTENSION OF REMARKS

OF

HON. CLAIR ENGLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 3, 1957

Mr. ENGLE. Mr. Speaker in 1952, legislation which I authored, was enacted initiating the saline water research program under the direction of the Secretary of the Interior. The objective of this program was to find ways and means of economically converting saline or salt water to fresh water. The progress made under this program during the 5 years since it was initiated has been disappointing; however, eventual success is foreseen if the program is put in high gear with the view of producing concrete results at an early date. This is the conclusion of the House Interior and Insular Affairs Committee as the result of recent hearings held for the purpose of reviewing the program.

The objective of the committee's hearings was to determine, first, just where we stand at the present time with respect to finding economic means of converting salt water to fresh water; second, whether the Department of Interior is in agreement with the expressed views of Congress with respect to the degree of urgency warranted in this research program; third, what measures the Department has taken to speed up the program; and fourth, if additional legislation is needed or would be of assistance in meeting the objectives of the program at an earlier date. In 2 days of hearings the committee heard and questioned officials of the Department, contractors, and consultants.

The committee's report on the hearing is critical of the Department of the Interior, both for its handling of the program, and for misrepresentation to the American people of the progress made under the program. The hearings indicated that the Department has not attached to this program the degree of urgency directed by Congress in the 1955 legislation amending the 1952 basic act, and has allowed it to drift along without concrete results while numerous optimistic statements by high officials of the Department have left the impression that large-scale use of converted saline or salt water is just around the corner. My concern and that of the committee is that such misrepresentation of progress may lull the Nation into a false sense of security with respect to water and that the immediate need for conserving and making better use of the water available from natural sources will be overlooked and not properly emphasized.

No concrete evidence was presented to the committee as to measures to accomplish a speed-up in meeting the objective of the program, nor did the Department indicate any immediate need for additional legislation. While it was made clear that pilot plants or demonstration plants of appreciable magnitude to test the more promising processes would require specific Congressional authorization no positive program was presented for getting the demonstration plant phase of the program underway.

With respect to the nature of the research work the Department seemed to be placing emphasis on small and special purpose conversion units, whereas the committee believes that the immediate need is for processes capable of producing large quantities of water for municipal and industrial use near populous or potentially populous areas.

It is not the purpose of the committee's report to present a pessimistic view with respect to the possibility of economical saline and salt water conversion at an early date; however it is the committee's purpose to apprise the American people of the true situation with respect to sea water conversion in order that those charged with responsibility of providing water supplies do not expect too much from this program too soon and do not reduce efforts to fully conserve and make maximum use of the water available from natural sources.

The committee believes that, eventually, converted saline or salt water will be used extensively for municipal, industrial, and perhaps even agricultural uses. The problem has become one of economics or cost.

California Real Estate Magazine Features Information About State and National Legislators

EXTENSION OF REMARKS
OF
HON. CLYDE DOYLE
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, June 3, 1957

Mr. DOYLE. Mr. Speaker, to my desk has come a very lovely and interesting magazine published by the California Real Estate Association for the month of February 1957, featuring the 1957 California State Legislature and the United States Congress.

In this magazine are nicely arranged and printed pictures of each of the members of the California State Senate and Assembly—and also each of the Members of the House and Senate of the United States from California. And opposite each of the photos is a designation of the district represented by the State legislator or the National Representative, together with a short but appropriate descriptive statement of some of the facts about the gentlemen.

Throughout the magazine are feature articles such as the opening message by Hon. Goodwin J. Knight, Governor of California, How Bills Become Laws, Crucial Issues Confronting 1957 Legislature, Streamlining the Legislative Process in California.

Mr. Speaker, I wish to observe that in arranging and publishing this issue of this monthly magazine by this group of California realtors they have rendered a really valuable service to the enlightenment of their members and other readers about the State Legislature in California and about the United States Congress.

I wish to further observe that if more regularly published magazines circulating to memberships of business and professional and other groups throughout our Nation would do some such act at appropriate times in connection with legislative activities in their respective States and in our Nation, it would certainly also be a definite contribution to the representative way of life under our State and United States Constitutions.

The Consumers Study Subcommittee Points the Need of Our Postal Employees

EXTENSION OF REMARKS
OF
HON. ELIZABETH KEE
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Monday, June 3, 1957

Mrs. KEE. Mr. Speaker, retail food prices have increased 16 percent in the past 10 years, according to the preliminary findings of the Consumers Study Subcommittee of the House Committee on Agriculture, which were recently made public.

The subcommittee, and the purposes for which it was created, represent something of a departure from the scope of the Agriculture Committee's previous activities which have, pretty generally, been confined to dealing with the Nation's farm problems as such. This year, however, the constantly rising cost of living prompted the committee for the first time in its history, to take a look at the high prices of food from the consumer's angle.

The Consumers Study Subcommittee was created on March 14, 1957, to study and investigate, among other things, the reasons for the continuing spread between the retail prices city dwellers pay for what goes into their market baskets and the prices farmers receive for the foodstuffs they produce for market. And in another precedent-breaking move, let me add, also for the first time in the Agriculture Committee's history, the chairman appointed to head the new subcommittee is himself a representative of urban consumer groups. He is the Honorable VICTOR ANFUSO, Congressman from New York City's teeming Eighth District—one of the first, I believe, if not the first Member of Congress from a big city to serve on the House Agriculture Committee.

In the preliminary report of its work to date, Mr. ANFUSO's subcommittee has produced a great many thought-provoking facts, and I am confident that before its work is completed, it will have rendered an outstanding service to the Nation.

Returning to the opening statement in this column, that retail food prices have risen 16 percent in the past 10 years—a figure which I have no doubt the subcommittee will be adjusting upward with the latest statement from the Labor Department's Bureau of Labor Statistics, reporting the 14th month straight rise in consumer prices—it is, I feel, significant to note that during this same 10-year period, the average city family increased its expenditures for food by $500, or 50 percent, while farm prices were declining 14 percent.

"Of this additional family outlay," the subcommittee reports, "$400, or 80 percent, went to food processing, transportation, and distribution agencies, and only $45 to farmers. The remainder was expended on imported foods."

Breaking this data down into specifics, the subcommittee states that—again over the 10-year period—the farm price of wheat dropped 7 percent, while retail prices of cereals and bakery products rose a staggering 34 percent.

In other words, most of what we pay for today is in the processing, packaging, and distributing of the product and not its content. For example, there is less than 3 cents' worth of farm-produced corn in a 22-cent package of corn flakes; only 4 cents' worth of wheat in a 28-cent package of soda crackers; and only 2.6 cents' worth of wheat—at farm value—in the pound loaf of bread we purchased in 1956 at an average price of 18 cents.

Here are some other price facts culled from the report that should be of great interest to city and country housewives, alike. In 1956 the contents of the can of sweet corn or peas for which they paid a retail price of between 18 and 22 cents brought the farmer only 2 to 3 cents. A can of tomatoes—staple commodity on most housewives' shelves, as it is on mine—which retailed for 15 cents, had only 2.3 cents' worth of tomatoes in it.

I am greatly concerned with these facts and figures because of legislation which is presently pending in the Congress to grant cost-of-living pay increases to postal employees and other Federal classified employees. Bills have also been introduced, although no action has been scheduled on them, to increase the minimum social-security retirement benefits of older citizens who now average between $30 and $40 a month.

The average city family spent about $1,500 for food in 1956 compared with $1,100 in 1950 when, according to a Bureau of Labor Statistics survey taken at that time, the income before taxes of the average city wage and clerical worker's family was $4,332. Most of the families interviewed in this 1950 survey spent more than their incomes in that year.

Today in West Virginia, the average take-home pay of a top-grade regular clerk in the post office is about $3,800, after deduction for taxes, retirement and life insurance. With the slightly more than $1,500—because of rising prices—that this worker would spend, on the average, for food for his family in 1957, this would leave him approximately

$2,300 to take care of all other living expenses—rent and repairs, clothing, medical and dental care, group hospitalization, transportation, recreation and something put aside for the future education of his children. Obviously, this worker cannot get by economically without going heavily into debt, taking a part-time outside job or having his wife work to help eke out the family income.

As for our older citizens living on retirement pittances of $30 to $40 per month, it is clear that they cannot hope to maintain even the most substandard existences without outside aid—either from grown children, hard-pressed and with families of their own to support—or through public assistance.

Both of these groups stand in dire need of economic help—in the form of pay raises for our postal employees and of an increase in the minimum benefits paid to our older citizens covered by the old-age and survivors insurance program. It is my intention to remind the Congress of this inescapable fact at every possible opportunity—until something is done about it.

Annual Questionnaire to Sixth District

EXTENSION OF REMARKS
OF
HON. PAUL G. ROGERS
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Monday, June 3, 1957

Mr. ROGERS of Florida. Mr. Speaker, each year it has been my custom to submit a questionnaire to the people of my district setting forth various questions which will be considered by the Congress of the United States in its deliberations. This year through the cooperation of the fine newspapers of my district, the questionnaire was published, and to supplement the publication in the paper, I also mailed out a number of questionnaires to broaden the base of the coverage. I am pleased to be able to say that over 23,000 people have answered this questionnaire, which I think is one of the highest participations of any like questionnaire.

The Sixth District of Florida is comprised of 11 counties. The district extends from the east coast to the west coast and has many interests, including not only the tourist business, but many small businesses, industries, fishing, and agriculture. This district in 1950 had a population of about 284,000; presently, the population of the district is over 500,000. It is populated by residents who have settled there from all over the United States, therefore, I think the response to the questionnaire reflects not only the thinking of the people of the sixth district but in good measure reflects the thinking all over the United States.

I greatly appreciate the fine response we have had and I am gratified to say that the people of the Sixth District of Florida are intensely interested in their Government and are willing to take time to participate in it because they know that government is everybody's business.

The following is the questionnaire and the results, first in the actual figures and second in percentages:

1. The President's budget for fiscal 1958 proposes that the Federal Government spend $71,800,000,000. Do you favor the reduction of this budget by Congressional action? Yes, 19,489 (89.9 percent); no, 2,177 (10.1 percent).

2. The President's budget requests the Congress to appropriate an additional $4,400,000,000 for foreign aid (military and technical). Do you—

(a) Favor this amount? Yes, 2,494 (12.5 percent); no, 17,532 (87.5 percent).

(b) Favor no additional money for foreign aid when there are unspent appropriations still on hand? Yes, 13,930 (70.2 percent); no, 5,904 (29.8 percent).

(c) Favor discontinuing all foreign aid? Yes, 8,170 (41.9 percent); no, 11,306 (58.1 percent).

3. Do you favor Federal aid to education? Yes, 12,155 (58.8 percent); no, 8,529 (41.2 percent).

(a) If Federal control is included? Yes, 4,533 (23.3 percent); no, 14,923 (76.7 percent).

4. Do you favor extending minimum wage law coverage to include retail, chain store, hotel and other employees not now affected? Yes, 14,655 (71.6 percent); no, 5,725 (28.4 percent).

5. Should postal rates be increased on:

(a) First-class mail? Yes, 7,323 (36.6 percent); no, 12,657 (63.4 percent).

(b) Second-class mail? Yes, 12,822 (64.2 percent); no, 6,920 (35.8 percent).

(c) Third-class mail? Yes, 13,314 (69.8 percent); no, 5,758 (30.2 percent).

6. Should present excise taxes be extended for one more year? Yes; 10,410 (52.2 percent); no, 9,502 (47.8 percent).

7. Do you favor enactment of my bill, H. R. 2494, to extend the Kennedy-Rogers Act to place the Federal budget on a yearly basis (recommendation of bipartisan Hoover Commission)—estimated to save $4 billion annually? Yes, 21,366 (98.4 percent); no, 349 (1.6 percent).

An Honor Well Deserved

EXTENSION OF REMARKS
OF
HON. CLEVELAND M. BAILEY
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Monday, June 3, 1957

Mr. BAILEY. Mr. Speaker, today in my home State in the city of Morgantown, the University of West Virginia will confer an honorary degree of doctor of laws upon a most distinguished American, John L. Lewis. Mr. Lewis has been president of the United Mine Workers of America since 1919. During his presidency of that proud organization America's union coal miners have become the highest paid industrial workers in the world.

West Virginia has been for some years the largest coal-producing State in the Union. It is fitting that Mr. Lewis' first honorary doctorate should come from our State university. He has led West Virginia's coal miners from the depths of economic depression and personal indignity to the place they now enjoy in our State as well paid, free mountain men.

In commenting on the degrees to be awarded this year by the University of West Virginia, one of the largest daily papers in our State, the Charleston Gazette, said:

One name stands out as distinctive and that is John L. Lewis, head of the United Mine Workers of America. In coming up from the coal pits to eminent status in the American labor movement, and giving dignity to the coal miners in this largest of coal-producing States, we think his is a degree long overdue.

This editorial states only the truth. Mr. Lewis is a great man and an erudite man. It is fitting that he be formally recognized as such.

Wool-Textile Imports Weaken a Basic American Industry

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Monday, June 3, 1957

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include my statement at the hearings which began today at the General Services auditorium, under the auspices of the Office of Defense Mobilization, on petition by the National Association of Wool Manufacturers on alleged "threat to national security presented by wool-textile imports."

The statement follows:

WOOL TEXTILE IMPORTS WEAKEN A BASIC AMERICAN INDUSTRY

(Statement of Congressman THOMAS J. LANE, Democrat, of Massachusetts, at the hearings beginning June 3, 1957, General Services auditorium, under auspices of the Office of Defense Mobilization, on petition by the National Association of Wool Manufacturers on alleged threat to national security presented by wool textile imports)

Mr. Chairman, the textile industry as a whole, has been suffering from many complications since the end of World War II. The woolen-worsted section of that industry is actually fighting for its very existence, due to the added danger of foreign imports.

It is an astonishing and disturbing fact that the Federal Government, under international trade agreements, is making it more difficult for this industry to survive.

Repeatedly we must hammer home the following official statistics, in order to awaken responsible agencies of the Government, so that effective steps will be taken to protect this vital industry.

In New England alone, from 1949 through 1957, 145 woolen and worsted mills have liquidated, displacing over 65,000 skilled operatives.

As most of these workers have had to establish themselves in other industries, their special skill in textiles have been lost to the industry and to the Nation, in the event of an emergency.

Of the various factors, regional competition within the United States was once thought to be the principal one that forced many older woolen and worsted textile mills in New England to go out of business.

Unnoticed for some time, was the growing volume of foreign competition.

In 1951, imports of wool yarn from Japan were none. By 1956, they had reached a total of 1 million pounds for that year.

Since 1948, when cloth tariffs were slashed, imports of woven woolen cloth from Britain,

Japan, Italy, France, and other sources, increased by over 25 million yards. From 1946 to 1956, these imports jumped 735 percent.

Corporate net income after taxes, of the wool textile industry in the United States, dropped from $82 million in 1948, to a loss of $7 million in 1952.

On the basis of the three-fourths of a man-hour per yard needed to produce 16 ounces of Army serge, British manufacturers can produce it for 82 cents per yard less, and the Japanese for $1.10 per yard less. This startling wage gap receives no protection from our export-import policies. Without such protection, our manufacturers and workers cannot possibly compete with imports, even right here in our own home market.

This unfair competition is forcing more and more of our mills out of business, and is preventing the remainder from expanding or even modernizing the plant and equipment that would be called upon for extra duty if a military emergency should arise.

In 1942, output for the military alone was three-fourths of the total production in 1956. The reserve capacity of the industry is lower than it ever has been, in relation to our growing population.

Official indifference to the problems of the industry has resulted in the present dangerous situation where the mobilization needs for essential wool textiles would probably exceed our capacity to produce. Technological progress along other lines has not replaced the Nation's dependence upon a woolen and worsted industry located within the United States, to provide an adequate supply of clothing for its civilian population and its defense forces.

The embattled wool textile industry is not looking for any handouts. It only seeks protection to insure fair competition.

Is this too much to ask, when its very existence depends upon action by the Government to halt the flood of imports?

The threat is present, and it is serious. It materially affects our national security.

We therefore ask the Office of Defense Mobilization to advise the President of the danger, and recommend adjustments by him to reduce wool textile imports, to protect a basic and strategic American industry.

Housing Conference Report Offers Chance for Big Savings

EXTENSION OF REMARKS
OF
HON. CHARLES W. VURSELL
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, June 3, 1957

Mr. VURSELL. Mr. Speaker, while the other body last week, by amendments, made considerable improvement in the housing bill reported to it by the Banking and Currency Committee, if the Members of the House, when considering the conference report that will soon come to us, will stand firm and refuse to concur on certain provisions of the bill, which yet should be corrected, we can save the taxpayers in the future billions of dollars.

The House bill, when it went to the other body, contained the Fisher amendment, which was stricken out by that body. The difference between these two bills in this one instance with respect to public housing is so fundamental that the House should refuse to concur. If the Fisher amendment can be maintained over future years, it alone will save the taxpayers billions of dollars.

Then, again, 4 or 5 of the public-housing amendments approved by the other body are so far reaching, in adding additional expense that they should be stricken, as they go beyond the welfare purpose which was the original intent of the law.

Here are their provisions:

First. Would permit over-income tenants to remain in public housing indefinitely if the public housing authority determines that adequate housing is not available in the private market consistent with the tenant's income less all his exemptions—section 401 (a) of the Senate-passed version of H. R. 6659.

Second. Would repeal the requirement that a community have a workable program for the prevention of slums or blight as a prerequisite to public housing—section 401 (c). Note: The workable program was placed in the law in 1954, repealed in 1955, and reenacted in 1956.

Third. Would increase the income exemptions for determining whether a family is eligible for admission to public housing. Exemptions are also increased for determining eligibility for continued occupancy. The exemptions relate to adult members of the household other than the principal wage earner, and apply to the wages of this other adult group; that is, grown children, in-laws, and so forth, section 401 (b).

Fourth. Would increase the construction cost limits for public housing from $1,750 to $2,000 per room; and where designed for elderly persons, from $2,250 to $2,500 per room—section 401 (d).

URBAN RENEWAL SHOULD BE REDUCED

The Senate bill carries $250 million more in authorizations for urban renewal than was carried in the House bill. The House by all means should refuse to concur, and reduce the amount by $250 millions.

In urban renewal the House bill provided that no one State could have allocated to it over 10 percent of the total funds allocated in the bill. New York City has been allocated and committed an amount of $92 million, which has about reached its allotment, and consumed the State's allotment.

Chicago has $74 million, Philadelphia $54 million, and many other big cities many other millions.

The mayors of these large cities have been insisting the allotment percentage per States be raised from 10 to 15 percent.

The Senate bill raises these allotment rates from 10 to 15 percent, which will lift the ceiling to the extent that New York City and other cities can secure up to $200 million of the taxpayers' money in grants—none of it to be returned. The House adamantly refuses to concur in this amendment.

There has been allocated for urban renewal a total of $1¼ billion in grant money to do a face-lifting job, so to speak, mostly in improving large cities at the expense of every taxpayer in every congressional district in the United States.

I am wondering how many Members of Congress know that these funds are all grants to be given away, with not a single dollar returned to the Treasury, from which it comes.

It would seem to me that no Congressman can defend before the people in his own district the giveaway of over a billion dollars of the taxpayers' money out of the Treasury to the wealthy big cities of the country, and to many cities of smaller size—all of which are more able to improve their own cities than is the Federal Government—thereby taxing all laboring men, farmers, professional and small-business men throughout the Nation.

It would seem to me that if we believe in economy that we ought to put on the brakes and reduce the costs carried in this housing bill rather than to expand and increase them year after year.

The House of Representatives, which reduced the defense budget by $2½ billion, ought to seize upon the opportunity of reducing the intolerable and unnecessary waste provided in the housing bill that will come before us shortly in a conference report.

Special Subcommittee Chairman of House Armed Services Committee Makes Announcement of Dates for Hearings on Subject of Less than Honorable Military Discharges—Public Hearings To Begin Monday, June 24, and Run Through June 28

EXTENSION OF REMARKS
OF
HON. CLYDE DOYLE
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, June 3, 1957

Mr. DOYLE. Mr. Speaker, by reason of unanimous consent heretofore granted me so to do I am pleased to advise you and all the other Members of this distinguished body that the public hearings on the Doyle bill, H. R. 1108, and companion bills dealing with the subject of less than honorable discharges will commence at 10 a. m., Monday, June 24, in room 313A, 3d floor of the Old House Office Building. At that time the special subcommittee of five members of the full Armed Services Committee, appointed by the Honorable CARL VINSON to hold such hearings, will ony be able to hear, on Monday, the witnesses from the Defense Department. Beginning on Wednesday at 10 a. m. the Members of Congress and other interested witnesses representing the veterans groups and others will be heard and continue the balance of the week. Every effort will be made to accommodate the time element for all Members of Congress who desire to testify in the public sessions during the week but I regret to say that on account of the large number of witnesses who have already indicated such desire, the oral testimony of witnesses must needs be limited to 10 minutes;

with the privilege of inserting in the record of the hearings additional written material which the Congressional Member deems relevant.

Since the hearings on Monday are limited to witnesses from the Defense Department to the desirable end that members of the special subcommittees shall have the benefit of their stated position known throughout the balance of the week, I have taken pleasure in cordially inviting all Members of the House desiring to do so to also attend the hearings on Monday so as to also have the benefit of hearing the position of the military on these bills.

Mr. Speaker, the special subcommittee has held several executive meetings preparatory to these public hearings and I wish to state that it has already been a real pleasure for me to have the opportunity to sit with these distinguished members of the House Armed Services Committee on this special subcommittee appointed for these important hearings. And we have given our best considered attention to this very difficult and important problem which annually relates to several thousand members of our military establishments. We enter these hearings with the Defense Department and other witnesses who appear before us in a studious attitude, determined to seriously and conscientiously endeavor to ascertain the facts applicable to the problem so as to be able to recommend to the attention of the full Armed Services Committee, and through them if our recommendations be approved, to Congress itself; that which may definitely be of good report and real merit in a field which it is generally recognized some meritorious advancement should be promptly made.

Members of Congress desiring to make their wishes known for opportunity to appear in the hearings should promptly notify Mr. Russell Blandford, committee counsel, at the House Armed Services Committee office, phones 217 and 341. The members of the special subcommittee appointed by Honorable CARL VINSON are: CLYDE DOYLE, chairman, California; WILLIAM G. BRAY, Indiana; GEORGE HUDDLESTON, JR., Alabama; CHARLES S. GUBSER, California; and A. PAUL KITCHIN, North Carolina.

Subcommittee on Mines and Mining Adopts Resolution Supporting Funds for Mineral Program

EXTENSION OF REMARKS

OF

HON. CLAIR ENGLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 3, 1957

Mr. ENGLE. Mr. Speaker, the Subcommittee on Mines and Mining of the House Committee on Interior and Insular Affairs, chairmaned by our colleague WALTER ROGERS of Texas, on May 24, 1957, adopted a resolution urging the House to approve the $30 million provided for tungsten, asbestos, fluorspar, and columbium-tantalum by the Senate in the third supplemental bill, H. R. 7221.

The mining subcommittee spent many days of hearing when this program was authorized under Public Law 733 in August 1956, and received further testimony on the subject on May 24 of this year.

The resolution adopted by the mining subcommittee supports a similar position taken by the Senate Committee on Interior and Insular Affairs, the Senate Appropriations Committee, the Senate itself twice by overwhelming votes, and by the executive agencies—the Department of the Interior, the Office of Defense Mobilization, and the Bureau of the Budget.

So far as I know, the House Committee on Appropriations is the only committee or agency that has had anything to do with the problem that has recommended against this appropriation.

A copy of the resolution is as follows:

RESOLUTION OF THE SUBCOMMITTEE ON MINES AND MINING OF THE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS, HOUSE OF REPRESENTATIVES

Whereas during World War II and at the beginning of war in Korea in 1950 the United States was almost wholly dependent upon supplies of foreign produced tungsten; and

Whereas by Public Law 733, 84th Congress, approved July 19, 1956, the domestic tungsten, asbestos, acid-grade fluorspar, and columbium-tantalum miners were encouraged to believe by the highest authorities in the land—namely, a law passed by both Houses of the Congress and approved by the President—that general purchase programs (as distinct from individual negotiated contracts) to be in effect through December 31, 1958, were to be carried out; and

Whereas the General Services Administration, to which was delegated responsibility for administration of this program, indicated to the domestic miners that the necessary funds to carry out the programs were expected to be forthcoming and that the miners should conduct their operations on this basis (as detailed in letters from GSA in November and December, 1956); and

Whereas one of the surest ways to encourage all the citizens of the land to respect the laws of the land is for the Congress itself to carefully respect the very laws that it itself causes to be enacted into law; and

Whereas any present official statements as to defense requirements for high temperature metals, such as tungsten, columbium, and tantalum, are completely obsolete (as noted in the letter of December 13, 1956, from the Deputy Secretary of Defense to the Office of Defense Mobilization); and

Whereas future defense requirements for high-temperature metals such as tungsten, columbium, and tantalum can only be expected to increase significantly in view of the fact that tungsten is the metallic element with the highest melting point known to man—about 6,152° F. (indeed of all the elements, the melting point of tungsten is exceeded only by that of carbon)—while columbium and tantalum are also high-temperature metals, iron-free asbestos is necessary for electric-cable coverings, and fluorine is a constituent of high-temperature fuels—and our entire technological civilization requires the utilization of ever higher temperatures (as acknowledged by the Director of the Office of Defense Mobilization in the February 26, 1957, hearings by the Senate Committee on Interior and Insular Affairs on the Necessity for Implementing Public Law 733); and

Whereas it would be the utmost folly and it could be disastrous to let our present domestic mining mobilization base collapse, as it will surely do in the face of the competition of cheap foreign-mined material coming largely from sources of extreme vulnerability in time of emergency; and

Whereas there is as yet no other program to maintain the domestic mining mobilization base, although the Congress has been promised on several occasions that a long range minerals program would be recommended to it; and

Whereas the real cost of the material acquired under this program is substantially less than the base price set forth in the law when Federal, State and local taxes paid by the mining companies and their employees and suppliers are taken into consideration; and

Whereas the costs of any future Government procurement programs for metals and minerals that may be found to be necessary in the uncertain years ahead in this age of peril will of necessity be much higher if the operators have before them the example of breach of faith in the execution of prior programs such as failure to carry out that set forth in Public Law 733; and

Whereas while it may well be that the present spot price of foreign material is lower than that for domestically mined material, history in the case of many strategic materials shows clearly that the price of foreign material can rise many times over once the domestic source of production has been scuttled, and consumers are then put through a real price wringer when it is too late to reactivate domestic mining properties that are flooded and caved: Now, therefore, be it

Resolved by the Subcommittee on Mines and Mining of the Committee on Interior and Insular Affairs of the House of Representatives, That the House of Representatives is hereby urged to forthwith take the necessary action to implement fully the provisions of Public Law 733, 84th Congress, the Domestic Tungsten, Asbestos, Fluorspar, and Columbium-Tantalum Production and Purchase Act of 1956, and in particular to agree to make available the sum of $30 million which is provided therefor by the Senate amendment to H. R. 7221, 85th Congress, 1st session, the 3d supplemental bill, 1957.

Adopted May 24, 1957.

WALTER ROGERS,
Chairman, Subcommittee on Mines and Mining.

NANCY J. ARNOLD,
Clerk.

The Third Party in Medicine

EXTENSION OF REMARKS

OF

HON. OREN HARRIS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 3, 1957

Mr. HARRIS. Mr. Speaker, I was privileged on June 2, 1957, to address the Conference of Presidents and Other Officers of State Medical Associations at a session preceding the annual meeting of the American Medical Association in New York City. My speech was entitled "The Third Party in Medicine" and it deals in part with the proper role that the Federal Government can play as a third party to the physician-patient relationship. Because of the importance of the question, I call it to the attention of our

colleagues and under unanimous consent I include my discussion herein:

THE THIRD PARTY IN MEDICINE

I consider it a great honor that you have asked me to address you today. I may assume, of course, that you do not expect me to impart to you any knowledge in the field of medicine which I do not possess. I would rather think that you want me to discuss some issues which concern both physicians and Members of Congress because legislative proposals involving these issues have been entertained in the Congress in the past and are apt to be considered again in the future.

Not a day passes on which I as an individual Member of Congress or as chairman of the Interstate and Foreign Commerce Committee do not receive a number of communications involving some questions of health and health care. You may wonder why the Committee on Interstate and Foreign Commerce of all congressional committees should concern itself with questions of health. Certainly the name of the committee does not appear to imply any such concern. As frequently is the case, the explanation is a historical one and readily explains the connection between commerce and health.

Since colonial days our country has depended on merchant vessels to bring goods from foreign lands to our shores and to carry our exports abroad. Merchant seamen manning these vessels, when falling ill or becoming incapacitated, imposed an undue burden upon local facilities and local resources in our port cities.

When the Congress met in 1789, a resolution was adopted appointing a committee to prepare a bill providing for the establishment of hospitals for sick and disabled seamen. However, no such legislation was enacted until 9 years later when the 5th Congress passed an act to establish the Marine Hospital Service (I might say parenthetically that things today are still pretty much the same as they were during the early days of the Republic—it usually takes several sessions of Congress to develop and pass major legislation).

The Marine Hospital Service Act was approved by President Adams on July 16, 1798. It authorized the President "to nominate and appoint, in such ports of the United States as he may think proper, one or more persons, to be called directors of the marine hospital of the United States, whose duty it is to provide for the accommodation of sick and disabled seamen."

The Marine Hospital Service formed the basis of the United States Public Health Service as we know it today, and from this interesting bit of history you will appreciate the historical connection between commerce and health which has resulted in the assignment to the Committee on Interstate and Foreign Commerce of legislative jurisdiction over public health and health care problems.

I would like to make it abundantly clear that the Committee on Interstate and Foreign Commerce feels very strongly that its responsibility in the field of health is one of the most important legislative responsibilities given to it, and the committee takes these responsibilities very seriously indeed. This field of the committee's legislative responsibility differs somewhat from other fields assigned to it because in the case of health legislation the committee deals with human needs of all of our citizens. In many of the other legislative fields assigned to us we are dealing primarily with business organizations and trade associations, etc., and economic considerations frequently predominate and necessarily so.

In an effort to more effectively discharge the committee's responsibilities in the field of health, I have as chairman of the committee appointed a Subcommittee on Health and Science, of 11 members, with Congressman JOHN BELL WILLIAMS, of Mississippi, as chairman. It is my purpose to see that special attention is given to the problems and legislation in these two fields. It is also my aim that this subcommittee of able Members of the Congress keep in mind in the consideration of these matters, the subject which I have in mind for you today, The Third Party in Medicine.

I have not related to you the history of our committee's legislative responsibilities in the field of health merely to explain why our committee and not some other congressional committee has legislative jurisdiction over health measures. I wanted, however, to call to your attention that from the very inception of the Republic, Congress, in case it found such action was justified on the basis of a clearly established need, has accepted the fact that a third party might be required in special situations to provide needed medical services.

Every thoughtful person appreciates, no doubt, that a third party entering into a two-party relationship creates quite a problem. In the case of a marriage relationship, intervention of a third party almost invariably results in a breaking up of the marriage. Fortunately, however, this is not the rule with regard to all third parties. Take for example the case of the relationship between a Member of Congress and his constituents. A third party in the form of an interested group or an executive agency, might attempt to influence the Congressman-constituent relationship. Quite frequently a third party may improve this relationship by helping both the constituent and the Congressman. Then, there are other instances where nothing is further from the mind of a third party than to strengthen the relationship between the Congressman and his constituent, but on the contrary, is out to sever the relationship and to sever if for good.

What am I trying to say? I am trying to say that in the case of the relationship between a physician and his patients, just as in the case of other relationships, each case of a third party must be examined carefully on its own merits in order to determine whether the third party is likely to benefit or harm the relationship.

Let me examine then the nature and purpose of some of the third parties which participate in the physician-patient relationship and let us try to determine whether their participation has been beneficial or adverse. I do not mean with a view of determining the advisability of whether they are good or bad. Most of us have our own opinions about some of these programs. I merely wish to point to some results and with particular emphasis to the trend of today.

Let us take hospitals, for example. Surely they must be considered third parties when it comes to the doctor-patient relationship. However, could you imagine practicing medicine today without hospitals. As a matter of fact, it might be said that the construction of many hospitals, particularly in rural areas and small communities, has contributed to the establishment of new physician-patient relationships, because in many instances physicians could be induced to practice medicine in rural areas and small communities only after adequate hospital facilities were made available in those areas. Hospitals also help train new members of your profession by providing the facilities where medical students, interns and residents gain the practical experience required by physicians.

If we consider hospitals third parties then can we consider the Federal Government a third party once removed because the Federal Government, through the hospital construction program, has given impetus and support to the construction of new hospital facilities by State and local governments and private, nonprofit organizations.

While hospitals on the whole must be considered third parties which greatly benefit the physician-patient relationship, there have been some instances in which some hospitals have been criticized for disturbing established physician-patient relationships. Such criticism has come from physicians as well as from patients. It has been directed against the practice generally followed by hospitals of being selective about admitting members of the medical profession to their staffs. This selectivity (and I am not criticizing it when I refer to it) definitely affects the relationship between some physicians and some patients.

Where does that leave the hospitals as third parties? On balance, I would think, your profession would not want to do without hospitals. This does not mean however that each and every act of these third parties invariably is beneficial to the relationship with exists between a given physician and his patients.

Let us look at some other third parties. Their number has become legion in recent years. Private insurance carriers and prepayment organizations have increasingly become third parties which importantly participate in the physician-patient relationship. These carriers may be commercial insurance companies, or, they may be nonprofit organizations like the Blue Cross or Blue Shield. They may be prepayment plans organized by employers or employees, or they may be organized jointly by both employers and employees. They may be prepayment plans organized by consumers on a communitywide basis, or they may be prepayment plans organized by local medical societies which compete with consumer-sponsored prepayment plans.

All of these third parties greatly differ from each other with regard to the methods which they employ in participating in the physician-patient relationship. Your profession, through its local, State, and national organizations has scrutinized, and appropriately so, these methods for many years. You have approved some and you have actively opposed others. As I understand it there are many different points of view as to whether a given plan or method is beneficial or detrimental to the traditional physician-patient relationship.

This is a fundamental issue that has beset many Members of Congress, and especially the members of our committee, in the consideration of the many proposals, and I might say, demands which we have had in matters of public health. I am personally concerned about the trend in the thinking that goes into these legislative proposals but want to emphasize here that this is the fundamental principle involved between the traditional system, the freedom and unrestrained relationship on the one hand and governmental interference, or often referred to as socialized medicine on the other.

As new third parties appear on the scene, new issues will be raised for some time to come and perhaps the debate will become heated in particular cases to the point where some of these controversies will, as they have in the past, reach the courts, State legislatures, and the Congress of the United States.

There are other third parties that are not thought of quite as frequently as third parties because their attempts to influence the traditional physician-patient relationship are of a different character. I have in mind drug and pharmaceutical firms on the one hand and foundations and voluntary associations operating in the health field on the other hand. The committee has received a number of interesting communications from members of your profession pointing to the increasing amount of advertising engaged in by some pharmaceutical firms addressed to the public in general. The purpose of this advertising obviously is to create a demand on the

part of the general public for particular drugs. Some of these drugs may be sold on prescription only. Therefore, such public advertising is aimed at creating a demand on the part of the patients that physicians prescribe particular drugs. Thus, the pharmaceutical houses engaged in such advertising seek to influence the physician-patient relationship. Some physicians who have communicated with our committee have suggested that such advertising constitutes an unwarranted interference on the part of the particular drug manufacturer in the traditional physician-patient relationship. It is my understanding that the problems have been the subject of study by a special committee established by the American Medical Association. If these practices continue and increase in frequency, our committee too may desire to study how these practices affect the public welfare, or should I say public tranquility.

Public demand for particular drugs, or biological products, is created not only on the basis of public advertisements. Foundations and voluntary organizations concerned with particular diseases aim at reaching the public to arouse interest in these specific diseases and to stimulate their prevention or cure. In some instances substantial differences of opinion have arisen on the part of medical experts, whether a vaccine or a pharmaceutical or biological product is safe and efficacious and whether it should or should not be given to patients. There might be further disagreement among medical experts with regard to the methods which should be employed in applying the vaccine or the pharmaceutical product. The direct contact however which a foundation or other organization may have with the general public may greatly influence traditional physician-patient relationships. We cannot easily forget an experience so recently had which pointed out so forcefully this particular problem.

So, you can see we have a multitude of third parties which seek to participate in the physician-patient relationship. Some of the third parties have become generally accepted by physicians and patients. As to other third parties the situation is often not so clear, and this is particularly true with regard to some of the more recent third parties whose potential power for good or evil is very great indeed. As an example, you have the existing contentions which have arisen recently on certain kinds of prepayment plans.

It is impossible for me to discuss the benefits and disadvantages, both actual and substantial, of all the third parties that I have referred to so far. Therefore, I would like to single out for attention one third party to whose role with regard to the traditional physician-patient relationship I have given particular thought—and I refer to the Federal Government as a third party in medicine.

How are we to judge the role of the Federal Government as a third party? In order to do this we must be ever mindful of the nature of the physician-patient relationship.

In spite of the general tendency toward increasing specialization on the part of the medical practitioner, modern medicine appears to stress more and more the interrelationship of all human functions and the need for dealing with the whole person of the patient. This concept of medicine requires more than ever a peculiar relationship of confidence between patient and physician. Any attempt to make this relationship of confidence over into a service which can be routinized or standardized and which may be purchased at a going price in the market place can only result in destroying that relationship. This does not mean, however, that ways and means might not be found in the future by the medical profession on the basis of carefully conducted experiments of facilitating the rendering of medical services through the utilization of new and improved methods of prevention, diagnosis, and treatment.

If this personal relationship of confidence is to be preserved—and I, for one, am determined that it will be—it follows that the role of the Federal Government as a third party in that relationship must be carefully circumscribed if it is to further and not harm that relationship.

We might postulate, first, that the Federal Government should not play any "third party" role unless there is a clearly demonstrated actual need for such a role, and unless there is substantial agreement that such need cannot be met in any other way.

Secondly, we might say that after the actual need has been clearly demonstrated, and after substantial agreement has been reached that the Federal Government should become a "third party," then the needs should be met, wherever possible, through indirect rather than direct methods. In other words, the Federal role should not be, except in special circumstances like in the case of our Armed Forces, for example, to provide medical services but to help provide the facilities in which, or to create the conditions under which, physicians are enabled to furnish the needed material services without further participation of the Federal Government.

I believe that these two yardsticks—the yardstick of clearly demonstrated actual need and the yardstick of indirectness—have been employed by the medical profession in judging the merits—or the lack thereof—of health legislation. Those legislative programs which the medical profession has supported in the past, such as programs for Federal aid in the construction of hospitals and research facilities, have met this dual test of need and indirectness.

Another program which is pending before our committee, calling for Federal aid for the construction of medical school facilities likewise appears to meet these two tests and thus is receiving your support. Even though there is great urgency for this program to meet an emergency with the economy wave and the consciousness of ever great Federal responsibilities I have as chairman of the Committee experienced difficulty thus far in getting off of the ground with further authorization. Our committee has observed the caution sign emanating throughout the country.

The fact that in the case of some programs the Federal Government is an "indirect third party" does not mean at all that it is an "insignificant third party." Take the appropriations for the National Institutes of Health for medical research. These have grown over a 20-year period from slightly less than one-half million dollars in 1938 to more than $220 million in 1958.

In the case of the Hill-Burton program, Federal funds appropriated for the current fiscal year amount to $125 million, and the budget request for the next fiscal year is only slightly less. Since the inception of the program in 1946, the Congress has appropriated over $937 million for the construction of hospitals.

On the other hand, plans calling for compulsory health insurance which would have resulted in a substantial curtailment of the independent character of private insurance carriers and prepayment organizations have met with your spirited opposition, and I can truly say, mine too, consistently. I venture to say that in regard to that proposal you probably felt that there appeared to be no clearly demonstrated need for such a far-reaching program, and that the methods proposed in these measures directly injected the Federal Government as a "third party" in physician-patient relations.

Finally, let me say that in my judgment the Committee on Interstate and Foreign Commerce, whenever health legislation comes before it for consideration, will exercise the greatest care to see to it that the Federal Government does not unnecessarily become a "third party" in medicine. When a need for Federal participation has clearly been established, the Committee will examine the proposal to determine whether the methods by which the Federal Government would be called upon to participate are such that they will not adversely affect the all important relationship of confidence that must exist between physician and patient.

I want to remind you, however, that the American people have always felt free to call upon Congress to act in any area of their lives if they feel that a need for action exists. As you well know, a considerable amount of public attention has been focused on the high cost of medical care (of which doctors' fees are only a part). If the American people should feel that large segments of the population, as for example, the aged or the chronically ill are unable to secure adequate medical care because the cost of such medical care is beyond their ability to pay, then they will call upon the Congress to meet these needs.

In this respect the American people have changed little if any since the days when the famous Frenchman, Alexis de Tocqueville, visited these shores. Upon his return to France in 1830 he wrote: "These Americans are the most peculiar people in the world. You will not believe it when I tell you how they behave. In a local community in their country a citizen may conceive of some need which is not being met. What does he do? He goes across the street and discusses it with his neighbor. Then what happens? A committee comes into existence and then the committee begins functioning on behalf of that need."

Today, when individual needs remain unmet, through the efforts of private groups or through local or State government programs, the outcry to have something done in behalf of these needs reaches the Congress with increasing frequency.

I hope that some of the serious health needs to which I have referred can be met by your profession with the aid of private third parties. If they are not met in this manner, public pressure will be growing steadily at enlarging the area in which the Federal Government should participate as a "third party in medicine." The dangers inherent in such expansion of the Federal role in medicine are very real indeed, and much is at stake for your profession. I am confident, therefore, that you will not slacken in your effort to participate actively in trying to meet some of these urgent needs.

It Is Later Than You Think

EXTENSION OF REMARKS

OF

HON. FRANCIS E. WALTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 3, 1957

Mr. WALTER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address, which I made on June 1, 1957, at the Catholic War Veterans' convention in Baltimore, Md.

Included is the statement of T. S. Bruchalski, commander of the Christopher Post of the Catholic War Veterans' 1957

Americanism trophy presented to Congressman WALTER by Commander Bruchalski:

IT IS LATER THAN YOU THINK

(Address by Hon. FRANCIS E. WALTER before Catholic War Veterans of the United States of America, Baltimore, Md., June 1, 1957)

On the letterhead of your organization appear these words: "The only thing necessary for the triumph of evil is that good men do nothing." This might well be the text upon which to base my remarks before this organization, the roots of which stem from spiritual sources, belief in God, the dignity of the human soul, and the direction of which is toward patriotic service.

These intangibles are the priceless heritage of the free West, to which approximately one-third the population of this globe adheres. The way of life which these intangibles sustain has been 2,000 years and more in development.

Just 100 years ago a German scholar, Karl Marx, under the influence of Hegel's philosophy of contradictions, and Ludwig Fuerbach's philosophy of the primacy of material things, developed a philosophy which, in essence, denies the existence of God and of the human soul. As a corollary, it denies the existence of morality stemming from a code of spiritual values. It asserts that man, his institutions, and society are determined exclusively by materialistic considerations. It conceives of a world class struggle as inevitable because of presumed clash of interest between those who produce and those who own; it proclaims that upon the elimination of the ownership class, the bourgeoisie, and a merging of production and ownership in a dictatorship of the proletariat, the working class, each will give according to his ability and will receive according to his needs, the state will wither away, evil will disappear, the millenium will have arrived.

Just 50 years ago the philosophy of Karl Marx gained impetus as an organized force at a conference of the Russian Social Democratic Party, held in London, where Nicolai Lenin formed a Bolshevik faction, later known as the Communists, to be the catalytic agent of this inevitable class warfare. Here are the words from the Communist manifesto:

"The Communists disdain to conceal their views and aims. They openly declare that their ends can be attained only by the forcible overthrow of all existing social conditions."

Here are the words of Nicolai Lenin:

"The existence of the Soviet Republic side by side with imperialist states for a long time is unthinkable. One or the other must triumph in the end, and before that end supervenes a series of frightful collisions between the Soviet Republic and the bourgeois states will be inevitable.

"We must be able to withstand all this, to agree to all and every sacrifice, and even—if need be—to resort to various stratagems, artifices, illegal methods, to evasions and subterfuges."

You and I may agree that this Communist force is unsound and unworkable, and we, like the overwhelming majority which it enslaves, do abhor it, but nevertheless today, just 50-odd years from its inception by Lenin, this force, called communism, controls one-third of the population of the world. In other words, today one-third of the population of the world are adherents to the basic philosophy to which you and I adhere, grounded in faith in God and spiritual value. One-third of the population of the world is enmeshed within the grip of international communism, and the remaining one-third—the so-called neutral bloc, the Middle East and the Far East, consisting of 800 million people, appear to be gravitating within the orbit of the international Communist conspiracy.

Now, let us face up to two elemental cold, hard facts:

First, today, of the 86 nations of the world, there is only 1 principal deterrent to world domination by the Communist conspiracy, and that is the United States of America.

Second, the Soviet Union, its satellites, and all within its influence are at war with the United States of America. It is a war which has already cost billions of our Treasury and the blood of our youth. It is a total war—political, economic, psychological, diplomatic—and it is a global war. Finally, it is a war which they, and not we, are winning.

In the course of the last year the Committee on Un-American Activities has assembled and released factual material on the international Communist conspiracy. We released some several months ago a report prepared for us by the Research Institute of America, which is one of the outstanding research organizations of the Nation. This report, after an appraisal of each of the many facets of the world Communist conspiracy, has this conclusion:

"These are the hard facts: Economic and military strength of the Moscow-directed one-third of the globe is rising steadily. The new Soviet leadership's domestic and foreign policies are far more subtle and shrewd than those of Stalin. Most important, the new Soviet policies have been astonishingly successful. It adds up to this: Right now we and our allies are losing the battle against world communism."

Several months ago, our committee brought to the United States for consultation, Ernest Tillich, who is head of one of the strongest anti-Communist groups in Europe. This group is the fighting group against inhumanity. In the course of his testimony, we asked him how late it is on the timetable of international communism. His response was "it is 5 minutes until midnight and the clock is moving fast."

We likewise received the testimony of experts on the Hungarian revolt. We were impressed with two conclusions on which the experts agreed. The first is that the Hungarian revolt demonstrated to the neutral bloc nations the impotency of the West, and second, that the result was a clear warning that there can be no successful defection from the grip of the Red octopus.

We likewise received testimony from experts respecting the Communist penetration in the Middle East where the recent Suez crisis has been exploited by Communist propagandists, and where the minds of hundreds of millions are being swayed toward Moscow. May I mention in passing that the testimony before our committee by experts on world Communist propaganda is to the effect that over $3 billion annually are spent by the Communist bloc on its ideological offensive, with hundreds of millions being spent in the Middle East alone.

Our committee received testimony from authoritative sources respecting the Communist penetration and now virtual control of vast areas of Asia. We heard of the narcotics offensive stemming from Red China, in which there is a deliberate highly financed campaign piercing principal capitals of the non-Communist countries of Asia for the purpose of demoralizing these pockets of resistance and to obtain hard currency with which to run the war machine of Red China.

I have given you just a few highlights of this international world conspiracy which is controlled through a network of 25 million Communist agents encircling the globe. My purpose in alluding to these few facets of the world conspiracy is so that my discussion of the Communist Party in the United States may be in proper perspective, because we must never overlook the fact that the Communist Party in the United States is a fifth column of foreign agents on American soil—foreign agents who are working zealously night and day as part of a world conspiracy for which the principal target is this Nation.

Here are the words of William Z. Foster, who is now the leader of the Communist Party of the United States: "When a Communist heads the Government of the United States—and that day will come just as surely as the sun rises—the Government will not be a capitalist government, but a Soviet government, and behind this government will stand the Red army to enforce the dictatorship of the proletariat."

In the United States today, there are an estimated 17,000 trained hard-core agents of the Kremlin, who are the nerve centers of our society. These are the so-called members, and I emphasize the word "members," of the Communist Party. Under date of June 4, 1951, the national committee of the Communist Party issued an order that "only those members whose membership is approved by the appropriate committees of the Communist Party on or before August 8, 1951, will be, and remain, party members."

At that time the Internal Security Act of 1950, which was developed by the House Committee on Un-American Activities, was just beginning to take effect and so the Communist Party burrowed deeper underground. How many comrades relinquished formal membership but remained in the apparatus, I do not know. We do know, however, that for every 1 of the 17,000 members of the Communist Party, there are an estimated 10 who are under Communist Party discipline. This apparatus of 170,000 people operates in this country through over 600 front organizations, and through thousands of fronts which they have created in front of the fronts. Compare this army, if you please, with the FBI, which is a magnificent organization, but which has roughly five to six thousand agents who are committed for all kinds of enforcement work, of which internal security matters are only a small part.

As chairman of the Committee on Un-American Activities, I say to you now, as the witness Clifford Miller, who had served as an undercover agent for the FBI in the Communist Party, testified at our recent hearings held here in Baltimore, that the Communist Party today in the United States is a greater menace than ever before.

How does this conspiracy operate? What are its objectives? What is it accomplishing for the world conspiracy here, now?

Let me pause to quote one of the top world figures of the Communist Party, George Dimitrov, who was a leading instructor in the Lenin School in Moscow:

"As Soviet power grows, there will be a greater aversion to Communist parties everywhere. So we must practice the techniques of withdrawal. Never appear in the foreground; let our friends do the work. We must always remember that one sympathizer is generally worth more than a dozen militant Communists. A university professor who, without being a party member, lends himself to interests of the Soviet Union, is worth more than a hundred men with party cards. A writer of reputation, or a retired general, are worth more than 500 poor devils who don't know any better than to get themselves beaten up by the police. Every man has his value, his merit. The writer who, without being a party member, defends the Soviet Union, the union leader who is outside our ranks but defends Soviet international policy, is worth more than a thousand party members.

"Those who are not party members or marked as Communists enjoy greater freedom of action. This dissimulated activity which awakens no resistance is much more effective than a frontal attack by the Communists. Our friends must confuse the adversary for us, carry out our main directives, mobilize in favor of our campaigns people who do not think as we do, and whom we

could never reach. In this tactic we must use everyone who comes near us; and the number grows every day."

Let me say here, that one of the principal objectives which the Communist Party has attained in the United States, is to develop a spirit of apathy, an attitude that those who fight the Communists are the real menace and not the Communists themselves. Let me give you a few illustrations of what I have in mind. Some few months ago, a man who was a professor in a college in my State was identified as a hard core Communist by a witness of unimpeachable integrity under oath before our committee. In accordance with the practice of our committee, this professor was subpenaed and interrogated respecting the identification of himself as a hard core member of the Communist conspiracy. This professor invoked the fifth amendment as he had a right to do. A copy of the transcript of the entire proceedings was requested by the college and after the proceedings were carefully studied, this professor was called before the governing body of the college for examination. He was thereafter discharged. Within the course of just a week or two, the American Association of University Professors issued a censor condemnation of this college for firing this Communist. The censure condemnation was on the ground that the action taken by the college constituted an interference with academic freedom.

I could spend literally hours reciting to you similar incidents of the growing strength of the anti-anti-Communist movement in the United States, including the work of the $15 million tax-exempt Fund for the Republic which spent $120,000 on a dishonest report to the effect that there is a wave of hysterical discrimination in employment against people because of political belief. We investigated the background of this report and revealed that in every instance used as a basis for the report, the individual involved was an identified Communist, and that the actual discrimination or so-called blacklist has been and is against those who are dedicated, patriotic, anti-Communists, rather than against the Communists whom the report characterizes as merely persons of a particular political belief.

May I say in passing that it was this same Fund for the Republic that made an award of $5,000 to a church group in my State on the erroneous theory that this church group employed an identified Communist as a librarian. The facts are, of course, that the church group, the Plymouth Quaker meeting, was opposed to the employment of the Communist librarian; that the members of the Quaker faith who served in the library board that did engage the Communist librarian, resigned in protest, and that the $5,000 award has not been accepted.

A subcommittee of the Committee on Un-American Activities, some several months ago, was in the process of developing factual material on what we termed "Communist political subversion," namely the efforts of the Communists to bring pressure on governmental agencies through grassroots organizations controlled by the conspiracy. In the course of the hearings which were then being conducted in Los Angeles, certain lawyers who are representing identified Communists, and who themselves had been identified by witnesses under oath as members of the Communist Party, so disrupted the proceedings by every conceivable type of disorderly conduct that the subcommittee had no alternative but to cause the Communist lawyers to be ejected from the hearing room. Thereafter, the Bar Association of California issued a scathing indictment of the Committee on Un-American Activities on the theory that by evicting disorderly Communist lawyers from our proceedings we were in some way depriving their clients of a free selection of the attorneys who should represent them.

I think I should mention that Congressional committees do not have contempt power such as the courts have for punishing those who disrupt the proceedings. The only contempt power that a Congressional committee has is to refer, via the Congress, to the courts for trial, anyone who fails to furnish information which the law provides that the committee is entitled to receive, or who commits perjury. Beyond that, committees of Congress are powerless, and of course the Communists know this and take every advantage of it.

I have often thought that the effectiveness of the Committee on Un-American Activities is in direct proportion to the amount of attack and criticism which we receive. I was therefore a little surprised to find that we did not receive more criticism than was actually leveled at us as a result of the hearings which were held recently here in Baltimore. I was glad that the hearings were telecast, so that the average Mr. and Mrs. American here in this great area could see for themselves not only the facts which were developed in the course of the hearings, but the procedures and practices of the committee itself. May I say that with a few notable exceptions, the communications we have received from this area respecting the hearings are most heartening. We knew that our hearings in Baltimore produced only a fair sampling of Communist activity in this vital area. Our responsibility as a Congressional committee is so broad and our facilities are too limited for us to attempt to run down all possible leads in any given area. We have a staff of only 35 persons, with just 8 investigators for the entire Nation. We did, however, I believe, develop information here of significance and value in the discharge of our duty.

Some several months ago, the Communist Party created an organization with the innocent name Citizens Committee To Preserve American Freedoms whose purpose is to coordinate the activities of all Communist fronts and the fronts in front of the fronts, for the avowed objective of abolishing the Committee on Un-American Activities. Before the Baltimore hearings, we knew that the Communist Party had sent instructions to comrades here as to how they were to proceed and the manner of their attack against our committee.

Recently my attention was directed to an article in a Baltimore paper carrying a severe criticism of our Baltimore hearings by a member of the clergy, who, among other things, is alleged to have said that the real reason for the public inquiry was that it was necessary in some people's minds to cultivate fear of Russia. I would not for a moment suggest, because I do not know, that the author of the attack is under Communist Party discipline. I do know that in April of 1943 he was listed as one of the signers of a letter asking the then President to set aside deportation orders against international Communist agent Harry Bridges. I do know that in January of 1953, he was listed as one of those from Baltimore who urged the President to extend clemency to atom spies Ethel and Julius Rosenberg. I do know that he has lent his name and prestige to the Communist-front American Council on Soviet Relations.

Let me quote J. Edgar Hoover, in his testimony before our committee in 1947: "I confess to a real apprehension so long as Communists are able to secure ministers of the gospel to promote their evil work and espouse a cause that is alien to the religion of Christ and Judaism."

I know too, that the force which we fight is dedicated to the destruction of religion; that in its ascendency to power it crushed within Soviet Russia alone, 20 million human beings and it destroyed an estimated 40 million human lives in Red China. I am more than a little puzzled that a minister of the gospel would be so blind that he would rely upon the integrity and good faith of the cynical atheistic conspirators instead of the integrity and good faith of the elected representatives of the people of the United States.

How serious is the Communist conspiratorial operation to our national defense? Glance, if you will, at just two typical items of information before our committee. Right now the International Union of Mine, Mill, and Smelter Workers having an estimated 85,000 employees in mines vital to the defense of this country, is controlled lock, stock, and barrel by the Communist Party. Right now, employees of the American Communications Association, the top leaders of which have all been identified as members of the Communist conspiracy, man the tie-lines and lease-lines emanating from the Pentagon itself, and service the North Atlantic cable.

What is the political objective of the Communist Party now in the United States? The No. 1 objective, as announced to the comrades assembled at the National Communist Convention in February, is the destruction of the Immigration and Nationality Act. In the course of the last 2 or 3 years, the Communist Party has created in the United States 180 organizations in 15 key States all for the purpose of bringing pressure on the Senators and Congressmen to repeal the Immigration and Nationality Act. Most of the people who are in this apparatus do not have any idea that they are being used by the Communist Party.

Now I would not say, although I suspect, the leftwing press will misinterpret my statements, that everyone who advocates changes in the Immigration and Nationality Act is a Communist or under Communist Party discipline. The fact is that the Communists have found ready allies in the professional immigrationists, the do-gooders, and in the politicians who seek to woo the so-called nationality bloc vote, promising more and more visas at a time when we have the highest immigration since 1926.

Masquerading behind a facade of humanitarian appeals, this drive which is now in process, if successful, would destroy the principal safeguards of our immigration system. It would triple immigration to this country and abolish the only nonpolitical formula, the national origin quota system, which has ever been devised for apportioning visas among the clamoring millions of the world. As coauthor of the Immigration and Nationality Act, and as one who has spent literally years in careful study and investigation of our immigration system, I say to you that weakening amendments to the Walter-McCarran Act which are currently pending in the Congress, will undermine the security structure of this Nation. I shall fight those weakening amendments with every fiber of my being, because in my studied judgment, I will be fighting the cause of preserving this Nation.

How late is it?

Here are excerpts from an article by Msgr. William McGrath, as it apepared in the Brooklyn Tablet of July 1955:

"No war. No hydrogen bombs. No mass slaughter—till after the victory has been won.

"The coup d'etat, in course of accomplishment even while you are reading these lines, will be engineered to final success by the entrenched and untouchable traitors in high places, aided and abetted by their strategically placed cohorts in the nerve centers of the Nation.

* * * * *

"It will be the fulfillment of the prophecy made by Lenin in 1923: 'First we will take Eastern Europe, then the masses of Asia, then we will encircle the United States, which will be the last bastion of capitalism.

We will not have to attack. It will fall like an overripe fruit into our hands.'

* * * * *

"Condone. Appease. Pretend. But above all forever surrender. Peace in our time, wherever we've heard that before. Bury your head in the sand while Russia enslaves the rest of the world and hope—that it cannot happen here.

* * * * *

"Thank Heaven not all people have given up. A few brave souls in America are trying to arouse the country from its sleep of death."

Yes, my friends, it is later—much, much later than you think. It is happening, and it is happening here, now.

PRESENTATION OF CHRISTOPHER POST, NO. 841, CATHOLIC WAR VETERANS, 1957 AMERICANISM TROPHY, JUNE 1, 1957

(By T. S. Bruchalski)

Mr. Toastmaster, our honored and most distinguished guest, Congressman WALTER, distinguished guests at the dais, reverend members of the clergy, officers and members of the Catholic War Veterans, ladies and gentlemen, a few weeks ago we in the Baltimore area were privileged—if it can be called a privilege—to partake in a drama—really a tragedy—at which the very soul of our beloved Republic was being torn asunder by those whose hate should have been a love, whose calculated betrayal should have been a dedicated devotion.

However, that which we witnessed, either in person or in our homes, was actually an epilogue. For it was, in reality, a sorrowful summation of a series of traitorous events by those who would destroy, yes, by those who would destroy within the very shadows of that lady whose majestic mantle was so richly woven with the faith and devotion of dedicated men, dedicated to the principle that we posses inalienable rights, rights whose origins of their very essence come from God—not from men.

Tonight, however, we have with us some of those who were a part of that drama, but those who have supped and drank freely of these truths, those in whose minds the memorable words of Lincoln, that "to sin by silence when they should protest, makes cowards of men," must have been indelibly enshrined.

Out of a tremendous love for their country, they gave freely of themselves, out of that same dedicated devotion so characteristic of our fathers of yore for their beloved Republic so richly blessed.

They must have known what it would mean to play the role of a traitor—knowing all the while—that others surrounding them were actually and consciously dedicated to this horrendous crime.

Tonight, we of the Christopher Post have asked them to share the joys of this evening with our honored guest. We felt proud that they should have sacrificed their sterling individuality—at least for a while—to have immersed it into one so deathly alien to them.

It was a difficult thing. Even the best of us would have desisted from this bitter task.

Our unit has already formally extended to them our gratitude, and tonight, all of us here assembled to honor the driving force—as it were—of that courageous Americanism as exemplified in our honored guest, have an opportunity to express our sincerest wishes to Miss Irene Barkaga and Mr. Charles Craig, present here this evening as guests of our post. (Because of his unexpected work schedule, Mr. Clifford Miller could not attend but verbally sends his personal wishes to his other two compatriots and to our honored guest of the evening.)

Congressman WALTER, we of the Christopher Post feel that this presentation of our 1957 Americanism award is really a token of boundless appreciation from all of us here assembled.

Let it be an emblem of our united faith in you and the tremendous task to which you are so completely dedicated.

Let this humble award—but a human symbol of our dedication to your noble cause—be ever a spiritual reminder of our hope in you and in those like you, yet remaining in the ranks of the valiant, against this unholy breed.

We cannot help but feel that they who would destroy are dissipating our ranks. And yet by silence, we cannot and shall not sin. For that is a coward's lot.

Nor are we afraid. For, as has been so ably said, that even one with God, is a majority.

To Him, therefore, we send up our prayer when we in the simple words of this inspiring Irish wish would want to say:

"God be good to you in all your days
God be kind to you in all your ways
God give strength to you when crosses lean
God send light to you the clouds between
God give peace to you in times of strife
God bless everything that fills your life
God send joy to you when grief is o'er
God make way for you at heaven's door."

Protect Our Workers Against Further Intrusion by Foreign Fuel

---

EXTENSION OF REMARKS

OF

HON. ELIZABETH KEE

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 3, 1957

Mrs. KEE. Mr. Speaker, the coal industry has been bludgeoned by unfair competition from international oil companies for the past 10 years. Since 1947 more than a billion barrels of foreign residual oil—the equivalent of 275 million tons of bituminous coal—have entered America's fuel markets.

To communities of West Virginia and other coal-producing States, this deluge has brought needless destitution and despair. More than 250 million man-hours of work have been lost—never to be regained—for coal miners alone. Consequent unemployment in the railroad industry has also been staggering. American families have been forced to survive without many of the necessities of life. In this period of aggression on the part of international oil shippers, many children have grown to adolescence without proper nourishment—a deficiency that in many cases can never be remedied. Young men and women have been deprived of an opportunity for higher education because their fathers had to suffer the ignominy of idleness in order that rich international oil companies might get richer.

We in Congress who are familiar with this situation have pleaded in vain that the prayers of our people may be heard by responsible officials in the executive department. We were given some hope 2 years ago when a Presidential Advisory Committee took cognizance of the danger inherent in excessive oil imports. Unfortunately, there has been no enforcement of the recommendations thus submitted by the committee and later included as the national defense amendment to the Extension of the Trade Agreements Act. Residual oil continues to sweep onto our shores in whatever volumes the shipping companies choose to send.

The President recently ordered the Director of the Office of Defense Mobilization to take action toward reducing import levels, yet we have no actual assurance that a cutback in imports will be insisted upon. Furthermore, the White House directive did not specify that residual oil should receive specific consideration in the import matter. Unless this product is categorized apart from crude and imports in general, it would be possible for the shippers to make up a preponderant portion of their import allowables with residual oil; for that matter, if a total of a million barrels per day of crude and products were permitted to come in, there would be nothing to stop the shippers—unless the ODM rules otherwise—from increasing their residual oil import schedules to 366 million barrels per year.

While the coal industry is forced to operate in an atmosphere of insecurity that will prevail so long as the extension of the violation of its markets is to be determined by the whims of international oil executives, still another threat is forming from outside our borders. A group of international financiers is now striving to encroach anew upon the coal industry and the people who depend upon it for a living.

Mr. Speaker, I refer to the applications now before the Federal Power Commission for bringing natural gas from Canada into Midwest markets being served by coal from West Virginia and other Appalachian areas. Our people do not understand why the United States Government should permit world fuel merchants to flimflam them out of their means of livelihood. In the past several weeks I have spoken with coal producers and mine union representatives about the problems confronting us. I have told them frankly that I feel Congress has been negligent in not making it clear to the Federal Power Commission that it is obligatory upon the Commission to reject applications for bringing natural gas across our borders when such imports would be inimical to the general welfare. While to me it is inconceivable that the Commission would approve applications which would inevitably result in layoffs for a great number of American workers, it is nevertheless our duty as Members of Congress to make certain that the Commission understands its duty in this respect.

Earlier I mentioned that many sons and daughters of coal miners have been deprived of college educations because their fathers' paychecks stopped coming in when residual oil imports began to flood American markets. Can this Government permit a repetition of this situation by approving this promotional scheme which will benefit most those few people who expect to make a financial killing through the Canada-United States pipeline? I have been to many high school graduations. I think that most of us adults share similar emotions

as our young men and women consummate more than a decade of scholastic training by participating in the traditional ceremonies that mark the termination of a high school career. We recognize that the ceremonies are a tribute to a meritorious achievement of those young people, but at the same time we—better than they—are mindful of the responsibilities that lie ahead. For those children who aspire to additional learning but realize that the roads to colleges and universities are closed to them because their parents are unable to pay the way, graduation day's joys are tempered with dismay and frustration. This outlook is in prospect for many boys and girls who will be graduating in West Virginia and other coal-producing States in the days immediately ahead. For the FPC to allow further destruction of the labor market in those States would be to add immeasurably to the woes of those young people and their families.

Now let us consider the situation of some of the promoters of the plan to bring natural gas across our border and at the same time debilitate the employment capacity of the coal industry and of the railroads which are accustomed to carrying this fuel to market. Let me quote a portion of a news dispatch from Timmins, Ontario, that appeared in the Toronto Daily News of May 11, 1957, in its reference to an address by a member of the Conservative Commonwealth Federation:

M. J. Coldwell, CCF leader, last night kicked off a national campaign in this gold-mining city with a charge that United States promoters of the Trans-Canada pipeline have already harvested more than $26 million in profits.

"And this before a single cubic foot of natural gas has been moved through the pipeline; indeed, before the pipeline has ever been completed," he remarked.

Two Canadian officials of Trans-Canada alone * * * would make more than $1 million each, as a result of Trans-Canada stock options, the CCF leader charged.

Mr. Speaker, I of course cannot vouch for the authenticity of this statement. There has been, however, so much criticism about the financing of the pipeline project that I question whether it would be either moral or practical for the FPC to agree to allow this proposed invasion of United States markets. On March 27, 1957, the Stratford, Ontario, Beacon Herald printed an editorial which began this way:

Who says there are no more success stories? Consider the case of Mr. Nathan Tanner, of Alberta, and of Mr. Charles Coates, of Texas.

Mr. Tanner, president of Trans-Canada Pipe Lines, Ltd., took up an option on 55,000 shares of Trans-Canada at $8 a share, and Mr. Coates, vice president of Trans-Canada, an option on 50,000 shares.

On a recent Friday Mr. Tanner's and Mr. Coates' Trans-Canada shares were selling at $24.

Nice work, if you can get it.

I ask whether it would be moral to approve of a United States connection with the Trans-Canada pipeline because it seems to me that there is too great a disparity between the financial and economic positions of our coal miners and the pipeline promoters to permit further enrichment of the latter at the expense of the former. I ask whether it would be reasonable and practical to allow this pipeline to oust coal and oil from the Midwest markets that they have established and have come to depend upon. If there is already so much debate in Canada about the financing of this project, who is to say that—once it were established and our markets were to depend upon it—there would not be a tendency to raise drastically the price of the gas or even to put an enormous tax upon it as a means of replenishing what reportedly has already been lost to the Canadian public because of the manner in which it has been promoted?

Mr. Speaker, I do hope that the FPC will reject the applications for bringing Canadian gas into these markets if the evidence in the case indicates that American interests may be adversely affected by the Canadian gas proposals. An indication of the serious public questions involved in this case is evidenced by the fact that the applications for Canadian gas are being protested by the following:

National Coal Association.
United Mine Workers of America.
Fuels Research Council, Inc.
Anthracite Institute.
Chesapeake & Ohio Railway Co.
Maher Coal Bureau.
Midwest Coal Producers Institute, Inc.
Truax-Traer Coal Co.
Baukol-Noonan, Inc.
Dakota Collieries Co.

Meanwhile I believe it would be judicious and humane on our part to make whatever revisions are necessary in the Natural Gas Act to be sure that our men, women and children in coal-mining communities will not be exposed additionally to a predatory foreign fuel.

Commencement Addresses by Hon. Mike Mansfield, of Montana

EXTENSION OF REMARKS
OF
HON. MIKE MANSFIELD
OF MONTANA
IN THE SENATE OF THE UNITED STATES

Monday, June 3, 1957

Mr. MANSFIELD. Mr. President, during the past week I delivered four commencement addresses in Montana and Iowa. I ask unanimous consent that the addresses made by me on those occasions be printed separately in the RECORD.

There being no objection, the addresses were ordered to be printed in the RECORD, as follows:

THE NATION'S FUTURE IN THE WORLD

(Address by Senator MIKE MANSFIELD, of Montana, commencement exercises, Central Catholic High School, Billings, Mont., May 26, 1957)

Ladies and gentlemen of the graduating class of 1957, distinguished members of the faculty, parents, relatives, and friends, I am deeply honored to be asked to participate with you in this graduation.

To me, graduation means more than an end or a beginning. It means both at the same time. It means, in other words, a continuity which links one phase of life to another.

In this sense, a graduation is an expression of the law of life, which is change in the unchanging. That may sound mysterious and profound. In fact, it is neither.

Look around you, think for a moment, and you will see the meaning of this law of life. You will see that in the past few weeks spring has come to replace winter and the earth has grown green again. You will see that boys and girls are moving into manhood and womanhood. Those of you who are old enough to remember—that would include only the gentlemen present—those of you who are old enough will note that even Billings has grown into something different, into a larger community with a new look, in the space of a few short years.

If you look around you, then, if you think about it for a moment, you will be aware of change in all things—constant, endless change.

There is a sadness in some of this change. We are reluctant to see the passing of a time with which we are familiar, a time which has brought many happy associations. We are not certain of what will come in its place and it is hard to trust what we do not know.

Yet, change must come; that is clear. It seems to me that we can find strength to face the challenge of change, if we bear this in mind: the law of life is not only change; it is, as I noted, change in the unchanging.

Just as the spring has come this year, it will come again and again. Just as the earth has grown green this year, it will grow green each year in all the years to come. That is the constant. That is the unchanging in the changing.

So it is with the things that have lasting meaning in each of our lives. There, too, we will find things that are enduring in the midst of the changing. What, for example, made your days as students in this high school worthwhile? Your studies? No doubt. But studies change. Some will continue to interest you and some will not. Your extracurricular activities? Undoubtedly. Perhaps some of you may think that they were even more worthwhile than your studies. But extracurricular activities also change and some will continue to interest you and some will not.

I think that beneath these things, beneath the day to day routine of the past few years there was something deeper that made high school worthwhile for you. There was something less tangible perhaps than studies or extracurricular activities, but, in the long run, more important. There was something which gave lasting meaning to these years in your lives.

Was it, perhaps, the understanding that you had from friendly members of the faculty? Was it the affection which you shared with one another? Was it the courage with which you faced the problems of learning and living? Was it the faith you felt that life was good and God was good?

I know that these are things that a person is not aware of every minute of the day. That does not make them any less important. They are there, in all of us, and they are fundamental. They are constants, the enduring. They will be there with you throughout your life.

What we see, then, changes. What we do, changes. But what we are and what we feel underlies everything we see and do. That is the unchanging in the changing. If you go into the future with the understanding and tolerance, with the honesty, with the courage and with the faith, which gave deeper meaning to your life here during the past few years then you can go into it without fear. These feelings will guide you in dealing with whatever may arise in that future.

What applies to each of us individually also applies to our country. I talk to you today, about our country because its future and yours are closely interwoven. Just as your responsibility for your own future will grow increasingly heavier in the next few years, so too will your share of responsibility for the Nation's future.

Countries, ours no less than others, are governed by the same law of life that governs each of us: change in the unchanging. It could hardly be otherwise, for nations are the creations of human beings. This Nation is constantly changing. What we call the United States at this moment is not an abstraction. It is the product of the lives of all the individuals who have composed the Nation since the beginning. It is the sum of the great lives and the unknown lives, the lives of the countless millions who have made their contribution in conquering a wilderness, in agriculture, in labor, in defense, in science and industry, in religion, in education, in ideas, and hopes, in the raising of each new generation to maturity. All of these lives have left their impression on the shape of the Nation and that is your national heritage. But just as the Nation is different today than it was 50 years ago, 50 years from now it will be still something different.

The United States, in short, grows and changes as the individuals within it grow and change. It must change if it is to endure. As it is with the individuals so it is with the Nation. In growing and changing there are certain constants which make our national existence worthwhile, which enables us to meet new challenges successfully.

When we think of our Nation's future in the world it will be helpful to think of it in those terms, as though it were a growing individual. And I want you to think of the Nation's future, today, for as I mentioned, it is interwoven with your own. Each of you will have much to do with shaping the future of the United States and that future, in turn, will exercise a great influence on yours.

Time does not stand still and neither does our country. I would like you to reconstruct from your studies of history a picture of the United States a century ago. You will recall that our State of Montana, most States west of the Mississippi were settled then by a handful of people—many of them were your grandparents and great grandparents—many of them immigrants. They lived in isolated communities with little contact between one community and the next. They hunted and fished. They did some simple farming. They raised stock. They dug minerals from the mountains. They had few machines to help them. They had few of the conveniences that we take for granted today. There was no electricity, no telephone, no theaters, no radio or TV. They had few schools in which to educate their children.

Until the railroads came, there was little regular contact with the more settled areas of the eastern part of the country. Not many people knew or cared what was happening west of the Mississippi if they were east of it. And if they were west of the river they knew little of what was happening in the East. As for the rest of the world, few people in the United States knew anything about it or gave much thought to it.

Now, that has changed. The people who came to Montana, to the West, their children and their children's children built a new way of life here. Population has grown. The power of rivers has been harnessed through dams like Hungry Horse, Kerr, Tiber, Canyon Ferry, and more will be harnessed in our service through new dams like Libby in northwestern Montana and, in this section, Yellowtail, if we are ever able to convince the President that we need it, as you and I know that we need it. New industries have developed and more will develop. Schools have multiplied and we have learned many new ways of thinking and doing.

Most significant in the changes of the past century within our State is that we are no longer a scattering of communities, isolated and unconnected. We are linked together as never before by a complex system of airways, rails, and roads. We can pick up a telephone here in Billings and call any point in the State. Soon, I hope, TV will link every part of the State and the State with the rest of the Nation, as radio already does.

What is all this leading up to? The point I am trying to make is that, over the past century, the citizens of this State have been drawn by the processes of change into closer and closer integration. What is happening within the State is also happening within the Nation. All of the States are now tied together more closely than ever before.

What happens in other States and in Washington is now known to us immediately and affects us very directly. In turn, what we do affects the rest of the Nation profoundly and is known elsewhere promptly. In other words, a great interdependency and unity has developed throughout the United States. This means that, more and more, the Nation grows and prospers as a whole or it does not grow and prosper at all.

And what is happening in the United States is happening throughout the world. Other countries are no longer remote from us. We know promptly what is happening beyond our borders and others know promptly what is happening here. Our products are sold in vast quantities on every other continent. We draw on those continents for many of the essential products of our daily life.

A few decades ago we would not have even learned of a political upheaval in the Middle East until days or perhaps weeks after it had occurred. Today, almost simultaneous with its occurrence, the President finds it necessary to dispatch a fleet of naval vessels to the scene because he believes it may involve our vital national interests.

In other words, a process similar to the integration which has gone on within our State and within the Nation has also taken place in the world. We are no longer immune from the impact of events thousands of miles away. These events may act to hurt the Nation or to help the Nation. One thing is certain, however, sooner or later, they are bound to affect us.

No single person brought about this situation. It is the result of the never-ending process of change which goes on wherever there is life. We may not like the situation. We may feel uncertain as to where we are headed, just as I noted earlier you men and women may sense a sadness and uncertainty in graduating. Nevertheless, out of consideration for the Nation's future, we have got to face these changes in the world. We have got to try to understand what they mean to us. We have got to try to deal with them in a way which safeguards the Nation and its future.

What are the changes which have taken place in the world during these past few decades? Again, if you will recall your studies of history, you will have a picture of what the world was like a few decades ago so that we may contrast it with what it is like now. You will recall that Europe, particularly Great Britain, a half century ago was the citadel of international power. It shaped events practically everywhere else in the world. The United States and Japan were the principal exceptions. These two countries were growing rapidly in independent strength. Elsewhere, however, the countries of Europe controlled a seemingly inert and motionless world. The Europeans directed international commerce and industry and the political life of many peoples. China, India, and most of Asia were in a state of political sleep. Latin America, Africa, and Australia-New Zealand were great but little known continents. They poured natural wealth into the channels of international commerce but otherwise had little effect on events in the world.

The Europeans themselves were divided into rival national states. So long as they keep their rivalries from erupting in war among themselves, however, the rest of the world did not challenge their combined power. Their rule over other peoples produced at least a semblance of peace and calm over the face of the earth.

Under the surface of this calm, however, change—that constant law of life—was at work everywhere. It was hidden and it was often suppressed but it was not to be denied. In two great wars and the swift cavalcade of international events in their aftermath, the force of these long pent-up changes burst upon us.

We find ourselves, today, in another world, far different from that of a half-century ago. Europe is no longer the great citadel of power that once it was. Instead, the nations of that Continent have had to struggle for years merely to restore the devastation of World War II and to preserve their independent survival. And they would have been unable to do either had it not been for the help which this country extended to them. A dozen years after World War II, the European nations have still to regain their former importance and they are not likely to regain it unless they draw closer in unity among themselves. They are suspended between two poles. The one pole is the expanded totalitarian power of the Soviet Union. The other is the power of freedom of the United States. They are attracted towards us but many of their citizens look towards Russia or fear the power of Russia.

This new world in which we find ourselves today is also a world in which the slumbering nations of the past have awakened. India, China, nations in the rest of Asia, in the Middle East and Africa—these nations are coming out of a long night of political sleep. Some have awakened in a friendly, cheerful mood. Some have awakened growling and scowling. And some have just plain got up on the wrong side of the bed. Whatever the case, however, all of these nations are a part of this changed world in which we find ourselves and they have to be reckoned with.

So, too are the developing nations of Latin America and elsewhere—Canada, for example. Each in its growing strength and in its expanding achievements is a new factor in the world in which we must work out our future.

This world of today is also a world of instant communications. And it is a world in which space is losing its meaning. In aviation, distances are no longer calculated in miles but in hours of flying time; with the coming of the jet age they will soon be calculated in minutes and seconds.

It is a world in which nations depend intimately upon one another for the food, the minerals, the countless products which are essential to their existence. It is a world in which no one part is far from or can be separated from the rest.

It is, in short, a greatly different world from that of a century or a half century ago. It is a world of new dangers. You graduates know from your science studies the grim possibilities which it contains. You know the implications of the threat of atomic war.

Even the testing of nuclear weapons let alone war with these weapons, raises complex questions. When a single hydrogen bomb is set off in a test in the Pacific, for example, it is necessary to close off over 400,000 square miles of the ocean to all ships to guard against accidental death or injury. And we do not yet know with any degree of certainty what the long-range effect of the so-called radioactive fallout from nuclear explosions will be on human life and

future generations. We do know, however, that like X-rays, the effect of this fallout is cumulative and that it can be highly dangerous to mankind in concentrated amounts. Moreover, no nation is immune from it, even though the nation may be hundreds or thousands of miles from the scene of the explosions.

Three countries are already testing these nuclear weapons—the United States, Soviet Russia, and Great Britain. Others will in all probability have them in the not too distant future. The level of radioactive fallout in the atmosphere will increase as testing increases.

That is the kind of new danger which confronts us in the present world. If testing of weapons alone is such a serious matter, it is not too difficult to imagine the danger posed by such weapons in the hands of an aggressor nation capable of delivering them in jet planes and guided missiles.

If the world today contains new dangers for the Nation as it most certainly does, it also contains new hope. You graduates know from your studies that there are two sides to the coin of scientific progress. You know it is rich in the promise of a better tomorrow. You know that this world of today and tomorrow contains infinite possibilities of material progress for all mankind. Even more important, you know that the new international contacts which it compels can enrich our spirits and bring this planet closer to that brotherhood of man which God has enjoined upon us.

Let me turn now for a few minutes before closing to the implications of this world of today and tomorrow for the Nation's future and for your individual futures. I think it is clear that we cannot safeguard the Nation's place in this world if we start by imagining that we are living under conditions that existed a half century ago.

We can no longer dismiss other nations as too remote to be of concern to us when we know that, in fact, they are no longer remote. We cannot assume that events thousands of miles away have no meaning for us when we know that three times in the lives of some of us, those events have plunged the Nation into war. We cannot proceed on the old assumption that Europe still dominates the world and will keep a kind of peace in it when we know in fact that power has gravitated from Europe toward the Soviet Union and toward the United States. We cannot ignore the fact that many new nations have come into independence in recent years and that they will be a force for good or evil in what happens from now on. We cannot, in short, turn back the clock.

To do so would be to try to preserve the Nation in a world and time that no longer exists, a world and time when the principal dangers we faced were frontier conflicts, fought with bow and arrow and musket, when people in this State and the West lived largely by hunting and fishing and simple agriculture. If this Nation today were to plan and act on what existed yesterday, the real world would soon leave us behind. Even more likely, it would submerge us in its swift and ever-changing currents.

That is why this Nation must be ever alert to the continuing changes in the world. Our relations with other nations must reflect this awareness. The foreign policies which were adequate 50 years ago to protect the Nation and its future had ceased to be satisfactory 25 years ago. Those of today will undoubtedly have to be adjusted tomorrow.

In other words, change is to be expected and it must be faced. If you recall, however, I stressed that the important thing was change in the unchanging. There are constants which have marked the life of this Nation from the beginning. These can provide us with the strength to move into an uncertain future with the conviction that we can make it a worthwhile future no matter what it may contain. These constants include a belief in human freedom, in human equality and in human dignity.

They include a respect for the past coupled with a willingness to explore new paths of understanding and achievement. They include a willingness to defend our own rights coupled with full respect for the rights of others. They include a faith in ourselves and in God's infinite wisdom.

The task for the Nation, and that means all of us, then, is to seek always to enlarge our understanding of the world around us. The task for the Nation is to adjust our relations with other nations in the light of its realities. The task for all of us is to see to it that in making these adjustments we do so without losing the unchanging, the enduring in our national life. I call upon you young men and women of the graduating class of 1957 to join with us in that task.

Graduates in 20th Century World

(Address by Senator Mike Mansfield, of Montana, commencement exercises, Butte Public High School, Butte, Mont., May 28, 1957)

Ladies and gentlemen of the class of 1957, distinguished members of the faculty, parents, relatives, and friends, to each of us this graduation means something different. For you who are parents of graduates, the occasion is a landmark in the growth and progress of those closest to you. For you who taught the graduates, it is a moment of gratification which can be fully appreciated only by those who have dedicated themselves to the heavy responsibility of educating the youth of the land. For the invited guests like myself, it is both an honor and a pleasure to be permitted to participate.

And for you who are graduates, this commencement marks a significant point in your lives. It is a symbol of change, of the ending of an era and the beginning of another. Your thoughts at this time, I am sure, must be mixed. There must be in them both a reluctance to leave the old and the familiar and yet an anticipation of the new and the unknown. With each of you, I am sure, these thoughts take on a highly personal form. You are concerned with your particular experiences at this school over the past few years and your particular regrets at their closing. You are also concerned with your individual futures and what each may contain.

It is natural at decisive moments in life that you consider most carefully what affects you most closely. Let me suggest, however, that you have plenty of company when you ask yourself the question "What lies ahead for me?" If you stop to think of it, you will realize that not only are you asking that question, but graduates in Anaconda, in Lewiston, in Missoula, in Miles City, in Plentywood, all over the State and the Nation, are asking the same question. You will realize, too, that thousands of graduates in London, Paris, in Tokyo, in Calcutta, in the new African Republic of Ghana, in Moscow, graduates throughout the world are asking the same question: "What lies ahead for me?"

Each graduate wants to work out in his own way the answer that is right for himself. In that sense, each answer will be a personal answer, but it will also have much in common with the others. And one of the things, perhaps the most important thing, that the answers will have in common is that they will be dependent to a large extent on the kind of country or environment in which each graduating group lives and on the kind of world in which we all live.

Let me try to illustrate this point. Suppose for a moment, that this graduation in Butte were taking place not today but a hundred years ago. To you, gentlemen of the class of 1857, the answer to the question, "What lies ahead for me?" would still be a personal one but it would also be a simpler one than it is today in at least one respect. The number of choices open to you would be limited. For most of you, graduation would be followed by homesteading somewhere in the West. Or you might find a job in a store of some kind or open one yourself. Or, if you were restless, you might set out to prospect for gold in California. Five or six of you might head eastward to one of the Nation's few colleges. If you came back at all, it would be as a minister, a doctor or perhaps a lawyer or teacher.

As for the ladies of the class of 1857, it is unlikely that there would be any of you, for in those days people had very serious doubts about the wisdom of educating girls. But if there were, the choices of a future would be even narrower than the men's. One or two of you might have become teachers and you would, of course, be in demand as wives. But with a high school diploma, you might be regarded as having too much education even for that honorable profession.

What I am trying to get across to you is the fact that your futures—all of your futures—will be sharply influenced by the kind of world and the part of the world in which you find yourself. Let me, then, try to give you a picture of the different situations which confront high school graduates in different parts of the world, not in 1857 but in 1957.

Beginning in the United States, what is the setting in which you and your fellow graduates throughout the country must shape your future? It is, first of all, the setting of a growing country with a rapidly expanding population. It is a setting which finds us at a new peak of technological progress and on the threshold of even greater progress. Advances in agriculture, science and industry are transforming our economic way of life at an incredible speed. We are learning new ways, easier ways of growing and making the things that are necessary for daily living. We are only at the beginning of the age of nuclear energy, of the new power of the atom. Developments in transportation and communication have unified the country as never before. The science of medicine is steadily increasing the life expectancy of all of us. Developments in other sciences are expanding our knowledge of the planet on which we live and, indeed of the universe of which the earth is a part.

This setting opens wide horizons for careers for all of you, horizons that are by no means limited to those whose talents run to science, agriculture, and to industry. The fact is that the changes in technology in these fields will find their counterparts in education, in the arts, in the law and in all other aspects of human endeavor in this country.

All of you, whatever your interests, can look forward to a future of promise. It is not, however, a future without problems. And perhaps the greatest problem which the Nation will face in the next 25 years is to see to it that our technological progress does not run away with us, overwhelm us and, in the end, destroy those things in our way of life which make it most worthwhile.

We must not, in our fascination with the dazzling achievements of science, overlook the fact that technological progress is not an end in itself. It must enrich the lives and open new possibilities for the spiritual development of all our citizens or it will have served no useful purposes.

We must see to it, therefore, that this progress does not get out of hand. We must see to it that it creates opportunities for employment rather than destroys them. We must see to it that its benefits reach all our citizens, in better living conditions, in greater security, in better educational, health and recreational facilities. And we must see to it that the burdens of progress, for there are burdens as well as boons in progress, are borne equitably by all.

Most important, we must see to it that progress takes place in a pattern which preserves the fundamental values of American life. Those values are a high and equal respect for the dignity, the freedom, and the worth of every individual citizen.

You graduates will also work out your futures in a Nation whose position with respect to the rest of the world has undergone great changes in the past few decades. Once isolated by the oceans from other countries, we are now linked with them by the airways and modern communications. Once a small Nation with little influence or interest beyond our borders, we are now an enormous Nation with worldwide influence and worldwide interests.

The great power of the United States places us in a position of great responsibility. It is first of all a responsibility to ourselves and to future generations. If we no longer have the immunity of distance and remoteness from developments in the rest of the world—and technological progress has ended that immunity—then we must take steps to safeguard the Nation in its new contacts. What we do or fail to do in our relations with others has a great influence throughout the world. Our actions are an important factor in determining whether the world will keep a measure of peace or whether it will be plunged into a great war from whose destructiveness no nation will escape. What we do or fail to do in our relations with others also has a great influence on the continued progress of all mankind and ourselves as a part of it.

These are new problems to which a short time ago people in this country gave little thought. Now we have no choice but to give a great deal of thought to them. We will have to use our great power with wisdom, with restraint, and with economy to safeguard peace or we shall be compelled to use it recklessly in the terrible waste of war. As your Senator, I have tried as others have tried to give these international problems the attention they must have if your Government is going to handle them successfully. I have done so because they involve the safety and well-being of the people of this State, of all the people of the United States; in fact, of civilization itself. They are the major problems confronting us today and they will become even more important tomorrow.

That, then, is the kind of situation in which you graduates will work out your futures. What of graduates in Western Europe—in London, Paris, or Rome? In Germany and in Scandinavia? The young people in Western Europe will find themselves in a situation which has many similarities with yours. They, too, have grown up in an atmosphere of freedom and scientific progress.

They will not have as great an opportunity as you will have. The European countries are older and more crowded lands. Many of the graduates will migrate, as did our forebears, to seek a new life in Canada, in Latin America, in Australia or Africa. Some will come to this country. They will add their labor, their spirit, and their thought to the continuing stream of American life.

For those who remain in Europe, life will not be easy. Their countries lie directly in the shadow of the massive totalitarian power of Soviet Russia. They know that if they are to live in freedom they must be prepared to defend themselves. Yet they know the price of past wars, and they live in dread of a new one. These graduates in Europe today almost without exception have felt the effects of war themselves. They have seen the marching armies of World War II. They have heard the bursting bombs.

They know, too, that their countries are small countries, as the world measures countries these days and that individually, they have little influence on the course of international developments. They know, finally, that for centuries their countries have been torn by rivalries and conflict which in the end have weakened them all.

Yet, for all its weaknesses, Europe is not without promise for its graduates of 1957. You know from your readings of history that that continent has many sources of strength. It is the birthplace of most of the great ideas of freedom which have spurred people throughout the world to action for human betterment—ideas which today, we take for granted in this country. Europe has also had its geniuses of science and industry. Indeed, the development of atomic energy in this country during World War II was at least as much of the work of Einstein, and other European-born scientists as it was of our own. Europe has produced its great men of art and literature, and music. Finally, Europe has made its contribution in the struggle for freedom. Countless thousands of its soldiers fought and died for liberty in our Revolution, in the two great wars of this century and in Korea.

A Europe which can produce men of genius, works of civilization such as it has, is not without hope for the future. A Europe which can rise up in the cause of freedom as it has done many times is not a dead continent. A Europe which can recover from the terrible ravages of World War II as it has done with assistance from the United States, is not without inner strength.

If Europe is to continue to survive and to grow in freedom, however, it has two great challenges which it must meet. It must bring Germany, a united Germany, into a peaceful place in a unified and peaceful Western Europe. And Western Europe must stand fast together against the threats, the taunts and the harassments of totalitarian Russia. These two questions dominate the situation in which the graduates of the class of 1957 in Western Europe will work out their futures.

What of the graduates on the other side of the globe, in Japan? Their situation is a difficult one. Japan is a small country, no larger than our State of Montana. It has less natural wealth and only limited land fit for farming. Yet, within that country live 90 million people. You might try to imagine what it would be like in Montana if, instead of 650,000 citizens, we had 90 million. For one thing, you might expect that the population of Butte would be not 40 thousand, but several million. We would have, to say the least, a housing problem to end all housing problems.

Yet Japan must feed, clothe, house, educate, and otherwise take care of its 90 million people. How is it done? For one thing, by a lower standard of living. There is less to go around in the way of food, clothing, shelter and conveniences and the Japanese have adjusted themselves to doing with less. The Japanese also produce high yields of rice and other crops from their limited lands by intensive cultivation and extensive irrigation. They fish the waters of the Pacific from the Arctic to the Antarctic. Most important, they depend on trade with other countries based on their highly developed industry.

For Japan, the problem is literally one of having to fish and trade abroad on a large scale if they are to survive in peace and independence. In order to do both, the Japanese are turning increasingly to relations with Russia and Communist China. Before we condemn them for this, however, we had better ask ourselves, "What alternative do they have?"

The situation, then, that is faced by the Japanese graduates of 1957 is that: They live in a poor country which brought great destruction upon itself and others by the militarism of its leaders in World War II. By their own efforts and with assistance from the United States, the Japanese have restored their country and now have a fairly prosperous existence, perhaps more prosperous than they have ever known, but in no way comparable with what we take for granted in this country. They have a responsible, elected government, and they have independence.

Even under the best of circumstances, however, it will be difficult for the Japanese to maintain this situation. The Japanese islands are close to both of the centers of totalitarian communism—Russia and China. Economic circumstances compel the Japanese to deal with both. The Japanese will have to walk a narrow line if they are to trade goods with these Communist lands without ending up in their camps. Whether the new generation of Japanese will be able to walk such a line, whether they will be able to work out their futures in freedom, will depend to a great extent on how well the ideas of freedom, implanted by the United States after the war, take root. It will also depend on the understanding with which other free nations, including ourselves, treat Japan's very real needs for cooperation in economic matters.

Let me turn now to the class of 1957 in India, let us say in Calcutta or New Delhi. What is true for the students in these cities is also to a great extent true for graduates in the Middle Eastern countries—Egypt, Syria, and Pakistan, for example. It is true for graduates in Burma, Ceylon, Indonesia and the countries of Indochina.

In connection with the work of the Senate, I have had occasion to visit newly independent countries many times. I have done so because what happens in them, the way they go, is of the greatest significance to us. Their vast population, numbering in the neighborhood of 750 million, is almost a third of the world's total. These people can be a decisive factor in determining whether there will be peace or war, and I can think of no question which is more important to the people of this State, to the people of the United States. As these countries develop, moreover, our trade and other relations with them can become increasingly beneficial to both sides.

This huge world of newly independent nations which stretches from Africa through the petroleum-rich Middle East to the shores of Australia is already of great significance to us. It will have become even more important by the time you graduates have reached the age of your parents. I venture to predict that many of you will be at work in these distant places. You will be carrying skills which you have learned here in the United States to help others to a better way of life. You will be carrying on business affairs since commerce, more and more, no longer stops at our national boundaries.

What kind of situation, then, is it that the graduates in the newly independent nations find themselves in? They find themselves in countries which for the most part have known for centuries only poverty almost beyond imagining for the many beside great wealth for the few. They exist in countries like one I visited several years ago—Nepal—in which there is sometimes only one doctor for hundreds of thousands of people, where less than half the children born survive their first year. They live in countries where the number of people who can read and write is often less than 10 percent of the population. They live in countries where a foot-powered sewing machine would be an example of advanced mechanization. They live in countries where many people have seen airplanes overhead, but never a railroad or an automobile.

Until recently, these countries were colonies of European nations. The Europeans brought many improvements and they also

developed the natural resources of the lands largely for the benefit of Europe. The ideas of liberty and Christianity also entered these lands from Europe. Over the years these ideas built in the hearts of native leaders a burning desire for national independence and improvement in the conditions under which their people lived.

The desire for independence has now been fulfilled in virtually all of the countries of Asia, and it is being fulfilled very rapidly in Africa. The graduates of 1957 in these two continents have lived through this change from colonialism to national freedom. As children they heard their present leaders deliver impassioned pleas for independence. They have now grown up to see those pleas answered.

Independence, however, has not solved the problems of poverty, ignorance, and disease from which their countries have long suffered. It will fall to these graduates to tackle these problems if the promise of independence is to be fulfilled for all of the people of the newly independent nations. It will fall to them to use the power of independence boldly yet responsibly to bring their countries fully into the modern world. It will fall to them to rise above the bitter hatreds which the struggles of their fathers for freedom engendered. Other nations, like our own, can help to some degree but the initiative must come from them if their independence is not to be an empty word.

The graduates of 1957 in the newly independent countries have a difficult but inspiring future ahead of them. It is one of hard work, heavy responsibility, and many challenges. If they make of it what they can, however, they will have contributed immeasurably to the growth of their countries, the welfare of millions of people and to the strength of freedom throughout the world. I hope you graduates will keep an interest in their work and do what you can in the future to help them.

Before concluding, I should like to turn to one other class of 1957, the graduates of Moscow or Leningrad or any other city in Soviet Russia. Because of the great tension which has existed between this country and Russia, it is easy to overlook the fact that many of the same problems of life confront the people of Russia as we ourselves know. Their graduates, I am sure, also ask the question, "What's ahead for me?" And the setting in which they live as is the case anywhere else, to a great extent, controls their answer.

The graduate in Russia lives in a country which in a technical sense is not unrecognizable to us. The Russians in the last 20 years have laid great stress on industry. They have their extensive mining operations. They have their tractor factories, their railroads, their automobile plants, their mechanized farms. Most important, they have developed atomic and nuclear weapons, and the jet aviation and the guided missiles with which these instruments of destruction are linked in modern warfare.

The quality of Russian production is in general inferior to the material things we know and so is the quantity. The standard of living of the average person is far lower than it is in this country.

Except for these differences, however, what we might call the look of Russia to its graduates is not too dissimilar to the look of the United States to you graduates as you both contemplate the question, "What's ahead for me?"

Yet we sense and we sense correctly that there are enormous differences in the situations which confront the Russian graduate and the graduate in the United States. I believe if you think of it for a moment you will discover that of these differences, two are outstanding. They are the principal differences between freedom and totalitarianism. The first is the degree of freedom of choice you will exercise over your future, as compared with the Russians. In this country, it is you who will eventually choose what work you will do, where you will live and what you will make of your life. For the Russian graduate, that choice will be largely determined by the state. The task of choosing what we are to do with our lives is sometimes a difficult one. It is a price of freedom which the Russian graduates will not have to pay. But it is also a priceless heritage of freedom which they will never know.

The second great difference is that while you may criticize your Government and prefer Republicans to Democrats or Democrats to Republicans, I believe you have a measure of confidence that life in the future in this country will continue on a fairly level keel. You know that you will not be plunged into the nightmare of war by some sudden act of a mad ruler. You know, in short, that you live in a country with a responsible, an accountable government. It is a government which the people of this country have made and can unmake by orderly processes.

The Russian graduate has no such assurance. He must work out his future under an autocratic government. Today, it is run by the combination of Khrushchev and Bulganin but sudden upheavals in the night and tomorrow's ruler may be another power-mad Stalin. Even in the case of the present Soviet leaders—this week they may smile at the world, and next week frown at it. This week they may talk peace. Next week the order may go out for war. A graduate in Soviet Russia, as he develops his career, may make a great contribution to science and be honored for it in 1 year, but the next he may be sent into exile because the party in control has changed its mind.

Since such is the state of affairs in Russia, I believe you can see that the Russian graduate deserves our sympathy as much as his totalitarian government deserves our condemnation.

Unfortunately, the effect of the situation in Russia is not confined within the borders of that country. The totalitarian influence of that country is worldwide. Not only has it suppressed the independence of neighboring nations, but it has kept the entire world in constant fear of aggression and war.

That brings me to the final thought I wish to leave with you tonight. As you graduates, not only here in Butte High School, but throughout the world, work out your futures in accordance with your personal desires and the setting in which you find yourselves, there is one problem which all of you must face. That is the problem of maintaining peace in the 20th century world. That is a problem for which no single country can find the solution. There are no simple answers to this problem, yet all of us must do what we can to contribute to a solution. We cannot pass it off as futile and sit down to wait for our fate. If we can conquer this problem, a world—a universe—of undreamed of possibilities will open before us. Your creative contributions together with all those who have gone before will provide the key. If we fail, then all mankind in this nuclear age stands on the brink of unspeakable disaster. We cannot fail. We must not fail.

A Foreign Policy for Peace

(Address by Senator Mike Mansfield, of Montana, commencement exercises, College of Great Falls, Great Falls, Mont., May 29, 1957)

When Monsignor Donovan asked me to deliver the commencement address here at the College of Great Falls, I felt both honored and flattered. When the Monsignor also asked me to receive the honorary doctorate degree, I was overwhelmed. It was with a deep sense of gratitude and humility that I accepted.

I wish there were some way, some special honor, some higher degree—some superior mortar board, so to speak—that I might in return bestow upon the Monsignor, not because he needs it more than I but because he deserves it more.

This year, as you may know, is his silver anniversary in the priesthood. Twenty-five years of devotion to religion and years of service in the education of the youth of all faiths are ample testimony to his superior worth.

I regret, Monsignor, that I cannot give you a higher degree or a better mortar-board. I can however, express on behalf of all here, the deepest admiration and affection for you for your great contribution to this community. I can also express the hope that your next 25 years will be spent among us so that your magnificent work may go on.

This year is also the silver jubilee of the College of Great Falls. The 25 years of its existence have been years of astonishing growth, for the school, for the city, for the State and the Nation. The progress of the College of Great Falls is all the more remarkable since the school was founded at a time when the Nation was in the lowest depths of the great depression. For you graduates the great depression may be just a title in history. For your parents, however, it is far more than that. They will remember it as a time when colleges, like banks and businesses were busy only at closing their doors. It took courage and faith to establish a school in that climate. The vindication of the courage and faith of the founders of the College of Great Falls is to be seen in this graduating class of 1957.

Since all numbers seem to lead to 25 today, I should also note that a quarter of a century ago with the coming to power of Adolf Hitler in Germany, preparations began in earnest for World War II. We did not know it then but less than a decade later the entire world was to be engulfed in a struggle which brought civilization very close to the edge of doom.

The world has now recovered from the material damage of that war. The physical scars have healed even though the personal losses are still felt by those who suffered them. War has become an unpleasant subject for discussion. Many would prefer not to talk about it, just as people preferred not to talk about it in 1932.

Yet the shadow of war still hangs above the earth. The shadow today, moreover, is darker than that which preceded World War II. It is a darker shadow than any in the history of mankind. It is the shadow of a war which threatens not only the Soviet Union and this country but all countries. It is the shadow of a war which threatens not solely civilization but the human race itself; not merely this generation but all generations to come.

I shall not dwell at length, today, on the terrors of this war of the future. You have read of them. You have heard of them. Sufficient to say that each year its potential destructiveness grows larger as atomic weapons are brought to an ever higher state of perfection. We have already reached the point where it is necessary to clear an area three times the size of the State of Montana in order to test a hydrogen bomb. Think of it for a moment. Over 400,000 square miles of the Pacific Ocean must be emptied of unprotected shipping before a single explosion can be set off safely. Even then, there must also be a prayer that the winds hold and that there has not been a miscalculation. If we have already reached this state merely in testing nuclear explosives, it is not difficult to imagine what would happen if such explosives were released in actual warfare.

The United States, Soviet Russia, and Britain already have these weapons. It will not be long before other nations add them to their arsenals.

And we are only at the beginning. Guided missiles are commencing to replace piloted planes for delivering nuclear explosives in warfare. These missiles now travel several hundred miles with uncanny accuracy. Both Russia and the United States are already experimenting with new models that will speed to targets 1,500 miles away in a matter of minutes. It is only a question of a few years until these devices will have been developed to the point where they will carry nuclear explosives between the continents and reach speeds of 15,000 miles or more per hour in their flight.

This is not science fiction but scientific fact. These are the realities of the world in which we live in this second half of the 20th century.

It is no wonder that the conscience of humanity has begun to speak out. We have heard it in the words of His Holiness, Pope Pius XII. We have heard it from the depths of Africa in the words of that great missionary, Albert Schweitzer. We have heard it from other religious leaders throughout the world.

The words of each may differ but the message in every case is the same. The warning is clear: Mankind is walking blindly on the brink of an overwhelming catastrophe. There is little margin for error. There is little margin of time.

I said that I would not dwell at length today on the dangers inherent in war and I shall not. What is essential is that we recognize these dangers as very real. What is essential is that we do not close our minds to them as being beyond our comprehension. What is essential is that we seek to understand the problems that these weapons pose for the Nation and do what we can to deal with them.

That brings me to the question I wish to discuss with you in detail today. What is the alternative to accepting the inevitability of a nuclear war? The alternative, it seems to me, the only alternative is to work actively for peace.

There is no more important problem facing our State or the Nation. It is a problem which has a special significance for you young men and women who are graduating in the year 1957. You will be face to face with this problem through your maturing years. You will work out your dreams, your careers, your lives, under its overpowering influence.

As your Senator, I have given a great deal of thought and time to this question. If he is to serve the citizens of his State, a Senator must be concerned with a Hungry Horse or a Tiber Dam. He must be concerned with the price of wheat or cattle. He must be concerned with the cost of government as it is expressed in the budget and taxes. He must be concerned with the improvement of transportation and communications and the countless other problems of the citizens of the State.

As he considers these domestic matters, however, he is in much the same situation that you young people find yourselves in thinking of your futures. He must consider them in the light of the immense problems of war and peace which face the Nation.

The cost of past wars and preparations for defense in the event of another runs to over 80 percent of the $71.8 billion budget presented to Congress by the administration a few months ago. You have heard much, I am sure, of the so-called battle of the budget. Actually, it is more a skirmish than a battle. Congress has done what it can to reduce spending, to increase efficiency. The major costs of government, however, have to do as I noted, with defense costs, with what might be called war costs. So long as serious threats exist to the security of the Nation these are the most difficult costs to reduce.

The questions of war and peace, therefore, are not remote from the interests of the people of this State, or any State. They are at the core of our interests. And because they are, as a Senator, I have been deeply concerned with them. I have traveled widely in the world these past few years in an effort to grasp their implications as fully as possible. I have tried to understand what roads lead to peace, what roads to war.

The way the nation acts for peace is primarily through foreign policy, just as we work to defend ourselves in war through defense policies. A foreign policy is not a mystical formula no one can understand except the President and the Secretary of State, and of which ordinary citizens need stand in awe. In this Nation, it is your foreign policy and the more you know about it, the better policy it is likely to be. You will gain if this country has an effective foreign policy. You will suffer incalculably if it is an inadequate policy.

Foreign policy is the course of action we follow as a Nation in the world. It is what we do or fail to do in our relations with others to safeguard our national interests. Fifty years ago or even 25, these interests did not appear to be of great consequence. Yet 3 times in the lives of many here today, they were sufficient to plunge the Nation into the deep sorrow and the tremendous losses of great military conflicts.

In the light of these experiences can we believe any longer that the Nation's international interests are of little consequence? In the light of these experiences, is it reasonable to assume that if a major conflict breaks out in the world we can avoid it? If we were unable to do so when other nations were more remote from us, when the oceans provided a defense of insulation, are we likely to do so now? Are we likely to do so when technological advances continue to bring nations into ever-closer contact with one another? Are we likely to do so when not only the oceans but even the polar regions have ceased to be a barrier to this contact?

It seems to me that there is only one way in which we can hope to safeguard our overriding national interest in avoiding an involvement in war. That is by reducing the likelihood of an outbreak of war. It is by building a positive foreign policy for peace.

A policy of peace is one which first of all recognizes and is based solidly on the realities that exist in the world. It is one which is adjusted not to conditions as we would like them to be but to conditions as they are. Most important, it is a policy which isolates the principal dangers of war in the world and acts, insofar as it is within our capacity to act, to curb or remove those dangers.

Before I deal with the dangers to peace and the actions that are necessary to cope with them, let me say this about the nature of foreign policy. No matter how effective it may be, peace depends on what others do as well as on what we do. The most that we can expect is that those responsible for our foreign policy assess accurately the situation that exists in the world, that they face this situation honestly and then set a courageous course of action for dealing with it. They can do no more. We can ask for no more.

I have spoken, as you may know, many times in recent years on matters of foreign policy, in the Senate, at home in Montana, and elsewhere. As a result, some have come to regard me as a critic of the administration's foreign policy. I can assure you, however, that my purpose has not been criticism for the sake of criticism. My purpose has been to impress upon those responsible the commonsense principles of policy I have just mentioned: Assess the international situation accurately; face it honestly; deal with it courageously.

In these terms, a foreign policy for peace requires that first of all we isolate the dangers to peace in the present international situation. When we consider these dangers, most of us think automatically of Soviet Russia. There are sound reasons for this chain of thought although I should like to emphasize that the problem of maintaining peace involves much more than the actions of any single country or any single ideology. The problem has been with the world long before "communism" was even a word in the language and it may well be with us even after communism is remembered only in history.

At this moment, nevertheless, a major threat to peace does arise from the Soviet Union. That is because Russia is a militant totalitarianism and a powerful totalitarianism. It is the second industrial power of the world and possesses enormous military strength. Moscow is the summit of a worldwide system of power which extends over most of Eastern Europe and deep into the heart of Asia. The Russians have allies in the Middle East and support wherever Communist Parties operate in the world.

Soviet Russia is cut from the same cloth that has characterized all tyrannies. The threat it poses to peace lies basically in the unpredictability of the rulers of the Communist system. They are ruthless men and if they are like Stalin, they are men obsessed with a fear and hatred of freedom. They are men who cannot rest content while people or nations who do not agree with them continue to exist in independence.

The danger to peace arises from that fact that these men—these men without fixed responsibility to their peoples—control vast forces of destruction. They can unleash these forces in a moment of fear, in a moment of miscalculation, in a moment of whim.

Strangely enough the hope that peace shall not give way suddenly in these circumstances lies in the fact that these Soviet rulers are not only ruthless men, they are also intelligent men. They are fully aware of the dangers to themselves as well as to others in modern warfare. They know something of the power of nuclear weapons since they themselves have them and they are fully aware that these weapons are held by the United States and other free nations. They know that if they launch a military aggression it will be met by retaliation. Since such is the case, if they act as intelligent men, they will not invite their own destruction by precipitating a war.

That is not much of a hope for peace. It is a delicate fulcrum on which to balance the fate of civilization. For the moment, however, there is no other. That is one of the realities of the situation which confronts the Nation, and we have no choice but to live with it.

There is still another hope, however, a hope for a more durable peace. To realize it, will require endless patience and the deepest wisdom and restraint on our part. This other hope, this long-range hope lies in the fact that the Soviet totalitarianism is no more impervious to change than any other system and changes within the Communist realm could lead in the direction of greater stability, greater responsibility, and a more secure peace.

Pressures for change already exist throughout the vast stretch of the Soviet system, from Eastern Europe to the Pacific. There are people living within the Communist countries who resent oppression and who resist it. We have seen their influence in developments in Yugoslavia, in Hungary, and in Poland. In time, that influence is likely to reveal itself elsewhere in the Soviet system, even within Soviet Russia itself.

What, then, does the situation within the Soviet system add up to in terms of a foreign policy for peace? What attitudes and actions on our part does it suggest? It suggests, first of all, that we cannot underestimate the continued danger of aggression from the Soviet system. It also suggests, however, that if we can do anything to lessen the

threat which a potential war with the scientific weapons of today represents to all mankind, we ought to be prepared to do it. We should be prepared to negotiate at any time and at any place and on any matter which relates to the control of this warfare of the future. These negotiations must be pursued not with blind optimism but with all the soberness we can command, with a full awareness that there is no room for false steps or empty promises.

I am confident that we can trust the President of the United States to negotiate in that fashion. It amazes me when people say that the President, our representatives, or other Americans cannot talk with the Russians without being contaminated or without getting the worst of the bargain. If we ever reach the point where we fear negotiations on any matter because we believe we are less capable, less competent or more subject to contamination than others, or because we regard ourselves less able to distinguish between what is good or bad for this Nation then we shall indeed have reached a sorry state.

To afford immediate protection against war, then, we need a combination of military strength and a willingness to negotiate to reduce the risks of war. For the long-range hope of peace we need to be constantly alert to developments inside the Soviet system. We need to be flexible in our policies for dealing with these developments.

Whenever changes within that system promise to lead to greater freedom and to peace we ought to do what it is prudent to do to encourage these changes. One thing we ought not to do is to stimulate uprisings in any country by incendiary words or promises of liberation and then provide only tears and sympathy to the martyrs to liberty when these uprisings are crushed by brutal power.

Freedom will come to the countries now suppressed by Soviet Russia and even to the people within Soviet Russia. It will come, however, primarily on the initiative of the peoples of these lands. Our words and actions in this connection can be harmful as well as helpful unless they are governed by great wisdom, understanding, and restraint.

If I may turn now from the problems posed for foreign policy by the Soviet system, I should like to consider with you another threat to peace. The threat which arises from within the circle of the free nations themselves. Twice in this century the world has been plunged into wholesale conflicts. The origins of World War I and World War II had little to do with Soviet totalitarianism. They were wars which began primarily in Western Europe. They were wars which resulted from the disunity and rivalries of the very nations which are closest to us in culture, in traditions, and in outlook. They were wars, in short, which struck at the heart of the free civilizations of the Western World.

World War I dealt a severe blow to the ideals and achievements of Europe. World War II almost brought an end to liberty in Western Europe. It took an enormous effort on the part of the people of that region, great human and financial sacrifices on the part of the people of the United States, to restore that region, to give it one more chance to live again in freedom.

I believe it is the last chance. The countries of Western Europe now have little choice. Either they move toward greater unity or they will once again split apart into the rivalries which characterized them before World War II. They will lay themselves open to a new suicidal conflict and to a long night of totalitarian domination.

In recent years, I have had occasion to talk at length with many of the political leaders of Western Europe. Most of them recognize that the hope for the continued freedom of their countries lies in unity. They have done much to overcome the fears and suspicions of centuries, such as those which have characterized German-French relations, and they have moved their countries a long way toward integration. Much remains to be done, however, if the unity of Western Europe is to become a living reality. There is a need to rejoin the two halves of a divided Germany in peace and there is a need for a continued advance in binding together all of Western Europe in common efforts for defense and for economic and scientific progress.

During the past decade this country has done a great deal to contribute to the stability of Western Europe and to encourage its integration. Public funds, funds to which all of us contribute in taxes, were used to bring about economic recovery in the European countries under the Marshall plan. They have been used through the North Atlantic Treaty Organization to promote a common defense against totalitarian aggression.

We have made this contribution because it has been in our national interest to make it. We have made it because, as I suggested earlier, the advances of technology and science have linked our peace with the preservation of peace elsewhere. We have made it because there is no real defense against a major nuclear war except the defense of a strongly maintained peace.

I should like to turn now to a third major danger of war. It is a danger which arises from the vast political transition which is taking place in Asia and Africa. On those continents, one-third of mankind is on the move. These peoples have moved or are moving from colonial systems into a status of independent national life. They are impelled by the same urge to freedom and to better conditions of life that has inspired many others since the American Revolution in the 18th century.

This country can only sympathize with the motives which underlie this urge to change in the Afro-Asian world. To do otherwise would be to deny our noblest political beliefs and traditions.

When that has been said, however, we must also recognize that the vastness and the rapidity of the transition creates major problems for the maintenance of peace. As we have seen in the recent Suez and Middle Eastern crisis, this transition can involve bloodshed and it can bring the nations of the world close to major war. It can, as we have seen in the case of China, create aggression. Unless the transition to political independence is coupled with economic progress and the growth of responsible governments it can lead to disillusionment with freedom and to the rise of new totalitarianisms.

A foreign policy for peace must be acutely aware of these possibilities in the colonial transition. It must act to encourage the strengthening of the forces of freedom in the newly independent countries and their peaceful economic progress. It must not, however, produce an unending dependence on this country or an irresponsibility or an arrogance in the leadership of these new nations.

The point 4 program of technical cooperation has done much to help the peoples of the newly independent nations in an appropriate fashion. It has assisted them in acquiring the skills necessary to promote public health, education and other basic and essential services of modern life. I have seen this people-to-people undertaking in operation in many countries. The men and women who are engaged in point 4 work, the teachers, the public health specialists, the county agents, are performing an outstanding service to humanity and, in the process, are doing a great deal to promote an understanding and an appreciation of the finest qualities of our national life. However, I have also seen other types of foreign aid, often excessive and ill-advised military and economic aid that has been wasteful and harmful. It was for that reason that last year I suggested a full investigation of foreign aid by the Senate. That investigation has now been completed and I believe we have the facts which will enable us to separate the necessary from the superfluous, the wheat from the chaff, in foreign aid in the future.

If I may summarize, then, a foreign policy for peace has to deal with three principal dangers of war: the threat of aggression from the Soviet totalitarian system, the tendency toward disunity in Western Europe and the difficulties of the transition to freedom in Asia and Africa.

There are ways, as I have tried to indicate, in which we may cope with these dangers. We can stand firm with others against the threat of aggression from Soviet sources while we bend every effort to reduce by negotiation the perils which modern warfare and weapons pose for all humanity. We can do what we are able to do, to encourage the greater unity of the free nations of Europe and the Western world. We can help to guide the progress of the newly independent nations into channels of freedom, responsibility and economic progress.

We have no choice but to face the fact that all of these efforts require money. Let us, however, bear this in mind. It costs about $200 million a year to run the Department of State, the agency charged with primary responsibility for peace. It costs over $40 billion a year to run the Department of Defense, the agency charged with primary responsibility for defending the Nation in war. Further, most of the foreign aid we now provide supplements these expenditures for defense. If there is to be a major reduction in the price of government, in taxes, therefore it will be brought about only by an effective foreign policy that reduces the danger of war and the cost of defense against war.

Let me make this one final point clear. Money is not a guarantor of the success of a foreign policy for peace. Peace cannot be bought. Money is not a substitute for an intelligent understanding of the international problems we face. It is not a substitute for wise leadership in dealing with these problems. Least of all is it a substitute for an essential human compassion and for an essential human courage. Least of all is it a substitute for the faith and the determination that what must be done can be done to keep a decent peace in the world so that this Nation may live and prosper in peace.

Your Heritage of Freedom

(Address by Senator Mike Mansfield, of Montana, commencement exercises, Clarke College, Dubuque, Iowa, June 1, 1957)

It is customary on occasions such as this for the speaker to begin his remarks with some comments, lighthearted and otherwise. He might truthfully refer, for example, to the fact that his wife had been on this campus as a young student several years ago. He might point out that they were, perhaps, the happiest years of her life and that the Christian education she received here has been the mainstay of our lives. Or he might comment on his own days in college.

Usually by the time such comments have been exhausted, the commencement address is far enough along so that the more restless graduates—or their parents—are looking for the nearest exit. Thereafter, those portions of the address which the speaker is likely to think are the most important may not receive much attention.

I propose to reverse that procedure today and plunge immediately into my subject. I may make some assertions without proof of

their validity. But bear with me for 20 minutes and I will try to tie these remarks into a bundle you may carry with you for the next few years. There may even be some time left to tell you what a fine-looking group of graduates you are.

There are two periods in the life of man (and I use the word "man" in its generic sense) when he is likely to contemplate his place in history.

First, he is expected to think of his potential contribution to history when he graduates from college.

Secondly, he is likely to think of his contribution to history when he begins to think of death.

Most of the rest of the time, however, man is so occupied with living—he is so close to the stirring event of life itself—that he is usually not able to assess his impact on history.

I was once a schoolteacher. During those years, I discovered that the time to teach a student something was when he was paying attention. I believe you are attentive today because this is one of the moments in your personal life history when you are ready to learn and to plan.

There is one simple thought that I want to leave with you. It is this:

Every man and women has an opportunity to leave his or her mark on the history of the human race.

If we could somehow visualize the history of mankind as a total, it might look something like a pyramid—perhaps a pyamid of people, or of ideas, piled one on the other.

The essential of any pyramid which can be built to its apex is that it rests on a sound foundation.

The foundation for this pyramid of life is that it rests on man's belief in God. It is by that belief that man knows his contributions will not be lost for any divine reason. He knows the foundation will not fail. If man's contribution is to be lost, it will be because of man's failure, not God's failure.

A second essential of a pyramid is that each stone rests firmly on another. Lives and ideas must be fitted together so that each succeeding level of construction rests firmly on the foundation beneath it.

Your place in this pyramid is yet to be determined. Determine it well for I assure you that one day you will be called upon to tell what you have contributed to mankind. When you are ready to pass from this life, you must ask yourself: What have I contributed?

You have heard the story of the rich and favored king who asked a wise Athenian whether he considered the king lucky. The answer was quick: How can I tell? You aren't dead yet."

And this, I suppose, a characteristic of the contributions we make. Their total impact may not be known until we have passed on.

I have been told that one point impressed on men when they are learning to fly is that they owe their lives to the men who went before them. The pilot who first flew into a cloud and crashed because he could not maintain his equilibrium must not have felt that he was making a contribution to life. But lives sacrificed in all lines of endeavor have contributed to man's knowledge and growth and have helped to build the pyramid toward its apex.

All that man is able to do today he owes to what others have done before him. What man will be able to do tomorrow, he will owe to those of us who live today.

But what can you do? You are but one of billions of people on this earth.

One thing is clear. You can do worse than nothing. You can live a life that destroys rather than builds. You have the potential of becoming a burden on your community. You can force others to take care of you in the county jail or elsewhere. You can be a source of destructive acts in your community and not contribute to the growth of mankind. In short, you can act in such a way as to sap the resources of your community and require others to devote extra energy to your protection, rather than to be able to devote themselves to the growth of man.

But at the opposite end of the scale from doing nothing or worse than nothing, it is also clear to me that you have the potential—as an individual—of contributing to the advance of mankind.

One of our great contemporary authors has written: "Nothing was ever created by two men. There are no good collaborations, whether in music, in art, in poetry, in mathematics, in philosophy. Once the miracle of creation has taken place, the group can build and extend it, but the group never invents anything. The preciousness lies in the lonely mind of man."

The preciousness of our religion and our Government lies in their ability to preserve and to promote the capability of every individual to make his unique contribution to the progress of mankind.

None of us can know the contribution he may make toward man's progress. Some may develop new ideas; others will improve our physical surroundings; some will influence the lives of their companions; others will pass their heritage on to children capable of greater contributions than their parents. We each have the capacity to leave the world a better place than it was before we arrived in it.

Man as an individual has laboriously struggled upward. He understands things today he did not understand last year or the year before. He moves ahead step by step. He can continue this progress when his spirit and mind can operate in freedom. His growth will be stunted if his freedom is impaired.

It is for this reason that it is so important that we as individuals and as a sovereign entity shape our destiny toward protecting and promoting the freedom of this Nation.

You young women gathered here today to take an important step in life are the offspring of a free people. You are here to carry on the heritage that has been built. You are each fitting yourselves to make your unique contributions to the progress of mankind.

I have now completed what are the more serious portions of my remarks. The time has come to stop talking philosophy and to talk practicalities. You have jobs ahead of you. You have a community and a world in which you must live.

What is this world you face? Is it likely to be a peaceful world?

Last year I delivered an address to the graduating students of Montana State University. I told them that for the first time in my experience I could state my belief that a world war in their lifetime might be avoided. I said that I believed this was possible because of things done by men and women from many nations.

I reminded them of the discovery of atomic power—a discovery which was a threat, and still is—but which may also be a benefit in disguise because any nation which might start a war may now reasonably expect to bring about its own destruction. Nations of the world have realized in the past 2 years that another war might destroy all life. We live at peace as the result of what Sir Winston Churchill has described as the mutual terror resulting from the threat of atomic destruction.

Two years ago, at the summit conference, the United States and the Soviet Union crystallized an unspoken and unwritten understanding. The understanding was that neither country on pain of self-destruction could start a major war or permit a situation between other powers to deteriorate to the point where a major war might threaten.

Today if we get into a world war, it is not likely to be because the great powers want war, but because they will have slipped into war inadvertently.

Recall, for a moment, the most serious situation of last fall, the situations in the Middle East. Israeli troops had moved on Suez. France and Great Britain brought force to bear in the same area. The situation was fraught with danger that a small war might become a big war.

I cannot go into the details of those historic months. But I call your attention to the fact that the world stood virtually united in demanding that the use of force cease. The United States and the Soviet Union, with no understanding between them, found themselves on the same side. Together, unwillingly together, they worked through the United Nations to snuff out the fire of military action in the tinderbox of the Middle East.

I do not attribute the stopping of hostilities in the Middle Eastern crisis to any great diplomatic finesse on the part of the United States, the Soviet Union, or any other nation. I attribute it to the overriding, but unspoken, threat posed by the existence of weapons of mutual terror. These weapons might inadvertently have been unleashed had the use of force in the Middle East continued unrestrained.

It has been 2 years since the President met at Geneva with the chiefs of state of France, the United Kingdom, and the Soviet Union. It may well be that the time is approaching for another such meeting.

Much has happened in these 2 years which might shape the thinking of such a meeting. Britain has a new Prime Minister. President Eisenhower has been reelected by the greatest majority of any President. The leaders in the Soviet Union have faced the crisis of rebellion in the satellite nations. The Middle East crisis has warned us all that war lurks around the corner for nations not ever mindful of the terrible consequences that might flow from relatively isolated military action.

It seems to me that the people of the earth have the right to expect that the chiefs of state of these great powers should gather at least once every 2 years to discuss the issue of war or peace.

I believe that another summit conference will soon be due, and I suggest a new technique for such a conference. Past conferences of this kind have been followed by disillusionment and disappointment, I believe partly because they tried to do too much.

Would it not be advisable then in devising an agenda for such a conference to limit it to one important problem? Could the nations not agree, for example, to consider only one question on which agreement might be expected?

One of the difficulties in past conferences of this type has been that the agenda has been as wide open as the problems that face the great powers. Such an agenda tends to concentrate discussions on all the problem areas on which we disagree.

Why could not the chiefs of state take up just one problem—a big one I must admit—but one upon which there is some chance of agreement?

I have felt for some time now that real progress might be made toward agreement for the suspension of testing of hydrogen bombs of great size.

This should not be a suspension of tests on our part only. I propose instead that we endeavor to reach agreement with the Soviet Union and the United Kingdom on suspending tests of bombs over a certain strength level.

An agreement of this kind would be self-enforcing. We know from reading the daily press that our detection devices as well as those of many other countries can infallibly detect hydrogen test explosions when they

exceed a certain size. It follows therefore that if any party to an agreement not to test the biggest bombs were to violate that agreement, the violation would instantly be known to the entire world.

I grant that such an agreement would not be without its dangers. But I believe that the time has come when the dangers of further uncontrolled big tests outweigh the dangers of agreement to suspend such tests. Surely this is an important enough issue for the heads of state to explore together ways of agreeing to limit or stop altogether the testing of hydrogen bombs so large that their fallout of radioactive material poses a threat to mankind.

It is a strange thing that the United States which has been the leading nation in the development of military uses of the atom has somehow failed to occupy a leadership position in the development of the peaceful uses of the atom. It is a strange thing that this Nation has somehow failed to convince much of the world that we are in the forefront in seeking to control the devastating effects of the atom and to put it to peaceful uses.

The time has now come for a vigorous and vital effort, led by the President of the United States, to begin to roll back the dangers of atomic warfare.

The President cannot exert this leadership by occasionally authorizing his press secretary, Mr. Jim Hagerty, no matter how competent, to respond to pronouncements by Bulganin or Khrushchev. Neither can Mr. Dulles counter the propaganda moves of the Soviet Union by authorizing his press secretary, Mr. Lincoln White, to answer Mr. Gromyko. The voices of our leaders must be heard, not the voices of their press secretaries.

Moreover, leadership can never be exerted by waiting for the other side to make a statement to which this Nation can then respond.

An essential element of leadership on the part of a man or a nation is willingness to take the initiative, to move out ahead. Leadership requires imagination and boldness and coolly calculated assessment of alternatives in any course of action.

Leadership is not based on big talk, big size, or big emotion. I am sure that you have had experience enough to know that some men are assumed to be leaders, just because they are big, strong, and have a powerful voice. But you also know that real leadership among men or nations is not based on appearance, but rather is based on performance. Acts speak louder than words, as the saying goes.

There has been a tendency in the past few years for this Nation to rely on words instead of deeds. This situation is illustrated by recent hearings which were held in the Senate on the annual appropriation for the United States Information Agency, one operating part of which is the Voice of America. After sitting through some days of hearings when witnesses testified to the need for additional funds to carry the story of America abroad, I had the impression that much of this Agency operates under the philosophy that if we can just manage to shout louder than anyone else that we are good and they are bad, we will establish freedom and democracy throughout the world and communism will be defeated.

Leadership depends not only upon what we say, but upon what we do. Reverting to my opening remarks, the pyramid of your life—the pyramid of your Nation—cannot rest on words alone. It must rest on solid ideas and acts.

One of the reasons I have commented on what has seemed to me to be a deterioration in our leadership in the world in the past few years is the fact that our future as a Nation is molded by the present and past, just as your futures as citizens are molded by the present and the past. Your world of the past 4 years has been Clarke College in the heart of the American Midwest. You will carry the impressions of these years, of your devoted teachers, of this campus, of your fellow students throughout your life.

The same is true of our Nation. Its future is being molded by the acts of today. Our acts of today are establishing the United States as a great leader, or as a great failure. Nations rise and fall. The past is studded with the relics of empires which were unable to adapt themselves to the new. It is studded with the relics of nations that lived in the glory of past victories and were never able to face and to deal with the problems of the present.

Can we look at our Nation today and know that we are willing to face the issues? Are we able to look a fact in the face and recognize it as a fact? Or do we look at facts and call them fancies because we aren't willing to face them? Do we see the Russians as they are, or as we would like to think them to be? Do we recognize the threat of hydrogen weapons, or do we hide from it? Do you read the comic section of your newspaper because you are unwilling to face the hard issues of the editorial page? Do you say, "Let those in Washington worry about that one—they're the experts"?

In asking these questions, I have intentionally mixed together those we should ask as a Nation with those we should ask as individuals, because what we are, as a group of individuals, we are as a Nation. If we as individuals adopt an attitude of "let George do it," if we as individuals are unwilling to face facts, be honest, and do the best we can with what we've got, then we as a Nation cannot expect to exercise the leadership essential to the creation and maintenance of a world in which freedom shall not perish.

That brings me to the final thought I wish to leave with you tonight. As you graduates, not only here in Clarke College but throughout the world, work out your futures in accordance with your personal desires and the setting in which you find yourselves, there is one problem which all of you must face. That is the problem of maintaining peace in the 20th-century world. That is a problem for which no single country can find the solution. There are no simple, no cheap, no quick, no easy answers to this problem, yet all of us must do what we can to contribute to a solution. We cannot pass it off as futile and sit down to wait for our fate. If we can conquer this problem, a world—a universe—of undreamed-of possibilities will open before us. Your creative contributions, your abilities and capabilities, together with all those who have gone before, will provide the key. If we fail, then all mankind in this nuclear age stands on the brink of unspeakable disaster. We cannot fail. We must not fail.

HOUSE OF REPRESENTATIVES

TUESDAY, JUNE 4, 1957

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

O Lord, our God, Thou art always gracious and merciful, and dost never withhold from us any needed blessing.

With a humble spirit and a contrite heart, we acknowledge that so often we receive Thy blessings with too little gratitude and use them with too little wisdom.

We pray that Thou wilt continue to bestow upon us the manifold gifts of Thy divine grace, which we so sorely need, as we face the duties and responsibilities of our high vocation.

Grant that governed by Thy divine will and guarded by Thy boundless love and care, we may meet all our most difficult problems with confidence and courage, with patience and perseverance.

In Christ's name we pray. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. McBride, one of its clerks, announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H. R. 53. An act to consolidate into one act, and to simplify and make more uniform, the laws administered by the Veterans' Administration relating to compensation, pension, hospitalization, and burial benefits, and to consolidate into one act the laws pertaining to the administration of the laws administered by the Veterans' Administration.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1740. An act to authorize the payment from the employees' life insurance fund of expenses incurred by the Civil Service Commission in assuming and maintaining the assets and liabilities of certain beneficial associations.

The message also announced that the Vice President has appointed Mr. JOHNSTON of South Carolina and Mr. CARLSON members of the joint select committee on the part of the Senate, as provided for in the act of August 5, 1939, entitled "An act to provide for the disposition of certain records of the United States Government," for the disposition of executive papers referred to in the report of the Archivist of the United States numbered 57–12.

LAWS ADMINISTERED BY THE VETERANS' ADMINISTRATION

Mr. DORN of South Carolina. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 53) to consolidate into one act, and to simplify and make more uniform, the laws administered by the Veterans' Administration relating to compensation, pension, hospitalization, and burial benefits, and to consolidate into one act the laws pertaining to the administration of the laws administered by the Veterans' Administration, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 3, under "Sec. 404." of title IV, insert:

"SEC. 405. Payment of pension during confinement in penal institutions."

Page 27, after line 24, insert:

"The foregoing shall not be applicable to any widow who, with respect to date of marriage, could have qualified as a widow for death compensation under any law administered by the Veterans' Administration in effect on the day before the effective date of this act."

Page 47, after line 18, insert:

"PAYMENT OF PENSION DURING CONFINEMENT IN PENAL INSTITUTIONS

"SEC. 405. (a) No pension under public or private laws administered by the Veterans' Administration shall be paid to or for an individual who has been imprisoned in a Federal, State, or local penal institution as a result of conviction of a felony or misdemeanor for any part of the period beginning 61 days after his imprisonment begins and ending when his imprisonment ends.

"(b) Where any veteran is disqualified for pension for any period solely by reason of subsection (a) of this section, the Administrator may apportion and pay to his wife or children the pension which such veteran would receive for that period but for this section.

"(c) Where any widow or child of a veteran is disqualified for pension for any period solely by reason of subsection (a) of this section, the Administrator may (1) if the widow is disqualified, pay to the child, or children, the pension which would be payable if there were no such widow or (2) if a child is disqualified, pay to the widow the pension which would be payable if there were no such child."

Page 52, line 8, after "War", insert "who is on the pension rolls on the day before the effective date of this act under any public law."

Page 53, line 1, after "War", insert "as heretofore defined under public laws administered by the Veterans' Administration."

Page 66, line 14, strike out all after "(e)" down to and including "war" in line 18 and insert: "Any disability of a veteran of the Spanish-American War, upon application for the benefits of this section or outpatient medical services under section 524, shall be considered for the purposes thereof to be a service-connected disability incurred or aggravated in a period of war."

Page 83, line 10, strike out "thereof" and insert "therefor."

Page 89, line 23, strike out "act of 1924" and insert "act, 1924."

Page 109, line 3, strike out "of" and insert "on."

Page 109, line 18, strike out "part" and insert "title."

Page 110, line 6, strike out "part" and insert "title."

Page 112, line 11, strike out "(a)."

Page 112, line 20, strike out "States or Territories" and insert "States, Territories, or Commonwealths."

Page 113, line 2, strike out "States or Territories" and insert "States, Territories, or Commonwealths."

Page 114, strike out lines 4 to 7, inclusive.

Page 125, line 9, strike out "authorzied" and insert "authorized."

Page 130, lines 22 and 23, strike out "(except retired pay, but including emergency officers' retirement pay)."

Page 130, line 24, after "benefits" insert "(except retired pay, but including emergency officers' retirement pay)."

Page 139, line 5, strike out "now."

Page 177, lines 14 and 15, strike out "public or private" and insert "private, State, and other Government."

Page 181, line 19, after "shall" insert "to the extent feasible."

Page 183, line 11, strike out "3" and insert "(3)."

Page 188, line 18, strike out "part" and insert "section."

Page 226, lines 2 and 3, strike out "veteran occurring before the effective date of this act," and insert "veteran."

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

Mr. DORN of South Carolina. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DORN of South Carolina. Mr. Speaker, the amendments of the Senate are limited to technical, typographical, or grammatical corrections which do not change the intent, meaning, or effect of the bill as passed by the House. There is one substantive correction made necessary by the enactment of Public Law 85-24, prohibiting the payment of pension to veterans who are incarcerated for periods of 60 days or more. This latter law passed both the House and Senate unanimously.

CALL OF THE HOUSE

Mr. TABER. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their name:

[Roll No. 94]

Beamer	Healey	O'Brien, N. Y.
Bowler	Holifield	O'Konski
Buckley	Holtzman	Powell
Celler	James	Prouty
Christopher	Jenkins	Rains
Cole	Jensen	Rivers
Coudert	Judd	Sheehan
Dawson, Ill.	Kearney	Shelley
Diggs	Kilday	Siler
Durham	McConnell	Utt
Engle	McCormack	Wigglesworth
Feighan	McGovern	Wolverton
Fogarty	Miller, Md.	
Halleck	Norrell	

The SPEAKER. On this rollcall 386 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

COMMUNICATION FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following communication from the President of the United States, which was read:

THE WHITE HOUSE,
Washington, May 29, 1957.

The Honorable SAM RAYBURN,
Speaker of the House of Representatives, Washington, D. C.

DEAR MR. SPEAKER: I have been informed by the Secretary of State that the original of House resolution 201, of March 18, 1957, commemorating the untimely death of President Ramon Magsaysay of the Philippines, and my letter of transmittal were delivered to Carlos P. Garcia, President of the Philippines, on May 21. Mr. Garcia expressed deep appreciation on behalf of the family of the late President, and the Government and people of the Philippines.

Sincerely,

DWIGHT D. EISENHOWER.

AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954

Mr. COOLEY. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H. R. 6974) to extend the Agricultural Trade Development and Assistance Act of 1954, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H. R. 6974, with Mr. HAYS of Arkansas in the chair.

The Clerk read the title of the bill.

Mr. COOLEY. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. POAGE].

Mr. POAGE. Mr. Chairman, the legislation we have before us today is an extension of an act which has been in operation for several years and which has worked remarkably well. It is rather unusual these days that one can come before the House and report that an agricultural program is working very well and to the satisfaction of all sides and to all sections of our country. I think it is quite clear that there has been more general agreement with this program, established under what is commonly known as Public Law 480, and that it has received more general acceptance, than any other of our major agricultural programs.

It attempts to dispose of surpluses. It has nothing to do with the accumulation thereof. Whether we pass it or whether we do not will have nothing to do with the volume commodities coming into the Government warehouses. You can defeat this bill, and you will still have just as much surplus accumulating each year as if you pass the bill. You will still have to do something with the commodities.

This bill gives you a way to dispose of those surpluses, and regardless of what you think about the accumulation of the surpluses, they are there, and you cannot get rid of them just by wishing them away.

Now what can we do? We have tried a good many programs. We have tried a number of disposal methods. We have tried to sell these commodities at 105 percent of the acquisition cost, and in most cases we did not find any takers. We have tried other disposal programs. We subsidize the exportation of wheat at about 80 cents a bushel, and we subsidize the exportation of cotton at about $70 a bale. Those are rather expensive

programs. And more recently we have tried to prevent the accumulation by a soil-bank program which proved even more expensive. But the surpluses are there and they must be disposed of, or we have got to pay even more for keeping them.

A great many years ago we tried destroying some of our commodities, and we found that the public did not believe in that. You do not believe in it and I do not believe in it, and we know we are not going to take that course. Even though it might be the cheapest way in the long run, it is a harsh method and we are not going to resort to it.

So we come to you with a program that for the past 3 years has provided for the disposal of a substantial amount of agricultural commodities. Somebody says, "But look, you are just adding tremendously to the budget. You have $1.3 billion in this bill." No; we do not have any appropriation whasoever in this bill. There is no additional expenditure in this bill. This bill simply brings some money into the United States Treasury. The billion-dollar provision under title 1 and the $300 million provision under title 2 are not authorizations to expend money, but rather they are limitations upon the value of the amount of the commodities that can be disposed of under the program. We have already paid for the commodities. This bill does not make you pay for them a second time. There seems to be considerable misunderstanding in that respect.

This bill gives us a chance to at least get some of that money back and is probably the most effective program that we have had. Oh, but you say, "We will get it back in foreign currency." So we do, under this bill, but remember that we have received back under this bill and we have used of this foreign currency for the payment of United States obligations $476 million. For these payments we would have had to appropriate American dollars had we not had this foreign currency. We have spent $7 million for the purchase of strategic materials for which we would have had to spend American dollars had we not had this bill. We have under this program purchased $241 million of military procurement for which we would have had to spend American dollars had we not had this bill.

In other words, what you have done is, you have spent wheat, you have spent cotton, you have spent oils, you have spent these commodities that are now in surplus and for them you have received these things for which you would have had to pay American dollars.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. POAGE. Certainly, I yield to my chairman.

Mr. COOLEY. And the amount that the gentleman mentioned, $478 million, is actually 37 percent of the total value of the foreign currencies.

Mr. POAGE. That is right. For every dollar of foreign currency we have taken in, we have received tangible goods for which we would have otherwise been compelled to spend American dollars, to the value of at least 37 cents. So, if you never got anything from the rest of the foreign currencies, you have gotten nearly 40 cents on the dollar.

Oh, but you say, that is a tragically small amount. What did you get when you sold surplus war materials? What did you get when you sold surplus industrial goods? You averaged about 5 cents on the dollar, 5 cents on each dollar that these goods had cost the Government. So we are getting about 8 times as much for these surplus agricultural goods as we got for our surplus industrial goods; about 8 times as much in American dollars. And you are also getting the other 60 percent in the foreign currencies which undoubtedly will bring us a very substantial return—not 100 cents on the dollar, but a very substantial return in the future.

And we are selling these commodities, not at a cut-rate price. We are selling these commodities on the world market at the world price and taking foreign currencies in payment. It is not such a bad deal. It is not such a giveaway. It is not the kind of a program that many of the Members have thought that it was. On the contrary, it is probably the soundest business in which we have engaged since we have been faced with the question of the disposal of these surpluses.

It does not involve the kind of losses that many of our other disposal programs have involved.

Some people have gotten the idea that this was simply a foreign program for the benefit of somebody on foreign shores. We hope that if our program can help our neighbors that it will help them while at the same time solving some of our economic difficulties. But in this particular case the primary effect is to help America to get the most cash dollars for those things that we now have on hand that we can possibly get, as quickly as we can, to stop the cost of storage and handling as soon as possible.

Mr. DEMPSEY. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman.

Mr. DEMPSEY. I have here a bulletin from the Department of Agriculture dated May 28, 1957. It shows the bartered minerals that may be shipped to the United States. One paragraph says:

> Materials delivered under barter contracts may not be produced or processed in the United States. Heretofore, foreign-produced materials could be processed.

In other words, we are not going to get the raw materials. We are going to have them finished over there while our people are out of work over here. Is that the thing to do?

Mr. POAGE. That certainly does not seem to me to be the thing to do.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman.

Mr. COOLEY. This announcement that the gentleman from New Mexico [Mr. DEMPSEY] has referred to is dated May 28. Unfortunately it had not come to my attention and I am quite certain that the gentleman from Texas [Mr. POAGE] has not had an opportunity to read it. It is of importance, and I would like to say to my friend from New Mexico that the committee will give the matter attention and, if necessary, have hearings to determine just what change, if any, is contemplated by the United States Department of Agriculture as a result of this program announced on May 28.

Mr. DEMPSEY. I appreciate that, but it covers zinc, lead, copper, practically every mineral we have.

Mr. POAGE. Of course I have not read the particular item to which the gentleman is referring, but this bill has nothing whatsoever to do with what commodities we can buy under this strategic minerals program. Nor does this bill involve title III the barter section. It relates only to titles I and II. These sections refer only to the source from which you get the money with which you pay for these minerals. The program for the purchase of strategic materials is not set up by Public Law 480. The program for the purchase of strategic materials is set up by a separate law which provides the details of what we can buy, the amount to be paid for it, and the condition in which it may be brought into the United States. The only connection that program has with Public Law 480 is the question of how you get the money to make the payments for the obligations that have been incurred by the strategic materials program.

If we did not have Public Law 480 we would have to use American dollars to get the money to pay for it.

Mr. DEMPSEY. But you are going to throw our people out of work over here because they will process these barter metals and minerals over there with foreign workers.

Mr. POAGE. I agree with the gentleman that the regulations he has read seem to me to be ridiculous, but the gentleman ignores the point, and I hope that he does not do it intentionally.

Mr. DEMPSEY. I will put this in the RECORD intentionally.

Mr. POAGE. It is not Public Law 480 that provides the conditions under which commodities may be brought into the United States.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from North Carolina.

Mr. COOLEY. The statement the Governor has here clearly indicates that the strategic materials brought in under 480 must come in in processed form rather than raw.

Mr. POAGE. That is exactly correct so fas as the instructions are concerned but does not the Department of Agriculture receive its instructions as to what it can bring in and the conditions under which it can bring it in from another agency of the Government?

Mr. DEMPSEY. The Department of Agriculture obtains a list of strategic and critical materials which can be stockpiled in this country either in the Office of Defense Mobilization stockpile or a supplemental stockpile maintained by the Commodity Credit Corporation. The authority for barter is vested in the President of the United States who delegates it to the various departments under his administration. The Office of Defense Mobilization sets up a list of metals,

minerals, and other commodities from which the Department of Agriculture, through the Commodity Credit Corporation can choose for the barter list. This determination is made by the Board of Directors of the Commodity Credit Corporation, of which Secretary of Agriculture Benson is the Chairman and the remaining members are largely his assistant secretaries. It is not difficult to determine who decides on this policy. This Board also sets up the regulations, including the one which says that none of these foreign produced materials can be processed in this country. That is the place where the full responsibility lies for this provision, which takes away from American plants and workers the jobs that are being done in the foreign countries. I would like to point out that the Board of Directors of the Commodity Credit Corporation authorized the issuance of the following announcement, which I include, in part, as a portion of my remarks:

USDA Outlines Revised Barter Program

The United States Department of Agriculture announced today that the Commodity Credit Corporation barter program, suspended since the end of April, is being resumed immediately on a revised basis.

The revamped program, under which CCC will continue to exchange surplus farm products for strategic and other materials from foreign countries, is intended to insure that each barter contract results in a net increase in exports of the agricultural commodity involved. One of the principal factors leading to suspension at the end of April of new barter transactions was the possibility that some of the barter contracts were simply replacing dollar sales with no net gain in the total volume of agricultural exports.

The program, as revised, contains the following principal provisions:

1. In general, if the barter contractor can satisfy the Commodity Credit Corporation that a proposed barter transaction will mean a net increase in United States exports of the agricultural commodity involved, CCC will enter into a barter contract providing for delivery of any CCC-owned agricultural commodity (or tobacco held as collateral for CCC loans) for export to any friendly foreign country.

2. Exports of cotton, wheat, and feed grains to certain countries will be automatically presumed to be in addition to normal exports, and therefore a special showing that the barter transaction will result in a net increase in total United States exports will not be required. These countries will include all those not named in the country lists given later in this release.

3. Each barter contract must contain a specific designation of the agricultural commodity involved in the transaction. Up to now, barter contractors could export virtually any CCC-owned commodity under their contracts.

4. If barter contractors desire delivery of agricultural commodities in advance of delivery of material to CCC, such advance deliveries will be permitted but interest at the rate which would be applicable to credit sales by CCC will be charged until the material is delivered or payment is otherwise effected for the agricultural commodities. Payment for the interest charges will be delayed until final settlement under the contract but must be paid in cash. An irrevocable dollar letter of credit acceptable to CCC must be posted for the value of agricultural commodities which are delivered by CCC in advance of delivery of materials to CCC plus the estimated amount of interest. Heretofore, interest was not charged for the first 2 years.

5. Barter contractors must provide assurances satisfactory to CCC that the agricultural commodities exported under barter contracts will not be transshipped from the approved countries of destination. In the past, only assurances against transshipment to unfriendly countries was required.

6. Materials delivered under barter contracts may not be produced or processed in the United States. Heretofore, foreign-produced materials could be processed here.

7. Each barter contract for strategic and other materials must designate the country of origin of the materials to be delivered. In the past, this was not required.

Foreign produced strategic and other materials currently acceptable to CCC under the barter program include aluminum; antimony; asbestos (amosite); bauxite (Jamaica, Surinam, and refractory grade); chromite (metallurgical and refractory); copper; fluorspar (metallurgical); lead; manganese (synthetic battery grade, chemical types A and B, and metallurgical); mica (Muscovite block, Muscovite film, Muscovite splittings, and phlogopite splittings); palladium; selenium (chemical grade); silicon carbide (crude); and zinc.

CCC's ability to conclude barter proposals for materials depends at any one time upon such factors as requirements, existing commitments, and market conditions.

Authority to barter was initially provided in 1948 by the Commodity Credit Corporation Charter Act. This authority has been enlarged and clarified in other legislative provisions, including an amendment to the Charter Act; the Agricultural Acts of 1949, 1954, and 1956; and Public Law 480.

The barter program was suspended at the end of April 1957 to permit a detailed study by the Department of possible safeguards against the substitution of barter transactions for dollar sales, without a net gain in total export of agricultural surpluses. Program revisions announced today reflect the results of that study.

I believe this announcement should be carefully studied by every Member of the House, particularly those who are concerned with the welfare of our mining industry, which is one of the most important segments of our entire national economy. This announcement provides that this long list of minerals, duly processed, shall be brought into this country at a time when parts of our mining industry are in bad shape. Our zinc mines, for instance, are closing down. In New Mexico alone, I am advised that 750 zinc miners are either out or will be out of work very shortly. The reason given by the mine operators is that so much zinc from foreign countries, employing cheap and slave labor, is being dumped into our market that the prices are dropping to a point where our mines cannot compete.

This is not a new situation, as all of the Congressmen from the mining States well know. Several months ago the Tariff Commission concluded long hearings on the imports of zinc and lead. That Commission recommended to the President that the tariff be increased and that import quotas be set in order to save our own industry. The recommendation was not followed.

Within the last couple of weeks Felix Wormser, Assistant Secretary of the Interior for Minerals Policy, sent a like recommendation to the White House. No action has been taken on this recommendation.

The motivating force back of all this can be found in our State Department and our present foreign policy. This may not come within the purview of title I of Public Law 480, but it does come within the provisions of that section of the law which sets up the barter authority for the President. Regardless of which law is concerned, the fact remains that this is another way of dumping these foreign minerals into our markets and stockpiles, while our mines are closing down and our miners are out of work. It seems to me that this is an apt illustration of the confusion that exists in our dealings with foreign countries. Apparently our right hand does not know what our left hand is doing. If we must barter our surplus agricultural commodities, let us barter them for those materials which will not play havoc with our own industries.

I wonder if Secretary Benson and the other directors of the CCC know what consequences their barter program may have? I believe they should be advised what their program may do to damage another segment of our national economy. I believe that they should be informed in no uncertain terms that this Congress does not approve of any plan to throw our workers out of jobs in order to give employment to those in foreign countries. This program has all of the earmarks of another foreign giveaway and I, for one, do not like it. I certainly am glad that the chairman of the Committee on Agriculture intends to have this matter thoroughly investigated. I hope the necessary steps will be taken to see that the barter program does not do further damage to our mining industry.

Mr. POAGE. I appreciate what the gentleman is talking about and I agree with his position thereon, but I doubt it is under Public Law 480 that we make those requirements.

Mr. DEMPSEY. If they have the authority to make it, then we should stop this money that gives them the wherewithal to do it.

Mr. POAGE. The gentleman means he does not want to trade for these critical metals? Does he want us to just buy them? You have your choice, and it is just this simple: You can either trade wheat, which is in surplus, or cotton, which is in surplus, or you can pay American dollars.

Mr. DEMPSEY. We have foreign zinc in surplus here right now. Our zinc mines are closing down. Our copper mines are reducing. Now those factories that process it are going to be affected. They change it in this bulletin I have right here, dated May 28 of this year.

Mr. POAGE. But they do not do this under authority of Public Law 480.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield.

Mr. FULTON. I would like to point out to the gentleman from New Mexico what section 104 (b) provides. Section 104 (b) shows that the purchase of strategic materials abroad is made only under the terms of the Strategic and Critical Materials Stockpile Act. I will read it:

SEC. 104:

(b) To purchase or contract to purchase strategic and critical materials, within the

applicable terms of the Strategic and Critical Materials Stockpile Act, for a supplemental United States stockpile of such materials as the President may determine from time to time under contracts, including advance payment contracts, for supply extending over periods up to 10 years. All title shall be placed in the above-named supplemental stockpile and may be additional to the amounts acquired under authority of the Strategic and Critical Materials Stockpile Act. Materials so acquired shall be released from the supplemental stockpile only under the provisions of section 3 of the Strategic and Critical Materials Stockpile Act.

It is there where the gentleman should go to see that agreements with 70 countries are properly carried out or properly made and not here where we are just setting up a method for the distribution of surplus commodities to help American agriculture, I might point out.

Mr. DEMPSEY. May I say to the gentleman from Pennsylvania that I do not have the time to go to 70 countries to inquire about these questions. This is the place and the forum where this question should be decided. If this Congress wants us to have certain strategic materials in exchange for cotton or some other agricultural commodity, that is all right, but the question I raise is that these materials must be processed in the countries from which we purchase them, and I have read from the statement where the Agriculture Department states that heretofore they did not do that.

Mr. FULTON. The Department of Commerce handles the strategic materials stockpiling.

Mr. COOLEY. It seems to me that the gentleman from New Mexico should be satisfied with the suggestion made a moment ago that we will immediately investigate this matter, and if the gentleman's interpretation of this release is accurate, our committee will investigate the matter immediately and take appropriate action.

Mr. DEMPSEY. That is perfectly agreeable to me.

Mr. SANTANGELO. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield.

Mr. SANTANGELO. I would like to have a bit of information. Can the gentleman tell us how much money in counterpart funds our Government has accumulated in all these foreign countries?

Mr. POAGE. When the gentleman says counterpart funds, does the gentleman mean under this bill?

Mr. SANTANGELO. I am referring to these funds which we have in these foreign countries where we cannot get any money out, but where we can get the value in goods of some sort or another.

Mr. POAGE. If the gentleman means how much we received all told under this bill, the amount is about $1,700,000,000.

Mr. SANTANGELO. That is $1,700,000,000?

Mr. POAGE. I think that is about correct.

Mr. COOLEY. The gentleman is inquiring as to what money is located in other countries?

Mr. SANTANGELO. That is what I am trying to find out. How much money has been accumulated in these countries as a result of this program where we sell them our surplus commodities?

Mr. POAGE. We have contracted, or we have entered into agreements involving the sale when the goods are all delivered of about $1,700,000,000.

Mr. SANTANGELO. Then it is with this money in the amount of $1,700,000,000 that our Government is purchasing other kinds of goods from foreign countries either under this law or under other laws; is that correct?

Mr. POAGE. Yes; but as I understand it we are purchasing these products under other laws and not under this law. The point I wanted to make clear to the gentleman from New Mexico was that we can only make purchases involving any of these commodities under other laws, not under Public Law 480. It was necessary to have the authority of some other law in order to make the purchase.

Mr. SANTANGELO. As I understand the complaint of the gentleman from New Mexico, it was that these funds which have accumulated in these foreign countries are being used under other laws to destroy the zinc and copper industries of our country.

Mr. POAGE. That is not quite correct because if we did not have Public Law 480, we would make the same purchases in foreign countries and pay for them in American dollars on the same terms.

Mr. O'NEILL. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield.

Mr. O'NEILL. I believe your report shows that up to February 28, 1957, you had $1,984,088,000.

Mr. COOLEY. That is what is covered by agreement. Actual shipments total $1,320,000,000 up to May 27, 1957.

Mr. POAGE. And that includes the ocean transportation.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield.

Mr. FULTON. I think it is a matter of getting these strategic materials abroad. Actually under this act it is only a bookkeeping transaction. This is where the money comes from. So we do not have to put up real American dollars but we use surplus agricultural commodities.

Mr. POAGE. That is the only effect. It has nothing whatsoever to do with the terms under which these products are brought into the United States, but only as to where you get your dollars.

That, my friends, is the crux of this whole thing—that we use surplus agricultural commodities to pay rather than to use American dollars.

The CHAIRMAN. The time of the gentleman from Texas [Mr. POAGE] has again expired.

Mr. AUGUST H. ANDRESEN. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Chairman, there are some things about this bill that need considerable attention. There is a considerable part of the things that go abroad that are paid for by counterpart funds; that is, items that result in the foreign country's cash currency, and those things are available, the way the law stands, for expenditure for all sorts of things. For instance, as I understand it, they can take this money and pay agricultural attachés or other people who are over there in that particular country; pay their expenses. They can build residences for those attachés. They can pay the expenses of those who are in that part of the country on detail from the committees to which they belong, either in this body or the other body, and there is no control at all over the thing. Frankly, in the Appropriations Committee we passed a provision known as section 1415 which was designed to correct that evil. The extension of this statute by this bill is an appropriation coming from a committee that has no authority to bring an appropriation bill before the Congress, and it must necessarily be corrected before it goes through. I think we all ought to understand that if we are going to provide appropriation of funds without any control over them at all, that we are giving up the authority of the Congress of the United States to control things. Frankly, I dislike to see that happen, and if I can help it I do not intend to see it happen. That is the thing that bothers me about this bill. I do not like that feature of it. I expect, when the proper time comes, that someone will offer an amendment designed to correct that situation. If we continue to educate these bureaucrats with the idea that they can spend money without paying any attention to us, it would not be long before we would be out of business as a Congress. There will be no brake upon the executive whatever.

I hope that when this comes up the Committee will treat it with a sense of responsibility and a desire to see that the bill is corrected. Frankly, I do not want to stand in the way of the disposal of these surplus agricultural products. At the same time, we must see that it is done in a proper way and in a way which does not damage the United States.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. TABER. I yield to the gentleman from New York.

Mr. ROONEY. I should like to say that I am in thorough accord with every word uttered here on the floor today by the distinguished gentleman from New York. It will be recalled, as it was discussed here yesterday in the Committee of the Whole, that under this legislation the administration could purchase all over the world residences for agricultural attachés. The No. 2 man who becomes the chargé d'affairs in the absence of the Ambassador to Italy would continue to live in his present 6-room apartment in Rome, while they could purchase one of the Roman palaces for the agricultural attaché with the proceeds of this unhampered fund.

Mr. TABER. That is correct.

Mr. AUGUST H. ANDRESEN. Mr. Chairman, I yield 2 minutes to the gentleman from New York [Mr. KEATING].

Mr. KEATING. Mr. Chairman, I ask unanimous consent to proceed out of order.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. KEATING. Mr. Chairman, the decision yesterday of the Supreme Court of the United States in the Jenks case has posed a very serious problem for the security of our Nation which should be brought immediately to the attention of the Congress.

If this decision stands and nothing is done by the legislative branch it may well result, as Justice Clark has indicated in his minority opinion, in our investigative agencies having to close up shop. The FBI and other investigative agencies must be greatly concerned.

I have asked the Attorney General to assist me in the preparation of legislation which can immediately be studied by the Judiciary Committee in order that we can come to grips with this serious threat to our security.

Mr. McCULLOCH. Mr. Chairman, will the gentleman yield?

Mr. KEATING. I yield.

Mr. McCULLOCH. Mr. Chairman, I wish to commend the gentleman from New York for so promptly bringing this vital matter to the attention of the Congress. I think that Justice Clark has so clearly let us know the importance of this matter that it would be worth while to quote 2 sentences from his dissenting opinion, and that I would like to do. Justice Clark said:

> This fashions a new rule of evidence that is to our Federal jurisprudence. The rule has always been to the contrary.

Without burdening the House with a necessary long quotation at this time, I wish to say that I will later request authority to insert in the RECORD the entire dissenting opinion of Justice Clark. I would commend it to every Member of the House for his serious reading as soon as it is available.

Mr. KEATING. I thank the gentleman and hope every Member will read the opinion.

Mr. McCULLOCH. The opinion referred to follows:

SUPREME COURT OF THE UNITED STATES—No. 23, OCTOBER TERM, 1956—CLINTON E. JENCKS, PETITIONER, v. UNITED STATES OF AMERICA—ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE FIFTH CIRCUIT

June 3, 1957

Mr. Justice Clark, dissenting.

The Court hold "that the criminal action must be dismissed when the Government, on the grounds of privilege elects not to comply with an order to produce, for the accused's inspection and for admission in evidence, relevant statements or reports in its possession of Government witnesses touching the subject matter of their testimony at the trial." This fashions a new rule of evidence which is foreign to our Federal jurisprudence. The rule has always been to the contrary. It seems to me that proper judicial administration would require that the Court expressly overrule *Goldman* v. *United States* (316 U. S. 129, 132 (1942)), which is contra to the rule announced today. But that is not done. That case is left on the books to haunt lawyers and trial courts in their search for the proper rule. In Goldman the Court was unanimous on the issue of disclosure of documents[1] and refused to order produced "notes and memorandums made by the [Federal] agents during the investigation." The rule announced today has no support in any of our cases.[2] Every Federal judge and every lawyer of Federal experience knows that it is not the present rule. Even the defense attorneys did not have the temerity to ask for such a sweeping decision. They only asked that the documents be delivered to the judge for his determination of whether the defendant should be permitted to examine them. This is the procedure followed in some of our circuits. My Brother Burton has clearly stated in his concurring opinion the manner in which this procedure works. Perhaps here with a recanting witness the trial judge should have examined the specific documents called for, as the defense requested, and if he thought justice required their delivery to the defense, order such delivery to be made. I would have no objection to this being done. But as Brother Burton points out, this would not require a reversal but merely a vacation of the judgment and a remand to the trial court for that purpose.

Unless the Congress changes the rule announced by the Court today, those intelligence agencies of our Government engaged in law enforcement may as well close up shop for the Court has opened their files to the criminal and thus afforded him a Roman holiday for rummaging through confidential information as well as vital national secrets. This may well be a reasonable rule in State prosecutions where none of the problems of foreign relations, espionage, sabotage, subversive activities, counterfeiting, internal security, national defense, and the like exist, but any person conversant with Federal Government activities and problems will quickly recognize that it opens up a veritable Pandora's box of troubles. And all in the name of justice. For over eightscore years now our Federal judicial administration has gotten along without it and today that administration enjoys the highest rank in the world.

Director J. Edgar Hoover back in 1950 tellingly pointed this out before a subcommittee of the Committee on Foreign Relations of the United States Senate. Among other things he said, "I have always maintained the view that if we were to fully discharge the serious responsibilities imposed upon us, the confidential character of our files must be inviolate. * * * [U]nless we drastically change or circumscribe our procedures, they should not be disclosed." In describing the files of the Bureau, he continued:

"FBI reports set forth all details secured from a witness. If those details were disclosed, they could be subject to misrepresentation, they could be quoted out of context, or they could be used to thwart truth, distort half-truths, and misrepresent facts. The raw material, the allegations, the details of associations, and compilation of information * * * are of value to an investigator in the discharge of his duty. These files were never intended to be used in any other manner and the public interest would not be served by the disclosure of their contents.

* * * * *

"These files contain complaints, allegations, facts, and statements of all persons interviewed. Depending upon the purpose of the investigation, particularly in security cases, they contain, not only background data on the individual but details of his private life * * * the identities of our confidential sources of information and full details of investigative techniques. In short, they consist of a running account of all that transpires.

* * * * *

"For want of a more apt comparison, our files can be compared to the notes of a newspaper reporter before he has culled through the printable material from the unprintable. The files do not consist of proven information alone. * * * One report may allege crimes of a most despicable type, and the truth or falsity of these charges may not emerge until several reports are studied, further investigation made, and the wheat separated from the chaff.

* * * * *

"If spread upon the record, criminals, foreign agents, subversives, and others would be forewarned and would seek methods to carry out their activities by avoiding detection and thus defeat the very purposes for which the FBI was created." (Hearings before a subcommittee of the Senate Committee on Foreign Relations on S. Res 231, 81st Cong., 2d sess., 327–329.)

I can add nothing to this graphic expression of the necessity for the existence of the rule which, until today, kept inviolate investigative reports.

My Brother Burton's concurrence also points up the failure of the majority to pass upon another important question involved; namely, the sufficiency of the trial judge's instructions. The impact of this failure on him and on my Brother Frankfurter was such that they have announced their own views though the majority never reaches the point. For myself alone, I believe that the instructions on the whole were sufficient. It is unfortunate that the majority does not announce its position. This is only 1 of some 10 Communist affidavit cases now pending in the trial and appellate courts. Unless this case goes as did Gold's,[3] the question of the sufficiency of instructions will come up in this as well as in each of the other cases. The Court is sorely divided on this important issue and proper judicial administration requires that charges as to what constitutes membership and affiliation in the Communist Party be announced.

Mr. COOLEY. Mr. Chairman, I yield such time as he may desire to the gentleman from Virginia [Mr. ABBITT].

---

[1] Though the Court was divided on an issue not here material, the two dissenting opinions expressed no disagreement whatsoever on the disclosure issue.

[2] The opinion cites only two of our cases for support. The quotations from *Gordon* v. *United States* (344 U. S. 414 (1953)), an opinion by my late Brother Jackson, a former Solicitor General and Attorney General, are lifted entirely out of context. The case holds explicitly that documents must be produced only after a foundation is laid "showing that the documents were in existence, were in possession of the Government, were made by the Government's witness under examination, were contradictory of his present testimony, and that the contradiction was as to relevant, important and material matters which directly bore on the main issue being tried: the participation of the accused in the crime." (Id., at 418–419.) Likewise, *United States* v. *Reynolds* (345 U. S. 1 (1953)), by my late Brother Chief Justice Vinson, approved the refusal of the Government to produce documents in a tort claims suit. The opinion gave no approval whatever to the conclusion announced by the majority here. I purposely omitted the reference in the opinion after the penultimate sentence, "Accord, *Roviaro* v. *United States* (353 U. S. 53, 60–61)." That case had to do with the disclosure of a dead informant's name and did not touch on the problem of the disclosure of Government documents.

[3] In *Gold* v. *United States* (352 U. S. 985 (1957)), this Court reversed and remanded the case for a new trial because of official intrusion into the privacy of the jury. The case was dismissed on oral motion of the Government on May 9, 1957.

Mr. ABBITT. Mr. Chairman, we have this morning again seen demonstrated in the Washington Post and Times Herald glaring evidence of the conspiracy to hoodwink the American people into believing that the so-called civil-rights legislation is just a little innocent piece of legislation dealing with the protection of the right to vote.

In the lead article on the first page of the Washington Post dealing with the jury-trial amendment in the civil-rights legislation there appeared the following:

> Under its terms, persons charged with violating Federal court injunctions forbidding interference with the right to vote must be tried by a jury rather than a judge.

This is just another instance of certain segments of the press, particularly the Washington Post, trying to pull the wool over the eyes of our people and fool them into believing that this vicious anti-civil-rights legislation will not affect the rights of the vast majority of our people in this country. There has been a constant effort to play down this legislation and to show it up as dealing with the right to vote only. As a matter of fact, this is the most dangerous, liberty-destroying legislation that has been offered in the Halls of Congress since I have been here, in my opinion. This bill is all embracing and covers all fields of civil rights. First, it sets up a Commission on Civil Rights with the authority and directive to include a study of all civil rights. The Commission will be a roving commission of inquisitors trying to browbeat and intimidate our people and make them amenable to the desires of the NAACP and kindred organizations. Second, it creates a Civil Rights Division in the Department of Justice which will be a small gestapo to harass the American people. Third, it confers upon the Attorney General of the United States the authority to institute civil action in the name of the United States or for the United States in all civil-rights matters. Furthermore, it allows the Attorney General to take up claims whether or not the party alleged to have been aggrieved desires it or not. It wipes out State remedies, deprives the States and localities of their police power and the authority and duty of the enforcement of criminal law. It permits the administration of laws by contempt and injunction proceedings, wiping out the right of trial by jury. And, lastly, it permits preventative action in right-to-vote matters, which is one of the minor provisions of the bill, and, in my opinion, will be less obnoxious than the other areas of jurisdiction covered in the bill.

I think it is high time that the American people be given a forthright and honest analysis of the proposed legislation. I am surprised at the effort being made in certain quarters to cover up the real intent, purpose, and effect of this legislation.

Mr. AUGUST H. ANDRESEN. Mr. Chairman, I yield 5 minutes to the gentleman from Indiana [Mr. HARVEY].

Mr. HARVEY. Mr. Chairman, I think the debate we are having on the extension of Public Law 480 is a very healthy one. I have been particularly impressed with the type of interested questions we have had. I believe the suggestion which was offered by the gentleman from New York [Mr. TABER] to provide for better control and disposal of these counterpart funds is a good idea. I want to comment briefly on two or three points I noticed have been receiving a good deal of attention.

I have heard the criticism voiced in reference to this program that it is disposing mostly of wheat and cotton and not doing enough for the dairy people, for example, of some of the other States where dairy products are a substantial portion of their production. The inequality of that complaint is not quite as apparent as it might seem. First of all, wheat and cotton are normally exportable commodities. Dairy products are not as exportable, but we are doing a terrific job of using dairy products on a domestic basis for the school-lunch program, through extra consumption by our service personnel, by charitable institutions. So dairy products are receiving substantial donations and attention in other farm legislation than Public Law 480 in the domestic market; and cotton and wheat, for example, are receiving more attention in the export or foreign market.

I want to address myself particularly at this time to one point that seemed to receive a great deal of attention yesterday. It is one facet of this problem I have interested myself in. I refer to the importation of Polish ham. I have followed the importation of Polish ham and have been against it for a long time. From what I have been able to find out, percentagewise it is not a very important product as an import proposition. It is a specialty product, it is a high-priced product, and it goes mostly into certain areas where people have a particular liking for this product.

I spoke to the packers in my own area as to why they did not meet the competition of this product and they said it is a sealed product. It comes sealed in tins and the demand totalwise was not sufficient to justify them setting up the necessary facilities to produce this specialty product.

I have figures which I can show to any Member if interested to cite the amount that is coming in. However, may I say that Polish ham does not all come from Poland. As a matter of fact that is sort of a trade name for the product.

I have some figures I would like to give the Members, because I think they are worth while. They are as follows:

Imports of canned ham and canned pork to the United States, 1954

Country	Export of canned ham and pork to United States	Import of all agricultural commodities from United States
Canada	$37,337,000	$298,038,000
Denmark	20,796,000	19,491,000
Netherlands	35,032,000	248,244,000
West Germany	11,896,000	265,393,000
Czechoslovakia	179,000	896,000
Poland	17,483,000	4,000
Total	122,723,000	832,066,000

May I say that there is no law which prevents Poland from shipping their products into our country provided they pay the duty of 3¼ cents per pound. I am opposed to the idea of trading with Poland because it is a one-way street. In my opinion, they are using the millions of dollars that they get from us to buy strategic materials at other places to finance their war effort. For that reason I think there ought to be something done to tighten up trade with a country like Poland. However, the product, Polish ham, comes from many of the other countries and it is really the same product. We cannot complain about importation from friendly countries who are good customers of the United States.

I support Public Law 480 extension and hope it will be continued based upon the past experience of excellent administration.

Mr. COOLEY. Mr. Chairman, I yield 6 minutes to the gentleman from Florida [Mr. MATTHEWS].

Mr. MATTHEWS. Mr. Chairman, I rise in support of the extension of Public Law 480 and would like to take this opportunity to emphasize several points that might be of particular interest to the committee.

If you have had an opportunity to read the report of the committee, you will note that the committee is earnestly desirous that the expenses incurred under this program have a strict accounting and that those expenses chargeable to agriculture should be properly charged. We realize that some of the money spent under the provisions of this bill should not be charged to agriculture. You will note, for example, that $225 million will be spent for ocean transportation. Our colleagues who do such a wonderful job of promoting the maritime interests of this great Nation I know will take cognizance of that and will be glad to support the Commodity Credit Corporation as it comes back to Congress from time to time to get more money for the transaction of its business. You will note, if you have had a chance to read this report, that approximately 37 percent of the foreign currency available under title I will be used for military procurement by the United States and to take care of its obligations in nations throughout the world. Certainly, then, that particular item should not be charged to American agriculture.

You will recall that several months ago we were told, for example, that the budget for agriculture this year is approximately $5 billion. Mr. Chairman, that is not the truth of the matter, because, as you know, perhaps only about half of that should be charged to agriculture and certainly not more than a maximum of $3 billion. If I had time today, I should like to go into detail on that particular matter.

Now, as we consider title I—and most of the consideration thus far has been given to title I—you will note that only 1.6 percent of the money planned to be spent is planned to be spent for the development of our agricultural markets. The committee has insisted that we pay more attention to the development of our agricultural markets and in particular with the nations to the south of us.

Now, title II, Mr. Chairman, is one of the most stimulating titles in the bill. That is the donation program to needy

people abroad. I have been particularly impressed with the way this program has been directed by our great religious and charitable organizations. The Jewish, Catholic, and Protestant organizations have done a magnificent job to let these people abroad, our friends, know that this food is a gift of the taxpayers of the United States. Title III will not be changed in this bill. As you know, that is the title that makes possible the feeding of our needy people at home. I do not believe there will be a vote cast against this bill, because in it we have a provision to feed 12 million school children, 1.4 million people in charitable institutions in America, and people living in 3.5 million family units in 39 States in the United States, Alaska, and Puerto Rico. So often you hear people say, "Let us help our people at home." I am glad, Mr. Chairman, that we have an opportunity in this bill to do that.

Mr. H. CARL ANDERSEN. Mr. Chairman, will the gentleman yield.

Mr. MATTHEWS. I yield to the gentleman from Minnesota.

H. CARL ANDERSEN. I appreciate the gentleman from Florida [Mr. MATTHEWS] yielding for a brief comment, as I want to personally commend him for the fine job he has done in bringing this Public Law 480 program into proper perspective. The good our surpluses are accomplishing in helping hungry people all over the world is to my way of thinking one of the most important, if not the most important, features of this program.

One has to see hungry people in the Middle East, for example, only once to remember forever the look in their faces. We know that this is one of the worst trouble spots in the world today, but few people seem to realize that the real root of the trouble is lack of sufficient food. A few years ago I went into that area on an inspection tour, and I saw literally thousands of human beings living in those Arab refugee camps under deplorable conditions. I saw little children who had been born in those camps after their families had been displaced, and I know we would not tolerate such conditions here in the United States of America.

Those people barely exist with hardly enough food to keep body and soul together. It is no wonder that they are restless and that their leaders agitate and foment trouble. Hungry people are desperate people and there is little difference with them between dying of starvation and dying in riot, rebellion, or war.

Think of the good that has been accomplished and that can be accomplished by proper and effective use of our blessings of abundance. What better use can a Christian nation make of its abundant production than to share it with suffering humanity in other parts of the world?

In country after country I have personally seen the good we are doing with our surplus food. The masses of poor people in those nations may not even see, let alone appreciate, the industrial developments of our foreign aid program and they may even resent our military aid—but almost without exception we have found that they do appreciate our sending our food. It has been proven in Pakistan and all over the Middle East that our surplus food shipped to hungry people has made us more lasting friendships than all the dollars and guns and bombs we could ever hope to ship abroad.

The charge has been made that this program is a subsidy for American agriculture. Nothing could be further from the truth. Certainly it helps our agricultural economy to have some of these surpluses removed but the real value of the program is in the field of diplomacy and international relations. I would remind the critics of the Public Law 480 program that the commodities going abroad under this program are owned by the Commodity Credit Corporation. The producers have already received their settlement from the Government and these stocks are federally owned.

It is just good business on the part of our Government to sell, barter, and where proper to do so give these surplus stocks to customers and hungry people abroad. Every bushel of wheat and every pound of edible fat we ship abroad, through one means or another, is just one more block in the barrier of defense we are building against Communist aggression. By strengthening the Free World the Public Law 480 program is serving all the people in the United States, not just our farmers who produced the food. It would make as much sense to claim that the foreign aid program was a subsidy for American labor which produces the equipment provided under that program as it would to claim that the program before us today is a subsidy for our farmers.

Mr. MATTHEWS. I appreciate that comment of the gentleman. I know, like many of you feel, this feeding of friendly people should certainly be charged to the cost of this cold war. I am delighted that the Congress during the past several years has recognized the legitimacy of this kind of endeavor, and not only with our vast armaments should we fight this cold war, but with this great amount of food which we have in such providential surplus.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. MATTHEWS. I yield to the gentleman.

Mr. FULTON. I think the gentleman is to be complimented on his statement. Actually, it should be pointed out that the title of Public Law 480 is The Agricultural Trade Development and Assistance Act of 1954. The purpose is to increase the consumption of United States agricultural commodities in foreign countries. And so it is really a bill to assist our own United States farm areas, and for our own United States safety and security abroad as well.

Mr. MATTHEWS. I thank the gentleman for his contribution.

Mr. Chairman, this bill is a good bill. I, along with other members of the House Committee on Agriculture, introduced similar legislation.

The facts concerning the extension of Public Law 480 are well presented in the committee report to accompany H. R. 6974.

Public Law 480 was approved July 10, 1954, as an emergency program for disposing of surplus agricultural commodities through sale for foreign currencies, barter, and donation—both domestic and foreign. The act consists of three titles.

Title I deals with sales for foreign currency and originally provided an authorization of $700 million for the sale of surpluses abroad to friendly countries for foreign currencies. On August 12, 1955, this authorization was increased to $1.5 billion and on August 3, 1956, to $3 billion. This bill will further increase that authorization to a total of $4 billion.

Title II originally authorized the expenditure of not more than $300 million for foreign donation programs. This was later increased to $500 million, and this bill would again increase this amount to $800 million. The termination date of programs under titles I and II of the act is June 30, 1957, and is by this bill extended to June 30, 1958. No other changes are made in the act by this bill.

Title III deals with barter and with a permanent surplus disposal and donation program embodied in the Agricultural Act of 1949.

I would like to point out that, of course, this bill will help us to continue disposing of the agricultural surplus. From latest reports, there are over $8 billion worth of these agricultural surplus commodities in the hands of the Commodity Credit Corporation. I think it is most commendable on the part of Congress to recognize that in our efforts to win the cold war that in addition to the implements of warfare, that food is equally important, if not more important. I think many of the expenses incurred under Public Law 480 might well be considered part of the total defense effort and should be charged to the cold war. Recent events in Formosa call for a reevaluation on the part of Congress as to the value of many of our foreign aid programs. It is interesting to note in this connection that I have personally talked with colleagues who have visited Formosa and they told me months ago that we had entirely too many civilians on that island. Over half of the total 15,000 Americans are not in any way connected with the military departments. I think among other reasons for the recent demonstration on the part of the Chinese Nationalists against Americans is that fact that these people resent our superior standard of living and I, for one, am convinced that food distributed in the name of the United States to hungry people throughout the world will do more to improve American relations with the remainder of the world than many of our present programs involving a tremendous number of civilian personnel.

In the committee report, attention is invited to the need that we have in the United States to help develop new markets for agricultural commodities on a mutually benefiting basis with other countries. I should especially like to emphasize the possibility here with our neighbors to the south. I feel that we have been overlooking our South American neighbors. There are many countries in South America who have an

abundance of mineral resources but can never develop agriculture as we can here in the United States. Certainly one of the most important needs for developing agricultural markets is to give other nations dollar reserves with which they can buy our products. An ideal relationship, it seems to me, could be promoted with many of our South American countries where we, in exchange for their mineral resources, could ship to them agricultural commodities that are in such great surplus in our own country.

Many times I do not think we recognize the fact that our trade in all commodities, agricultural or otherwise, is most promising with nations that have high standards of living. Canada, our best customer, has a high standard of living. Often as our programs of assistance to other parts of the world have given to these undeveloped nations a desire for economic improvement, we find that agriculture suffers to a certain extent because the need for heavy machinery and other mechanical equipment gets first attention on the part of these nations in order to improve their own economies. I think it should be stressed, also, that many times we have a favorable trade balance with nations, such as Cuba, that benefit the whole of American economy, but at the same time, does not benefit agriculture as such. I voted for our present sugar program, for example, and will continue, I think, to vote for it, because among other things, it helps the friendly nation of Cuba. Cuba, in turn, buys a tremendous amount of goods from the United States, but most of these goods are in areas other than agriculture. In the Everglades section of Florida we could produce enough sugar to feed the world, and yet our sugar growers in America are not permitted to produce enough sugar to feed the United States because of our trade program with Cuba and other nations of the world. I repeat again that I voted for this sugar program, but it points out some of the difficulties facing American agriculture.

Another point which should be mentioned here is the fact that many times we hear expressed the sentiment that our agricultural programs benefit only the producers of the six basic crops—rice, tobacco, corn, wheat, peanuts, and cotton. It is interesting to point out that through Public Law 480 that $97 million worth of feed grains have been exported to foreign nations, $251 million worth of fats and oils, and $48 million—approximately—of other products, have been exported to other nations. It should also be pointed out that section 32 funds, which of course, are not a part of Public Law 480, but which specifies that funds from import taxes on agricultural commodities shall be used for the promotion and sale of agricultural commodities that are not the basic crops, have accounted for the disposition of literally hundreds of millions of dollars worth of beef, pork, vegetables, milk, and other items.

I should like to comment briefly on the value of title II, which authorizes a program by which we can help friendly foreign people in time of need. You may recall that just recently this program has been used to help feed Hungarian refugees in Austria. Title III deals with barter and with domestic donations. I think the fact should be emphasized that under titles II and III, in the fiscal year 1956, more than 2 billion pounds of food were distributed to needy persons at home and abroad, and of this amount 789 million pounds were distributed in the United States.

Let me repeat again what I have said before. So often we hear criticisms that we are taking care of people all over the world and do not attend to the needs of our people at home. Every State in the Union can set up a program to receive donations under title III for their needy people. There are 3,443,803 persons in the United States from 39 States, Alaska, and Puerto Rico receiving food under title III of this bill in family units. In addition these foods are going to about 12 million schoolchildren, and to 1.4 million persons in charitable institutions.

In foreign countries, these surplus foods are distributed primarily through voluntary relief agencies, chiefly of a religious and charitable nature. I emphasize again that I have been very much impressed with the fine program that our religious and charitable groups here in America have developed for the distribution of this surplus food in foreign countries. I think we must always keep in mind that this food should clearly indicate that it comes as a gift of the taxpayers of the United States. Our various groups in America, in my opinion, have done a fine job in this connection. I want to repeat again what I have said earlier—that to me a hungry person in a friendly foreign country receiving food through a voluntary American organization which tells the recipient that the food is a gift of the taxpayer of the United States—does more good in winning friends and influencing people for the cause of the Free World than almost any other single thing we are doing. I believe the American people would be willing to expand this program, provided, of course, they realize that the food is not used to keep in power a particular person or group of persons but is used for direct relief purposes as our people have every right to expect. I think more use should be made of title II, especially as it concerns the authority to assist refugees.

I should like to emphasize here, again, the fact that all kinds of agricultural commodities have been used under titles II and III of this program. To give some specific totals for fiscal year 1956 and through the months of July to March of fiscal year 1957, the following amounts of commodities have been distributed: dried beans, 204 million pounds; butter, 272.7 million pounds; butter oil, 99 million pounds; cheese, 424.7 million pounds; eggs, 36.2 million pounds; frozen hamburger, 66 million pounds; lard, 59.4 million pounds; milk, nonfat, dry, 899.4 million pounds; pork, 164.7 million pounds; shortening, including cottonseed oil, 64.2 million pounds; sweetpotatoes, 21 million pounds; frozen turkeys, 25.2 million pounds—and other commodities 19.4 million pounds.

Mr. Chairman, I hope that H. R. 6974 receives the unanimous approval of the House. It is a bill of many facets. It will help some, I hope, the plight of the American farmer. Time and time again we have been told here on the floor of the House that the American farmer has not participated in the general prosperity of the Nation. This is true because he is caught in the price squeeze. He has no organization to demand a fair return for his product. He cannot compete in a protected economy unless he, in turn, gets protection from the Government. The farmer continues to pay more and more for what he buys and he gets less and less for what he sells. His share of the consumers' dollar is below 40 cents. In some commodities, of course, much less, and a few commodities a little more. If we could just devise a program whereby the farmer could get a fair share of the consumers' dollar I believe his problems would be solved. The soil bank has not proved to help the current income of the farmer, and has positively proved damaging to the economy in the rural areas.

In my own Eighth District of Florida we shall probably have ten to twelve millions of dollars less in circulation this year because of the soil bank. The farmer is receiving income from the soil bank, but that income is less than what he would receive if he cultivated his land and were paid a reasonable price for what he produces.

The small merchant, the automobile dealer, gasoline dealer, professional man, in rural areas all are suffering today to an extent that I still do not believe is recognized by the public at large.

The soil bank was intended to help cut down the huge surplus of agricultural commodities, and I hope and pray when we take stock at the end of this year we find that it has. This, of course, in itself, will help the farmer, and his goods will bring more in the market place.

The extension of Public Law 480 is a device also to get rid of agricultural commodities in surplus, and by so doing help the farmer. It goes much further than that, however, and Public Law 480 is a tool to help us in the struggle with Communist Russia. It is a means not only of promoting the best interests of American agriculture, but it is a method whereby we feed hungry people at home and abroad, and by so doing we reflect the humanitarian impulses of our people, which have been the strength of our Nation since the founding of the Republic.

Mr. AUGUST H. ANDRESEN. Mr. Chairman, I yield 2 minutes to the gentleman from Washington [Mr. PELLY].

Mr. PELLY. Mr. Chairman, every time this House considers a measure seeking to resolve an agricultural problem, which is the objective of H. R. 6974, I keep comparing the situation with tranquilizer pills. In other words we keep passing legislation to ease tension and worry over farm problems, but we do not courageously meet the illness with major medical or surgical treatment to try to cure or remove the basic cause of the worry.

I was told that the Congressional Digest's last recapitulation showed my

voting record indicates 77 percent in support of the President's program. If so, it would have been better had I supported the soil bank, but the distinguished chairman of our Agriculture Committee urged termination of the plan to allow time for his committee to come up with a more workable program. Of course that is wishful thinking. I doubt if the House Committee on Agriculture, or if the Department of Agriculture is going to come up with a plan; we will continue with tranquilizers in the way of special treatment to ease the suffering.

These pills are pretty expensive—and in spite of what one hears and reads, I fear are habit forming. The cost to the American taxpayer represents about $1,000 for each farm in America. There are about 4.9 million farms and our farm subsidy amounts to about $5 billion.

Last Sunday afternoon CBS and its television show "Face The Nation" had Nikita Khrushchev on a nationwide hookup. Maybe much of this show was propaganda, but Khrushchev was not exaggerating, I am sure, when he made the prophecy that our grandchildren in America will live under socialism.

Does not our Federal Government subsidize our farmers to the extent of 46 cents of every dollar of agricultural income? I call that a reasonable basis for Khrushchev's prediction. The nature of socialism is such that the individual exchanges his personal freedom and individualism in return for collective benefits. But once the individual barters his rights away only by means of outright revolution can the state be forced to cancel its authority and revert to free competitive enterprise and individualism.

Khrushchev is quoted as saying that our grandchildren will not understand how we, their grandparents, did not understand the progressive nature of a Socialist society. I would say "how true" to that—for certainly the people who support tranquilizer programs for the farmer are blind to the danger of socialism and communism inherent in such legislation.

The Farmers' Union, meanwhile, says we are not progressing fast enough; the more conservative Farm Bureau believes its policies are those of a capitalistic free society. As for me, all I ask is that the people of America be given the facts, because few persons I have ever found want socialism and I think a little courage and sacrifice is the answer.

Congress has been too kind at times. We have exempted farmers from paying the gasoline tax; we have exempted his trucks and produce from regulation on the highways; we reimburse farmers for fertilizer and lime; we support peanuts as if it were a basic crop; we subsidize his power and telephone bills; we loan to him at artificially low interest rates; we give free information on how to increase crop yields; we take his surplus products off his hands; we give him dollars and the Government takes foreign currency.

Actually is not our agricultural industry pretty close to socialism now?

We need a new program more than an extension of the old one.

We are asked for authority so the Secretary of Agriculture can barter with socialistic European satellites of the Soviet Union. Why not repeal section 304? Really the truth is we have a Federal system of socialist management, distribution and control. The difference between the Soviets and ourselves is small. Our Federal Government has not taken over the ownership of farms—that is about all. But as Khrushchev believes it may well have to take over the ownership before too long.

The passage of tranquilizer legislation soothes the American people into the illusion that we do not have collectivism already to a high degree.

I am willing to vote to increase the authority from $3 billion to $4 billion of farm products the Government can sell from its stocks to other nations as provided by this bill. But I will only support the increase because it will be Federally owned products we will be disposing of and because the sale will reduce the huge bill for rental which the Commodity Credit Corporation is forced to pay to store these surplus crops. Also, of course, the surplus crops will spoil if we do not dispose of them.

Meanwhile where is the new program to replace the soil bank plan which admittedly has not worked? Are my city consumers to continue paying 46 cents of the farm income dollar and also pay artificially high food prices, too?

Every American has a right to expect of Congress that the basic farm problem be solved within the framework of the free enterprise system. I am awaiting the workable program the chairman of the House Agriculture Committee said he hoped to bring us.

Mr. AUGUST H. ANDRESEN. Mr. Chairman, I yield 1 minute to the gentleman from Illinois [Mr. MASON].

Mr. MASON. Mr. Chairman, I ask unanimous consent to speak out of order.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. MASON. Mr. Chairman, I take this time to notify the Committee that the Army today issued a news release which the ticker tape says was agreed to by the Republican leaders at the White House at the last conference to the effect that the Girard boy, from Ottawa, Ill., who killed a Japanese woman while he was on duty, is to be turned over to the Japanese for trial; in view of the fact that the international situation is tense, following the Formosa riots, we now propose to give up our sovereignty and turn this boy over to the Japanese to try, in order to prevent or head off another international incident such as the Formosa riots. Is that what our American soldiers can expect in the future? Are we to forget principle and be guided in the future by appeasement even if it means sacrificing the lives of our own boys?

Mr. AUGUST H. ANDRESEN. Mr. Chairman, I yield 1 minute to the gentleman from Illinois [Mr. SPRINGER].

Mr. SPRINGER. Mr. Chairman, I do support the enactment of H. R. 6974. This bill would extend Public Law 480 for 1 year and increase the authorization by $1 billion. No appropriation or expenditure of funds are involved.

I was 1 of the 5 Congressmen who introduced this legislation early in 1954. The others included the gentleman from Texas [Mr. POAGE], the gentleman from Texas [Mr. BURLESON], the gentleman from Minnesota [Mr. JUDD], and the gentleman from Nebraska [Mr. HARRISON]. All of these men and myself introduced these bills after long and serious consultations with all three of the national farm organizations. These included the American Farm Bureau Federation, the National Grange, and the National Farmers Union.

It was their feeling and ours that there was no other way in which our surpluses could be disposed of within any reasonable length of time. Many of these surpluses were in a seriously deteriorated state, and disposal in some form was imperative. It appeared to us at that time that the disposal of these goods in foreign markets for foreign currencies was reasonable and in the best interests of our country. I might point out that this was the first departure which this country had made in its entire history in which we had not demanded dollars in return for our produce.

In this respect the program has worked far better than we expected when it was enacted. We have found uses for the native currencies in our foreign-policy programs in all of the intervening years. We have been able to pay operating expenses of this Government in the various countries where this program has been in effect.

I am sure all of us who are vitally interested in agriculture are heartened by the progress which has been made in expanding agricultural exports. Last year's exports were the highest in quantity for the last 30 years.

The gain in exports is proceeding at an accelerated rate during the current season. For the first 6 months of the fiscal year July 1, 1956, to July 1, 1957, overseas shipments totaled approximately $2.3 billion in value. This is 40 percent higher than the export total on the same date last year. It appears that for the entire 1956–57 season, our agricultural exports will total as much as $4.4 to $4.5 billion. The attainment of that level would mean new alltime highs in both value and volume—far above all previous records.

My purpose today is to present a statement on the contribution that the Public Law 480 sales program has made and is continuing to make to the expansion of export markets for surplus agricultural commodities.

WHAT IS PUBLIC LAW 480?

On June 30, 1954, the 83d Congress passed the Agricultural Trade Development and Assistance Act of 1954.

This law, more commonly referred to as Public Law 480, authorizes disposal programs of three different kinds: First, sales for foreign currency; second, gifts of surplus commodities to combat emergency needs abroad or to help meet continuing relief needs at home or abroad; third, a strengthening and emphasis of

the CCC program for the exchange of agricultural surpluses for strategic materials or other materials needed by United States agencies abroad.

COTTONSEED AND SOYBEAN OIL

The programing and shipment of cottonseed and soybean oil under title I in 1955–56 was the key factor in keeping cottonseed and soybeans out of CCC hands. These activities have added millions of dollars to the incomes of soybean and cottonseed producers. Nearly 600 million pounds of these oils were shipped abroad under the foreign currency program last year and this helped push edible oil exports to a record level of almost 1.2 billion pounds, about 55 percent higher than the previous record level. The large exports of oils together with record exports of soybeans kept soybeans and cottonseed above support levels last year. Despite the fact that farmers placed about 30 million bushels of soybeans under price support in 1955–56, only a few thousand bushels were taken over by CCC and these were sold easily.

The record 1956 harvest of 456 million bushels of soybeans, almost 84 million bushels higher than last year's level, made marketing conditions look dark last fall. But again title I has proved of great help. Already title I exports have accounted for over one-third of the 350 million pounds shipped abroad during the first 3 months of the season. For the entire season, combined exports of cottonseed and soybean oil should approximate last season's record with the continued strong help of Public Law 480.

Even though we have a soybean crop about 84 billion bushels larger than last year, the quantity under loan currently is only 30 million bushels higher. This is solid evidence of the strength that the Public Law 480 program is contributing to markets. We will probably end the season with some beans in CCC hands, but the amount is being reduced because of the strong action being made to move surplus oil under Public Law 480, and during the heavy marketing season price levels have been maintained above the increased support level.

LARD

Lard exports which totaled about 625 million pounds in 1955–56 have done much to ease the pressure on the livestock industry. Public Law 480, title I, shipments accounted for 100 million pounds of this total. This was of material assistance in reaching this export total. It is expected that lard exports under the foreign-currency program will be at the same level this year. These exports helped to bolster lard prices during the last few months, which, in turn, contributed to the great improvement in prices that hog producers have been experiencing.

WHEAT

The surplus holdings of wheat have grown larger each year since 1952–53. But in 1956–57 for the first time in 5 years the surplus should be reduced by about 50 million bushels.

The reversal in surplus accumulations is due almost entirely to expanded exports which have risen from 220 million bushels in 1952–53 to 344 million last year. The Department of Agriculture some time ago estimated wheat and flour exports for the current season at a minimum of 415 million bushels. Now it appears that exports could reach 450 million bushels.

A large share of the credit for this gratifying outlook must go to Public Law 480 and particularly to title I. Exports for foreign currency have increased from 24 million bushels in 1954–55 to 93 million bushels last year and are expected to equal or exceed 150 million bushels this year. Much of these shipments are going to countries like India which is finding it possible to expand consumption of wheat as the result of their ability to make purchases in their own currency.

The possibility of a cut in the surplus wheat stockpile is even brighter for 1957–58. With prospects good for continued high level exports and a substantial reduction in wheat production because of the soil-bank program, the reduction in the wheat carryover at the end of next season should be much larger than the 50 million bushels in sight this year.

Finally, the effect of increased exports and larger purchases of free market supplies by private traders for export has meant more money in the pockets of farmers. As of mid-January, wheat prices at the farm level were about 10 cents per bushel more than at the same time last year.

SUMMARY

The request for the extension of this program will permit the United States to program agricultural commodities for the fiscal year 1958 at about the same annual rate as in the past 2 years. It will permit us to plan our disposition programs well in advance for next year and facilitate the orderly disposal of commodities during that period.

In programing the additional authorization our emphasis will continue to be concentrated in underdeveloped, low-income countries. Sales will be made to expand consumption, to regain or establish new markets, to meet foreign needs arising from crop failures, and to expand reserve stocks overseas.

The administration has limited the request for the additional authority to a 1-year extension because it believes it desirable that the results obtained under this program be subjected to a periodic review. This request also emphasizes the administration's position that Public Law 480 is a temporary program designed to deal primarily with accumulated farm surpluses. Such a periodic review also permits consideration of alternative methods of surplus disposal and other actions aimed at expanding normal export markets.

Mr. Chairman, this law has worked successfully for 3 successive years. On the basis of accomplishment alone this authorization for an extension is deserved and in the public interest.

Mr. AUGUST H. ANDRESEN. Mr. Chairman, I yield 3 minutes to the gentleman from Maine [Mr. McINTIRE].

Mr. McINTIRE. Mr. Chairman, we have heard a very extensive discussion of this bill. I wanted to take the opportunity of putting into the RECORD my words of commendation of Gwynn Garnett, the Administrator of the Foreign Agricultural Service, and his deputy, Mr. Clayton Whipple, and all of those associated with them in the Foreign Agricultural Service and in the Department of Agriculture, for the job they have done in administering very complex legislation and the very complex problem with which they are dealing.

I think it is also appropriate that we commend our agricultural attachés for their efficiency in representing the interests of American agriculture abroad and reporting back to American agriculture the situations as they see them in countries in which we are very much interested in developing markets.

This is a very complex problem. We are dealing with surpluses which, of course, are a real problem. We are dealing with them as constructively as possible. We are opening the possibility of developing permanent foreign markets, which American agriculture sorely needs. I think we should look at some of these facts as well as some of the problems of the administration, because the primary objective of this legislation is sound.

I sincerely hope it will be supported by the Members of the House, recognizing the complexities of it, but I think in these areas in which this program is working it is developing for the American farmer outlets which would not otherwise have existed.

The program is saving the American taxpayers by converting commodities into money which can be used, and in that balance this program deserves our support for its extension as suggested in this legislation.

Mr. SPRINGER. Mr. Chairman, will the gentleman yield?

Mr. McINTIRE. I yield to the gentleman from Illinois.

Mr. SPRINGER. I should like to join in the commendation which the gentleman from Maine has made here today with reference to Gwynn Garnett, the Administrator of this program. I know of no man in this Government more dedicated and honest, and who has done a better job all the time he has been in this position, than Gwynn Garnett. He has had a wonderful background, having been legislative adviser to the American Farm Bureau Federation before he came into this job, having been with the State Department overseas, and having seen this problem first hand for a period of many months; so he has had the background and experience necessary to administer the law. I think he has certainly done a wonderful job in administering Public Law 480.

Mr. McINTIRE. I certainly concur in the gentleman's remarks.

Mr. AUGUST H. ANDRESEN. Mr. Chairman, I yield 3 minutes to the gentleman from Nebraska [Mr. HARRISON].

Mr. HARRISON of Nebraska. Mr. Chairman, I want to associate myself with what has been said about the Administrator of the Foreign Agricultural Service, Mr. Garnett, who has done an

outstanding job in administering this legislation.

I ask for support of the bill H. R. 6974. I think it is very important that we pass it at this particular time. As was mentioned yesterday, I was one of the original sponsors of this particular legislation. I want to direct my remarks to the importance of it because of the importance of the agricultural industry. I think we are pretty much agreed here in the House of Representatives that the agricultural industry is one of the most important, if not the most important industry we have in this country, and that the agricultural industry more than any other industry is in trouble at the present time. It is in trouble because of the surplus commodities we have built up. We have been trying through these different measures of different kinds throughout the ages, more or less, to circumvent a very important law, the law of supply and demand. We have not been able to do that and this law, Public Law 480, is the only piece of legislation, the only medium and the only vehicle we have been able to come up with to reduce our surpluses that are hanging over the heads of our farmers today with a depressing effect on markets. The farmer is in a fairly good position if he has a good market. We know how important it is to have a free market and to have these surpluses moved. Let me give you just one example. I think it is important that we realize the necessity for letting the law of supply and demand operate. You will remember a couple of years ago the pork industry was in a very bad situation because of an oversupply of pork. Today it is in a fair position, I would say a good position because the amount of pork has been reduced to the point where it is not in surplus and thus the price of pork is good. If we can put wheat, corn, rice, cotton, and other commodities in that position, we will put the farmer in a position that he wants to be, and the position in which he can get his fair share of the Nation's prosperity which he is entitled to. Public Law 480 is the only medium making it possible for the farmer to through reduced surpluses improve his prices that we have come up with thus far to this date.

Public Law 480 has accomplished the following:

Operations under the law have grown rapidly in volume. Agreements were signed during the first year the law was effective, 1954–55, totaling $488 million at CCC cost and $362 million at export market value. In 1955–56, new agreements were signed in the amount of $1 billion at CCC cost and $686 million at export value. To date this year, additional agreements negotiated total $1.4 billion at CCC cost and $939 million at export market value. Thus, in 9 months of 1956–57 new agreements were concluded almost as large in total as in the previous 2 years.

Included in agreements signed to date are wheat, 430 million bushels; feed grains, 75 million bushels; rice, 22 million hundredweight; tobacco, 145 million pounds; cotton, 2.5 million bales; fats and oils, 1.6 billion pounds.

I think it would be useful to clarify one point—that is, the difference between CCC costs and export market value. As you know, the fund limitation in the law is in terms of CCC costs. This means that the authorization is charged the full cost of any commodities supplied under the program. Such costs include the cost of acquisition and carrying charges of price-support commodities, processing, transportation, and handling charges. Thus, during 1955–56 a bushel of wheat delivered to port resulted in an average charge of about $3.30 to the authorization. The foreign buyer paid about $1.65 a bushel which was the prevailing export price and this was the amount he was required to pay in his own currency. In general, to date the authorization has been charged $3 for every $2 worth of commodities purchased by foreign buyers.

Looking at results another way, exports in 1954–55 were small, totaling about $73 million at export value or about 2 percent of total agricultural exports. In 1955–56 title I shipments jumped to $435 million which was 12 percent of agricultural exports. In the first 8 months of 1956–57 title I exports averaged about $60 million monthly, 16 percent of our farm exports. And this rate should hold for the balance of the year. This is solid evidence of the contribution the title I program has made and is continuing to make to the booming export outlook.

The current $3 billion authorization is virtually exhausted at the present time. Agreements have been signed for almost $2.9 billion at CCC cost and the small balance will be used in a very short time. That is why action should be taken promptly on the administration's request for additional funds. I understand that hundreds of millions in new requests have been received which cannot be considered until new funds are made available.

Mr. AUGUST H. ANDRESEN. Mr. Chairman, I yield 1 minute to my colleague the gentleman from Minnesota [Mr. H. CARL ANDERSEN].

Mr. H. CARL ANDERSEN. Mr. Chairman, the debate on this measure has gone far afield. At times the arguments have been so far removed from the question before us that one walking into the Chamber might think another bill was being discussed. I plead with my colleagues to not let these extraneous matters interfere with their thinking in passing judgment on the merits of the Public Law 480 program. Let us consider this program on its own merits and let us not be influenced by collateral disagreements which have no relationship whatsoever to the matter at hand.

This is one of the best programs ever devised by any nation to help its less fortunate neighbors. This program offers the best possible outlet for our agricultural surpluses and how much better it is to see our excess food going into hungry bodies rather than be stored indefinitely at such great expense to plague and depress our own markets.

It is not only a good program of which the legislative authors may be justifiably proud, but it is one of the best administered programs in our Government today. The Foreign Agricultural Service of the Department of Agriculture has made this a really effective program. From Gwynn Garnett, the Administrator, to the agricultural attachés and their staffs all over the world we have had able and enthusiastic people carrying out this program. Some of them have testified before my subcommittee, and I have visited with some of the attachés at their stations abroad, and I can honestly say that I know of no more dedicated public servants anywhere in our Government. If for no other reason, we would be justified in extending this program because they have put so much time and effort into its development.

I repeat, Mr. Chairman, the plea that this program be considered on its own merits. If that is the case, I am sure this extension of the program will be approved by an overwhelming majority.

The CHAIRMAN. The time of the gentleman has expired.

Mr. AUGUST H. ANDRESEN. Mr. Chairman, I yield such time as he may desire to the gentleman from Connecticut [Mr. SADLAK].

Mr. SADLAK. Mr. Chairman, it is a matter of great importance that the United States and the free Western World wage their fight against international communism wherever it exists. The free democratic world must give active aid not only to Poland but to any satellite country liberating itself successfully from the shackles of Soviet despotism. We must meet the needs and the aspirations of these people who have lost freedom and who are struggling to regain it. We must never allow a situation to arise that would force them to turn despairingly back again to their Soviet masters.

I would today like to remind my colleagues that the disputed issue of aid to Poland is most ironical. With the start of World War II Poland was a free nation, and she was the first to sacrifice blood and people in defense of liberty. As our ally, she should have shared in the victory of the freedom she so gallantly defended. She belongs in the camp of the democracies, but her present plight is traceable to the Yalta infamy and betrayal in which we, to our everlasting regret, so shamefully participated.

When World War II ended, Poland was a terribly battered nation. Almost 9 million of her people were dead, most of them tortured and killed in the labor camps of Russia and in German concentration camps. Her only hope was the promise that we, the United States, gave her. As our ally, she was promised freedom and liberty. So it is now time for us to execute that promise. In her struggle for freedom, we are asked to help her not by use of force or threats of violence to her aggressors, but only by selling to her, from our abundant stock of surpluses, some wheat and some cotton which she so desperately needs. That is much too small a request not to have it granted.

It is being argued, however, that American aid should not be granted because it will contribute to the strengthening of a Communist regime. It is falsely suggested that economic aid from the West will in no way improve the living stand-

ards of the Polish people; that it will only be wasted and used in the interests of Soviet imperialism.

It is not to be denied that after Stalin's death there was a certain relaxation of the strict Communist rule. The people of Poland today are more and more losing their fear of the secret police. They talk more freely, listen to the radio, and exchange remarks and views on what they hear. They travel more. Everybody in Poland once again seems to be enjoying some measure of freedom, and what's more, they are determined to keep that freedom, and strive to complete it.

It is wrong to brand Gomulka as another edition of the Yugoslav dictator, Tito. We must not forget that the Western World embraced Tito even though he was and still remains a Communist, and his nation was and still is communistic. If we can justify the fact that he qualified for our American support, does it not seem fair that Poland would be more deserving of our support because of her proven loyalty to the philosophy and traditions of the democratic way of life?

Has not Poland, for example, already restored almost fully religious freedom, including the right to religious education in schools for anybody demanding it? Religious freedom in Yugoslavia under Tito is nonexistent.

Our President and our Secretary of State have both commented favorably on the friendly desire of the Polish nation to cooperate with the West, and they are both perhaps in better positions than we to appraise existing relations between the Gomulka government and our own.

There is no doubt that American aid will strengthen the present Gomulka regime, but in so doing, it will also strengthen Polish independence. By giving aid, we will considerably advance the cause of restoring democracy to an unhappy but freedom-loving people. We will give encouragement and enable them gradually to push forward toward a democratic way of life.

What Poland needs is wheat, cotton, fats, coal mining machinery, and means of transportation.

Even though politically independent, Poland cannot afford to go it alone economically. Stalinism brought Poland to the brink of economic ruin.

I wish to emphasize, however, the point that the Poles are not asking for grants, but loans. They are not seeking relief-type help. They want to put an end to forced deliveries of grain and establish a free market, and they want to speed up decollectivization of farming. To accomplish this, they need considerable stockpiles of wheat as an offset to inflation during the changeover. They also want to obtain cotton for their textile factories to relieve their heavy dependence on the Soviet Union. Cotton is in extremely short supply in Poland with the continual threat of factory closings and unemployment. If Poland could obtain cotton from the United States, she would not be so dependent on Russia.

The mere fact that Poland has asserted her autonomy is the most hopeful development along the Iron Curtain in many years. Poland has pursued the kind of liberation policy we have been supporting—a policy short of war and solely from within. We must not fail her. It would only lead to discourage other satellite countries who would dare aspire to independence on the basis of promises from the West.

I urge the rejection of any amendment which would impede passage of this bill authorizing release of our farm surpluses to any nation struggling against Communist ideologies. Both commodities are in large surplus in the United States and I know of no better use to which these surpluses could be put.

It lies in our interest to have a free and independent Poland in Europe. It would be another step in the direction of realizing world peace.

Mr. COOLEY. Mr. Chairman, I yield 2 minutes to the gentleman from North Carolina [Mr. BONNER].

Mr. BONNER. Mr. Chairman, I want to compliment the distinguished chairman of the Committee on Agriculture [Mr. COOLEY]. As usual, he has brought in a splendid bill that carries out the love in his heart in supporting agriculture. I join him in supporting the bill and in his efforts for agriculture throughout America—East, West, North, and South.

I only ask for this time to ask the gentleman, my close friend from North Carolina, what he means by restriction on ships. On page 13, it reads:

> Officials should also exercise to the fullest their authority to permit use of any available shipping when suitable space is in tight supply.

I would like to have the gentleman's attention. Does he mean in this sentence that he is trying to affect in any way at all the 50–50 provisions of the now existing shipping laws?

Mr. COOLEY. No. I do not have any idea of doing away with the gentleman's pet project of 50–50 shipping. I know that he is the guardian angel of the Coast Guard and the ships that sail the seven seas from all of our ports, but we want to see that they carry out the true intent and purpose of Congress in using shipping were shipping can be used more economically. For instance, even in our own State they are not using our ports along the North Carolina coast and in other places, but are giving preference to other ports. I was prompted to put this in by somebody from North Carolina.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COOLEY. Mr. Chairman, I yield the gentleman 2 additional minutes.

Mr. BONNER. I am just as interested as anybody in selling our surplus agricultural commodities abroad, as provided in this legislation. But if it were not for the American-flag ships, the prices that would be asked by foreign-flag ships would be so high that you might not be able to ship all the material that you desire brought under this program.

Mr. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. BONNER. I yield.

Mr. BOGGS. The distinguished gentleman knows that this body has expressed itself a half dozen times on this subject. On several occasions the committee headed by my good friend, the gentleman from North Carolina [Mr. COOLEY], chairman of the Committee on Agriculture, and also the Committee on Foreign Affairs, have tried to change this basic principle, and on each occasion the House has reversed them.

Mr. BONNER. I would say to the gentleman that was a friendly debate, and it has been decided permanently, and, I hope, forever.

The CHAIRMAN. The time of the gentleman from North Carolina [Mr. BONNER] has again expired.

Mr. COOLEY. Mr. Chairman, I yield myself the remaining time.

Mr. Chairman, frankness requires me to say that if I were permitted to do so, I would remove the 50–50 shipping provision, but I do not have the authority to do it, and I have no intention of doing it, but I am anxious for the officials administering this program to treat all ports of the country fairly and equitably.

Mr. Chairman, I understand that some amendments will be offered, and that perhaps a point of order is being considered on this bill. First I want to reiterate that this is an administration measure. It was prepared by one of the Cabinet officers of the Eisenhower administration and transmitted through the Speaker to me, as chairman of the Committee on Agriculture.

I do not regard this as an appropriation bill. I do not regard it as an ordinary authorization bill. In section 101, the bill provides:

> In furtherance of this policy the President is authorized to negotiate and carry out agreements with friendly nations or organizations of friendly nations to provide for the sale of surplus agricultural commodities for foreign currency.

Now that is one sentence. It authorizes the President to negotiate contracts by which we will sell agricultural surplus commodities to foreign countries for foreign currencies.

It seems to me that any restriction of that power which we have given to the President shows clearly a lack of confidence in Mr. Eisenhower and those who will assist him in administering this program.

On this floor today Members of Congress have complimented those who have administered this program up to now. It seems to me it is a rather late date for any Member of the House to try to restrict the President in the exercise of a power which you say has been well exercised in the past.

It is plain to see that if the President must first have approval of the Appropriations Committee and of the Congress, either one or both, the President will be hamstrung in conducting his negotiations. He could make only tentative agreements which would have to be submitted to the Appropriations Committee, and the Appropriations Committee would have veto power. Under such circumstances I believe that the administrators would be very badly handicapped in administering this law.

The suggestion has been made that we should not exempt any transaction from section 1415 of the Supplemental Appropriation Act of 1953. If the law is

changed I still say that the President will be badly embarrassed and handicapped.

I want to read you one other proviso of the law which is as follows:

Provided, however, That section 1415 of the Supplemental Appropriation Act, 1953, shall apply to all foreign currencies used for grants under subsections (d) and (e), and for payment of United States obligations involving grants under subsection (f) and to not less than 10 percent of the foreign currencies which accrue under this title: *Provided, however,* That the President is authorized to waive such applicability of section 1415 in any case where he determines that it would be inappropriate or inconsistent with the purpose of this title.

It is plain to see that the Congress understood what it was doing at the time we passed this law and conferred this authority—and it is broad authority—upon the President and upon his associates in the executive branch of the Government, it seems to me that if a point of order were to be made the time has long passed for the making of such a point of order, because, when this bill was here when it came from our committee no one made a point of order to any part of the bill, as I recall it.

Now I ask the committee to vote against the amendment, if it is proposed, which will hamstring the President in the prosecution of his efforts.

The CHAIRMAN. The time of the gentleman from North Carolina has expired. All time has expired.

The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That the Agricultural Trade Development and Assistance Act of 1954, as amended, is amended as follows:

(1) Sections 109 and 204 of such act are amended by striking out "1957" and substituting in lieu thereof "1958."

(2) Section 103 (b) of such act is amended by striking out "$3,000,000,000" and inserting in lieu thereof "$4,000,000,000."

(3) Section 203 of such act is amended by striking out "$500,000,000" and inserting in lieu thereof "$800,000,000."

Mr. COOLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COOLEY: On page 2, following line 3, add the following new paragraph No. 4:

"Section 104 (e) of such act is amended by striking out the semicolon at the end thereof and adding a comma and the following: 'for which purposes not more than 25 percent of the currencies received pursuant to each such agreement shall be available through and under the procedures established by the Export-Import Bank for loans mutually agreeable to said bank and the country with which the agreement is made to United States business firms and branches, subsidiaries, or affiliates of such firms for business development and trade expansion in such countries for the establishment of facilities for aiding in the utilization, distribution, or otherwise increasing the consumption of, and markets for, United States agricultural products. Foreign currencies may be accepted in repayment of such loans.'"

Mr. TABER. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state his point of order.

Mr. TABER. Mr. Chairman, this is an appropriation on a bill coming from a committee which has no authority to report appropriations to this body.

The CHAIRMAN. Does the gentleman from North Carolina desire to be heard?

Mr. COOLEY. Yes, briefly.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. COOLEY. Mr. Chairman, I think I need only call the Chair's attention to the language right in the beginning of the amendment. It says:

For which purposes not more than 25 percent of the currencies received pursuant to each such agreement shall be available through and under the procedures established by the Export-Import Bank for loans mutually agreeable to said bank and the country with which the agreement is made to United States business firms and branches—

And so forth. That is clearly a limitation. If the money has heretofore been authorized and appropriated, clearly this is nothing more or less than a limitation, because it says "not more than." I do not see how you could have language that would more clearly indicate it is a limitation when you say "not more than 25 percent."

Mr. TABER. Mr. Chairman, the trouble with that is nothing would be available for the purposes set forth in this amendment if that were not there. That is the trouble with the argument of the gentleman from North Carolina.

Mr. COOLEY. As I understand it, the President now has the authority in existing law to make these agreements and to use the money as provided by law. This is in effect saying he shall not use more than 25 percent of it for these purposes.

The CHAIRMAN (Mr. HAYS of Arkansas). The Chair is ready to rule. The Parliamentarian has directed the Chair's attention to the fact that on July 18, 1956, in the consideration of a similar measure, the gentleman from Georgia [Mr. PRESTON], being Chairman of the Committee of the Whole, ruled on a point of order similar to that made by the gentleman from New York.

This is the ruling, and the reasons for it in the language of Chairman PRESTON, which the Chair adopts:

The gentleman has made a point of order against section 2 of the bill. The bill under consideration by the Committee seeks to amend existing law known as Public Law 480 of the 83d Congress. In the pending bill it is clearly evident that a new activity is being created by the legislation. New authority is being granted in the handling of the foreign credit derived from the sale of commodities. Therefore, in the opinion of the Chair, it constitutes an appropriation. The Chair, therefore, feels constrained to sustain the point of order.

The Chair sustains the point of order made by the gentleman from New York [Mr. TABER].

Mr. ROONEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROONEY: Page 2, line 4, insert:

"(4) Section 104 is amended by striking the words at the beginning of the section, which read as follows: 'Notwithstanding section 1415 of the Supplemental Appropriation Act, 1953, or any other provision of law', by striking the two provisos at the end of the section and by inserting the following proviso: '*Provided, however,* That section 1415 of the Supplemental Appropriation Act, 1953, shall apply to all foreign currencies used under this section.'"

Mr. COOLEY. Mr. Chairman, I would like to reserve a point of order against the amendment offered by the gentleman from New York [Mr. ROONEY].

Mr. ROONEY. Mr. Chairman, the purpose of my amendment, and it is offered by one who is and has been in thorough accord with the purposes of Public Law 480, is to properly control expenditures of the funds of foreign currencies generated under Public Law 480. As was pointed out yesterday during general debate, without a control such as the one offered, we find at page 12 of the committee report on this bill that:

In many countries additional physical facilities, including perhaps a more suitable residence, would be of assistance to the agricultural attaché in selling American agricultural products.

Now, under the law as it stands, these agricultural commodity funds could be used, for instance, as I said a while ago, in Rome to buy a palace for the agricultural attaché, while the No. 2 man, who is frequently the chargé d'affairs, lives in a 6-room apartment, and this at a time, as was pointed out in the report of the House Appropriations Committee on the State, Justice, judiciary, and related agencies appropriation bill for 1958, at page 6 thereof, when the Government has already acquired real property valued in excess of $150 million, consisting of some 201 office buildings, 128 principal officers' residences, 162 residences for senior officers and attachés, and 1,999 staff living units. Now, if this pending amendment is not adopted, these funds may be used to buy real estate all over the world on top of what the State Department has already acquired. The bulk of the acquisitions of the State Department were effected by way of foreign currencies in countries which owed us such foreign currencies.

As was pointed out yesterday on the floor of the House with regard to the educational-exchange program—and I and the members of my subcommittee on appropriations are all for that program—when, after having the State Department appropriation bill pass the House, pass the Senate, following extensive hearings in both bodies, go to conference, arrive at the amount $20.8 million for this program and then come into this Chamber and find in the committee report on this bill—I believe it is at page 8 thereof—that the amount of $17.15 million additional is being authorized for the same purpose, I think it is time to call a halt. All that the amendment presently before the Committee of the Whole provides is that section 1415 of the Supplemental Appropriation Act of 1953 be adopted and followed. That section provides that foreign credits owed to or owned by the United States Treasury will not be available for expenditure by agencies of the United States after June 30, 1953, except as may be provided for annually in appropriation acts and provisions for the utilization of such credits for purposes

authorized by law are authorized to be included in general appropriation acts.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I am glad to yield to my distinguished friend, the able chairman of the great House Committee on Agriculture.

Mr. COOLEY. As I pointed out a moment ago, this bill before the House is not an appropriation bill and does not purport to be.

Mr. ROONEY. The gentleman surely understands that each year now since this program was started the Committee on Appropriations has had nothing at all to do with the use of these funds in connection with the educational exchange activities, in connection with agricultural attachés, and so forth.

Mr. COOLEY. When this bill was originally before the House, as I pointed out a moment ago, I do not recall that any such argument as the gentleman is now making was then made. We gave the President the authority. The program has been operated successfully and well, and now, because we did put something in the report indicating that some part of these funds might be used to buy some homes abroad, it seems to me what the gentleman is doing is trying to take over for the Committee on Appropriations all of the negotiations looking toward the sale of surplus commodities. That would be a burden to your committee that it could very well ill afford to bear in this instance. In the second place, I do not think the Committee on Appropriations would be able to do a much better job than is now being done.

The CHAIRMAN. The time of the gentleman from New York [Mr. ROONEY] has expired.

Mr. ROONEY. Mr. Chairman, I ask unanimous consent to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ROONEY. Mr. Chairman, I respectfully say that that is exactly the problem. Nothing is being done to check on these expenditures. The Department of Agriculture comes up here to the Committee on Agriculture and suggests $17 million plus additional for a program which was provided for and passed by both Houses of Congress less than a week ago.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the distinguished gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Chairman, the gentleman has stated the situation quite clearly. When this bill was up before, as I remember it, it came in here under a rule waiving all points of order. The main legislation unquestionably contains appropriations and provides how funds may be distributed. But the extension that is before us now is also an appropriation bill because it extends an appropriation bill into a future time. There is not any question in my mind about that. I do not like to see these things brought in without an annual review by somebody representing the House of Representatives. The power of the purse is the power that Congress holds in this country.

Mr. VORYS. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the distinguished gentleman from Ohio.

Mr. VORYS. Section 1415 applies to all other counterpart funds except these; is not that the case?

Mr. ROONEY. I believe that is so.

Mr. VORYS. The purpose was this. We found counterpart funds were running into billions of dollars in value. We found this was real money and that it ought to be studied carefully and appropriated as carefully as we do with dollars.

Mr. ROONEY. We are talking about over $1 billion in counterpart funds at the moment.

Mr. VORYS. And this item here is over $1 billion that we are talking about. I can see no reason for making an exception to the rule that we apply to other counterpart funds.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the distinguished gentleman from North Carolina.

Mr. COOLEY. I would like to ask the gentleman what would be the basis of your authorization to appropriate money? You must have an authorization to appropriate money before your committee can function. There is no authorization here in this proposal other than an authorization to sell personal property.

Mr. ROONEY. Mr. Chairman, may I say that my amendment finds no fault whatever with the general program. I am all for this surplus agricultural commodity program. My amendment is directed to what may occur after the proceeds have been collected.

Mr. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the distinguished gentleman from Louisiana.

Mr. BOGGS. Mr. Chairman, I asked the gentleman to yield to get some information. Does the gentleman know the total amount of the funds generated by Public Law 480?

Mr. ROONEY. Approximately a billion dollars.

Mr. BOGGS. How are those funds disposed of? What control does the Congress have over them?

Mr. ROONEY. The Congress has no control whatever over the great part of these funds. I shall ask the gentleman from North Carolina [Mr. COOLEY] if that is not so?

Mr. COOLEY. No; you have control completely over 21 percent of the funds.

Mr. ROONEY. Then the Congress has no control over 79 percent of the funds.

Mr. COOLEY. And your committee should not have control over the other part of the funds, because if you do, you have control over all the negotiations and you would never sell a bushel of wheat or a bale of cotton.

Mr. ROONEY. We are not interested so much in the negotiations. We are more interested in the dollars and cents and what happens with regard to the funds generated under this program.

Mr. COOLEY. Look at page 8 of the committee report and you will see exactly what has happened with every dollar of the money that has been generated.

Mr. ROONEY. Exactly. Referring to page 8, Mr. Chairman, let me call attention to the fact that under "International Educational Exchange," which I mentioned awhile ago, there is the amount $17,150,000, for translation and publication of documents, $1.75 millions, and for the information program, which we just finished appropriating for 6 days ago, May 29, $7.4 million.

Mr. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the gentleman from Louisiana.

Mr. BOGGS. The gentleman from North Carolina said that 79 percent of these funds were not under the control of Congress in any fashion.

Mr. COOLEY. I did not mean to say that; not under the Appropriations Committee.

Mr. BOGGS. If they are not under the Appropriations Committee, under whom are these funds?

Mr. COOLEY. These are funds properly made available to the President.

Mr. ROONEY. May I inquire of the distinguished gentleman from North Carolina how many days his committee spent in the hearings, which are not before the House at all, on this extension?

Mr. COOLEY. I do not remember how many days we spent on this extension, but I know we heard people from the State Department and the Department of Agriculture. I would say this: The committee room was packed and jammed with people, and I asked the question if there was a single witness in the room who was appearing in opposition to the extension of this bill, and there was not a single one there.

Mr. ROONEY. I am in favor of the extension of this law, but I think the matter of Congress controlling the expenditures is highly important.

Mr. BOGGS. Assuming the gentleman's amendment is adopted, what will be its effect upon the 79 percent?

Mr. ROONEY. If the pending amendment is adopted, the administration will go to the proper subcommittees on appropriations and justify the expenditure of these funds.

Mr. HARVEY. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the gentleman from Indiana.

Mr. HARVEY. The point that seems to be in controversy here and about which I am doubtful is whether in this case the Appropriations Committee would have to make the determination whether the President could sell these commodities, or how the determination would be made as to how the counterpart funds would be used after a sale had been made.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the gentleman from New York.

Mr. TABER. No one would have any authority to interfere with the President in making a deal for these counterpart funds. He would absolutely have that authority. This amendment has no effect on his operations in making the deal. After the counterpart funds were obtained and were deposited in the Treasury of the United States, then any department that wanted to use them would have to come and justify the right to use them.

Mr. COOLEY. If the gentleman will yield, the very use of the counterpart funds constitutes a vital part of the agreement. You cannot make the agreement until you determine how the counterpart funds will be used.

Mr. TABER. There is nothing of that kind in the statute.

Mr. COOLEY. Everything is in the statute.

Mr. ROONEY. All the pending amendment seeks to do is to put this matter of the disposition of these foreign currencies on the basis on which we have had for years, that is, appropriate dollars to get the funds out of the Federal Treasury, the same as we do when we buy real estate for our diplomatic people all over the world.

The CHAIRMAN. Does the gentleman from North Carolina insist on his point of order?

Mr. COOLEY. No, Mr. Chairman; I do not think I will insist upon the point of order.

Mr. HIESTAND. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. HIESTAND to the amendment offered by Mr. ROONEY: On page 2, line 4, insert *"Provided*, That all funds received from the sale of such surplus commodity shall be deposited as far as practicable in banks or branches of banks approved by the Secretary of the Treasury."

Mr. HIESTAND. Mr. Chairman, I shall be very brief. I doubt if there will be any objection to this amendment. I have secured the approval of the chairman, had his amendment been not subject to a point of order.

The point of this amendment is just this: We in times past have several times lost control of these counterpart funds by reason of the fact that the nations assembling them in their own currencies had deposited them in their own banks. When use of them was requested in a perfectly legitimate way, the State Department declined, stating that they had no control over those funds, that they were in other banks than those either owned or controlled by American banks. I suggest that instead of specifying an American-owned bank, we simply say "with the approval of the Secretary of the Treasury." Thus, the Congress and the American officials will have control over all counterpart funds belonging to us. I do not believe there can be any objection to the amendment, if it is intended to implement the amendment offered by the gentleman from New York.

Mr. ROONEY. Mr. Chairman, will the distinguished gentleman yield?

Mr. HIESTAND. I yield.

Mr. ROONEY. May I say to the gentleman I see no reason to deviate from the present system with regard to the State Department and the United States Treasury. I have no idea as to what an amendment such as this would result. It may be that it would result in a windfall to the Bank of America. I just do not know. Therefore, I respectfully urge that this amendment be rejected.

Mr. COOLEY. Mr. Chairman, will the gentleman yield

Mr. HIESTAND. I yield.

Mr. COOLEY. I understand the purpose of the gentleman's amendment is to provide wherever possible that these funds should be deposited in American banking institutions abroad rather than in foreign banks.

Mr. HIESTAND. That is exactly it.

Mr. COOLEY. I stated to the gentleman personally I have no objection to it, but I want to state to the Members of the House that I have no authority from the committee to accept the amendment, and I do not accept it on the part of the committee. It might be well, since some of us do oppose the pending amendment, if the gentleman would withdraw his amendment and offer it at a later time.

Mr. VORYS. Mr. Chairman, will the gentleman yield?

Mr. HIESTAND. I yield.

Mr. VORYS. I find in section 102 (b) of Public Law 480 there is apparently a provision for carrying out the provisions the gentleman suggests. For instance, at the tail end of this first sentence it says:

And for this purpose accounts may be established on the books of any department, agency, or establishment of the Government, or on terms and conditions approved by the Secretary of the Treasury in banking institutions in the United States.

It seems your proposal is already in the law, but it certainly has no place as an amendment to the pending amendment.

Mr. HIESTAND. Mr. Chairman, the instance I ran into where we did not have control over these funds by reason of their being deposited in a foreign bank was an instance several years ago. Since the gentleman from Ohio has cited the law possibly enacted since that time, I have no hesitancy in asking unanimous consent to withdraw my amendment.

The CHAIRMAN. Without objection, the amendment offered by the gentleman from California is withdrawn.

There was no objection.

Mr. COOLEY. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from New York [Mr. ROONEY].

Mr. Chairman, I do not believe the Committee on Appropriations has the authority to appropriate the sale of surplus agricultural commodities, nor do I believe they have a right to interfere with the negotiation of an executive agreement. Further, I do not believe that even a negotiated executive agreement gives the Committee on Appropriations the authority to interfere. This amendment, I know, was not intended to embarrass the administration. I do not think the author of the amendment had that in mind at all. I think the gentleman offered his amendment in good faith thinking that he is throwing some safeguards around the use of these foreign currencies. But, I think the effect of this amendment will be to embarrass the administration and to almost make it impossible for the administrator to negotiate successfully agreements which would result in the disposition of these commodities. If the gentleman who has offered this amendment could show wherein there had been abuses, wherein there is something wrong or something evil that is taking place, then there might be some justification for throwing some further safeguards around the funds. But, to this moment during this debate, no one has disclosed anything that would indicate the law had been misused nor has anyone suggested that it has been abused in any way. We want to know where the funds have been used. Look at our report on page 8 and there you will see a detailed chart showing the use of the money. Yesterday someone asked about the possibility of some part of this money being used for entertainment purposes. I have tried to make inquiry on that subject. If any part of the funds have been used for entertainment purposes, it perhaps would come under the item, "Payment of United States obligations," or under the other item, "Marketing development."

I do not know whether any part of it has been used for entertainment or not, and as far as I am concerned I do not care whether some of it has been used for appropriate entertainment.

Mr. ROONEY. Mr. Chairman, will the distinguished gentleman from North Carolina yield?

Mr. COOLEY. I yield.

Mr. ROONEY. The gentleman is making a much more convincing argument than I could in behalf of the pending amendment. He says we do not know whether they are spending the money for entertainment or anything else. That is the purpose of the amendment; to find out what they are spending.

Mr. COOLEY. Under the Reorganization Act it is not the prerogative of the Appropriations Committee. Our committee is charged with the responsibility of exercising some degree of supervision. Perhaps there have been some rotten transactions, but none of them have come to my attention. I have assured this House that our committee will, when given authority to do so, investigate the use of these foreign funds abroad. I do not intend to vote for an amendment that I know is going to embarrass the administration and hamstring the administration in the performance of the functions which have been vested in them by the laws now on the books.

Mr. SPRINGER. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield.

Mr. SPRINGER. I think I can explain this. It has not come out yet. But many of these programs are entered into for as much as a 3-year program. Of course they cannot bind this Congress to go ahead, but we have signed 3-year agreements and entered into them. They must know how these currencies are going to be spent and what it is to be spent for. They will not be able to enter into these agreements, they will not enter into them. I think your program will be substantially and severely restricted.

Mr. COOLEY. Is it not true that the agreement, to which the gentleman refers, and all these other agreements, deal with the foreign funds that are generated by the sale of the commodity?

Mr. SPRINGER. Exactly. All of that is done at the time the sale is made.

Mr. COOLEY. And if we adopt this amendment we are taking away from the executive branch the right to negotiate and to consummate these transactions, and turning the finances over to the Appropriations Committee, which is already overburdened.

The CHAIRMAN. The time of the gentleman from North Carolina [Mr. COOLEY] has expired.

(By unanimous consent, Mr. COOLEY was granted 3 additional minutes.)

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield.

Mr. TABER. The trouble with that situation is that the bill that you have before the House right now expires in 1958, and there is no such thing as a 3-year contract.

Mr. COOLEY. Well, I am not sure whether the expiration would have anything to do with it or not. I understand that there is available for economic loans $1,700,000,000; programed for loans $386,000,000; left for loans $1,300,000,000. That authority is already in the President. Certainly we would have to carry out the contracts he has negotiated and signed up to date. I do not think we should turn over to the Appropriations Committee functions which could be more properly administered by the executive branch.

Mr. ARENDS. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield.

Mr. ARENDS. It would prohibit more than 21 percent of the program becoming effective, would it not?

Mr. COOLEY. I think that is the effect of it. The other 79 percent will be left in the lap of the Appropriations Committee.

Mr. ABERNETHY. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield.

Mr. ABERNETHY. Does not the gentleman agree with me, as much respect as we have for members of the Appropriations Committee, that if this amendment is adopted the very objective and the heart of 480 is dead? This bill not only involves the sale of commodities, but it primarily involves the use of the funds as a result of the negotiated deal that the President has made with those countries.

Mr. COOLEY. I agree with the gentleman. I think that the situation is a misunderstanding. The use of the counterpart fund is a vital part of the negotiations and a vital part of the contract. If you say you are going to reserve to the Appropriations Committee the right to determine what use shall be made of the counterpart funds, then you are stripping the President of the authority given by the act to consummate a single contract.

Mr. ABERNETHY. In other words, the authority of the President to negotiate an exchange of this merchandise for dollars or for foreign currencies and the use of them thereafter would be completely cut off.

Mr. COOLEY. And suppose they wanted to build even a schoolhouse in some distant country; they would have to come to the Appropriations Committee and ask their permission to build this schoolhouse.

Mr. ABERNETHY. They cannot go back to the Appropriations Committee because there would be no deal made, no transaction unless the President is authorized to carry out some form of transaction.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Iowa.

Mr. GROSS. It is difficult for me to understand how there can be this accumulation of funds if the counterpart funds are disposed of. How could they have funds accumulate?

Mr. COOLEY. They are being held in abeyance to determine what use shall be made of them, as I understand; they are available for loans in the future.

Mr. HOFFMAN. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. HOFFMAN moves that the Committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken.

Mr. HOFFMAN. One purpose in offering the motion, but not the overriding purpose, to strike the enacting clause was to get a recess so that members of the Appropriations Committee and of the Agriculture Committee might get together, come up with something that would satisfy those who are in favor of this legislation.

My thought is that if the enacting clause is stricken and we get back into the House we might send the bill back to the committee with instructions to take into consideration the recent dangerous and deplorable situation which has arisen in the State of Michigan.

We are all familiar with the fact that various sections of the country have been given relief because of disaster. In Texas not long ago there was a drought but before money could get to them for relief of that damage floods overwhelmed them.

We are having our troubles in Michigan. It is possible that some of our unemployed workers and others who will be unemployed if the present situation continues or grows worse as it is, can use up a large part of this surplus.

You ask me why? Let me read to you, if I may, the headlines in the Detroit Sunday Times of June 2. Here it is: "Industrial Blight Saps City's Economy."

We all know that Michigan is a great industrial State. That Detroit is the center of our great industrial empire. Throughout the State we have small factories which get prime or subcontracts out of the Detroit area—contracts for the manufacture of parts that are used in Detroit industry. Here is what the first senfence of the Times story says:

"Proud Detroiters had better buffer up for a big shock.

"Dynamic Detroit soon could become decaying Detroit."

Do you realize what that means to the rest of the State and country? What will become of this great agricultural surplus if the Detroit workers cannot use their normal share of it?

And why that situation?

To me one of the saddest, saddest days I ever lived through was the day following the elections last November when we learned by radio, television, and press that our Democratic colleagues, our CIO Democratic friends, rather, had taken over every elective office in the State of Michigan. Was not that a catastrophe? I thank you for the applause from the majority side of the aisle.

You sowed the seed when you let the CIO take you over and dominate your political philosophy. Now here you have the harvest of unemployment.

Do you get it? The Times, a Detroit daily, names it "Dynamic Detroit"—"Dynamic Decay."

The Department of Defense wished to let a contract for the building of $119 million worth of Army tanks.

Detroit has more than 200 acres of idle factory floorspace. It wanted this contract. It has the equipment and the skilled workers to carry it out. But the contract was awarded to Chrysler operating in another State.

The Detroit Times captioned the story, "Tank Job Loss Stirs New Furor." The Sturgis (Mich.) Journal captioned its story, "Governor Blasts Army Secretary," followed by the statement, "Angered by Claim State Tax Caused Big Contract Loss." The Journal item states: "Gov. G. Mennen Williams today accused the Army of 'playing politics' with a tank contract issued to Chrysler Corp.'s Delaware plant." He added, "The Army is obviously playing politics with this tank contract."

Other dailies throughout the State carried similar stories.

Detroit, which is an industrial labor-distress area, to avoid unemployment disaster was looking for this order from the Department of Defense. Did Michigan get the order? It did not. Governor G. Mennen Williams charged, as just stated, that, in refusing to give it to Detroit, the Department of the Army was "playing politics."

Gov. G. Mennen Williams is now serving his fifth term. From almost his first day in office, he has been under the domination and control of the CIO, headed by Walter Reuther and Gus Scholle.

Although Michigan has a Republican legislature, remedial legislation has been effectively opposed by Governor Williams, who has the power of veto.

It is matter of common knowledge that the CIO's political bosses, with but 1 or 2 exceptions, have dominated the Governor's conduct. He has been dependent upon Walter Reuther and upon Reuther's political associates for his continuance in office. He is responsible for the financial situation of the State. He has insisted upon spending and upon taxation which has given Michigan a bad name with industry.

Sunday's Detroit Times states that 160 Detroit factories have closed since 1950. It asks "How many more move-outs should be expected immediately?

Why the continuing exodus? A Detroit organization mailed out questionnaires and learned that 213 more firms now have definite plans to move out of the city."

Other industrial plants in Michigan, expanding, build their new facilities in other States. Why?

An industry, once located in a community, especially in an area where there is surplus skilled labor, is inclined to stay put just as long as costs can be held down so that the product can be sold at a profit.

But in Michigan more and more industries are learning to their sorrow that an ever-increasing tax burden, with arbitrary demands from the Reuther-controlled unions, are making it impossible for them to continue to operate at a profit.

Reuther is responsible for the demands of the members of his union. No one begrudges an industrial or any other worker adequate compensation for his toil, but one thing is as sure as the rising or the setting of the sun, and that is that, if an employer cannot make and sell at a profit, the industry will be closed or moved.

Note this story on page 2 of the Detroit Times of last Sunday. The caption is "Bundy Moves Fab Operation; Blames Taxes."

BUNDY MOVES FAB OPERATION; BLAMES TAXES

All general fabricating operating operations of the Bundy Tubing Co. are awaiting transfer from the Detroit area to a new plant at Winchester, Ky., it was revealed Saturday. The firm makes small metal tubing and auto parts.

The move will result in indefinite layoffs for 22 men and 220 women employees.

They were told a study of Michigan's higher tax setup, both from Warren Township and the State, prompted the move to Kentucky.

CONTINUES ONE JOB

Bundy, however, will continue production of its Bundyweld base tube at the Warren Township plant, 12354 East Nine Mile, Van Dyke. It also will produce serpentine coils and push rods at the Nine Mile plant, which is being converted to provide more manufacturing space.

In an announcement to employees, W. W. Anderson, Jr., vice president and general manager, explained the company's decision to build a new plant in Kentucky instead of here. He said:

"We found, on comparing the various taxes which Bundy faces in Warren Township and the State of Michigan with the taxes in Kentucky, that Bundy would be subject to considerably less tax in the latter location. In fact, approximately $45,000 a year less."

FEAR OTHER TAXES

"We are also, as of course you all know from articles in the newspapers, faced with the threat here in Michigan of additional or other taxes, any one of which we believe would increase our load."

Anderson said the possible additional taxes might come from Warren Township as well as the State. He said:

"For instance, a 6 percent corporation income tax, which has been urged to replace either the Michigan franchise or business activity tax, would make the difference in taxes somewhere between $86,000 and $93,000 a year, depending on which Michigan tax was eliminated."

SEEK TO CUT COSTS

Anderson said the company had found it necessary to expand tubemaking 20 percent and to have a new plant and an efficient operation to keep costs down. Old patents no longer protect the company, he said.

This objective is causing the Nine Mile plant to be converted and a new office building is being constructed.

If the general fabricating operations were also kept there it would cost the company $500,000 more than to locate in a new building in Kentucky, Anderson said.

Only a week or so ago, there was a wildcat strike in the Detroit Chrysler plant.

DETROIT AREA INDUSTRIES CANNOT GUARANTEE PERFORMANCE

There is another reason why armed services is not justified in awarding a contract to industries in the Detroit area.

That is the lack of assurance that the contract will be performed on time and according to its terms.

Without such assurance, those charged with the defense of our country cannot with safety award any contract to any area.

Let me cite an illustration of what is meant.

Do you remember way back 10, 12, or 15 years ago, when the Navy let a big contract in Detroit and the CIO closed the plant? Do you remember that?

In 1939, the Navy had a contract with the Bohn Aluminum and Brass Corporation of Detroit for the production of special bearings and castings for aircraft engines. The company was under the domination of Local 208 of the United Automobile Workers—CIO.

That union called a strike in all seven of the company's plants. In one instance, the strike continued for 24 calendar days; in the other, for 41 calendar days, and for a part of that time the union refused to permit the Navy to remove its own plans, specifications, or equipment, and "the delivery of completed castings, bearings, and parts, also those in the process of manufacture, was delayed for the duration of the strike." See exhibit A printed at the conclusion of these remarks.

When production for national defense can be delayed—not because of lack of appropriations—but at the caprice of Walter Reuther, unhampered by Governor Williams, the chief executive and law-enforcing agent of the State, the Defense Department is not justified in awarding a contract involving defense to any area.

Do you wonder why, if it is necessary for the armed services to get munitions of war, to get tanks, to get the other things they must have and by a certain date, the Secretary of the Army cannot place a contract in Detroit when he knows from the past record that the CIO, Brother Reuther and Brother Williams, Siamese twins—their demands, must be met or no delivery? You cannot do business in Michigan without the approval of both.

Governor Williams with his veto power has forced upon our people of Michigan a tax policy that is driving industry out of Michigan, creating a situation where the Secretary of the Army or of the Navy or of the Air Force dare not let a contract involving national defense in Michigan because the production may be stopped at any moment. At whose command? At the edict of Walter Reuther. Williams and Reuther have sown the seed and Detroit workers are harvesting unemployment.

EXHIBIT A

(No. 253)

REQUESTING CERTAIN INFORMATION FROM THE SECRETARY OF NAVY ON CERTAIN MATTERS IN CONNECTION WITH A STRIKE OF EMPLOYEES IN THE PLANTS OF THE BOHN ALUMINUM CO. AT DETROIT, MICH. (H. RES. 314)—MR. HOFFMAN

NAVY DEPARTMENT,
Washington, October 20, 1939.

The CHAIRMAN, COMMITTEE ON NAVAL AFFAIRS,
House of Representatives,
Washington, D. C.

MY DEAR MR. CHAIRMAN: The resolution (H. Res. 314) requesting information from the Secretary of the Navy on certain matters in connection with a strike of employees in the plants of the Bohn Aluminum Co. at Detroit, Mich., was referred to the Navy Department by your committee with request for report.

The questions in the resolution are set forth below, the answer to each appearing immediately thereafter:

(a) Whether the Navy Department did have a contract with said corporation.

At the time the said strike was called, the Navy Department did have a contract with the Bohn Aluminum & Brass Corp., of Detroit, Mich., for the manufacture of special bearings for aircraft engines. In addition, the corporation was also engaged in the manufacture of special bearings and castings for manufacturers with whom the Navy Department had contracts.

(b) Whether a strike which interfered, or would interfere, with the activities of the Navy Department occurred.

A strike actually occurred in the plants of said corporation which did interfere with the activities of the Navy Department.

(c) How long such strike continued.

A strike was called at the corporation's plant No. 1, Detroit, Mich., on August 29, 1939. At the time the strike was called, plant No. 1 was engaged in the manufacture of special bearings for aircraft engines for manufacturers with whom the Navy has contracts. On September 15, 1939, a second strike was called at all of the seven plants of the corporation in the Detroit district in sympathy with the strike at plant No. 1 (bearings). At the time of calling the second strike, plant No. 2 was engaged in the manufacture of castings for airplane engines in process of manufacture at the Naval Aircraft Factory, Navy Yard, Philadelphia, Pa.; also castings for a manufacturer with whom the Navy has a contract for a special type of marine engine.

The duration of the strike in plant No. 1 (bearings) was from the 29th of August to October 8, inclusive, 41 calendar days. The duration of the strike in plant No. 2 (castings) was from September 15 to October 8, 1939, inclusive, 24 calendar days.

(d) Whether the delivery of bearings or parts which had been manufactured for the Navy, or of plans, specifications, or equipment, or any of them was delayed.

The delivery of completed castings, bearings, and parts, also those in the process of manufacture, was delayed for the duration of the strike.

The Navy Department was unable to obtain the return of the Government-owned patterns, plans, and equipment for the duration of the strike.

(e) What, if any, representations were made by the Navy Department to the corporation looking toward the ending of said strike.

No representations were made by the Navy Department to the corporation looking toward the ending of the strike.

(f) What, if any, representations were made by the Navy Department to the union or its representatives looking toward the settlement of the strike?

On September 28, 1939, the United States Navy resident inspector of naval material at Detroit, Mich., informed the regional director of the United Automobile Workers, Congress of Industrial Organizations, Detroit, Mich., of the seriousness of the delay in the delivery of the material due on contracts, also the urgent need of the shipment of patterns and requested that he instruct his representative in charge of the picket line at the corporation's plant No. 2 to allow a representative of the inspector of naval material and a truck to pass through the picket line to pick up Government-owned patterns and ship them on a Government bill of lading.

The regional director of the United Automobile Workers, Congress of Industrial Organizations, sent three representatives of union local No. 208 to discuss the removal of the patterns with the inspector of naval material. The representatives of union local No. 208 were given full access to the files on the Navy contracts and they were informed that the delay in releasing patterns for delivery were seriously jeopardizing the manufacture of airplane engines at the Naval Aircraft Factory. At the end of the discussion, the union representatives stated that as the strike situation stood at the present time, their answer was emphatically "No" and that they would not let patterns or inspected castings be removed. No further action was taken by the Navy Department to remove the patterns and castings. The Navy Department kept in touch with the strike situation at the Bohn plants through its field representatives, and through United States Department of Labor, but took no steps looking toward the settlement of the strike.

Sincerely yours,

CHARLES EDISON,
The Acting Secretary of the Navy.

Mr. POAGE. Mr. Chairman, I rise in opposition to the motion offered by the gentleman from Michigan [Mr. HOFFMAN].

Mr. Chairman, there seems to be considerable misunderstanding about this matter of appropriations and why there should be some reluctance on the part of those who want to make this program continue to function to accept an amendment that simply says that the Appropriations Committee must appropriate any money that comes in as a result of this transaction. I agree that when the Federal Government has money, before it can be expended it should be appropriated. That is the proper way to spend public money.

But we do not have money in this case. We have wheat, we have cottonseed oil, we have soybeans, we have corn, we have cotton, and we want to dispose of those products. We find somebody who will trade with us if we will make a trade whereby their economy can avoid danger. They cannot buy dollars. They might convert their own currency into dollars and buy our commodities. They cannot afford to do that. Neither can any of these countries with which we are dealing allow us to simply take a lot of their money, put it in our pockets and say that we will use it any way we please.

These deals between nations cannot be made as are deals between individuals. Let us assume that we had a billion dollars of Mexican currency. If we could use that without any limitation anywhere in the world any day we wanted to, we could utterly destroy the economy of the Republic of Mexico any time we saw fit. Suppose some other nation might hold $10 billion of American currency and had the right to come in and demand its redemption in goods at any time in the world they laid the money down, they could absolutely destroy our economy. And so it is with the smaller countries, only in a much more aggravated way. They realize they cannot give us the right to come in without restriction or restraint and demand a redemption of their currency in goods at any time and in any way we ask. So a part of the agreement and a part of the sales price of these goods is the fact that we agree in each instance that we will use this money only for certain purposes. It is only because we make that agreement to use the money for certain purposes that these nations can afford to deal with us at all. They could not afford to deal with us if we demanded the unrestricted right to use this currency as if we got it in a normal commercial transaction.

So it is not simply the price which enables us to sell these commodities we are moving under Public Law 480. We are selling all of these commodities at a price which is the world market price. We are not giving these countries any concession on price. We are giving them the concession on an agreement that we will not use their currency in a way that will hurt their domestic economy. Now, if we cannot make those agreements and under the Rooney amendment we cannot make binding agreements at the time that we make the trade. Unless we can, we cannot sell these commodities. It seems to me to be just that simple. The method of the use of the local currency is surely a part of the consideration. What we are giving is not simply so much wheat, but we are giving in return for their pesos or their liras or their francs so much wheat plus the agreement that if you give us your lira, we will not use it to your disadvantage but use it only under certain circumstances.

Mr. VORYS. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Ohio.

Mr. VORYS. Title I is entitled "Sales for Foreign Currencies." What that means is this——

Mr. POAGE. Mr. Chairman, I cannot yield any longer, because my time is running out. I do not care what the title is or what it is entitled. We recognize that the sale has two parts, that the sale involves on our part selling a commodity and selling an agreement that we will do certain things with the foreign currency that we get in exchange. So, it is not a commercial sale. It is a sale, but it is a sale on conditions, and no nation can live without those conditions.

The point that many of us overlook—and I am surprised that a member of the Committee on Foreign Affairs should stand up here and suggest that we could trade with those people just as individuals could trade with each other, because nations cannot trade that way, and if you are going to have this trade, you have to keep the power to make these conditions.

The CHAIRMAN. The question is on the preferential motion.

The preferential motion was rejected.

Mr. McINTIRE. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, it is with the greatest respect for the gentleman from New York who has proposed this amendment and also the gentleman from New York who is the ranking minority member of the Committee on Appropriations that I rise in opposition to this amendment.

I think perhaps it has already been said, but if you will bear with me, I will repeat it, that we are dealing here substantially with commodities that are owned by the Federal Government. These commodities are being used in transactions with friendly countries, and the very bases of those transactions are the items of agreement or items upon which agreements have been made before any of these commodities can be moved from the Commodity Credit Corporation inventory.

Now, it is true that they generate funds that are held under this agreement, and before any transactions are consummated, the disposition of those funds is agreed upon. Now, with all deference to those who propose that this amendment would not interfere in any way with the development of these agreements, I think that the very mechanism of developing those agreements does not balance with that argument, because they are made before any of these transactions are consummated.

Now, I would like to direct a question to the author of this amendment, the gentleman from New York [Mr. ROONEY]. In the use of these funds it is my understanding that some of these funds are used in the manner of loans, which loans are developed and approved by the ICA, and these loans then are turned over to the Export-Import Bank for administrative or service purposes. In relation to the amendment which has been proposed, what would be the situation in regard to the funds which ICA has been using for loans from the funds generated under these agreements?

Mr. ROONEY. This pending amendment would include all the funds under this program to Congressional approval. They would be justified to the Appropriations Committee just the same as the Mutual Security bill is justified to the Committee on Appropriations of each House, every year. There is a great deal of misunderstanding with regard to this amendment. We proponents are all for the program. We are for its becoming the greatest thing that ever happened. But we think the Congress is entitled to know what happens to these funds generated under the program. That is it, pure and simple. All this superfluous business about foreign currencies and these agreements, has nothing whatever to do with it.

The same and proposed procedure is followed in connection with the acquisition of buildings abroad by the Department of State. We appropriate the dollars, they go down to the Treasury and withdraw the foreign currencies and buy a piece of property, let us say, in

Italy. That is all we seek to do by means of this pending amendment.

Mr. McINTIRE. Mr. Chairman, the reason I asked that question of the gentleman from New York is that reference was made previously in the discussion only to such uses as the gentleman referred to at this point and I wanted to inquire as to whether or not it would also encompass the area of loans which are being worked out through ICA and serviced by the Export-Import Bank. I believe I have my answer.

Mr. ROONEY. In effect, this amendment would not interfere with such loans. Does the gentleman understand that the entire bill now before the Committee of the Whole is very clearly subject to a point of order?

Mr. McINTIRE. I am not familiar with the technical nature of the bill and whether it is subject to a point of order.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. McINTIRE. I yield to the gentleman.

Mr. COOLEY. If the gentleman from New York [Mr. ROONEY] and other Members of the House will read the chart on page 8 of our report, they can very clearly see what has become of the money. We do not have, I say unfortunately we do not have, a detailed breakdown. But I am sure that all I would have to do is to ask the Department to send up a detailed breakdown of the expenditure of counterpart funds.

There is one other observation I should like to make, and I think I am accurate in saying this: That all of the counterpart funds that are on deposit now here or elsewhere are already obligated in some sort of fashion. They were obligated by the very contract that was negotiated under which we disposed of the surplus commodities.

Mr. McINTIRE. Mr. Chairman, I would like to reemphasize that point, because as I understand the operation of this act, these agreements are made prior to the development of any of these funds. It is my sincere opinion that this amendment will greatly interfere with the further continuation of the program and the equitable distribution of the funds; and also the fact that it would make it almost impossible to negotiate agreements under this restriction.

Mr. WHITTEN. Mr. Chairman, I offer a substitute for the Rooney amendment.

The Clerk read as follows:

Amendment offered by Mr. WHITTEN as a substitute for the amendment offered by Mr. ROONEY: Add the following new paragraph:

"Within 60 days after any agreement is entered into for the use of any foreign currencies, a full report thereon shall be made to the Senate and the House of Representatives of the United States and to the Committees on Agriculture and Appropriations thereof."

Mr. WHITTEN. Mr. Chairman, I have offered that amendment as a substitute in the hope of bringing these different viewpoints together. I do not think there is anything more sound than to have the Committee on Appropriations—not because it is that committee, but an arm of the Congress to approve the use of funds, whether they are United States currency or foreign currencies which the Government has received and which normally would go into the Treasury for whatever they are worth. But I do believe that in this particular field we are dealing with something where the use of the currency is the come-on to the foreign country.

I am firmly convinced that unless this amendment as I have written it is accepted—let me put it the other way; I am convinced that in this type of operation if the President of our country had to wait upon the Committee on Appropriations and the Congress to approve each and every use of the currencies that would be generated by these sales as provided in the Rooney amendment, you never would have any Public Law 480 program.

I should like to add this, that in a moment I am going to offer another amendment which I hope will receive the attention and the support of the committee. That amendment would provide that we not sell for a foreign currency any commodities we would not sell for dollars. I believe I can make you a very strong argument, supported by facts and figures, to show that we need that protection, but unless we let the President work out agreements which will also include agreements as to the use of the funds, if you have to wait for the Congress to act before you can make an offer or accept or agree, you will not have any real 480 operation. It is just as plain as that. You cannot wait on the Congress to tell the President whether they will permit the use of these foreign currencies in line with his agreements.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from North Carolina.

Mr. COOLEY. I wonder if the gentleman from New York will not agree to accept the amendment offered by the gentleman from Mississippi. While I have no authority to speak for the committee, I think the gentleman has offered a constructive amendment, and I personally would approve the amendment the gentleman from Mississippi has offered.

Mr. ROONEY. Mr. Chairman, will the distinguished gentleman from Mississippi yield?

Mr. WHITTEN. I yield to the gentleman from New York.

Mr. ROONEY. May I say I am unalterably opposed to this substitute, for the reason that, referring to the situation that happened in connection with the education-exchange program, a bill just passed within the last 6 days by both Houses, the Appropriations Committee would have no control whatever if, having allowed $20.8 million in that bill 6 days ago, you would then come along with an authorization of $17 million on top of that, as is set forth on page 8 of this report. This amendment does not take the place of the one now pending.

Mr. WHITTEN. I regret that this has come up to where we do not have the time to dig into the facts in the case to which the gentleman refers. I agree with him it is bad practice for our Committee on Appropriations after months of work and having reported to the Congress a full story on a program to find that through some other channel they have gotten funds to have many more employees than we realized. I realize it is bad for the gentleman from New York in his situation. But if my amendment which is offered as a substitute is adopted, the gentleman's committee would be notified what part of that program is being paid for with 480 funds and presumably would take that into consideration in determining how much new cash to give them.

I have the same problem the gentleman has; in fact, I suspect I have much more of it, because our Subcommittee on Agriculture will doubtless have more contact with this program than will the gentleman's own subcommittee. But I would urge again on the Members that if you do not permit the President to work out agreements with foreign countries as to what those currencies will be used for, a major part of them, you will have no agreement and you will have no sales.

I am going to offer another amendment in a minute. I do not think there should be any sales under 480 unless we stay in the market to sell for dollars. The record shows you can do lots of damage if you cannot sell what you have for dollars, but instead use 480 as a substitute. I hope the amendment I have offered will be adopted.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from North Carolina.

Mr. COOLEY. The gentleman is a very distinguished member of the Subcommittee on Appropriations. When the capital stock of a corporation has been impaired, it is necessary for the gentleman's committee to pass upon the appropriation restoring the capital stock of that appropriation; is that not true?

Mr. WHITTEN. That is true.

Mr. COOLEY. Then the Appropriations Committee, on which the distinguished gentleman from New York is also a member, does have some responsibility and does have some authority as to whether or not it will restore that capital after it has been impaired.

Mr. WHITTEN. We have, but I would say to the gentleman that the Commodity Credit Corporation gets no credit on its books for the value of the foreign currencies, so there is real reason why the Appropriations Committee should have full knowledge of these activities. But if we have to approve it in advance, you will have no agreements and actually you will have no sales.

I hope the amendment is adopted.

Mr. VORYS. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Ohio.

Mr. VORYS. Section 105 of this law provides that every department or agency using any foreign currency shall reimburse the Commodity Credit Corporation in an amount equivalent to the dollar value of the currencies used, so that this bill provides for restoring such impairment of the Commodity Credit Corporation capital as it may have caused

without reference to the Committee on Appropriations at all.

Mr. WHITTEN. The gentleman has made a point there, but to my knowledge I do not recall that our attention has ever been called to a single instance in which any funds were returned to the Commodity Credit Corporation in all the days I have dealt with that corporation.

Mr. VORYS. That provision has been in the law. I do not know whether they do it.

Mr. MULTER. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield.

Mr. MULTER. I think the gentleman overlooked the one important fact. Under your amendment, there would be required a report to the Congress and to the committees within 60 days after making the agreement.

Mr. WHITTEN. That is right.

Mr. MULTER. But, you do not say what shall be done after that. Suppose we disapprove? I think you need a provision added to your present amendment to permit the Congress to approve or disapprove of it.

Mr. WHITTEN. I say if the Congress has to agree in advance, which would be true under the amendment offered by the gentleman from New York, you would have no sales and you would have no agreements in my judgment, judging from how the negotiations have been carried on in the past. What my amendment does is to provide that an agreement as to how the funds would be used would be reported to the appropriate committees and any place where we are paying for our foreign-aid bill, from that fund presumably we would take that into consideration in the amount of money that we had in bills which are brought to the Congress.

Mr. BOW. Mr. Chairman, I rise in opposition to the substitute amendment.

Mr. BOW. Mr. Chairman, I am in opposition to the substitute amendment, which it seems to me is simply locking the barn door after the horse has run away. I favor the amendment offered by my distinguished chairman of the Subcommittee on Appropriations for the Department of State. But, I would like to refer back again to this question which he has mentioned many times about the international exchange program. Let us see just exactly what we are getting into here. Here is a program where last week the House approved the conference report and appropriated $20.8 million. Here we find an additional $17,400,000. This program is being extended for 1 year. What has happened to us? At the end of that year, representatives of the State Department and representatives who believe in the exchange program are going to come in and say, "Well, now, you approved this last year. You set this thing up on a $37 million or $40 million basis and now we have to continue it because we cannot offend these countries. We cannot cut down this program which already has been started." What would you be up against next year or the year after when this law expires? You would be appropriating dollars to carry on a program you are establishing under this bill. So we have to look beyond this year. People talk about counterpart funds. I am amused at times when I hear people talk about these counterpart funds and they say these are not dollars—this is not money. I say to you, my colleagues, that these are some of the most expensive dollars that have ever been spent. We did not get these products for nothing. They cost us money. We got them with expensive dollars. I want to say I am in favor of this program. I believe in this bill. I believe in the method, but it should be controlled by the Congress. When you get into questions of international exchange and the translation of publications—that is the small-book program put out by the Information Agency—we gave them money in the State Department bill, but you build it up here and next year they are going to say, "Well, we have to have more."

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. BOW. I yield.

Mr. COOLEY. The gentleman mentioned something about locking the barn door after the horse has run away. That would seem to me that the gentleman indicates he is not willing to trust those who are administering this program. Does the gentleman have any evidence that anybody has let the horse run away in this program?

Mr. BOW. May I say to the gentleman, and I decline to yield any further, of course, I trust the President of the United States. But, I will say to the gentleman that the President of the United States cannot take the time to sit down and review every item that this money is going to be spent for. The President of the United States cannot determine how large a house you build for an agricultural attaché in Rome. He cannot determine all of these various items. Those are things that our Committee on Appropriations handles. I say in our FBO, that is the foreign buildings abroad program today, we are using counterpart funds created under executive agreement, if you please, the same as these are. The President has entered into an agreement in the past. In the bill which you approved here just a few days ago, there was a provision for $20 million for the FBO and I think $15 million of which shall be in counterpart funds. We did not affect the negotiation of contracts by doing that. We did not affect how the President should deal in making these agreements. We are simply considering how counterpart funds will be used after such funds have been generated or created.

Mr. ROONEY. I should like to point out that in connection with the educational exchange activities program in the State-Justice bill there is a provision that of the $23 million some seven or eight million shall be by way of counterpart funds.

Mr. COOLEY. I wonder why the Appropriations Committee did not ascertain during its consideration of this matter how much counterpart funds was being used for the purpose of the committee.

Mr. ROONEY. We certainly were informed on it, in answer to our demands. That is the reason we have this pending amendment. These things are done before the Appropriations Committee knows anything about it. Does the gentleman think the House Appropriations Committee would have the inexcusable temerity to be here with the silly unexplained explanation at page 8 of this report for over a billion dollars? You would expect us to work on this kind of expenditure for a month, from early morning until late at night. The House is entitled to that.

Mr. COOLEY. Why did you not ascertain from the officials of the Department how much of this was used for exchange education?

Mr. ROONEY. I just explained that we did do so.

Mr. COOLEY. But, notwithstanding that, you went ahead and gave the money and we had no control over the figure.

The CHAIRMAN. The time of the gentleman from Ohio [Mr. Bow] has expired.

Mr. SMITH of Mississippi. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from New York, and in support of the substitute offered by my colleague from Mississippi. The point that has been made in regard to lack of control, or the fact that the Appropriations Committee would not handle this appropriation ignores the purpose of Public Law 480 as it was first passed. These exchange programs have been referred to, and various other programs put through under the 480 provisions, paid for by counterpart funds, are a part of this plan to provide for the greater use of American commodities. That is why they are not handled by the Department of State, such as the educational-exchange program. These programs which are financed through the counterpart funds and which are authorized under this bill and which would be made impossible under the amendment offered by the gentleman from New York [Mr. ROONEY], are designed to promote the use of American agricultural products to benefit the American farmer, and to benefit all of our citizens through the greater use of these products and by providing greater markets.

Mr. ROONEY. Mr. Chairman, will the distinguished gentleman from Mississippi yield?

Mr. SMITH of Mississippi. I yield for a question.

Mr. ROONEY. Just a short statement?

Mr. SMITH of Mississippi. A short question only.

Mr. ROONEY. Very well; if the gentleman insists. Would not my distinguished friend from Mississippi say it is a fact that the gentleman from New York who offers this amendment, insofar as his voting in his years in the House, has been a friend of the farmer?

Mr. SMITH of Mississippi. I understand that the gentleman from New York is a friend of the farmer. The only rivals that he has as a friend of the farmer from New York are perhaps the distinguished gentlewoman from New York or perhaps the distinguished member of the Committee on Agriculture from New York City.

Mr. ROONEY. The gentleman does not give me an exactly satisfactory answer. Is the gentleman not proud of the fact that I have never voted the other way, against the farmer?

Mr. SMITH of Mississippi. I value the gentleman from New York as one of the finest friends of the farmer. He is also a great friend of the entire program overseas. I think he is really mistaken here, because if his amendment goes through it will handicap rather than help our efforts to sell farm commodities.

Mr. ARENDS. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Mississippi. I yield.

Mr. ARENDS. I wish the gentleman from New York would be a friend of all farmers instead of just certain farmers, because I happen to have this record on the desk where he voted against the corn farmer legislation.

Mr. ROONEY. I voted with the best interests of the farmer and the chairman of the Committee on Agriculture on that proposition.

Mr. ARENDS. Let us keep the record straight. Here it is.

Mr. SMITH of Mississippi. I do not think there is any question about any of the 435 Members of the Congress not being friends of agriculture; the only question is whether they are right in their friendship at the moment.

What we are doing here if we adopt the amendment of the gentleman from New York is to make the provisions of Public Law 480 ineffective as far as permitting use of American agricultural commodities in the rest of the world and as it will affect making these agreements. It will make it impossible to work them out, because it will contain no provision for the payment for these programs through the sale of commodities for local currencies. There will be no way to work out agreements in advance if this amendment is adopted. I think that the full consideration that the Congress will give and the report it will make as ordered by the substitute amendment will convince us that we have had some good programs and are accomplishing something toward the disposal of surplus products.

Mr. ABERNETHY. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Mississippi. I yield.

Mr. ABERNETHY. Would it not be fair to say that if this amendment is adopted it will result in the virtual repeal of Public Law 480?

Mr. SMITH of Mississippi. It will completely alter the method now used under Public Law 480 and it would be useless as a means of disposing of surplus commodities or promoting the further use of surplus agricultural commodities.

Mr. WHITTEN. The gentleman has reference to the Rooney amendment and not to the substitute.

Mr. SMITH of Mississippi. Of course.

Mr. FULTON. Mr. Chairman, I move to strike out the last word.

I would like to ask the gentleman from New York a question about his amendment. Actually the amendment offered by the gentleman from New York strikes out the two provisos that are in the section referred to, section 104; does it not?

Mr. ROONEY. Yes.

Mr. FULTON. May I point out what that does. Section 104 reads:

> SEC. 104. Notwithstanding section 1415 of the Supplemental Appropriation Act, 1953, or any other provision of law, the President may use or enter into agreements with friendly nations or organizations of nations to use the foreign currencies which accrue under this title for one or more of the following purposes:

Then the last proviso reads as follows:

> *Provided, however,* That the President is authorized to waive such applicability of section 1415 in any case where he determines that it would be inappropriate or inconsistent with the purposes of this title.

I would point out that we would thereby be tying the hands of the President of the United States in his handling of Public Law 480, because we knock out the proviso that permits the President to waive applicability of section 1415 in any case where he determines it would not be feasible, or in the words of the act where it would be inconsistent or inappropriate, with the purposes of this title.

We must look at this Public Law 480 either as primarily a method for the disposal of agricultural surpluses or as merely a method of carrying out subsidiary programs abroad such as the education-exchange program, the information program, and so forth.

The trouble with the amendment offered by the gentleman from New York is two fold: First, it ties the hands of the President of the United States completely and puts the operation in the Appropriations Committee; and, second, it bypasses all committees which are legislative committees concerned with the type of programs abroad authorized by section 104. For example, the Banking and Currency Committee as to Export-Import Bank loans, should have the authority to pass on those programs if the Appropriations Committee is given the power to appropriate. The Foreign Affairs Committee then should have to authorize any program under its jurisdiction and be given the authority to pass on it. Does not the chairman of the Committee on Agriculture agree with me?

Mr. COOLEY. If the gentleman will yield, I agree with the gentleman. Again I would like to point out that if you adopt the amendment offered by the gentleman from New York you might as well throw out the whole business, because you deprive the President of all right to negotiate and transfer that power over to the Appropriations Committee.

Mr. FULTON. The third point is this: We have negotiations pending for the disposal of the United States surplus agricultural commodities abroad. Under the amendment of the gentleman from New York, the Executive must come to the Appropriations Committee to see if they will authorize the kind of program that the counterpart money will be used for.

That is the program implemented by the agreement which provides the foreign currency. Unless we give the President latitude in this act to dispose of these surplus commodities for the purposes which everybody agrees on, unless we give him the power to negotiate, we tie his hands in dealing with these foreign countries on the sale of United States surplus agricultural commodities abroad, and the United States farm program suffers.

Especially do we tie the President's hands under the amendment offered by the gentleman from New York when it does not even let the President set aside the Appropriations Committee jurisdiction when he deems it inappropriate to require this delaying procedure. I do not wish to tie the hands of the President of the United States of America on foreign policy in that regard in negotiating these agreements for the disposal of United States agricultural surpluses, because these are necessary and sometimes confidential agreements that are being made. Of course, the Appropriations Committee, even in connection with the education exchange fund, has the power to look at the next appropriation and decide whether to give that program more dollars or counterpart funds, so that committee does have a pretty effective practical control. Likewise, as clearly pointed out in section 105, if any department of the United States Government uses any of these funds for their programs they must then supply the Commodity Credit Corporation with dollar funds of an equivalent amount of the value of the commodity or foreign funds used, is that right?

Mr. COOLEY. Yes; section 105 provides that. We are not faced with the question of where we are going to get the money. It is a question of what we are going to do with surplus commodities. We have passed the question of where we are going to get the money.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from New York.

Mr. TABER. Is the gentleman in favor of tearing down the bars and not having any control in Congress of appropriations and what is done with the people's money? That is the trouble with this thing. If we do not have any restrictions or any control, the House of Representatives might just as well give up the ship.

Mr. FULTON. I respectfully believe the Agriculture Committee and the Appropriations Committee can exercise adequate supervision and control under the present act, and the Bureau of the Budget approves these provisions. We are discussing section 104 that authorizes the President of the United States to enter into agreements with friendly nations or organizations to dispose of surplus agricultural commodities already owned and stored by the Commodity Credit Corporation, and are not authorizing new funds. Secondly, under this section 104 there is the first proviso which refers to appropriations committee jurisdiction. I am surprised that if the great Appropriations Committee did not like it, they let the first proviso go in the legislation last year and the year before.

Mr. TABER. That was because they came in with a rule that permitted them to control it.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

(By unanimous consent (at the request of Mr. ROONEY) Mr. FULTON was allowed to proceed for 3 additional minutes.)

Mr. FULTON. Mr. Chairman, the first proviso under section 104 provides that under subsections (d) and (e), the programs must go before the House Appropriations Committee. That covers under (d) financing the purchase of goods or services for other friendly governments and likewise under (e) programs to develop balanced economic development and trade between nations. Likewise the section says programs to pay United States obligations involving grants under subsection (f) must go before the House Appropriations Committee. Also not less than 10 percent of the foreign currencies that are generated under this bill must go before the House Appropriations Committee. So this legislation is not a case where the Appropriations Committee has lost full control.

But under the amendment offered by the gentleman from New York, it will in all cases tie the hands of the President of the United States and will not give him any discretion ahead of time to dispose of United States surplus agricultural commodities without having the secondary programs individually approved.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from New York.

Mr. ROONEY. There has been a lot of loose talk here this afternoon. It has been said that the President would not have authority to negotiate agreements. The pending Rooney amendment refers only to section 104 of this act.

Mr. FULTON. Yes.

Mr. ROONEY. Is the gentleman familiar with section 101 which says:

> In furtherance of this policy, the President is authorized to negotiate and carry out agreements with friendly nations or organizations of friendly nations to provide for the sale of surplus agricultural commodities for foreign currencies.

Mr. FULTON. Yes, but here is the point. Your amendment is simply going to put the money from the sales of these United States surplus commodities into the United States Treasury and then the Committee on Appropriations decides what to do with it from there on, and the President does not have power to negotiate terms of agreements to make a program up with these countries. The President has to have the power to make a good agreement to get rid of the United States agricultural surpluses by agreeing to a lot of specific side programs, at the same time as he negotiates the surplus commodity agreements in many cases.

May I just point out to the gentleman who has just spoken, why does he not look at section 102 and try to amend it too, if he wants appropriation power?

Mr. ROONEY. The pending amendment does not apply to section 102.

Mr. FULTON. I know, but you should put the appropriation power in section 102, in order to be fully logical on your amendment.

Mr. ROONEY. We do not want to do that. If you will approve the pending amendment, we will see what happens to these funds after they are generated under this program, and we might be building schoolhouses all over the world and buying palaces for agricultural attachés.

Mr. FULTON. Why did you strike out the second proviso which gives the President discretionary power to refer it to the Committee on Appropriations?

Mr. ROONEY. I will tell you.

Mr. FULTON. Because this is the crux of it.

Mr. ROONEY. To do a neat and clean job, we merely insisted that section 1415 be followed.

Mr. FULTON. Yes; and you are doing a good, neat, clean job doing that to the exercise of the President's power, too.

Mr. CURTIS of Missouri. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I rise to support the amendment offered by the gentleman from New York and also the position as expressed by the ranking minority member of the Committee on Appropriations [Mr. TABER]. I cannot for the life of me see the argument being presented by the Committee on Agriculture that this will in any way interfere with the agricultural surplus-disposal program. In essence, this is no more than a three-part program: One part is the disposal of agricultural products. Another is purely an appropriation bill, and all the details that you will find in the foreign-aid bill are in here, or, rather, they should be in here, but they are not in here; only the general substance of it is here. The third part of this program is ways and means, that is, providing the money whereby the operations are going to be paid for.

The orderly procedure, of course, on any program is to have the committee that is concerned with the overall legislation authorize the program, in this instance the Committee on Foreign Affairs, and they should authorize these programs. Then the Committee on Appropriations comes in and specifies what particular appropriations are needed on that program, and then we get the money. Now, how you get the money is not of too much concern to the committees, I regret to say. It is something we have to be concerned with though when we try to balance the budget.

Already the procedure has been utilized by the Committee on Appropriations to balance off the payments of some of these foreign-aid programs partly with new money from the Treasury, partly from money generated in these counterpart funds.

Now, there is no reason at all that the President in negotiating some deal on the sale of some of our agricultural commodities cannot go to a foreign country and say, "Now look. We have a certain foreign-aid program on our books that will permit us to spend a certain amount of money for schools in your country or for any of these purposes listed here, and some of this money that would be generated by your purchasing these agricultural products will go for that purpose under the authority of the Congress." There is nothing at all that prevents that from happening. As a matter of fact, that is the orderly way to proceed.

Mr. Chairman, I submit that this amendment proposed by the gentleman from New York is one of the most important amendments that we are going to have to vote upon, and those of you who are particularly interested in getting control over the foreign-aid program might as well save your breath when the appropriation bill on foreign aid comes up if you are not going to take an affirmative stand on this and at least turn over to the Committee on Appropriations the power to dig into these programs. There is at least as much money being spent under this guise as there is through direct appropriations.

Mr. HIESTAND. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman from California.

Mr. HIESTAND. Do I gather that the gentleman from Missouri does not approve the substitute amendment offered by the gentleman from Mississippi?

Mr. CURTIS of Missouri. Oh, no. The substitute amendment is, as someone expressed it, like locking the door after the horse is stolen.

Mr. HIESTAND. But the gentleman from Missouri heartily approves the amendment offered by the gentleman from New York?

Mr. CURTIS of Missouri. I think it is one of the most important amendments that has been presented to this Congress in this session.

Mr. VORYS. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman.

Mr. VORYS. Title I of Public Law 480 is labeled "Sales for Foreign Currency." It starts out by saying that the President is authorized to provide for the sale of surplus agricultural commodities. If, in addition, to being authorized to sell, the President is authorized to give away, then that title and all the rest of it is sophistry. However, in addition to being an agricultural surplus disposal bill, this is a foreign aid bill. This section, 104, authorizes foreign aid.

Mr. CURTIS of Missouri. That is right.

Mr. VORYS. But we ought to appropriate for that foreign aid after we authorize it. It is not merely a matter of committee jurisdiction. It is the way the Congress itself functions. First we say that we are going to approve a principle, we are going to authorize something. Then we say we want to take a second look at it and see how much money, domestic, or foreign money, we are going to spend on it. All that section 1415 does is to apply to these mounting amounts of foreign currency the same rule that we apply to American dollars.

Mr. CURTIS of Missouri. Mr. Chairman, I think the gentleman has stated it exactly right. I cannot conceive, in any way, how this would interfere with the disposal of our surplus commodities.

Mr. HILL. Mr. Chairman, I move to strike out the requisite number of words.

Mr. Chairman, I hesitate to inject myself into this debate, but frankly either this is a good program or it is not; either Public Law 480 is worth preserving because of the type of work it has been doing in our relations with foreign countries or it is not. It is my personal opinion that we should pass this bill as it is, and not support either one of the amendments that have been proposed. I say, how are you going to use the Committee on Appropriations—and they are all friends of mine I hope—when we are trying to deal not only with large foreign countries who are in need of our surpluses but small foreign countries who are in need of our surpluses, for which we are going to take their currencies. This is strictly a barter program. I like the illustration of locking the barn door after the horse is stolen. That is fine, but in the amendments that have been proposed they lock the barn door before the horse ever gets into the barn. So there is no chance in the world for this program to succeed if we support these amendments. That is my personal opinion and I hope everyone within the sound of my voice realizes what he is doing.

Some of the things previous speakers have said are correct. They have made some wonderful statements on this program. But after all, here is a program we have developed during great emergency in the world today. We have the surpluses to give away. I think we had better embrace the bill as it has been offered here, almost as the Senate passed it, and then you will have very little trouble getting this bill down to the White House.

Mr. GROSS. Mr. Chairman, I move to strike out the requisite number of words.

Mr. GROSS. Mr. Chairman, I was delighted to hear the gentleman from Ohio [Mr. VORYS] a moment ago properly label title I of this bill as strictly foreign aid. That is exactly what it is 100 percent, and it ought to be charged directly to the foreign giveaway appropriation.

I support the Rooney amendment and oppose the Whitten amendment. I know of no reason why the Committee on Appropriations should not take a look at how these counterpart funds are being spent. I note that there is $27 million worth of tobacco involved in the agreements that have been entered into up to February 28, 1957; $27 million worth of tobacco going to the United Kingdom.

Someone in this Government only a few years ago—I do not know who it was—but someone in this Government approved the British use of more than $1 billion of our counterpart funds to help retire their internal debt; and another $400 million of our counterpart funds to build airplanes. I understand some of that construction was commercial airplanes. Only recently, and I referred to this on the floor yesterday, a combine of British businessmen supported by their government, entered into a contract to build in Soviet Russia the biggest tire and rubber products plant outside the United States.

It appears these counterpart funds are being used indirectly to subsidize the building of rubber plants in Communist Russia and steel mills in India.

This is a good amendment and I hope it is adopted. Some committee certainly ought to scrutinize carefully the spending of these counterpart funds, and I say to the chairman of the House Committee on Agriculture that his argument against the Rooney amendment might have more validity had the Committee on Agriculture held hearings so that we could today read the hearings and thereby ascertain the justifications for the spending of the counterpart funds as proposed in this bill. Then the gentleman would be on far more solid ground in opposing the amendment.

Mr. COOLEY. May I say to the gentleman that we had hearings. We heard every living human being that wanted to be heard. I asked the question, "Is there a single witness here that is opposed to the bill?"

Mr. GROSS. Will the gentleman tell me where I can obtain a printed copy of the hearings?

Mr. COOLEY. I am not certain the hearings were transcribed. I am told by a member of our staff that they were printed and that they are available. Had we received any complaint about anything that was wrong naturally we would have inquired into it. My recollection is that all the farm organizations, all the Department officials, everybody appeared in favor of the bill.

Mr. GROSS. What I should like to see are the justifications for the expenditure of these counterpart funds as you have them set up in the report.

Mr. COOLEY. I have assured the House today we have the responsibility in our committee to look into these expenditures. We have a chart on page 8 showing exactly what became of the money, showing that 37 percent of the value was used to pay off obligations of our own Government. If you adopt the Rooney amendment, in my opinion, you are going to wreck the entire program.

Mr. ROONEY. Mr. Chairman, will the distinguished gentleman from North Carolina yield?

Mr. GROSS. I yield to the gentleman from New York.

Mr. ROONEY. I should like to point out that all we have in justification is page 8 of this report with regard to the amount of $1,984,000,000, with not even a transcript of the testimony of the witnesses heard before the Committee on Agriculture to justify it.

Mr. GROSS. Yes; and here is further wording in the report for which I would like an explanation from someone:

> Wheat is to be sold to Spain for resale to Switzerland for financing the procurement of Swiss goods for Spain.

Will somebody tell me what that means?

Mr. COOLEY. I can tell the gentleman what I know about that. It was a transaction under which Switzerland wanted some of our surplus grain from America shipped in with the understanding it would not interfere with normal shipments and the normal consumption of grain in Switzerland. Switzerland in exchange, according to my recollection, was to ship to Spain some high-class machinery, locomotives, and so forth.

Mr. GROSS. We could not produce high-class machinery in this country?

Mr. COOLEY. It was something Spain wanted from Switzerland in exchange for the commodities. We finally ended up with pesetas, and the pesetas were used to pay our obligations in Spain.

Mr. GROSS. We increase the tariff on Swiss watches and then turn around and subsidize this transaction between Spain and Switzerland. What I want to get at is this: What else are we doing with counterpart funds in many other countries of the world?

Mr. Chairman, I support the bill and the Rooney amendment. The Whitten amendment merely provides for another report that would undoubtedly be buried with scores of others that are called for each year from the various departments and agencies of government. Let us try to control the purse strings—not merely ask for another report.

Mr. COOLEY. Mr. Chairman, I rise in support of the Whitten amendment.

Mr. Chairman, I hesitate to prolong this debate, but I want to emphasize the importance of the vote we are about to take now. I think the amendment offered by the gentleman from Mississippi [Mr. WHITTEN] makes sense. It is perfectly reasonable for us to require a report. At the same time I am mindful of the fact that under the reorganization act, our committee already has authority to summon all of these officials before our committee and to inquire into each of these items. Had any member of our committee desired to have done so, he could have gone into these items in detail. But, no complaints have been submitted by those who are so apprehensive about the way this program has been administered. Since we had no complaints, there was no real reason for us to go into the matter any further than we have. The Members of the House talk about hearings and they wanted to have some accounting and they wanted the Appropriations Committee to pass judgment on these items. I wonder why those same arguments were not submitted at the time the original act came before this Congress. The original act is now the law, and I submit the law has been properly administered so far as we know up until this time. But, if it has not been properly administered, it is the responsibility of our committee to ascertain wherein it has been abused. I know you have some faith and confidence in the Committee on Agriculture. You know of our great interest in this program. I think the program has been mutually advantageous for us and for the countries with which we have been dealing. I do not know of any opposition, and I challenge any Member of the House Committee on Agriculture to stand up and say he is opposed to this bill. My recollection is that we were unanimous. As I said this morning, we considered this bill free from any partisan politics. I think this debate has been free from partison politics. I have been standing in the well of the House defending those who have been admin-

istering the program and I am perfectly willing to do so as long as the program is properly administered. But, if we adopt the Rooney amendment, we may just as well close up shop and let the people know that we have repudiated the President and that we have actually thrown doubt upon the agreements that have already been entered into. I think we will probably find upon inquiry that all of the counterpart funds now on deposit to the credit of the United States in various banks throughout the world are obligated in some fashion by the original agreements which resulted in the sale of our commodities.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield.

Mr. FULTON. I would like to point out to the Committee that in a communication of Mr. Benson, Secretary of Agriculture, on behalf of the administration he says:

> The Bureau of the Budget advises there is no objection to the submission of the proposed legislation to the Congress.

That is, the Bureau of the Budget approves the bill in this form. Mr. Benson says further:

> Enactment of such legislation would be in accordance with the program of the President.

So it is really President Eisenhower's program and we are voting his authority up or down in these two amendments.

Mr. COOLEY. I think the gentleman is correct. I think when you say you want to hold an ante-mortem examination rather than a post-mortem examination, you are reflecting upon those who are administering the program.

Mr. ARENDS. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield.

Mr. ARENDS. I concur in what the gentleman has just said. I think, if we adopt the Rooney amendment, we will find ourselves absolutely in an impossible position.

Mr. COOLEY. I think that is absolutely correct.

Mr. Chairman, the Whitten amendment requires a report and the report is to be submitted to the Committee on Appropriations. If anything does develop that is inappropriate, we can take the necessary action to correct it.

Mr. Chairman, I ask for a favorable vote on the Whitten substitute amendment at this time.

The CHAIRMAN. The time of the gentleman has expired.

The question is on the amendment offered by the gentleman from Mississippi [Mr. WHITTEN] in the nature of a substitute for the amendment offered by the gentleman from New York [Mr. ROONEY].

The question was taken; and on a division (demanded by Mr. ROONEY), there were—ayes 103, noes 45.

So the substitute amendment was agreed to.

The CHAIRMAN. The question is on the amendment as amended by the substitute.

The amendment as amended was agreed to.

Mr. WHITTEN. Mr. Chairman, I offer an amendment, which I send to the desk.

The Clerk read as follows:

> Amendment offered by Mr. WHITTEN: At bottom of page 2 add the following new paragraph: *"Provided,* That no commodity of which the Commodity Credit Corporation owns a supply shall be eligible for sale to foreign countries under the provisions of this act, unless such commodity is being offered for sale in foreign trade through normal trade channels at competitive prices for dollars."

Mr. WHITTEN. Mr. Chairman, I ask unanimous consent to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WHITTEN. Mr. Chairman, if I had to determine at the moment whether Public Law 480 had done more good or bad, I would be hard put to decide. The reason for that is that the Congress and the committees, acting in perfectly good faith, offered Public Law 480 as an additional means of disposing of agricultural commodities. Unfortunately, for a number of years Public Law 480 was substituted in place of sales through normal trade. There was a period of years when you could read in the U. S. News & World Report, Nation's Business, and other magazines the technical provisions of how to sell 480 commodities, as though that were the only way. This is surprising to some of you; but the Secretary of Agriculture, Mr. Benson, had been in office many months when he appeared before our committee, and it was brought out at that time that he did not even realize he had authority to sell for dollars. We had reports before our appropriations subcommittee from the Commodity Credit Corporation, and they referred to how many commodities they had disposed of and how much they had gotten rid of, how much had disappeared. The value ran into huge amounts of money. Never once in the report did they refer to how much they sold for dollars.

I am not going to make my sales speech all over to you again; but suffice it to say that our committee, in an effort to get United States commodities sold, went so far as to say we would not recommend any funds to control acreage of any commodities that CCC refused to sell for dollars. We set up a sales organization and tied the money down for that purpose only, in order to get this thing broken. During that period it was argued you had to sell under Public Law 480—that you could not sell for dollars. In 1953 CCC sold only $1,500,000 worth of commodities for dollars. In 1954 we insisted and got the Department to offer a few relatively minor commodities for sale, and they went like hotcakes—$92 million.

We insisted further in 1955 and we sold $219 million of commodities for cash. And, listen to this: In 1956, for the first time, the Department went all out offering these commodities, which had formerly been held for Public Law 480 sale for foreign currencies, in competitive markets for dollars and in 1956 the Department sold $2,723,000,000 worth of commodities for cash.

What is the difference? Where you sell under Public Law 480, do not be misled, our committee is asked to replace that money in appropriations. If you sell under Public Law 480 you have to restore the impairment of the capital of the Commodity Credit Corporation. In the bill we reported to you this year we provided $637 million in appropriations for losses in Public Law 480 sales.

Now the Department tells us that having sold $2,700,000,000 of commodities for cash, and that money went into the Commodity Credit Corporation as American dollars, it kept us from having to appropriate that money.

Next year the Department, if it keeps up this sales program through normal channels for dollars, through regular trade channels, estimates they can sell almost $4 billion worth of commodities, through normal trade channels.

My amendment merely says: "Mr. Secretary, Mr. Department of Agriculture, we approve Public Law 480; but we do not mean for you to substitute it for normal sales. You cannot give commodities away under Public Law 480 unless you put such commodity out on the counter offering it for sale at dollars."

The record clearly shows we would have saved billions of dollars in times past if they had sold these commodities in the open market, as they are selling them now; and the feeling on the part of the Congress and the country in the situation would have greatly improved.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield.

Mr. TABER. Have the authorities in the Commodity Credit Corporation or the Department of Agriculture the right to make these sales without the language the gentleman has proposed?

Mr. WHITTEN. Which sales does the gentleman have reference to?

Mr. TABER. The sales which you were urging in this amendment.

Mr. WHITTEN. The Commodity Credit Corporation charter, from the start, has given unlimited authority to the Secretary to offer these Commodity Credit Corporation stocks in world trade at competitive prices. That authority has been in the original charter throughout; and, in selling the $2,700,000,000 worth of commodities they sold in 1956, they were using the authority that had existed all along; and that authority still exists.

Mr. TABER. What change would that result in from the policy that has been followed lately?

Mr. WHITTEN. Since January 1956 it would not result in any so far as I know.

The purpose of putting this language in the bill is to avoid getting back into the old habit of letting some of our international traders perhaps talk us into not selling for dollars, but sell under Public Law 480 where we virtually give the commodities away for foreign currencies. It is to require a continuation of the good policy that has been followed for the last 18 months.

Mr. VORYS. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield.

Mr. VORYS. I believe the Fairless Committee appointed by the President made a recommendation along this line, and that they urged that sales not be made for foreign exchange. This would be in that direction.

Mr. WHITTEN. I thank the gentleman. And permit me to say at this time that I was pleased when the Secretary of Agriculture in appearing before our committee was very nice and complimentary to me for having insisted through the years that he use this method of offering for sale for dollars in normal channels. He says he has been greatly pleased at how well it has worked.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield.

Mr. COOLEY. I think the gentleman is in error when he says Public Law 480 was in operation in 1953. Actually it was not passed before July 10, 1954, and it was probably put into operation either in late 1954 or in full operation in 1955. I realize that within the last 15 months under pressure from Capitol Hill perhaps the Secretary has disposed of an unusually large amount of cotton.

Mr. WHITTEN. Has sold, if I may say to the gentleman.

Mr. COOLEY. Well, he has sold it for what?

Mr. WHITTEN. For dollars.

Mr. COOLEY. By reducing the price to the world price level or lower and taking a large and substantial loss of $535 million in 15 months.

Mr. WHITTEN. May I continue by pointing out that the maintenance and storage of these commodities was eating up hundreds of millions of dollars.

Not only that, but the record shows that every day and every month we kept that policy, the situation deteriorated still further. Rather than saying that the Secretary reduced the price I would express it this way, and perhaps you will say it is the same thing. There is no way of selling anything unless you make your price competitive. The authors of the Commodity Credit Corporation Act recognized that. There can be no other type of sale. So the losses that the gentleman mentions are much, much less than they would have been had you continued to hold the commodities. May I say again that some of the losses you had there ran as high as $40 a bale for storage during periods we were offering them for sale. I might point out that in February 1955, the Commodity Credit Corporation had $3,600,000,000 worth of farm commodities which had never been offered in world trade for sale competitively for dollars. We are remedying that situation at the moment. This amendment, if adopted, means that Public Law 480 shall not take the place of selling for dollars, but it will be an additional means and not be permitted to usurp and take away the normal trade through normal channels where we receive dollars for what we sell.

Mr. WATTS. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Kentucky.

Mr. WATTS. The gentleman in his amendment refers to commodities owned by the Commodity Credit Corporation. I assume he means commodities to which the Commodity Credit Corporation has title?

Mr. WHITTEN. Certainly.

Mr. WATTS. And not commodities we have an outstanding loan against?

Mr. WHITTEN. That is right. It would not refer to the latter instance. I hope the amendment will be adopted.

Mr. COOLEY. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Mississippi [Mr. WHITTEN].

Mr. Chairman, again I do not question the good faith of the author of this amendment but I do say that the amendment should not be adopted. The very law that we are dealing with contemplates sales and donations of surplus commodities over and above the normal requirements of recipient countries.

A moment ago we referred to transactions between Spain, Switzerland, and the United States. I understand that Switzerland accepted agricultural commodities from America over and above its normal consumption and normal requirements. If the amendment offered by the gentleman from Mississippi [Mr. WHITTEN] is adopted, it means that the Secretary of Agriculture will have to shop around the world in an effort to find a place to sell these commodities for dollars on competitive prices in the world markets, before he can offer to give them away or before he can barter them away or before he can sell for foreign currency. I think it is only reasonable to assume that the Secretary will sell for dollars wherever he has an opportunity to sell for dollars.

Just yesterday I spoke to one of the Secretary's assistants about the poultry situation in Germany. In that conversation I was told that we have a very substantial potential market for ready-to-cook American poultry in Germany. The Department did not want to be dangling the possibilities of gifts and sales in local currency over the head of Germany, however.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from New York.

Mr. TABER. The thing that bothers me about that is that I have heard that as a result of sales that might be forced on to the Department the prices of such things as cotton might be dropped so low to the foreign purchasers that they could come back into the market and shut up our cotton mills and that sort of thing.

Mr. COOLEY. What we are doing now is selling cotton at below the domestic market by 6 or 7 cents a pound. If we put American cotton under competitive prices on world markets we are going to be competing with the low standards of labor in all the cotton-producing areas.

I do not believe that we would want cotton to go that low.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Mississippi.

Mr. WHITTEN. I would like to correct one thing. In the first place, the amendment is limited to sales for foreign currencies and would not affect dollars. Section 22 of the Agricultural Adjustment Act provides protection from foreign imports authorizing the President to levy as much as 50 percent tax or put an embargo on, so we do have those protections in the law.

Mr. COOLEY. I am very cognizant of the fact that we have protection under section 22 to protect our own products here at home, and we also have authority, which we vested in the President last year, to negotiate with representatives of foreign countries to limit the imports of manufactured goods coming in in competition with domestically produced goods.

Mr. WHITTEN. While the gentleman is speaking against my amendment, I do believe I understood the gentleman to say that he does not believe in giving away commodities through aid if we are unwilling to sell them for dollars.

Mr. COOLEY. I do not believe the department has indicated an unwillingness to sell for dollars. They are selling for dollars now, and the only way they can sell for foreign currency is over and above agricultural consumption in recipient countries.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Pennsylvania.

Mr. FULTON. This is already in the law. On line 6, section 2, of the act it provides:

> And to stimulate and facilitate the expansion of foreign trade in agricultural commodities produced in the United States by providing a means whereby surplus agricultural commodities in excess of the usual marketings of such commodities may be sold through private trade channels, and foreign currencies accepted in payment therefor.

Mr. COOLEY. The gentleman is correct.

Mr. FULTON. And on specific instructions on negotiating agreements, section 101, it reads:

> (a) take reasonable precautions to safeguard usual marketings of the United States and to assure that sales under this act will not unduly disrupt world prices of agricultural commodities.

Mr. BELCHER. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Oklahoma.

Mr. BELCHER. The Secretary of Agriculture would not be permitted to sell for dollars to certain countries without the permission or consent of the State Department if it interfered with foreign policy.

Mr. COOLEY. That is right.

Mr. BELCHER. Then, if the State Department refuses to permit the Secretary of Agriculture to sell for dollars, he would not be permitted to take any action under this bill.

Mr. COOLEY. That is right.

Mr. BELCHER. It would just eliminate this bill if the State Department did not approve a sale for dollars.

Mr. COOLEY. I think the gentleman is correct.

I just want to say in conclusion before you vote on this amendment I think it is tremendously important, and I think it is very unfortunate that the gentleman from Mississippi did not present the matter to the Committee on Agriculture. I am sure that had he presented it to the Committee on Agriculture it would have been carefully considered; we could have had the views of the State Department officials and the Department of Agriculture and we could have had the benefit of a lot of information that we do not now have.

I hope the Committee will defeat the gentleman's amendment.

Mr. WHITTEN. Mr. Chairman, if the gentleman will yield further, the gentleman has rendered great service to agriculture, and I know that we are both trying to reach a common ground. Here is the point I would like to make. Under existing law you cannot use Public Law 480 if you upset any of the normal channels of trade. I would just like to point out that in 1953 we sold out of the Commodity Credit Corporation only $1.5 million and in 1954 $92 million. You could easily determine and pick up those years when we were not in the world market competitively.

Mr. COOLEY. You know and I know that we had an abnormal situation because we did not have a definite, positive program for cotton, and as soon as we had an announced program we started selling cotton. We sold a million bales in the first 40 days and about 9 million in 15 months, when we lost $535 million and we dissipated a profit of $267 million which we had January 1, 1953.

Mr. WHITTEN. We had already incurred the loss. We had the cotton and had no use for it.

Mr. COOLEY. We did not incur a loss. You could not have incurred a loss, because under the law you could not sell it for less than 105 percent of parity plus carrying charges. Soon after the Secretary announced the cotton export subsidy program, the $267 million profit which we had on January 1, 1953, had been dissipated. Now instead of having a profit of $267 million, we are told that within the last 15 months we have lost $535 million. Certainly, it is not reasonable to believe that the Secretary would sell cotton or any other commodity in any market to any buyer under any circumstances for local currencies or would barter with surplus commodities if such commodities could be sold for dollars in the normal channels of trade. I am certain that the Secretary would prefer to sell all of our commodities for dollars rather than for foreign currencies. I am likewise certain that he would rather sell for dollars rather than barter for materials or to donate to foreign countries. I hope that the amendment will be defeated.

Mr. BARDEN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I take this time just to ask this question of the gentleman from Mississippi. The chairman of the committee, the gentleman from North Carolina [Mr. COOLEY], just remarked that they had disposed of so many million bales of cotton. I would like to know, had that cotton been disposed of for foreign currencies, would the foreign currencies derived from that sale have been available to give away also for other projects without any check by the Committee on Appropriations?

Mr. WHITTEN. May I say to the gentleman that it would; and, if I may carry this one step further, in our bill this year there was $637 million provided to restore capital impairment of the Commodity Credit Corporation. If we had not sold these commodities in world trade for dollars, there would have been an additional request to this Congress to appropriate $2,723,000,000. So it is clearly to our interest to sell for dollars, and I think it is clearly to our interest to see that you sell for dollars before we start giving away the same commodities.

Mr. BARDEN. I should like to ask one further question of the chairman of the committee. Does the gentleman from North Carolina understand that the statement made by the gentleman from Mississippi [Mr. WHITTEN] is correct?

Mr. COOLEY. No; I do not agree with the gentleman that the losses were sustained before the cotton was sold. The gentleman said that we had to restore capital impairment of the Commodity Credit Corporation to the extent of $637 million. Five hundred and thirty-five million dollars of the loss was sustained on the cotton program that the gentleman has been advocating in the last 15 months. That is what the losses are, according to the Secretary of Agriculture.

Mr. BARDEN. And what would have been the situation under the gentleman's program?

Mr. COOLEY. Had we sold it in the foreign markets and above normal consumption in those countries, we would have received foreign currencies and could have used those currencies to build up the internal economy of those countries and for other purposes.

Mr. BARDEN. They could have used it for that purpose and for other purposes.

Mr. COOLEY. Yes.

Mr. BARDEN. Without the approval of the Congress?

Mr. COOLEY. Yes. Here is what the President could use it for. It is set out in the act itself under section 104.

Mr. BARDEN. Mr. Chairman, I should like to ask the gentleman this question. Had you sold it for dollars, with those dollars coming back here to our Government, could those dollars have been spent as you would have spent the foreign currency or would those dollars come to our Government and be subject to appropriation by the Congress?

Mr. COOLEY. The commodity that the gentleman from Mississippi [Mr. WHITTEN] spoke of sold for dollars, but sold at 7 cents a pound below the domestic market.

Mr. BARDEN. I want to know whether they sold it for 50 cents or whatever the price was, but for dollars, those dollars would have come back to this Government and then Congress would have control as it has over other Government funds.

Mr. COOLEY. No; they would have gone back to the Commodity Credit Corporation and used by the Commodity Credit Corporation for its original purpose.

Mr. BARDEN. And could not have been given away to strengthen the economy of the other countries without Congressional approval.

Mr. COOLEY. No; this $535 million that we lost was given away. We got nothing in return, not even foreign currencies.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. BARDEN. I yield to the gentleman from Mississippi.

Mr. WHITTEN. I will say this, that we sold and got the cash in the amount of $2,723,000,000. That money went to the Commodity Credit Corporation to meet the purposes of that organization, which are spelled out. In the absence of having collected that cash, if we had sold for foreign currencies or had given it away, let us say, we would have been faced this year with a request by the Department of Agriculture for an appropriation of $2,723,000,000 to restore capital impairment of the Commodity Credit Corporation.

Mr. COOLEY. Let me ask the gentleman this question. Suppose you had sold it in the world market at competitive prices, how much would you have had to appropriate to restore capital impairment of the CCC?

Mr. WHITTEN. We did restore that capital impairment by $637,000,000. But that is a far cry from over $3 billion which we would have lost if we had gone on under Public Law 480 instead of under the normal trade channels.

Mr. COOLEY. But you sold a substantial volume under Public Law 480 for foreign currencies.

Mr. WHITTEN. That is right. And we had to pick up the tab for $637 million, which amount our committee recommended appropriating and you passed on it.

In connection with the discussion the gentleman from North Carolina and I had as to when you lost the money on the cotton, if you have cotton on hand and do not need it, and are paying storage on it, and it is not worth in the world markets except what you can get, I respectfully submit that your losses were incurred when you got it on its decrease in value. You see the amount when you sell it, but the loss was there to start with. It was not worth any more than that whether you sold it or whether you kept it and paid something like a million dollars a day in storage.

Mr. COOLEY. The gentleman knows as well as I do that that cotton to which he is referring could not have been sold in the domestic market at less than 105 percent of parity with all the handling and other charges included.

Mr. WHITTEN. That is true.

Mr. COOLEY. Therefore, you could not have lost a dime until you embarked on the subsidy program abroad.

Mr. WHITTEN. That is right. We held it 8 years and we could not sell it on the domestic market.

Mr. COOLEY. The gentleman does not know what he is talking about. In

1953 we had an embargo on American cotton and could not send it out of this country.

Mr. BARDEN. Let me get it down to the point where even I can understand it. You have 100 bales of cotton. You sell it for dollars. Those dollars come back here, and every dollar that goes into the Commodity Credit Corporation means that Congress will have to appropriate that much less. Now you sell those same 100 bales of cotton for foreign currency. Where does that foreign currency go?

Mr. COOLEY. The fact is you would not sell that same 100 bales of cotton because this foreign currency sale must be over and above normal consumption.

Mr. BARDEN. Let us say we sold any 100 bales of cotton.

Mr. COOLEY. Where does the money go?

Mr. BARDEN. Yes.

Mr. COOLEY. The foreign currency goes wherever the original contract provides it should go.

Mr. BARDEN. What contract?

Mr. COOLEY. The contract which results in the disposition of the surplus commodity in the first place. That is the reason I say it is a contract made by the President, negotiated by representatives selected by the President. Of course the President does not go out and do all the negotiating himself. He does it under the law and under the spirit of the law. As to the counterpart funds, I may say to my friend, we have now not only a surplus of commodities but we have a surplus of foreign currency.

Mr. BARDEN. That is what I am talking about. I am interested in getting some dollars back instead of setting up a revolving foreign-aid program over which Congress will have no control over, and not even know what is being done with it or where it is.

Mr. COOLEY. It is in banks around the world.

Mr. MARSHALL. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, it has been my great privilege to serve on the great Committee on Agricultural Appropriations under the able chairmanship of the gentleman from Mississippi [Mr. WHITTEN]. The farmers of this country and the taxpayers of this country owe a real debt to our chairman, JIMMY WHITTEN, of Mississippi. He has done an outstanding job in our committee in attempting to get those commodities sold into competitive world trade and get as much money as we can from it.

Let me read his amendment:

Provided, That no commodity of which the Commodity Credit Corporation owns a supply shall be eligible for sale to foreign countries under the provisions of this act, unless such commodity is being offered for sale in foreign trade through normal trade channels at competitive prices for dollars.

What is wrong in selling our commodities for dollars if we can get dollars? What is wrong with using the normal trade channels? Is there anything wrong with that?

Mr. HARRISON of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. MARSHALL. I yield.

Mr. HARRISON of Nebraska. I think that is a part of the law, and I think the law has been carried out by the administration.

Mr. MARSHALL. I am glad to have my friend, the gentleman from Nebraska, make that statement. Therefore, since the law is being carried on in that particular fashion, this amendment fits right in with the manner in which the law is being administered. I know the people from the Department have been before us and they have said this is true. There is this thing that comes about, occasionally through misunderstanding and occasionally because of the overzealousness of some people, it is difficult to keep this thing in line. If we can sell these commodities for dollars and use the normal trade channels and get dollars, those dollars go back to the Commodity Credit Corporation. That is purely and simply all that this amendment does. What is wrong with that?

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. MARSHALL. I yield to my distinguished chairman.

Mr. COOLEY. I would just like to say, of course, every Member of the House would be in favor of using the normal channels of trade. But, if it is a normal transaction, it cannot be a foreign currency transaction. Foreign currency transactions are over and above the normal transactions. So the gentleman does not make a point when he says we should use normal trade channels. Certainly, we should. Nor when he says we should sell for dollars—to be sure we should sell for dollars. But we sell all we can for dollars in the normal way, and then over and above that we sell for foreign currencies. That is the whole program contemplated by this law. But, if you say that every bushel of wheat and corn and all other commodities must be sold for dollars in the world market sometime, somewhere, before we can resort to foreign currency transactions, you are going to bog down this program.

Mr. MARSHALL. I know my distinguished friend from North Carolina and also my good friend and my distinguished chairman from Mississippi, and a moment ago the distinguished chairman of the Committee on Agriculture, made the statement that it would be nice had this amendment been presented to the Committee on Agriculture before. I agree with the chairman. However, this bill goes to conference with the other body. What is wrong with including this amendment and then looking into it further? Certainly, if there is anything wrong, I know my chairman, the gentleman from Mississippi, does not want to do anything that is going to damage the sale of these commodities in any way and neither do I.

Mr. COOLEY. There is nothing morally wrong and there is not anything legally wrong about the gentleman from Mississippi not presenting it to our committee. I merely suggested that had he presented it, we would have considered it and we could have ascertained the facts from these officials who are administering this program. But, the gentleman did not do that and, therefore, we had no opportunity to hear him present his views.

Mr. MARSHALL. If the gentleman will excuse me, is that not what my good friend, the gentleman from Mississippi, is now offering you an opportunity to consider?

Mr. COOLEY. Yes; in the last few minutes of debate here, we get this amendment.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. MARSHALL. I yield.

Mr. WHITTEN. I wish to thank the gentleman for his very kind statement regarding me. I would like to point out that certainly it has been a pleasure to come before the gentleman from North Carolina and his committee on each occasion that I have appeared before his committee and each time I have been invited, I have gone to the committee. Unfortunately, I have been tied up on military appropriations work until just the other day since the 10th of January, and in view of these long hearings before the Committee on Appropriations, it is not always easy to find time to appear before the gentleman's committee. Until this bill came up yesterday, I did not know when the hearings were being held and I did not know along with many other people that the hearings would involve this matter. I thought that this was more or less a routine case of an extension of an existing law and presumably there was no need for lengthy hearings. I would like to say again, if I may impose on the gentleman's time, that this, contrary to the discussion you have heard about cotton, this has to do with all commodities. Under Public Law 480, if the Commodity Credit Corporation does not have a supply on hand, you can barter even though you have a supply.

Mr. MARSHALL. If my chairman will yield to me, I have looked over the amount of commodities which have been offered for sale, and while cotton is a part of it, certainly, the major proportion has been wheat, and there has also been rice and dairy products and a lot of other things.

Mr. Chairman, I urge the adoption of the amendment.

Mr. HOEVEN. Mr. Chairman, I take this time to announce to the Republican Members of the House that the conference called for this afternoon is being postponed until after adjournment tomorrow.

Mr. BROWN of Missouri. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I as unanimous consent to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. BROWN of Missouri. Mr. Chairman, I have great respect for the distinguished gentleman from Mississippi [Mr. WHITTEN], and the distinguished gentleman from Minnesota [Mr. MARSHALL], but before you vote on this amendment let me say a few words.

If it is in order, I would like to talk a little bit about the big purpose of this legislation we are discussing. It is interesting to argue about foreign currencies and about the prospects of dollar markets for some of our farm products, but let us face facts. The big possibilities in the Public Law 480 are to stabilize American agriculture at home. That is the initial purpose as outlined in the bill passed by the 83d Congress. And this act can have a tremendous impact on American agriculture prices at home, far greater than we are getting now, if it is administered aggressively with vision and ingenuity.

Let us open our eyes to some new horizons for a moment. In addition to all Commodity Credit Corporation surpluses that we have in warehouses that are costing us a million dollars a day to store, we are producing on the farms of the United States enough surplus food, extra food, to feed and partially clothe some seventeen to thirty million people—in addition to our population in the United States. What are we going to do with that surplus production?

I grew up in a town called Humansville, Mo., a town with a population of 757. We are just country folks down there, but whenever we have something on hand that we do not need and cannot use, we look around for some place to put it to work. We do not hang on to it and squeeze it and pay storage on it try to protect it as if it were a handful of diamonds. If we cannot sell it for what it is worth, we take a loss. We take less than what it is worth, because it is that much. And if we cannot sell it at all, we give it to somebody who can use it, because we believe that is the Christian way.

I ask you, are we using this surplus food and fiber to the fullest possible advantage? I submit that we are not. We are making an effort. Perhaps we have made some progress. But I will guarantee you that we are not using it aggressively, and with enough vision and ingenuity to get the full impact of it on the domestic farm market at home. That I submit can be done with only a few supplementary additions to the agricultural trade development and assistance law and by more aggressive, imaginative administration of it.

We start with surplus, market-depressing food and fiber. How can we use it?

Well, every time you turn around somebody is talking about countries overseas that are struggling to maintain their independence; people who are hungry and ill clad. The foreign-aid advocates say that those people must get a better break out of life and get a good meal now and then, if they are to stick with freedom and join us in the struggle against communism. Rightly or wrongly, we have helped a great many of them; but if you will notice, when the diplomats start doling out help, 9 times out of 10, it is scarce money or scarce steel or scarce industrial machinery. Only on rare occasions is it surplus food and fiber.

I saw a figure last night. I do not know whether it is correct or not, but a distinguished author says that we have spent some $60 billion in foreign aid in the last decade. Less than $5 billion of that, including the $3 billion in exchanges for foreign currencies, have been food and fiber. In this struggle against communism there seems to be a big place for American industry, but only a very tiny place for the American farmer. If we are really trying to keep the wolves away from the doors of some of these struggling new nations, if it is really in our self-interest, I submit that we must make better use and bigger use of the surplus food and fiber that we now have running out of our ears.

Wherein lies the best interest of the United States of America? To trade $10 million of surplus dairy products to some nation for its foreign currency or to give them 10 million American dollars?

Wherein lies the best interest of the struggling nation you are trying to help? To take American dollars, build them a plant that uses silica and operates only 30 days because it runs out of silica? We did that in 1 Asiatic country. Or would it be better to sell them at bargain prices in their currency some of our broiler meat that is depressing our domestic market. You know if they eat American-style broilers for awhile they will form a new eating habit and will want to start a broiler industry of their own and feed our feed grains.

A broiler industry will employ more people in one of these agricultural countries than any single industrial plant ever will. If you do not believe it, go down to the State of Georgia. Some 20,000 families are now employed down there today growing broilers. Thousands more are growing feed to feed the broilers; thousands more are dressing those birds, and others are hauling them to market. That is what I call a big industry, and it is far less costly to start than a heavy equipment plant of some kind.

But no, the people administering our foreign economic-aid program seem to think in terms of hydroelectric dams, steel mills, and tire-manufacturing plants. They forget that the United States of America started as an agricultural Nation, then improved its agriculture and gradually built industries out of the profits and demands of that agricultural economy.

But the experts seem to want to leap over a whole generation of sound economic evolution and plunge some of these countries into a giant industrial era before they are ready for it.

If the law we are considering were being used more aggressively it could improve farm prices at home and foreign relations abroad. I submit, however, the administration is not doing that; it is not using it with enough ingenuity and imagination. They are moving so cautiously and so fearfully that we are losing the full impact of its potential.

For instance, Mr. Benson knew by the 4th of July last year that we had a serious overproduction of poultry meat in this country. Under this law, Public Law 480, without any additional authority the executive department could have purchased some $5 million worth of breeder hens and roosters, cut broiler hatchings by a healthy reduction, sent those breeder hens to some South American countries where they want to get the business started, and we could have prevented the disastrous crash of the broiler market last fall, the worst poultry industry depression since the early 1930's.

Did Mr. Benson do it? Certainly not. Oh, he sold some poultry to Germany—one one-thousandth of 1 percent of the national production. And what was the glorious outcome of this picayunish effort? It was just like trying to raise the tide by pouring a teaspoonful of salt water into the Atlantic Ocean. It did not help the agricultural picture at home because it was not bold enough in its concept, courageous enough in its execution. Let me give you another example.

The price of milk today in the market place is so low that you can't make a living out of milking unless you have so many cows in the stanchions that it takes you until midnight to get them milked.

Dairying is a $4 billion a year industry in the United States. Since this Public Law 480 was passed, American dairy farmers have produced some $10 billion worth of dairy products. Some 2 percent of it has been market-depressing surplus.

Has the administration used this Agriculture Trade Development Act to stimulate foreign sales? Look at the committee report: $25 million worth of milk in 3 years. That is two-tenths of 1 percent of production, and even then, Mr. Benson was afraid he was overdoing it.

Did you read the President's last semiannual report on activities under this law, July 1 through December 31, 1956?

On page 21, it says "Butter and butter oil were withdrawn July 1, 1956, because CCC inventories were depleted." And for the same reason, dry milk foreign donations were reduced substantially during the third quarter of the year.

Now, what kind of foolishness is this? Mr. Benson has yelped for 4 years about market-depressing milk surpluses. He gradually worked them down; and last July, just as the warehouses were about empty, when just a tiny bit more foreign trade would have adjusted supply to the point of profitable domestic demand, what does he do? He cuts out Public Law 480 foreign trade. Maybe he stabilized the price of milk but he stabilized it at a bankruptcy level.

Now I understand butter and dairy products are backing up on him again, because cautious, fearful administrators quit operating just at the point when they could have helped.

Now look—there are 4½ million farmers in the United States, each trying desperately to make a living in these times of higher and higher price tags on everything they buy. Not a one of them has a defense contract.

None has suffered from all this foreign aid.

This spring—as every spring—they started out to produce food and fiber to feed and clothe the people of the United States. And not a one of them knows what quantity of any product he, himself, will produce—much less what the total national production will be—whether there will be overproduction

or underproduction, because there are too many hazards, too many unpredictable factors.

Even if he tries to hold down production, he must allow a small margin for error or unexpected mortality, for droughts, and floods.

And yet, it is that vital, necessary margin for error that is killing the farmer in these times of inflation.

A little too much milk and grade C milk drops to $3 a hundred. A few too many turkeys, and turkeys drop to 25 cents.

Now maybe that situation is more or less normal in peacetime, when prices on automobiles, refrigerators, gasoline, and other commodities rise and fall with supply and demand.

But these are not peace times. There is a cold war going on—a struggle against communism—and big industries and their industrial workers are participating in that struggle, profitably, very profitably, on purchase contracts signed by the United States Government.

Now, why cannot the American farmer be included in that charmed circle? Is there any good reason why more of his food and fiber cannot be utilized more efficiently and aggressively in combating the Communist menace?

Nothing could be sounder than taking something you do not need, something that is actually a temporary liability to you and depressing the value of other things you do need, and trading it for something that might be worthwhile—new customers for tomorrow, new allies against communism today.

If we will continue this Public Law 480 as a foundation and then expand it with some new ideas, and get them aggressively administered, we could have a successful temporary farm program.

For instance, would this be possible? Suppose there is going to be a 3-percent surplus of dairy products this year, over and above domestic consumption, make it mandatory that 3 pounds of milk out of every hundred that a farmer sells is impounded for foreign market development and the Government pays only half price or so for that 3 pounds.

In fact, any farmer could afford to give you 3 pounds of milk free, if it meant that he could get 90 or 100 percent of parity for 97 percent of his production.

Right today, in the case of turkeys, with a tremendous carryover from last year, you could impound a percentage of this year's production at a very, very reduced price, and the grower would be better off by getting a decent domestic market price for what we will eat here at home.

And it could lead to new markets.

If we take some shiploads of tender juicy broilers or broad-breasted turkeys to some of these countries, sell them at even ridiculous prices with 1-cent-sale gimmicks and a little Madison Avenue-style promotion, the people will learn to like them. Then, see if we do not develop a customer for the United States farmers' extra food production.

And let us make even better use of this foreign currency. Loan it to some resourceful, aggressive American small-business men who will move a little basic equipment into one of those countries and, with a lot of ingenuity plus what that local currency would purchase, build industries and create new wealth.

Regardless of how it is done—the basic principle is this: We have a tremendous asset in our food and fiber production capacity that is now going to waste. Let us use it in the struggle against communism and invest it in developing new markets.

And let us not pussyfoot around about it. Let us either go into it aggresively to get the job done and make the trading of worthless food surpluses the major part of our foreign aid, or let us drop foreign aid completely.

It may be more difficult to give food away than it is to give dollars, but we have surplus food and we do not have surplus dollars.

And furthermore, if this international struggle against communism is half as serious as the foreign affairs experts say it is, we need the American farmers' productive power as much as we need American industrial power.

Let us renew this Public Law 480 and use it as a foundation for a cold war farm program that will put the American farmer on an equal basis with the American industrialist in the fight for freedom against Communist encroachment.

Mr. O'NEILL. Mr. Chairman, I move to strike out the requisite number of words.

Mr. Chairman, a Member asked what we did with the foreign currency. I have here the statement of Mr. Gwynn Garnett, Administrator, Foreign Agricultural Service, before the House Committee on Agriculture on March 29, 1957. In part, Mr. Garnett said:

> Substantial amounts of the foreign currencies are being used to promote economic development. Virtually all of these development funds are loaned to participating countries with programs being worked out by the foreign governments in cooperation with the United States. Direct grants of currencies for economic development purposes are made only in special circumstances.
>
> Of the agreements signed to date, almost 60 percent, or about $1.1 billion of foreign currency payments is earmarked for use for economic development loans. The administration of the loan funds is the responsibility of the International Cooperation Administration. Considerable emphasis is placed upon coordinating plans for the use of these funds with the overall development programs of the countries. In considering loan projects for agricultural purposes care is exercised to avoid encouragement of production which would result in reduced outlets for United States agricultural commodities.

So up to the present time we have practically given away $1,100,000,000 in money which we have loaned to these various countries. If we keep on lending this money to these countries we are going to have to put money back into the CCC funds.

Mr. Chairman, I therefore want to go along with the amendment offered by the gentleman from Mississippi [Mr. WHITTEN].

Mr. McINTIRE. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, it has been pointed out to the Committee that in the language of this bill under title I the Department is instructed to take reasonable precautions to safeguard normal and usual marketings of these commodities. I think perhaps we lose sight of the tremendously complicated matters with which we are dealing in the handling of these commodities abroad. I think the Department is to be commended in their efforts not to disturb the price domestically. They are to be commended in their efforts to make sure that those commodities are used in excess of those which are going through normal channels.

I think this amendment, while I have a great deal of respect for the gentleman from Mississippi in his sincerity in offering it, accomplishes nothing but to aggravate and complicate the administration of this bill. So, I think in that in balance it would add nothing and would simply turn out to be a further complication, making the bill more difficult to administer. It is very difficult as it is.

Mr. Chairman, in my opinion, this amendment should not be approved.

Mr. HARVEY. Mr. Chairman, will the gentleman yield?

Mr. McINTIRE. I yield to the gentleman from Indiana.

Mr. HARVEY. Is it not true that the administrators of this act have been guided on every occasion and also have taken into consideration the views of the State Department in regard to these programs to make sure that the surplus commodities do not in any way interfere with the regular channels of trade?

Mr. McINTIRE. That is my understanding. I might say to the gentleman from Indiana that in consideration of this legislation the Committee on Agriculture of the House has conferred with representatives of the State Department and it has been our intention that the language of this legislation would lend itself to cooperative action on the part of the Department of Agriculture and the State Department. I believe that this amendment, as offered by the gentleman from Mississippi, while it has a commendable objective, is not necessary, because instruction in this regard is implicit in the legislation itself.

Mr. SISK. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I take this time to inquire of the Chairman of the Committee regarding a matter of considerable importance to my particular district. It seems, in some of the discussions that have gone on, that some of these programs are intended primarily for cotton. I was a little bit concerned about the colloquy that went on a little while ago between the gentleman from North Carolina and the gentleman from Mississippi as to whether or not we were just talking about cotton. But I have a concern above and beyond cotton, if I may say to the distinguished gentleman from North Carolina, and I call his attention to the third paragraph on page 3, where, in your report, you discuss the fact that this program might be applicable to items that are not held in the inventory of the Commodity Credit Corporation.

I would like to have the gentleman state to me what the intent of his committee, and thereby the intent of the Congress is with reference to that.

Mr. COOLEY. Section 106 reads as follows:

SEC. 106. As used in this act, "surplus agricultural commodity" shall mean any agricultural commodity or product thereof, class, kind, type, or other specification thereof, produced in the United States, either privately or publicly owned, which is or may be reasonably expected to be in excess of domestic requirements, adequate carryover, and anticipated exports for dollars, as determined by the Secretary of Agriculture.

That is the law and that is the definition of surplus agricultural commodity. I direct the gentleman's attention to page 13 of our report, to the subhead "Fruit and Other Commodities." I do not want to take all of the gentleman's time, merely to say that it does include poultry, citrus fruit, and other commodities, whether they are owned actually by the Commodity Credit Corporation or not.

Mr. SISK. In other words, it is the intent of the Committee on Agriculture and the intent of the Congress that Public Law 480 shall be used for any agricultural commodity in surplus whether or not it be in Commodity Credit Corporation inventory; is that correct?

Mr. COOLEY. Yes, sir; I think the gentleman is correct. And I am glad the gentleman has mentioned it because some of the poultry producers have been very anxious about the poultry program. I am assured, I am certain that the Congress intends that the same interpretation be placed upon this law as the gentleman has indicated he interprets it.

Mr. SISK. I deeply appreciate the statement of the chairman because for the past 2 years I have been attempting to get that very kind of interpretation from the Department of Agriculture and only within recent months have we been able even to get our foot in the door to any extent. So it would be my hope and as I understand it is the position of the committee, that the Department of Agriculture will so interpret the law.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. SISK. I yield to the gentleman from Mississippi.

Mr. WHITTEN. The gentleman made a point earlier concerning the amendment. May I say again that this applies to those commodities of which the Commodity Credit Corporation owns stocks or a supply and it would not restrict other commodities. While we had our colloquy on cotton, this applied to all the commodities that the Corporation has.

Mr. SISK. I appreciate that statement. I, too, have cotton in my area, but I wanted to call attention to the fact that this is applicable to many other commodities that many of us are very much concerned about.

Mr. SMITH of Wisconsin. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

INTERNATIONAL COMMUNISM SEEKS TO DISARM AMERICA

Mr. SMITH of Wisconsin. Mr. Chairman, the Communist conspiracy is seeking to disarm America. By clever propaganda, it is seeking to create a national hysteria so the people will demand that our H-bomb testing be stopped. The campaign is underway and its objective is to spread fear among Americans and thus eventually disarm our country.

This first became evident when a copy of the Sunday Worker came to my office recently. A first glance puzzled me. The Communist tabloid carried a banner headline which read: "'Catastrophe'—If World Fails To End H-Tests."

There on the front page of this Communist propaganda sheet was the picture of Pope Pius XII. With it was a story saying the Pope was appealing to mankind to stop its race toward what it called atomic death.

Also, there appeared the picture of Dr. Albert Schweitzer, the Nobel prize winner, humanitarian, and scientist. And to my amazement, this Communist organ carried a long article by Dr. Schweitzer appealing for an end to nuclear tests.

Mr. Speaker, it soon became clear to me why this free copy of this particular issue of the Communist Sunday Worker had come to my office. It was the launching of a massive crusade to end the H-bomb tests. This was reported by the International News Service, and I quote:

> The biggest, boldest, Communist-sponsored global drive for "ban the bomb" signatures starts rolling this week. The Red-inspired petition propaganda campaign aims to enlist millions to force the United States to halt H-bomb tests immediately.

Later, I heard a newscast on a Washington radio station report on the situation. The first story was one quoting a leading scientist to the effect of the terrible ravages the H-bomb tests were causing the human race.

Was this all accidental timing? Or was it part of the campaign as revealed in the news reports?

The scientist who was quoted spoke out in Chicago. All three major press services carried the story. The scientist, identified as a Nobel prize winner, gave this alarming scare report:

> Ten thousand are dead or dying around the world because of the atomic or hydrogen bomb tests carried out to date.
>
> Dr. Linus Pauling, a chemist at California Institute of Technology, said if Great Britain performs scheduled hydrogen bomb tests on Christmas Island in the Pacific, another 1,000 will die of leukemia.

The test was held and the predictions of Dr. Pauling did not occur.

In reading the CONGRESSIONAL RECORD of April 30, I was further amazed. Dr. Schweitzer's long article which had appeared in the Communist Sunday Worker under his byline had been inserted in the CONGRESSIONAL RECORD by a Member of this House. He referred to Dr. Schweitzer as one of the world's greatest men and stated that the article appealing to end nuclear tests had been printed in the New York Times of April 24.

It then became apparent that Dr. Schweitzer's article had appeared in the New York Times 4 days before it was carried in the Communist propaganda paper. This alarmed me. So I compared the articles. They were identical, word for word.

It is clear what the Communists are doing. They are using the great humanitarians and the great men of peace of our day as tools of their propaganda. They are placing themselves on the side of peace. They are identifying themselves with the great cause of humanity. They are donning the cloak of respectability in the eyes of the unthinking. They know that when people are emotionally disturbed, their thinking processes are impaired. This is what wins good people to their evil cause.

Though they denounce guilt by association they seek to attain respectability by association. Never in the history of man has there been recorded such deception that composes the heart and soul of Communist propaganda. And in their reckless use of good people, they abandon all respect for the dignity of such people. Their only concern is for that which is of value to them.

It was not unusual therefore that it should be brought to my attention by Mr. Norman Cousins, the editor of the Saturday Review that the Communists had exploited Dr. Schweitzer's statement.

Writing in the Saturday Review, Mr. Cousins revealed that he had urged Dr. Schweitzer to speak out on the H-bomb subject.

Had not Mr. Cousins encouraged Dr. Schweitzer to make the statement, the Communist conspiracy would not have been provided with a tool for propaganda purposes. This is the tragedy of the age in which we live that the free peoples of the world are providing the tools for their own destruction.

In his letter to Members of Congress, Mr. Cousins did not take exception to the fact that the New York Times had published the same Schweitzer statement as was carried in the Sunday Worker. He did not criticize the Times for carrying the same excerpts of the statement. Indeed, this opens the way to many questions.

Someone, somewhere, took it upon himself to edit the Schweitzer Declaration of Conscience. Whoever did it did a thorough job. The original statement printed in the Saturday Review covered 88 column inches. The edited version carried identically by the Times and the Worker measured about 37½ inches. Thus the Times and the Worker left out more than 50 inches, or over half of the original statement of Dr. Schweitzer.

The question arises: Did someone edit the statement and provide separate copies to the New York Times and the Daily Worker? Or did the New York Times edit the statement and the Daily Worker lift the statement from the Times for its Sunday edition?

One of the paragraphs which the Times and the Worker left out in their versions referred to guaranties that nuclear agreements would be kept. The version printed in the Times and Worker concentrated on the horrors of further nuclear testing and urged that public opinion demand that such tests be halted. But the paragraph indicating that guaranties, reliability, and trust be fundamental to any agreement was not printed by either the Times or the

Worker. The following is one of over 45 paragraphs omitted in the identical reports of these two publications:

An agreement * * * presupposes reliability and trust. There must be guaranties preventing the agreement from being signed by anyone intending to win important tactical advantages foreseen only by him. Public opinion in all nations concerned must inspire and accept the agreement.

Mr. Chairman, I submit to you, to the American people and to the world that here is a clear-cut case of where well-intended humanitarianism has been used by the Communist conspiracy. Though such humanitarianism is well-meaning, I say to you that it is dangerous to even contemplate the possibility of reaching agreement with godless communism on any issue. Those leaders, such as Dr. Schweitzer and Pope Pius XII, who speak out only to have their words turned into words of Communist propaganda, are indirectly assisting those forces which would disarm us.

What are the people of America and the rest of the world to think when our leaders one day say: "You can't trust the Communists" and the next day, those same leaders say: "We must come to an agreement with them on the H-bomb"? We are playing into their hands. We are following the road which 40 years of history has shown to be littered with broken promises and captive nations.

The liberals and humanitarians of today are only courting danger when they espouse the causes which communism is promoting.

The Communists are not humanitarians. They do not wish to stop the H-bomb tests because of any radioactive danger to humanity. Their motive is diabolical. Under the pretense of noble virtue, they seek to take from us the strength and the power which are sheltering our freedom. Once they have taken from us the weapons of defense, they will then take from us the liberty which we have cherished since the days of 1776.

The Communist conspirators are tackling this project on an organized basis. On May 13, the International News Service reported:

Communists put the chain letter to work last week to pressure the White House into halting the H-bomb tests.

The nationwide mail device is another step in the high-powered Red fear propaganda campaign, now at its peak.

The purpose: Grassroots support to force an end to hydrogen experiments—without waiting for international agreements providing protective safeguards.

That is the way the Communist conspiracy affects policy. It saturates the public with its propaganda message. The message is wrapped in pretty paper with liberal thinking and tied with ribbons of humanitarian ideals. Thus camouflaged, the propaganda message brainwashes 170 million Americans. Moved by these emotional appeals, the mass of America asserts its voice upon the leaders of their government. Public opinion demands a change in policy, or a new policy. Government leaders, sworn to serve the people, acquiesce to what they believe to be the will of the people. Thus like a chain, Communist propaganda exploits the very basic principles of democracy and subverts them to its own depraved ends.

If Dr. Schweitzer's statement was used as a propaganda tool by the Communist Sunday Worker, was it no less so when it appeared in the same context in the New York Times? Was not the Times just as responsible in the errors of omission as was the Communist Worker? Should not Mr. Cousins be as disturbed with the Times as with the Communist Worker, for they both printed identical portions of Dr. Schweitzer's appeal?

Is it not clear that liberal forces serve the Communist cause when they indiscreetly proceed to proclaim to the world the No. 1 tune on the Communist hit parade? Until the liberal elements are convinced in their hearts as well as in their minds of the terrifying evil that communism is, the free world will be in dire jeopardy both from within and from without.

That is the real danger that faces us. The danger is not radioactive fallout. To be sure, there are some scientists who have expressed concern about that matter. But there are just as many who contend that there is no cause for alarm. Are we to blind ourselves to the real danger—the growing Communist conspiracy—as compared to a far less danger which is highly disputed. There is no dispute about the Communist menace. It is a real subversive threat. There are no pros and cons about it. It has resolved to push us to our graves.

Who are they who are trying to make us believe that radioactive fallout is a greater threat to humanity than the Comunist conspiracy? They who seek to propound this belief are blinding themselves and their fellow men to the realities of the hour. They are overlooking the fact that the Communist conspiracy is the cause of most of the world's problems today. Indeed, it is the real reason why there is radioactive fallout in the sky at all. Were it not for the threat posed against humanity by the men in the Kremlin, there would be no need for the H-bomb tests. There would be no need for the guided missiles or our spending for national defense.

Indeed, the real threat is the threat to our freedom. It is the conspiracy taking form to disarm us. How can freedom be defended without the weapons of defense? Will we be forced to make grenades from bottles of gasoline as were the valiant patriots of Hungary who had been disarmed?

Yet the propaganda mills are churning out hysterical outcries about the terrible dangers of the very weapons that would defend us—the very weapons which have virtually made war obsolete. Are we to submit to these propaganda outcries and disarm ourselves in the face of the conspiracy laying siege to our institutions, our traditions, and even our code of morality. Mr. Speaker, I reiterate that we cannot let the superficial, disputed fear of radioactivity blind us to the greatest threat of all—atheistic communism.

This evil alone has killed more people in its 40 years of life than all the H-bomb testing we could do from now until years to come. Why do not the scientists tell us about the millions which communism has "scientifically" and "unscientifically" liquidated?

If there is a threat to humanity, it is only because communism exists and is scheming to disarm us so it can destroy our way of life. That was the way the Reds won China. Our wartime leaders kept war material from reaching Chiang Kai-shek, material which we had promised to deliver to him. They weakened him militarily. They disarmed him.

Now the plan is to disarm America. The disarmament plans are being discussed. And Moscow and the Communist propaganda machine are saturating America with their pleas to stop the H-bomb tests. They are using our humanitarians, our men of religion, and even the chain-letter routine as their tools. No sane man would believe that Moscow's motive was in the interest of human decency. To accept that would be a total error in the reading of history. For Moscow's motive over the span of 40 years has been based on how to win control of the world.

The double danger involved is that the Communist appeal is tailored for idealists, liberals, some religious leaders, and wishful thinkers. Mr. Adlai Stevenson loudly called for working out an agreement with Russia to end the nuclear testing during the last political campaign. The reaction of the American people to his suggestion was repudiation at the polls.

This business of trying to work out agreements with Soviet Russia borders on sheer insanity. Anyone who proposes such a course is to say the least naive in his concept of world communism.

Even former President Truman admits that he found this out the hard, bitter way. He is now one of the most vocal in stating that "we can't trust Russia." Said Mr. Truman on a Milwaukee telecast:

If you'll read the agreements that were made at Yalta and the agreements that were made at Potsdam, 32 of those agreements were broken within 1 year, and that's what caused the difficulty. The Russians didn't keep their agreements, and they won't keep them now.

Those who are realistic about Soviet Russia state categorically that there can be no trust placed in a nation whose past record is one of complete insincerity. One of those to speak out just recently was none other than the highest military official in the United States, Adm. Arthur W. Radford, Chairman of the Joint Chiefs of Staff. As the Nation's senior military authority, Admiral Radford voiced blunt distrust of Russian disarmament proposals advanced at London. He was quoted by the press as saying:

We cannot trust the Russians on this or anything. They have broken their word too many times.

Indeed, the record supports this indictment. Ever since 1917, world communism has regarded an agreement but a scrap of paper. An agreement to it

is but a means to an end, a mirage, a delusion, a vehicle of expediency. In a study of this subject, the Senate Internal Security Subcommittee found that the Soviets have broken their word to virtually every country to which they ever gave a signed promise.

Said Senator EASTLAND:

I seriously doubt that if during the whole history of civilization, any great nation has ever made as perfidious a record as this in so short a time.

History is crowded with warnings about trusting this international outlaw. At Paris in 1919, Clemenceau of France said:

I need not say how valueless their promises are.

Speaking of the Bolshevik leaders of Russia.

On March 28, 1919, also in Paris, Herbert Hoover referred to bolshevism as a "murderous tyranny" which "we cannot even remotely recognize" let alone execute with them a valid and lasting agreement.

And in a speech on September 6, 1919, in Des Moines, President Wilson declared:

It (bolshevism) is the negation of everything that is American, but it is spreading and so long as the world is kept waiting for the answer of the kind of peace we are going to have and what kind of guaranties they are to be behind that peace, that poison will steadily spread more and more rapidly until it may be that even this beloved land of ours will be distracted and distorted by it.

One year later, President Wilson's Secretary of State, Bainbridge Colby, warned again:

The existing regime in Russia is based upon the negation of every principle of honor and good faith. * * * The responsible leaders of the regime have frequently and openly boasted that they are willing to sign agreements and undertakings with foreign powers while not having the slightest intention of observing such undertakings or carrying out such agreements.

Charles Evans Hughes repeated this warning in 1924. And in 1955, William C. Bullitt said:

The aim of the Soviet Government is and will remain, to produce world revolution.

That the Soviets have no intention of keeping an agreement to ban nuclear weapons is not only clear from past history and past warnings; but Soviet leaders themselves openly boast that agreements are mere devices. The record has stated this for all to see.

Zinoviev, a Lenin lieutenant, in 1919, said:

We are willing to sign an unfavorable peace—it would only mean we should put no trust whatever in the piece of paper we should sign. We should use the breathing space so obtained in order to gather our strength so that the mere continued existence of our Government would keep up the worldwide propaganda which Soviet Russia has been carrying on for more than a year.

Stalin was equally as despicable in dishonoring agreements, as Mr. Roosevelt and Mr. Truman so painfully found out to the sorrow of all. Said Stalin:

Words must have no relations to actions—otherwise what kind of diplomacy is it? Words are one thing, actions another. Good words are a mask for concealment of bad deeds. Sincere diplomacy is no more possible than dry water or wooden iron.

Those who speak of agreements with Russia now are grossly uninformed on the history of dealing with that nation. Those who say we can work out some system of trust so that the Russians will also ban their weapons are courting certain suicide.

That is the motive behind the propaganda to ban the H-bomb tests—to disarm the free world—to swing the balance of power and control to the Communists. Communist publications and literature are filled with propaganda imploring the United States to disarm and become humanitarian. But these same Communist organs fail to urge the Kremlin to do likewise. They fail to mention that Russia has 175 divisions under arms while we have only 19. They fail to say anything about Russia's 400 submarines and its air force and atomic weapons. It is only America whom they want to disarm.

Listen, if you will, to this pertinent passage from the January 1957 issue of Political Affairs, the monthly Communist pamphlet which lays down the Communist line in America. It said:

Great headway could be made in Congress and in 1958 and 1960 were labor to develop its own positive peace based on a settled national policy of peaceful negotiations and peaceful coexistence, expanded world trade, an end to H-bomb tests and the peacetime draft and a shift of the swollen arms programs to peacetime production.

Note the great emphasis the Communists place on disarming America. The entire Communist program is aimed at weakening the United States militarily. First, it would seek an agreement on the H-bomb which in reality would mean a return to conventional warfare if such occurred. But secondly, there is included the proposal to do away with the draft which would be a great blow to a nation forced to fight a conventional war.

To accept the Communist program would be counter to all commonsense, counter to mankind's very desire for self-protection and self-preservation. We must remain strong in this time of great danger.

To discontinue the perfecting of our weapons of defense and to seek an agreement with the unworthy Soviet leaders would be an abdication of our responsibility to mankind. To do this would be to forfeit our very insurance policy against war and against conquest. Our strength is our insurance. To forfeit our strength is to forfeit our insurance. That is tantamount to disaster.

One whose opinion on this is highly respected is William L. Laurence, a world famous science writer, who was the only journalist at the first atom bomb test in New Mexico in 1945. He also saw the bombing of Nagasaki and won a Pulitzer prize for his story on that attack and for subsequent articles on the development of the atom bomb. Mr. Laurence sees virtue in the possession of the hydrogen bomb, not unlimited danger. He says it is a savior of mankind; not a destroyer of it. Let me quote him:

This great iridescent cloud with its mushroom top * * * is actually a veritable protective umbrella that will forever shield mankind everywhere * * * against the threat of annihilation in any atomic war.

Any sizable war has become impossible, because no aggressor could from now on even dare to start an aggressive war, without the certainty of absolute and swift annihilation.

This world-covering, protective umbrella * * * will continue shielding mankind everywhere. * * *

To those who would have us stop our tests in the Pacific, I would therefore say: "These tests * * * serve as an effective substitute for war. History will record that World War III was fought and won on the Pacific proving ground."

It was when I saw that awesome force blast the peaceful Pacific sky that I believed the human race was freed from the threat of nuclear war.

From this expert observer, we see that nuclear weapons are the protectors, the shepherds of the civilized world. Mr. Laurence contends that the mere existence of these nuclear forces has virtually nullified the possibility of war. This is something that man has tried to do from the beginning of time; to outlaw war—to make war impossible. Thus the hydrogen bomb has invaluable virtue by its mere existence.

I say to my colleagues and to the world that the threat of atheistic communism is a far greater threat to mankind than the disputed fears over radioactive fallout. Communism has permeated all of society. It is a vicious evil destroying nations, civilizations, cultures, and peoples. Its radioactive propaganda has been poisoning the minds and hearts of men since the birth of its philosophy 109 years ago. The terror which it has visited upon humanity beggars description.

Let us never, in a fit of folly, submit to the urging of those who would have us disarm ourselves in face of this stupendous threat. Let us not become victimized by "nuclear neurosis" and unwisely compromise away that which is saving us. Let us rather keep strong—strong in our defense, strong in our spirit, and strong in our fervent belief in God. If we do that, no one will be able to disarm us. No one will dare challenge us. And we shall remain free.

Mr. POAGE. Mr. Chairman, I ask unanimous consent that the Clerk again report the amendment of the gentleman from Mississippi.

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

(The Clerk again reported the amendment of the gentleman from Mississippi [Mr. WHITTEN]).

Mr. POAGE. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I take this time first to ask the gentleman from Mississippi just what effect this would have upon the sale of rice, as an illustration.

Mr. WHITTEN. It would have the effect of preventing the sale of any commodity for foreign currencies where the commodity is given away if we do not sell it for dollars. It so happens that at the moment I did not know we were selling rice for foreign currencies that we could not sell for dollars. But in all frankness I would say that it is my

opinion, looking at the American financial interest and the interest of the farm program that we should not give commodities away when we could sell them and get dollars. That is what my amendment is intended to bring about, and if rice is being given away now, this would stop it.

Mr. POAGE. I do not know that rice is being given away anywhere. Rice is being sold for foreign currencies. I understand that rice is not being sold on the world market for dollars, because of the 105-percent program at home, and we have no particular export program for rice that I know of. But I merely use that as an illustration. I would like to say this points up the danger of something that looks good on its face, and that may be good. I would not say that it might not work out, but this amendment certainly has so many unknown factors in it, there are so many involvements about which none of us are sure; even the author of the amendment is not sure, that it seem clear that we should not pass it without considerable study.

I make no charges, but I do know there are not three Members of this House who understand what this amendment will do. The gentleman who offered it did not come before the committee. The committee had no opportunity to try to find out what it would do. We cannot find out here on this floor what it will do.

We have a program that is working pretty well. We have a program that has been moving a lot of commodities. We have a program that has been probably the most successful of the agricultural disposal programs. This might be a helpful amendment, and I certainly agree with the gentleman we ought not to sell even for foreign currency something we can sell for dollars. But our basic law provides that you cannot sell any of these commodities as long as the normal market in the normal channels of trade exists. Our Public Law 480 sales must be in excess of the normal trade. Consequently it seems to me we have in the basic legislation protection against the very thing the gentleman from Mississippi wants to protect us against, and the committee wants to protect us against. We are protected against that by the basic legislation.

The gentleman comes and suggests legislation to us. Neither he nor I nor the chairman of this committee nor any other Member of this House knows what it will do. It might not do a thing in the world except what the present law is doing. If it does not, we do not need it. If it does anything else, it is something we do not know about. It may very well destroy the usability of this program for a good many segments of agriculture.

I hope you will vote down the amendment.

Mr. WHITTEN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I regret to take this additional time when everyone wishes to vote. When the gentleman from Texas said I was unaware of what this amendment would do, I think he is in error. The amendment will do what it says it will do. If we are giving away commodities that could be sold for dollars, it would stop such practice. I do not know of any at the moment which meet that description. However, we did do that for several years. If we are doing it now, this amendment would stop it. Basically, what I would point out is the fact that we need to regain world markets. We need to let the world know that we are a producer and will sell competitively.

Getting rid of commodities, made surplus by being held off world markets, is no cure. Because these commodities were held off world markets, we accumulated huge amounts, commonly called surpluses. I just read to you that in 1953, 1954, and 1955 we were virtually out of the world market. So if we say that the yardstick is limited to normal trade, we may count years in which sales were low. We must be careful that under this Public Law 480 we do not give away what we could sell; that we do not let Public Law 480 be substituted for this very fine program which the Secretary is now carrying out, and under which he sold $2.7 billion worth of commodities for American dollars this past year.

Mr. BELCHER. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Oklahoma.

Mr. BELCHER. I think I misunderstood the gentleman, but I understood him to say that for many years we gave away products under this bill that could have been sold for dollars. The gentleman did not intend to make that charge, did he?

Mr. WHITTEN. Let me put it this way: For many years all the efforts to sell and all the sales were under Public Law 480. At that time the Department refused to sell competitively. Therefore, we were selling under 480, and we were not selling competitively. Since the Department has started selling competitively—last year we sold $2,700,000,000 worth of commodities for cash; and judging by the experience since he has started selling competitively, I think you can draw the conclusion that we could have sold for dollars what we sold under Public Law 480 for foreign currencies, then virtually turning around and giving such foreign currencies back to the countries involved.

Mr. COOLEY. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I just want to say again it is unfortunate that the gentleman from Mississippi [Mr. WHITTEN] did not bring this amendment to the attention of our committee when we could very thoroughly have considered it. I hope the Committee will vote it down because, as the gentleman from Texas [Mr. POAGE] pointed out, we do not know just what effect it will have on the program. I ask the House to vote down the Whitten amendment.

Mr. Chairman, I ask unanimous consent that all debate on the pending amendment and all amendments thereto do now close.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Mississippi [Mr. WHITTEN].

The amendment was rejected.

Mr. ROONEY. Mr. Chairman, I rise to a point of order against the entire bill, H. R. 6974, on the ground that it is a bill from a committee not having authority to report an appropriation.

The CHAIRMAN. Does the gentleman from North Carolina [Mr. COOLEY] desire to be heard?

Mr. COOLEY. Yes, Mr. Chairman; I do want to be heard very briefly.

Mr. Chairman, I think the Chair is aware of the fact that this legislation was originally reported by the House Committee on Agriculture. It came before the House some time in June or July of 1954. On July 10, 1954, it became a law. The bill is not in any sense of the word an appropriation bill. The original bill only authorized the President of the United States to negotiate certain contracts—sale contracts, if you please, under which we sought to sell or to barter or to give away these tremendous agricultural surpluses. The bill we now have before us extends that law and only increases the limitation. You cannot call it an appropriation. It merely changes one limitation from $3 billion to $4 billion and another from $500 million to $800 million limitations on the President's authority under this act. It authorizes the President to negotiate in a certain fashion and with reference to certain uses, the ultimate aim being twofold. First, to rid ourselves of these surplus commodities, and second, to improve the internal economies of other countries, friendly nations with which we are dealing. It does not amount to any appropriation at all, and I submit that the point of order should be overruled. But, before concluding, I would like to say that when I have concluded, I intend to move that the Committee do rise for the one purpose, and that is to permit our committee to go before the Committee on Rules in the hope that we can obtain a rule waiving points of order. Assuming that we do secure a rule waiving points of order, the point of order raised by the gentleman from New York will prove to be only dilatory and will delay final action on the pending bill.

Mr. ROONEY. Mr. Chairman, a point of order. I do not believe the distinguished gentleman from North Carolina has the right at this time, in arguing a point of order, to refer to the gentleman from New York in the fashion that he does.

Mr. COOLEY. I am arguing the parliamentary situation. If it pleases the Chair, I certainly do not mean to reflect upon the gentleman from New York. The gentleman from New York has a perfect right to raise the point of order that he has. I am a little bit apprehensive that the point of order may be sustained, if the Chair is called upon to rule on it. But, I think it would be very unfortunate for us to delay final action on the bill, and in the circumstances we have no other alternative other than to move that the Committee do now rise, and so, Mr. Chairman, I make that motion.

The CHAIRMAN (Mr. HAYS of Arkansas). The Chair is prepared to rule on the point of order, but the motion offered

by the gentleman from North Carolina that the Committee do now rise is in order, and the Chair will put the question.

The question is on the motion offered by the gentleman from North Carolina.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. HAYS of Arkansas, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 6974) to extend the Agricultural Trade Development and Assistance Act of 1954, and for other purposes, had come to no resolution thereon.

TEXTILE DEVELOPMENTS

Mr. PHILBIN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. PHILBIN. Mr. Speaker, in connection with textile matters, New England textile mills have been through the economic wringer in late years in large measure because of the reciprocal trade treaties, although there are other factors pertaining to sectional wage differentials, taxes, power costs, raw material sources and the like, that undoubtedly contributed to the decline of this industry.

New England woolen and worsted mills notwithstanding the crushing effects of foreign imports still produce more than one-half of the woolen and worsted fabrics of the United States. These mills employ 40,000 textile workers in 170 mills throughout the New England States. It is interesting to note the effects of sweatshop, low-wage, foreign goods imports since import duties were slashed about 10 years ago. In this period, foreign goods imports have increased by more than 800 percent and were so selectively managed that they absorbed the greatest share of the United States markets.

Hundreds of our American mills have been forced to liquidate and it is a fact that over 100,000 men and women have lost their jobs in the textile industry in the past decade because of this situation. All the while, the foreign producers of woolens and worsteds have enjoyed a substantially growing market in the United States. For example, the Japanese woolen and worsted industry now operates twice as many looms as the United States. In the past 3 years, Japan has increased its imports in this field to the United States by 650 percent. England and Italy have also increased their imports. In medium priced goods Japanese imports have increased by over 600 percent and higher priced fabrics over 1,200 percent.

In certain types of quality goods, imports have risen from one-half to almost two-thirds of the domestic production of similar goods, and many textile mills which a few years ago produced these fabrics are now out of business and the remaining mills are threatened with extinction by severe losses and steady decline of business. For example, American production and employment in these types of goods has decreased by one-third, imports have increased by 3½ times. It should be apparent to anyone, and it certainly does not take an expert to appreciate the fact, that no industry subject to this type of competition entailing 10 and 12 cents an hour wages can long survive. It is not a question of spreading the business. It may be a question of giving it all to the importers and before long, closing down American factories and throwing American men and women out of their jobs.

These are the plain, bald, unadorned facts and they present a shocking picture of lack of concern for the interests of a great American industry with its hundreds of thousands of honest, hard-working workers who, by calculated American policy have had their livelihood destroyed, the bread and butter taken out of the mouths of their wives and children, their family life disrupted, the education of their children jeopardized or cut off, and the stark, pathetic reality of public assistance staring them in the face as the result of cutthroat foreign competition stemming from direct action of the Government of the United States of which they are loyal citizens and to whom they have paid heavy taxes from their hard-earned wages.

Thus, by Government edict and policy, the number of textile workers in Japan, England, and other countries steadily increases, and the number of textile workers in the United States steadily decreases, and thousands and thousands of them are forced onto the welfare rolls. This is a rather weird result to be precipitated by a Government which boasts about its beneficent interest in the welfare of the people and its love of social justice, and its broad, world-scaled relief projects.

Of recent date the President has acted to apply controls to these hazardous imports, and it is to be hoped that this commendable action will be in time to alleviate and relieve the American textile industry.

TESTING OF NUCLEAR BOMBS

Mr. WALTER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALTER. Mr. Speaker, yesterday, Dr. Linus Pauling, head of the division of chemistry and chemical engineering of California Institute of Technology, in Pasadena, announced that 2,000 American scientists have signed a statement, which was prepared by him, urging international agreement to stop the testing of nuclear bombs.

I insert information respecting Dr. Linus Pauling from the public records of the House Committee on Un-American Activities.

The Daily People's World—official organ of the Communist Party on the west coast—in its issue of November 15, 1950, page 10, reported that Dr. Linus J. Pauling, "the noted chemist," had appeared as a witness before the California senate interim committee on education. The article stated that he had answered all questions—"with one important exception." He was said to have refused to answer the question: "Do you or did you ever pay dues in the Communist Party?" It was further reported that Dr. Pauling "had steadily maintained that the loyalty oath for teachers did grave harm and no good, and that he believed Communists should be allowed to teach so long as they did not propagandize their teaching."

The following is quoted from the Daily People's World of March 19, 1951, page 10:

> Dr. Pauling, nationally known peace advocate and opponent of atomic warfare, was prepared to leave soon for Hawaii, where he was to dedicate a new $1,270,000 chemistry building at the Honolulu campus of the University of Hawaii.
>
> Suddenly, over the weekend, the noted scientist received a curt cable:
>
> "Disregard letters. Plans changed. Dedication postponed."
>
> It was signed by Gregg M. Sinclair, president of the Hawaiian University.
>
> Then came a press story quoting President Sinclair.
>
> The Territorial committee on un-American activities, he said, had reported that Dr. Pauling refused to answer the question of whether he was a Communist during the California Senate un-American activities committee hearings on education last fall.
>
> Consequently, said the Hawaiian educator, Pauling was being uninvited.

It was reported in the Daily People's World of April 30, 1951, page 3, that Dr. Pauling intended to go to Honolulu and speak, despite the withdrawal of the invitation to speak at the dedication of the chemistry building. He was said to have announced that he had been invited "by the Hawaiian section of the American Chemical Society, the department of chemistry at the Hawaiian University, and the students chemistry club, to come to the islands for a series of addresses."

The Communist Daily Worker—April 3, 1951, page 9—reported that Dr. Pauling had "asked the University of Hawaii to reinvite him to dedicate the school's new chemistry building." The article stated that Pauling said he sent the regents a letter asking that they "give immediate consideration to action" which would "minimize the damage" they had done.

An article from Honolulu which appeared in the Daily People's World of May 21, 1951, page 2, said:

> Although Dr. Pauling's invitation to address the university was rescinded by the administration, he will speak here May 26 to a number of academic societies on non-political subjects.

On April 1, 1951, the Committee on Un-American Activities released a report on the Communist Peace Offensive—A Campaign To Disarm and Defeat the United States, which contained a section —pages 85–87—concerning the leading role in the Communist peace movement in the United States, played by Dr. Linus Carl Pauling. The Daily People's World, April 9, 1951, page 12, reported that Dr. Pauling had "sharply

answered the House Un-American Committee's charge that the noted California Institute of Technology professor has aided the Communist peace offensive." He was quoted as saying:

I have sponsored the Committee on Peaceful Alternatives, the American Peace Crusade, and other movements. I have spoken several times in support of the Quaker proposals for peace. I have supported Senator Taft and other Members of Congress when they have advocated action that seemed to me to increase the chance for a peaceful future. All of my political activity is open, and known to the public. I carry it on as my patriotic duty to my fellow man and my country. I shall continue to act in the way that my conscience tells me is best.

The following is quoted from the New York Times, July 16, 1952, page 19:

The State Department has granted a limited passport of Dr. Linus Pauling * * * after having rejected his passport application three times in the last few months.

The State Department said that it had acted after new evidence had been submitted, and the whole case reevaluated.

One of the conditions on which the passport was granted, it was said, was Dr. Pauling's certification that he is not now and never has been a member of the Communist Party. Authorities indicated that such an affidavit was sometimes required in questionable cases.

Dr. Pauling's applications have been turned down in the past on the ground that his travel would not be in the best interests of the United States.

This was also reported in the Daily Worker of July 17, 1952, page 1.

According to the Daily Worker of December 17, 1947, Dr. Pauling signed a petition to the United States Attorney General in behalf of Hans Eisler—a German Communist, brother of Gerhart Eisler—protesting his deportation.

The following references report other activities of Dr. Pauling in support of cases involving known or alleged Communists:

The March 25, 1949, issue—page 4—of Narodna Volya—Bulgarian language organ of the Communist Party—and the Daily Worker of February 28, 1949, page 9, named Dr. Pauling as a signer of a statement in defense of 12 Communist leaders. He signed a statement in behalf of the Los Angeles Communits cases, according to the Daily People's World, June 15, 1949, page 2. The Daily People's World of October 20, 1949, page 3, reported that he spoke against the conviction of Communist leaders. The Sunday Worker—southern edition—of October 30, 1949, page 6, named him as a signer of a statement on Communist cases. The Daily Worker—December 7, 1949, page 5, and February 1, 1950, page 3—reported his support of lawyers defending the defendants in the Communist cases. He was listed as a signer of a letter in behalf of 11 Communist leaders in the Daily People's World, April 18, 1950, page 2. He signed a statement asking parole for Hollywood cases, according to the Daily Worker of December 22, 1950, page 3.

Dr. Pauling was named as a sponsor of a Conference of Inquiry Into the Facts of the Rosenberg Case scheduled for May 16, 1953, in Los Angeles—Daily People's World, May 12, 1953, page 6. He was a signer of an amicus brief petitioning the Supreme Court for a new trial for Morton Sobell, who is serving a prison term for conspiracy to commit espionage—Daily People's World, December 22, 1953, page 6; December 23, 1953, page 2. The Daily People's World of January 7, 1954, pages 2 and 6, reported that he had called for a new trial for Morton Sobell.

As the main speaker at the Pasadena Conference on Human Rights, Dr. Pauling defended the Communist Party, according to the Daily People's World, November 3, 1947, page 4.

It was reported in the Daily People's World—December 28, 1951, page 12—and the Daily Worker—January 2, 1952, page 2—that Dr. Pauling was a signer of an advertisement in the Los Angeles Times urging repeal of the Smith—anti-Communist—Act.

The Daily People's World—December 15, 1952, page 3—announced that Dr. Pauling would speak at a farewell dinner for Dr. Richard W. Lippman, who was one of three physicians fired from the staff of Cedars of Lebanon Hospital for political reasons. His defense of the ousted physicians was also reported in the Daily People's World of January 14, 1952, page 3.

The following is quoted from the Daily Worker of November 25, 1953, page 2:

One hundred and thirty-four educators, ministers and other professionals from 21 States and three foreign countries today declared their support of the "constitutional right" of Americans to teach and learn Marxism in institutions like the Jefferson School of Social Science, a 10-year-old adult evening school in New York.

Their joint statement was issued here on the eve of hearings scheduled to begin tomorrow * * * before the Subversive Activities Control Board on the petition by Attorney General Herbert Brownell, Jr., petition to order the Jefferson School to register as a "Communist front organization" under the (McCarran) Internal Security Act of 1950.

Dr. Pauling was listed as a signer of the statement in behalf of the school.

The Special Committee on Un-American Activities cited the Jefferson School in its report of March 29, 1944—page 150—which said:

At the beginning of the present year, the old Communist Party Workers School and the School for Democracy were merged into the Jefferson School of Social Science.

The United States Attorney General cited the school as an "adjunct of the Communist Party"—letter to the Loyalty Review Board, released December 4, 1947; included in consolidated list released April 1, 1954.

The Washington Evening Star of October 30, 1951, page A-7, contained an advertisement—paid for by contributions of signers—in the form of an open letter to the Attorney General in behalf of four trustees of the bail fund of the Civil Rights Congress of New York, who had been imprisoned for contempt following the disappearance of four Communist leaders for whom the bail fund had posted bond. Dr. Pauling was listed as a signer of the letter. The Civil Rights Congress was cited as subversive and Communist by the United States Attorney General—letters to the Loyalty Review Board, released December 4, 1947, and September 21, 1948; included in consolidated list released April 1, 1954. The Committee on Un-American Activities described it as being "dedicated not to the broader issues of civil liberties, but specifically to the defense of individual Communists and the Communist Party" and "controlled by individuals who are either members of the Communist Party or openly loyal to it"—report No. 1115, September 2, 1947, pages 2 and 19.

The following sources name Dr. Pauling as a signer of statements sponsored by the Committee for Peaceful Alternatives to the Atlantic Pact: a letterhead dated August 21, 1949; Daily Worker, August 22, 1949, page 3; Daily People's World, August 22, 1949, page 2; statement attached to press release of December 14, 1949, page 1; letterhead dated March 30, 1950; Daily Worker, July 28, 1950, page 8. The Committee for Peaceful Alternatives to the Atlantic Pact was cited as an organization which was formed as a result of the Conference for Peaceful Alternatives to the Atlantic Pact to further the cause of "Communists in the United States" doing "their part in the Moscow campaign"—Committee on Un-American Activities, House Report No. 378, April 25, 1951, page 54.

Dr. Pauling was named as a sponsor of the American Continental Congress for Peace, which was held in Mexico City, September 5–10, 1949—Daily Worker, July 29, 1949, page 5; Daily People's World, August 18, 1949, page 2. A mimeographed sheet—written in Spanish—giving biographical data concerning speakers for the Congress named Dr. Pauling as a speaker. The Committee on Un-American Activities cited the Congress as "another phase in the Communist 'peace' campaign, aimed at consolidating anti-American forces throughout the Western Hemisphere"—Committee on Un-American Activities, House Report No. 378, April 25, 1951, page 21.

A letterhead of the American Sponsoring Committee for Representation at the World Peace Congress—dated December 1, 1950—listed Dr. Pauling as a sponsor of the organization, which has been cited by this committee—Committee on Un-American Activities, House Report No. 378, April 25, 1951, page 36.

The following sources name Dr. Pauling as a sponsor of various activities of the American Peace Crusade: Daily Worker, February 1, 1951, page 2; minutes of sponsors meeting, Washington, D. C., March 15, 1951, page 4; Daily Worker of May 1, 1951, page 11; leaflet, An Invitation to American Labor To Participate in a Peace Congress"; American Peace Crusader, May 1951, pages 1 and 4; leaflet, American People's Congress Invites You To Participate in a National Peace Competition—June 29, 1951; Daily Worker, April 22, 1951, page 2; call to the American People's Congress—June 29–July 1, 1951; letterhead, February 25, 1953. The American Peace Crusade was cited as an organization which "the Communists established" as "a new instrument for their 'peace' offensive in the United States"—Committee on Un-American Activities, statement issued on the March of Treason, February 19, 1951; also cited in House Report No. 378, page 51.

Dr. Pauling was listed as regional chairman of the National Council of the Arts, Sciences, and Professions on two letterheads of the organization in the files of this committee—one received in January 1949; another dated April 24, 1950. These sources named him as chairman of science for the council: Leaflet, Policy and Program Adopted by the National Convention, 1950; Daily Worker, May 1, 1950, page 12; letterhead, July 28, 1950; letterhead dated December 7, 1952. He signed statements sponsored by the organization, according to the following: Daily Worker, October 19, 1948, page 7; CONGRESSIONAL RECORD, volume 95, part 7, page 9435; handbill, Halt the Defamers Who Call Peace Un-American—announcing an address by Dr. DuBois on September 28, 1951. He was a sponsor of the Cultural and Scientific Conference for World Peace, arranged by the council and held in New York City, March 25–27, 1949, according to the call to the conference, the official program, and the Daily Worker—February 21, 1949, page 2. The National Council of the Arts, Sciences, and Professions was cited as a Communist front by the Committee on Un-American Activities, in its Review of the Scientific and Cultural Conference for World Peace, House Report No. 1954, April 26, 1950, page 2.

The Daily People's World, January 12, 1946, page 3, reported that Dr. Pauling was to be chairman of a mass meeting conducted by the Hollywood Independent Citizens Committee of the Arts, Sciences, and Professions on January 21. The issue of February 26, 1946, page 3, named him as a signer of a statement sponsored by the organization. A letterhead dated May 28, 1946, listed him as a member of its board of directors, and a letterhead dated December 10, 1946, showed his name as vice chairman. The Independent Citizens Committee of the Arts, Sciences, and Professions was cited by the Committee on Un-American Activities as a Communist front—House Report No. 1954, April 26, 1950, page 2; and House Report No. 378, pages 11 and 12.

Dr. Pauling was named as a sponsor of the American Committee for Protection of Foreign-Born in the following sources: Three 1950 letterheads of the organization; a 1951 letterhead of the Midwest Committee for Protection of Foreign-Born; the Daily Worker, August 24, 1951, page 8. The American Committee for Protection of Foreign-Born was cited as subversive and Communist by the Attorney General in letters to the Loyalty Review Board released June 1, 1948, and September 21, 1948—included in consolidated list released April 1, 1954; the special committee cited it as "one of the oldest auxiliaries of the Communist Party in the United States"—report of March 29, 1944; also cited in report of June 25, 1942, page 13.

The Committee on Un-American Activities issued a report, dated August 25, 1956, entitled "Trial by Treason—The National Committee To Secure Justice for the Rosenbergs and Morton Sobell," which contained the following references to the subject individual:

The National Committee To Secure Justice in the Rosenberg Case issued various propaganda petitions which were to be signed and forwarded to President Eisenhower. One of these printed forms carried the name of Prof. Linus Pauling as one of the "clemency supporters listed from newspaper reports." A reproduction of this appeal appears on page 41 of the committee's report.

Professor Pauling was named—page 70—as one of the southern California sponsors of a "conference of inquiry" on the Rosenberg case, which was announced in April 1953.

A reference to Professor Pauling on page 124 of the report says:

The national campaign gathered momentum again in 1955. A $6.50-a-plate dinner was held * * * in Chicago on February 12 as a testimonial to Dr. Urey, who was presented by Mrs. Sobell with a bound volume of some 6,000 scrolls signed by "prominent persons throughout the world honoring [him] for his achievements as a scientist and contributions as a citizen." (The Daily Worker and the Daily People's World listed the following persons as signers of the scroll * * * Dr. Linus Pauling * * *.)

The following appears on page 131:

On May 11, 1956, the Daily Worker reported that a group of 60 persons had signed a letter to President Eisenhower urging him "to exercise his Executive authority either by asking the Attorney General to consent to a new trial for Morton Sobell or by the granting of Executive pardon or commutation." The signers listed in the Daily Worker article were: * * *, Dr. Linus Pauling, Nobel prize scientist, Pasadena, Calif.

The National Committee To Secure Justice in the Rosenberg Case—including local affiliates—was cited as a Communist front by the Committee on Un-American Activities in its annual report for 1955, as well as in the report referred to in the foregoing, Trial by Treason.

PONY EXPRESS POSTAL SERVICE

Mr. KELLEY of Pennsylvania. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. KELLEY of Pennsylvania. Mr. Speaker, the President again is asking for more money for the Post Office Department, and the Postmaster General again is telling Congress he cannot get along on the amount he is going to receive for the coming fiscal year, beginning July 1.

Actually, Mr. Speaker, it is even worse than that. The Postmaster General says the money requested in the budget submitted by the President in January for the coming fiscal year would not be enough, even if Congress appropriated the whole amount. Between last January and now, in other words, the Postmaster General has discovered that his budget requests for next year are far too low.

That raises the question, Mr. Speaker, just what does the Postmaster General do with this money after it is appropriated? How is it possible, Mr. Speaker, for the postal service to cost us continually more and more, while the service gets worse and worse? It is not because of any pay raise to the employees. They have had no raise. Then how does Mr. Summerfield manage to get rid of so much money with such poor results?

Every Member of Congress, and many of our citizens, could, no doubt, come forward with many examples of the kind of poor service to which I refer. Just the other day a newspaper editor in my congressional district forwarded to me the envelope in which I had sent him a special-delivery letter. The letter was mailed in plenty of time for the editor's deadline, but he could not use the material he requested from me for his paper because it did not arrive in time. It was mailed at the Capitol at 7 p. m., May 27—that is what the postmark shows—and it arrived in a Westmoreland County, Pa., post office 2 days later—at 7:30 a. m., May 29.

This is the kind of service Mr. Summerfield is now providing. If it takes 2 days for a special-delivery letter to go from Washington, D. C., to Westmoreland County, Pa., one wonders how long it takes a regular letter to go anywhere in this country. It sounds like the days of the pony express all over again.

TRIAL OF SP3C. WILLIAM S. GIRARD

Mr. GROSS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. GROSS. Mr. Speaker, I was shocked and grieved to read a press release delivered to my office this morning, announcing that an American soldier is to be sacrificed on the altar of appeasement in Japan.

The decision of the Secretary of State and Secretary of Defense to deliver Sp3c. William S. Girard for trial in a Japanese court, for an alleged act which occurred in the line of duty, is nothing less than disgraceful.

I can only imagine how low the morale of our servicemen in Japan, as well as in other countries where Status of Forces Agreements are in effect, will be when they realize the significance of this unthinkable action. Here we have two of the highest officials of the Government announcing to the world that our men in uniform no longer can expect the protection of the American flag and our precious Constitution, even while they are on duty.

Was Specialist Third Class Girard on duty when he was alleged to have caused the death of a Japanese woman? Even the joint statement by Secretary Dulles and Secretary Wilson admits that he was. Let me read just one sentence of the press release delivered to my office:

"The commanding general of Girard's division certified that Girard's action was done in the performance of official duty."

Now that the decision in this individual case has been announced, apparently there is nothing we in the Congress can do for Specialist Third Class Girard.

But we can do something to prevent repetition of this outrageous act.

Pending before the Committee on Foreign Affairs are resolutions introduced by the gentleman from Ohio [Mr. Bow], by myself and others, providing for revision of Status of Forces Agreements so that foreign countries no longer will have criminal jurisdiction over American Armed Forces personnel.

I urge the Committee on Foreign Affairs to give the Members of this body an opportunity to express their will by reporting one of the resolutions to the floor of the House at the earliest possible date.

PERMISSION TO SIT DURING SESSION OF THE HOUSE

Mr. LANE. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary may have permission to sit tomorrow during general debate in the House.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

NEEDED AMENDMENT TO INTERNAL REVENUE CODE OF 1954—H. R. 7876

Mr. HUDDLESTON. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. HUDDLESTON. Mr. Speaker, yesterday I introduced bill H. R. 7876, which I feel will accomplish a muchly needed amendment to the Internal Revenue Code of 1954 in the fair administration of the Federal tax law.

The Supreme Court of the United States has recently decided the case of *Putnam* v. *Commissioner of Internal Revenue* (77 S. Ct. 175), wherein a guarantor's loss on a corporate demand note was held to be a nonbusiness bad debt and not a loss incurred in a transaction entered into for profit within the meaning of section 23 (e) of the 1939 Internal Revenue Code.

The United States courts of appeal until the Putnam case had all consistently held that losses incurred on individual guaranties of corporate indebtedness, where the corporation was insolvent at the time the guaranty was honored, were section 23 (e) losses. These circuits included the third circuit in the case of *Pollak* v. *Commissioner* (209 F. (2d) 57), the fifth circuit in *Edwards* v. *Allen* (216 F. (2d) 794), and the sixth circuit in *Cudlip* v. *Commissioner* (220 F. (2d) 565). These cases all followed the earlier leading case decided by the second circuit on July 2, 1951, *Fox* v. *Commissioner* (190 F. (2d) 101).

The Supreme Court of the United States in the Putnam case in concluding that the loss sustained by the guarantor was from the worthlessness of a debt, although the debt was plainly worthless at the time of payment of the guarantor, placed primary reliance on an amendment effected by the Internal Revenue Code of 1954 in section 166 (f) thereof. In this connection, the Court stated:

> The Congress recently confirmed this treatment in the Internal Revenue Code of 1954 by providing that a payment by a noncorporate taxpayer in discharge of his obligation as a guarantor of certain noncorporate obligations "shall be treated as a debt." (*Putnam* v. *Commissioner of Internal Revenue* (77 S. Ct. 175, 177).)

My search of the congressional history leading up to this change in section 166 (f) disclosed no intention on the part of Congress to change the existing law relating to guarantors' losses. Mr. Justice Harlan impressively points this fact out in the dissenting opinion of the Court in the Putnam case, with the statement:

> I am unable to find in this, or in any of the other legislative history to which the Court refers, any clear intimation of a broad policy to analogize generally all types of nonbusiness loans to other forms of capital investment, still less anything which indicates that guarantors' losses were considered as falling within the new section. Likewise, I think that the Court's reliance on section 166 (f) of the 1954 code is misplaced. That section provides that an individual taxpayer's guaranty payment discharging the obligation of a noncorporate debtor "shall be treated as a debt becoming worthless within such taxable year," and shall be deductible in full if (a) the proceeds of the guaranteed obligation were used "in the trade or business of the borrower;" and (b) that obligation was worthless at the time the guarantor made payment. The Court says that by enacting this section Congress confirmed the administrative practice of treating guarantor's losses as bad-debt losses, at least so far as guaranties of certain noncorporate obligations are concerned. I cannot agree, for again I think this action had a specific and limited purpose, which did not include the thrust which the Court now gives the section. That purpose, I think, was simply to permit deduction of certain guaranty payments that were not deductible at all under the 1939 code. (*Putnam* v. *Commissioner* (77 S. Ct. 175, 183–184).)

Further, the gross injustice results to small business enterprises. It is the usual practice among banks and lending institutions in making loans to small corporate businesses to compel the responsible officer of the corporation to endorse the corporate obligations. Without such endorsement, adequate financing cannot be expected by small businesses. To permit an ordinary deduction on the payment by a noncorporate taxpayer in discharge of his obligation as guarantor of a noncorporate obligation and deny equal treatment in the case of the guarantor of his corporation's paper, is inequitable and unfair. I do not believe such an inequitable result was ever intended by the Congress in enacting the 1954 code.

I have, therefore, on yesterday, introduced bill H. R. 7876, making technical amendments to the Internal Revenue Code of 1954, retroactive to July 2, 1951, the date of the Fox decision. This bill amends section 166 (f) of the Internal Revenue Code—relating to deductions for bad debts in the case of guarantors of certain noncorporate obligations—by striking out the words "a noncorporate obligation" and inserting in lieu thereof "an obligation."

Such an amendment, in my opinion, is required in the fair administration of the Federal tax law. Those taxpayers who relied on the consistent and uniform decisions of the United States District Courts or the Courts of Appeal will not be penalized by reason of having followed the advice of their accountants and lawyers following the established judicial tenet of stare decisis. Construction of the varied sections of the Internal Revenue Code, I recognize, cannot be uniform. There is as much lack of consistency on the part of the Commissioner of Internal Revenue as on the part of taxpayers. The Congress knows of many inconsistencies such as cases involving capital gains and capital losses, where the consistency of the Commissioner oftentimes is only in which position will produce more taxes in the Treasury.

In conclusion, I state my firm belief that in the Putnam case, the Supreme Court of the United States reached its decision by judicial legislation contrary to the real congressional intent on the issue involved. I am fortified in this belief by the circuit judges of four United States Courts of Appeal. The Congress should eliminate the resulting hardship to taxpayers who acted on the plain language of the statute and the judicial interpretation thereof, as confirmed in the four separate and distinguished circuit courts of appeal.

I urge the careful consideration of bill H. R. 7876 by the Members of the House and particularly by the members of the Ways and Means Committee.

IKE SHOULD ASK FOR EQUAL TIME

Mr. REUSS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. REUSS. Mr. Speaker, once we have gotten over our sense of outrage at Khrushchev coming right into our parlors on Sunday's TV, we ought to look at what he said, particularly about the prospects for a settlement in Middle Europe. He said, "Why don't you withdraw your troops from Germany and France, and we will withdraw ours from Germany, Poland and Hungary?" It should be noted that Khrushchev did not ask for the abandonment of NATO or of our strategic airbases abroad which are the main deterrent force against Communist aggression. Now, Khrushchev may hedge on what he said. But if he does, the TV tape in CBS's possession will brand him before the world as a hedger.

So Khrushchev breathes peace into every home in the world. So far, our only official reaction has been furnished by the President's press secretary, Mr. Hagerty, who vigorously denies the charge made by Khrushchev—and by anti-Eisenhower Republicans, for that matter—that the United States is headed for socialism. Really, Mr. Speaker, the world deserves something better than this from us. If all we do is to do nothing, we give Soviet Russia an incalculable advantage.

For Russia says it has a foreign policy for Middle Europe—the kind of disengagement which Khrushchev outlined on TV. The blunt fact is that we don't have a foreign policy: we haven't said what action we propose for Middle Europe on the question of German unification, on the question of liberation of the captive nations. Congress is asked to vote enormous budgets for armaments, for foreign aid, for USIA, all of which are supposed to be in support of a foreign policy. Everything is at hand, in short, except the foreign policy.

Mr. Eisenhower frequently complains that the Democrats never make any constructive suggestions. Well, here's one. Let Ike have a television-radio film made at the White House, in which, after his introductory remarks, he submits to questioning from Russian newsmen, whether from Tass here in Washington, or sent over from Russia for the occasion. Let the format parallel CBS's Khrushchev job as closely as possible. Let us then offer the film to the State Broadcasting and Television Committee set up only last week by the Soviet Council of Ministers, of which D. I. Chesnokov has been named chairman. Let us ask that it be beamed into every home in Russia capable of receiving it, and be played over the loudspeakers in every Russian farm, factory, cooperative, and public place. According to the Library of Congress' latest estimates, there are in Russia 19 TV stations and a TV audience of 4 million, and 6 million radio receivers, 30,000 radio relay centers, and 20 million public address loudspeakers.

Let the President start his interview by spelling out some positive goals for United States policy in Middle Europe. If he cannot think of anything better, I suggest he use the phraseology employed by 12 Democratic Members in a letter to the President last December—HUGH J. ADDONIZIO, THOMAS L. ASHLEY, CHARLES A. BOYLE, JOHN D. DINGELL, TORBERT H. MACDONALD, EUGENE J. MCCARTHY, HENRY S. REUSS, GEORGE M. RHODES, PETER W. RODINO, JR., JAMES ROOSEVELT, B. F. SISK, and FRANK THOMPSON, JR.:

The United States wants, in concert with Great Britain, France, Western Germany, and its other friends, an order in Middle Europe that will help to bring about peace, not war. We think that such a policy can flow from our own revolutionary ideals of life, liberty, and the pursuit of happiness:

1. Life: To bring an end to the threat of war in Central and Eastern Europe. A road toward that goal: Creation of a demilitarized area, without the capacity to make aggressive war, from the Rhine to Russia's historic boundaries, with the demilitarization and the security of the area guaranteed by East and West.

2. Liberty: To free the peoples of Central and Eastern Europe from foreign occupation or domination; to confirm their right of free elections, free speech, free worship, the civil liberties, protection for minorities; and at the same time to guard against the rebirth of totalitarianism from any quarter. A road toward that goal: Embedding these human rights in the constitutions of the liberated states, with an international guaranty of their preservation.

3. The pursuit of happiness: To hasten the economic and social progress of the liberated areas, and to provide an alternative to the old nationalistic rivalries for territory and resources. A road toward that goal: encouraging (by such steps as economic aid under international auspices) regional federation and economic integration in Central and Eastern Europe.

Such a foreign policy proposal would serve our own national interest, the interest of our allies, the interest of the captive peoples, and the interest of the Russian people themselves. If there is an ounce of sincerity in Khrushchev's position, there could be the basis for a fruitful negotiation. If there is not—if Khrushchev is indeed trying to hoodwink the world—the best way to unmask him is to put before the world a proposal that can inspire freemen everywhere.

Ike should ask for equal time.

A BILL TO AMEND THE SOCIAL SECURITY ACT

Mrs. KEE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentlewoman from West Virginia?

There was no objection.

Mrs. KEE. Mr. Speaker, on behalf of a small and voiceless minority among our citizens, I introduce for appropriate reference, a bill to amend the Social Security Act in order that a gross inequity may be corrected and the slate of social justice may be wiped clean of discriminatory legislation.

I refer, Mr. Speaker, to an inequity now present in the law, which is visited upon the widows of those who formerly worked in covered employment under title II of the Social Security Act and who are, therefore, to all intents and purposes, entitled to the survivors benefit insurance left to them by their late spouses.

As the act is presently written, many thousands of these unfortunate women—many of them in their middle or late fifties—unless they have dependent children under 18 years of age, or older sons or daughters physically and permanently handicapped—may not draw survivors' insurance benefits until they have reached 62 years of age.

As one of the pertinent facts of life, Mr. Speaker, permit me to point out that very few women past middle-age are the proud and fortunate possessors of children under 18 years of age.

Yet, without such minor children, or without the added grief and tragedy of a child forever handicapped and dependent upon them, these widowed women—these women who have lost their sole mainstay and financial support in life—these women who are deserving of our deepest commiseration and solicitude—are condemned by the laws of the land to years of destitution and drudgery, or to the humiliation of economic dependency upon the charity of friends and relatives, at best, and at worst, upon public assistance. For at this point in their lives, where shall they find employment?

It is, perhaps, fitting, Mr. Speaker, that I should raise my voice on behalf of these women. For within the four walls of this Chamber, I, too, am a member of a minority; not, I will admit, an entirely voiceless minority, nor a political minority, but a minority, nonetheless. It is not, I feel, necessary to point out that, in the language of legislation, 420 to 15 constitutes something of an impressive majority.

Consequently, it is to this overwhelming majority, to the gentlemen of the House, that I wish particularly to address my remarks on behalf of the widows of the Nation.

Gentlemen, throughout the world the reverence, the protectiveness, which American men have ever extended toward their womenfolk, is traditional. Indeed, throughout the length and breadth of this country, no finer exponent can be found of that chivalry and courtesy for which our great Southland is renounced, than exists in the distinguished person of our beloved Speaker himself.

And yet, Mr. Speaker, what have we done for this group of middle-aged and older women, those who have passed their 50th birthdays, who are approaching, but have not reached their sixties, who have lost their mates, and with them, their economic security, indeed, their very day-to-day subsistence, and who would, under normal circumstances, be the recipients of our most profound sympathy and solicitous concern?

Or, perhaps I should rephrase my question. It is not, What have we done for these women? for we have done nothing. It is, What we are doing to them?

Deprived suddenly, or after long and costly illness, of their financial support and, more or less, of their economic independence, nevertheless we bid them wait 5, 8, even 10 years, before they become eligible to receive the benefits, and pitifully small benefits they are in most instances, of the social security insurance program into which their husbands paid during their lifetimes. Moreover, these former breadwinners, Mr. Speaker, gladly paid into social security under the impression that they were thus providing some measure of protection for their wives in the event of their own deaths.

The inequity of the situation is clear when we consider—and I believe I am correct in this, for so I have been advised—that under our civil service retirement system there is no age limitation placed upon the time the widow commences to draw the monthly pension left her by her husband. Provided she has been named his survivor, she becomes the beneficiary of a pension at the time of his death. The same holds true for the widow of a deceased Congressman. Provided she is named the survivor, she becomes the immediate beneficiary of monthly pension payments regardless of her age.

But what of the tens of thousands of widows covered under the old-age and survivors insurance program by reason of their late husbands' contributions? To these women we say: "If you have no other means of support, get a job. Go to work and become self-supporting or starve until, if you are lucky enough, you manage somehow to exist until you are 62 years old."

And nearly starve, most of them do, Mr. Speaker, for it is utterly unrealistic on our parts to expect that these women

who have been housewives for the greater portions of their lives—who are entirely untrained and unskilled—to be able to compete in the labor market for any gainful employment except that of the lowest-paid kinds of work—say that of a domestic servant or charwoman.

Let me ask the fathers, the sons, and the husbands who are the Members of the House, if any of them would purchase commercial life insurance policies for their wives or other dependents, knowing that these policies would not become payable for anywheres from 10 to 12 years following their own demise?

Nevertheless, under the social security program—and that is exactly what social security is, gentleman—that is exactly why we call it the old-age and survivors insurance program—nevertheless under the program, this is what we actually do. We condemn the husbands and breadwinners of thousands of women to buy into an insurance program that will not provide for their widows for many years after their own deaths.

Why? There is no sound reason that I can find for this arbitrary act. This money is a trust. It is in a trust fund and it must eventually be paid to these women. Why then do we make them wait for what so many of them need so desperately?

As nearly as I have been able to ascertain, there is only one reason for this—a reason that is no longer valid nor even practical.

When the Social Security Act was first passed, no one knew for certain just how the law would work out in practice. No one knew for certain how many widows there would be as claimants to survivors benefits in the first few years after the program went into effect. And no one knew, with any degree of accuracy, how great a demand would be made upon the trust fund for payments to such beneficiaries. No one could tell for sure to what extent the trust fund could withstand such withdrawals and still remain sound. So the age for these widows without dependent children was arbitrarily set at 65 years. The 1956 amendments reduced this to 62.

Today, we have the answers to most of those early questions. We know that the trust fund is sound and that the amounts that would be withdrawn to pay survivors insurance benefits to widows at age 50 and over, would not be likely to jeopardize the fund's solvency.

Consequently, the only reason why we have not corrected this obvious inequity in the law, the only reason we have not moved to right this grave injustice which we are presently inflicting upon a group of hapless and helpless women is, I am sorry to say, apparently based upon sheer thoughtlessness.

The money is there, gentlemen. It must be paid to these widows later. It should be paid to them now. For today, only Heaven and our State directors of public assistance know how many of these women manage to subsist during the years that we force them to wait for that which will rightfully be theirs in the end.

Mr. Speaker, I feel it to be my painful duty to gently chide the gentlemen Members of the House—that overwhelming majority who are my admired and distinguished colleagues—for this seeming lapse from the considerate attitude which has traditionally been theirs toward American womanhood.

Mr. Speaker, I ask your own chivalrous support and leadership. I ask the Members of the House, one and all, to join with me in giving unqualified support to the bill which I have introduced to relieve the plight of this group of American women whose menfolk are no longer here to protect and provide for them.

TELEVISION CHANNEL 13

The SPEAKER. Under the previous order of the House, the gentleman from Indiana [Mr. BRAY] is recognized for 30 minutes.

Mr. BRAY. Mr. Speaker, in a decision adopted March 6, 1957, the Federal Communications Commission granted the application of the Crosley Broadcasting Corp. for television channel 13 which has been allocated to Indianapolis. In so doing, the Commission passed over the applications of three locally controlled Indianapolis corporations. The grant went to a corporation which is the wholly owned subsidiary of the Avco Manufacturing Corp., located in New York. The president and dominant stockholder of Avco is Victor Emmanuel, a resident of New York City. None of the officers or directors of Avco or of the Crosley Broadcasting Corp. are, ever have been, or propose to be residents of Indianapolis or Indiana. Thus the avowed intent of the Commission to grant the applications of local interests where qualified was ignored in this case.

The Commission found that each of the applicants was legally, technically, and financially qualified to operate the proposed television station, and the hearing was held on a comparative basis with respect to the background, experience and management, operation and program proposals of each applicant.

I would not argue the point that the Crosley Broadcasting Corp. is experienced and possesses the general qualifications for this permit. It certainly should be experienced, for by the fiat of the Commission it presently operates four other VHF channels. Three of these four stations are in Ohio, and with the addition of the Indianapolis channel, Crosley telecasting will blanket an area stretching from the Indiana-Illinois border to the eastern boundaries of Ohio along Pennsylvania and West Virginia. These 4 stations will cover 33,935 square miles, within which there is a population of 5,077,442. The coverage of the stations will overlap, and nearly 2 million persons will receive service from 2 Crosley television stations, and more than 90,000 persons will receive service from 3 Crosley television stations. The people living within these areas are and would be limited in their selection of programs to the extent that Crosley programs are duplicated. Giving all of these channels to the Crosley Broadcasting Co., a subsidiary of Avco, is certainly heaping great material gain on the stockholders, but the viewers are denied the advantages of management and ownership familiar with and experienced in the community. It is noteworthy that George C. McConnaughey, Chairman of the FCC, is from the State of Ohio.

Let me reiterate that I do not believe the Crosley corporation lacks any essential qualifications to successfully operate a television station. Had there been no other qualified applicants, it would be understandable that the Commission might have been justified in overlooking the concentration involved in granting this application. Had there not been 1, let alone 3, fully qualified locally owned applicants, we could more easily see why the Commission turned its eyes away from the hometown people.

Thus, we find that three basically qualified local Indiana applicants were denied in favor of an absentee multiple owner by virtue of a decision which required the Commission to reverse or ignore the major policy factors which have been applied in other comparative decisions. The sole area in which Crosley was found to be superior was in experience. Assuming that this finding was correct, it still does not and cannot serve as an adequate basis for overriding the more important criteria upon which the Commission has previously depended.

In considering qualifications and experience, however, it should be noted that the experience and character qualifications credited to Crosley by the Commission are possessed solely by employees. The owners of Avco possess only the reflected qualifications of their employees, while the broadcasting experience and character qualifications of the other three applicants were established primarily, if not exclusively, through their respective owners. Two of the three other applicants have a longstanding record of public service to the city of Indianapolis, and both have established this record under the immediate direction of their controlling stockholders who will continue to be personally identified with the operation. Some of these owners individually have established admirable records of public service and civic responsibility.

The third local applicant lacks broadcasting experience, but its character qualifications are those of its stockholders, not employees. Technically qualified personnel can and will be employed so long as the Commission makes certain that its licensees are owned and operated by persons whose character qualifications are established. In the case of Crosley the experience and character qualifications upon which the Commission places reliance can be changed and eliminated at any time by a decision made in New York, which decision is not subject to Commission jurisdiction or review. Prior to the Indianapolis decision, the Commission has in an overwhelming number of decisions held that character qualifications of employees, no matter how impressive their title, could not be a controlling consideration because the tenure of such persons is uncertain and is not the subject of Commission jurisdiction.

The grant of the Crosley application in a comparative hearing against three locally controlled Indianapolis corporations thus marks a milestone in Commission decisions. It is the first time that the Commission, having available to it a

number of qualified applicants, has voluntarily chosen to grant a television frequency to an applicant who already dominates and controls the television service available to several million people lying within a concentrated and well-defined geographical and political area. The grant is contrary to the basic philosophy of the Communications Act insofar as the prevention of monopoly broadcast facilities is concerned. In 1953 the Commission issued a report and order on its multiple-ownership rules which stated that—

> The fundamental purpose (of the Communications Act) is to promote diversification of ownership in order to maximize diversification of program and service viewpoints—as well as to prevent any undue concentration of economic power contrary to the public interest. * * * It is our view that the operation of broadcast stations by a large group of diversified licensees will better serve the public interest than the operation by a small and limited group of licensees (9 Pike & Fischer, pp. 1563, 1568).

This philosophy has been repeated by the Commission in numerous decisions and judicially sanctioned by the courts in many cases. Yet, the grant to Crosley involves a reversal of this decision in a case completely devoid of reasons, compelling or otherwise, for a radical departure from a well-considered and well-established basic philosophy This reversal of a well-established policy served no purpose but to make a big New York corporation such as Avco bigger at the expense of a number of qualified local applicants. While bigness should not be condemned because of size alone, it should not be aided by the grant of Government franchises to grow at the expense of equally qualified smaller businessmen who have not previously benefited from comparable Government franchises.

Mrs. HARDEN. Mr. Speaker, will the gentleman yield?

Mr. BRAY. I yield to the gentlewoman from Indiana.

Mrs. HARDEN. I concur in what the gentleman from Indiana has said and I wish to commend him for his fine statement which is of great interest to many people in Indiana.

Mr. BRAY. I thank the gentlewoman from Indiana.

Mr. HARVEY. Mr. Speaker, will the gentleman yield?

Mr. BRAY. I yield to the gentleman from Indiana.

Mr. HARVEY. I appreciate very much the fine statement that our colleague has made. I want to express my belief that the policy of the Commission has not been followed in this instance and I regret the fact that opportunity for local ownership was not given a fair, or at least we will say an equitable hearing at the time the decision was made,

Mr. BROWNSON. Mr. Speaker, will the gentleman yield?

Mr. BRAY. I yield to the gentleman from Indiana.

Mr. BROWNSON. I appreciate the gentleman's solicitude for these stations which are located in my district and I also appreciate the cooperation of the Indiana delegation when we went to call on Commissioner McConnaughey to advise him of our belief that the State of Indiana deserves home ownership for a television station in its capital city.

Mr. BOW. Mr. Speaker, will the gentleman yield?

Mr. BRAY. I yield to the gentleman from Ohio.

Mr. BOW. I know nothing of the merits or demerits of the controversy that the gentleman has referred to. The gentleman, however, in his statement has referred to the Chairman of the FCC, Mr. McConnaughey, and brought out the fact that an Ohio corporation apparently has been favored and indicated that the Chairman lived in the State of Ohio. I should like to say to the gentleman that Mr. McConnaughey has served the State of Ohio in many capacities for many years. He is well known and respected throughout the State and I am sure that his residence in the State of Ohio would not influence him or cause him to do anything improper in any decision he might make. He may be wrong in his decision, I know nothing about the merits of this matter, but I would not want the record left showing a possible inconsistency on the part of the Chairman because of his residence in the State of Ohio as perhaps favoring someone there as against the great State of Indiana.

Mr. BRAY. The facts in this case speak for themselves. He is from the State of Ohio. The Crosley Co., of Ohio, a subsidiary of Avco, does have three stations blanketing the State of Ohio, of which he is a resident. He was the Chairman of the Commission that granted to a New York corporation, Avco, which is the parent corporation, a license for channel 13 in Indianapolis, which, with the station already given to Avco gives them coverage from Pennsylvania and West Virginia to the border of Illinois. There is no attack made on the Chairman. I am merely stating the facts, and the facts in the case speak for themselves.

Mr. BOW. I appreciate the statement the gentleman has just made that there are no illusions against the Chairman because of that fact. It is a coincidence that he lives in Ohio and the license has been granted. But, I would not want the inference that that had influenced his decision in the matter.

Mr. BRAY. If the facts do create an inference that is unfriendly to McConnaughey, I am not making the inference, it is the facts that make the unfriendly inference.

LETTER FROM ATTORNEY GENERAL REGARDING JURY TRIAL AMENDMENT TO CIVIL RIGHTS BILL

Mr. KEATING. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and to include a letter from the Attorney General of the United States with reference to the proposed jury-trial amendment to the civil-rights bill.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. KEATING. Mr. Speaker, in order that the Members may have the benefit of the views of President Eisenhower and Attorney General Brownell in opposition to the proposed jury trial amendment to the civil rights bill, I quote below the text of the letter to me from the Attorney General dated May 31, 1957, dealing with this subject. It is submitted that this letter contains cogent and unanswerable arguments why such an amendment should be rejected.

MAY 31, 1957.

Hon. KENNETH B. KEATING,
House of Representatives,
Washington, D. C.

DEAR CONGRESSMAN KEATING: Thank you for your letter of May 29, 1957, requesting my comments on the proposed amendments to the civil rights legislation which would require a jury trial in contempt proceedings. In addition to the comments which follow may I particularly call to your attention the statement of the American Civil Liberties Union opposing an amendment to require jury trial in contempt proceedings arising under the proposed civil rights legislation. This statement was reprinted in the CONGRESSIONAL RECORD for May 22, 1957, at pages 7369–7371.

The proposed legislation seeks merely to apply long-established civil procedures for enforcing Federal laws to civil rights cases where experience has shown the need for civil remedies. In urging Congress to authorize the Government to institute civil suits for preventive relief in civil rights cases we are requesting the right to use procedures long available to the Government as a means of enforcing other types of Federal laws. Ever since the adoption of the Sherman Act in 1890 the Department of Justice has been empowered to institute proceedings in equity to prevent and restrain civil violations of the antitrust laws as well as to bring criminal prosecutions. The Department of Labor uses the injunctive process as a means of enforcing the Fair Labor Standards Act. The Interstate Commerce Commission, the Civil Aeronautics Board, the Securities and Exchange Commission, the National Labor Relations Board, the Atomic Energy Commission, and other Government agencies have similar authority to use civil remedies in addition to criminal prosecutions. In none of these fields are jury trials required in contempt cases.

There are valid reasons for the ever-increasing use of civil suits for preventive relief as a means of enforcing Federal law. Judicial determination of the validity of a course of conduct in advance aids the Government in its primary purpose of preventing violation of law. It also aids the defendant since he can litigate the legality of his proposed conduct without the necessity of taking action at the risk of a criminal conviction if he guesses incorrectly.

All of these reasons exist in the civil-rights field, particularly in connection with the protection of the right to vote. The primary interest of the Government is in making it possible for all citizens to vote without discrimination based upon race, creed, or color, not in punishing local officials for denying such rights. Often it is not clear whether the particular conduct of a registrar of voters, for example, does constitute a violation of Federal law. Under present law the Government can only wait until the harm has been done—the right to vote denied—and then proceed with a criminal prosecution as a means of testing the validity of the registrar's action. The registrar himself is often caught between community pressures to discriminate and the fear of Federal criminal prosecution with no way to resolve the issue in advance. With civil remedies authorized, the Government will often be able to obtain a judicial ruling

in advance of the election which will determine the legality of the proposed conduct of the registrar, removing from him the necessity of risking criminal prosecution and effectively protecting the constitutionally guaranteed right of citizens to vote without discrimination based on race, creed, or color.

Suits for preventive relief under the proposed legislation will be governed by the traditional rules of procedure which have always applied to such suits. The Government seeks no new or radical procedures to govern injunction suits in civil-rights cases. Under the proposed legislation the rules of procedure which have traditionally governed equitable suits in the Federal courts would apply in the same manner and to the same extent that they now apply to other suits by the Government for preventive relief. The defendant in an injunction suit in a civil-rights case will have the same rights that the defendant now enjoys in a similar suit under the antitrust laws, the Fair Labor Standards Act, or any other one of the Federal laws mentioned above.

These procedural protections are ample to protect all legitimate rights of the defendant. He gets a full hearing before the court on the question of whether his conduct violates Federal law and hence should be enjoined. If he disagrees with the determination of the court, he may appeal the ruling for full consideration by the appellate courts. In most cases this is the end of the matter. The defendant obeys the court order and the public interest in the enforcement of the Federal law has been vindicated. But if the defendant chooses to ignore or defy the court order he may be subjected to punishment for contempt of court. Again he is entitled to a full hearing before the court. He is presumed to be innocent, his guilt must be established beyond a reasonable doubt, and he cannot be compelled to testify against himself. If he is found guilty, he again may appeal. And an examination of the cases in recent years demonstrates that the appellate courts are alert to protect defendants against any possible unfairness in contempt proceedings.

It is true that wherever the Government is authorized to sue for preventive relief the defendant is not entitled to a jury trial in contempt proceedings. The Constitution of the United States recognizes the traditional differences between the procedures of courts of law and courts of equity and does not require jury trial in equitable proceedings. As long ago as 1890 the Supreme Court of the United States said: "It has always been one of the attributes—one of the powers necessarily incident to a court of justice—that it should have this power (the contempt power) of vindicating its dignity, of enforcing its orders, of protecting itself from insult, without the necessity of calling upon a jury to assist it in the exercise of this power." In 1914 Congress passed a statute (now 18 U. S. C. 3691) extending the right to jury trial in criminal contempt cases where the acts constituting the contempt also constitute criminal offenses under Federal or local law. This statute expressly excepted contempts arising out of disobedience to court orders entered in suits brought in the name of the United States. Since criminal contempt proceedings are not often sought in private litigation (the Clinton, Tenn., case is one of the few instances of its use), this statute has had little impact upon the enforcement of Federal court orders. In 1932 in the Norris-La Guardia Act Congress, after removing almost all of the jurisdiction of the Federal courts to issue injunctions in labor dispute cases, provided for jury trial in contempt proceedings arising under the act. It was only with the enactment of the Taft-Hartley Act in 1947 that the Government was given jurisdiction to seek injunctions in any substantial number of labor dispute cases and that act expressly provided that the jury trial requirement of the Norris-La Guardia Act should not apply to it. Hence it is probable that the statute which appears to grant jury trial in contempt proceedings for violation of injunctions issued in labor dispute cases (18 U. S. C. 3692) has no application to injunction suits brought by the Government under Taft-Hartley, which are, for all practical purposes, the only type of injunction suits (private or governmental) in labor dispute cases over which the Federal courts have jurisdiction. (See *United States* v. *United Mine Workers of America* (330 U. S. 258).)

With reference to jury trial, then, the procedure under the proposed legislation would be the same as that which has always governed suits by the Government for preventive relief. This procedure appears at the present time to be effective and satisfactory. I am aware neither of abuse nor of serious complaint of abuse by the Federal courts in contempt proceedings instituted for the purpose of enforcing injunctions issued in governmental litigation. I foresee no reason why this procedure should not be equally satisfactory in civil rights cases.

Enactment of legislation providing for jury trial in contempt cases arising out of governmental litigation would undermine the authority of the Federal courts by seriously weakening their power to enforce their lawful orders. The effect of adopting current proposals for jury trial would be to weaken and undermine the authority of the Federal courts by making their every order, even when issued after due hearing and affirmed on appeal, reviewable by a local jury. Referring to proposals similar to those now advanced President (and later Chief Justice) Taft said in 1908: "The administration of justice lies at the foundation of government. The maintenance of the authority of the courts is essential unless we are prepared to embrace anarchy. Never in the history of the country has there been such an insidious attack upon the judicial system as the proposal to interject a jury trial between all orders of the court made after full hearing and the enforcement of such orders."

Furthermore the proposed amendment to existing procedures that is being advocated under the innocuous slogan of "jury trial" would permit practical nullification of the effectiveness of the proposed civil rights legislation. The enforcement of any court order may require prompt and vigorous action if it is to be effective. Prompt action will often be vital in civil rights cases, especially election cases where the registration period or the election may pass while enforcement is delayed. The injection of a jury trial between an order of a court enjoining discrimination against Negroes in an election and the enforcement of that order would provide numerous opportunities for delay beyond the time when the order could have practical effect.

I hope that the foregoing statement provides the information requested by you. If I can be of further assistance, do not hesitate to call upon me.

Sincerely,

HERBERT BROWNELL, Jr.,
Attorney General.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. SCHERER on June 5, 1957, and from June 17 to June 21, on account of hearings of the Un-American Activities Committee at Albany, N. Y., and San Francisco, Calif.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. HOFFMAN (at the request of Mr. WEAVER), on Monday next, for 30 minutes.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. LOSER and to include an address by the gentleman from Indiana [Mr. MADDEN].

Mr. COAD and to include extraneous matter.

Mr. LONG and to include a joint statement of Secretary Dulles and Secretary Wilson on the William S. Girard case.

Mr. DAWSON of Utah in two instances.

Mr. CORBETT and to include a resolution.

Mr. MAY on the subject of Armenian independence.

Mr. DEMPSEY and include a statement and report from the Department of Agriculture on the barter program at the point in the debate today where he addressed the Committee.

Mr. KEATING.

Mr. HARRISON of Nebraska (at the request of Mr. WEAVER) and include an editorial and an address.

Mr. TUCK (at the request of Mr. ALBERT) and include extraneous matter.

Mr. WILSON of California and include extraneous matter.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1740. An act to authorize the payment from the Employees' Life Insurance Fund of expenses incurred by the Civil Service Commission in assuming and maintaining the assets and liabilities of certain beneficial associations, to the Committee on Post Office and Civil Service.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 895. An act for the relief of Josefa Kusiak; and

S. 1203. An act for the relief of Lydia Anne Foote.

BILL PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, a bill of the following title:

H. R. 6700. An act making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1958, and for other purposes.

ADJOURNMENT

Mr. ALBERT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 42 minutes p. m.), the

House adjourned until tomorrow, Wednesday, June 5, 1957, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

916. A letter from the Secretary of Commerce, transmitting the quarterly report of the Maritime Administration of this Department on the activities and transactions of the Administration under the Merchant Ship Sales Act of 1946, from January 1, 1957, through March 31, 1957, pursuant to the Merchant Ship Sales Act of 1946; to the Committee on Merchant Marine and Fisheries.

917. A letter from the Acting Secretary of State, transmitting a draft of proposed legislation entitled "A bill to amend the North Pacific Fisheries Act of 1954"; to the Committee on Merchant Marine and Fisheries.

918. A letter from the Attorney General, transmitting the report of the Attorney General on the administration of the Subversive Activities Control Act of 1950 for the year ending May 1957, pursuant to the Subversive Activities Control Act of 1950; to the Committee on Un-American Activities.

919. A letter from the Secretary of the Interior, transmitting additional material relating to a letter dated February 12, 1957, transmitting a report on negotiations with prospective purchasers of the falling water to be produced by the Trinity River division of the Central Valley project, pursuant to Public Law 386, 84th Congress; to the Committee on Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. McMILLAN: Committee on the District of Columbia. H. R. 6517. A bill to provide for the retirement of officers and members of the Metropolitan Police force, the Fire Department of the District of Columbia, the United States Park Police force, the White House Police force, and of certain officers and members of the United States Secret Service, and for other purposes; with amendment (Rept. No. 530). Referred to the Committee of the Whole House on the State of the Union.

Mrs. KELLY of New York: Committee on Foreign Affairs. Report of the Special Study Mission on Policy Toward the Satellite Nations; without amendment (Rept. No. 531). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BOYLE:

H. R. 7895. A bill to provide for extension of terms of patents where the use, exploitation, or promotion thereof was prevented, impaired, or delayed by causes due to war, national emergency, or other causes; to the Committee on the Judiciary.

By Mr. CHAMBERLAIN:

H. R. 7896. A bill to amend title II of the Social Security Act to increase the amount of outside earnings permitted without deductions from benefits thereunder; to the Committee on Ways and Means.

By Mr. CUNNINGHAM of Iowa:

H. R. 7897. A bill to amend section 1332 of title 10 of the United States Code to provide for counting active service in wartime as double time for the purposes of determining eligibility for and the amount of retired pay for nonregular service; to the Committee on Armed Services.

By Mr. CURTIS of Missouri:

H. R. 7898. A bill to revise the authorization with respect to the charging of tolls on the bridge across the Mississippi River near Jefferson Barracks, Mo.; to the Committee on Public Works.

By Mr. FLOOD:

H. R. 7899. A bill to authorize the sale of certain vessels to Belgium for use in the exportation of anthracite coal from Philadelphia to ports in Belgium and the Netherlands; to the Committee on Merchant Marine and Fisheries.

By Mr. FORD:

H. R. 7900. A bill to permit the Secretary of Agriculture to sell to individuals land in Ottawa County, Mich., which was acquired pursuant to the provisions of title III of the Bankhead-Jones Farm Tenant Act; to the Committee on Agriculture.

By Mrs. GRANAHAN:

H. R. 7901. A bill to revise the Postal Field Service Compensation Act of 1955 to provide certain employment benefits for postal field service employees; to the Committee on Post Office and Civil Service.

By Mr. GUBSER:

H. R. 7902. A bill to authorize travel and transportation allowances in the case of certain members of the uniformed services; to the Committee on Armed Services.

By Mr. HYDE:

H. R. 7903. A bill to amend title 18, United States Code, to authorize the enforcement of State statutes prescribing criminal penalties for subversive activities; to the Committee on the Judiciary.

By Mr. KEATING:

H. R. 7904. A bill to provide for the issuance of special nonquota immigrant visas to certain aliens who applied for admission to the United States under the Refugee Relief Act of 1953, and for the issuance of such visas to spouses and children of aliens admitted to the United States under such act; to the Committee on the Judiciary.

By Mrs. KEE:

H. R. 7905. A bill to amend title II of the Social Security Act to reduce from 62 to 50 the age at which widows' benefits become payable thereunder; to the Committee on Ways and Means.

By Mr. MURRAY:

H. R. 7906. A bill to amend the laws relating to the bonding of bidders and contractors for the transportation of mail; the advertisement and extension of mail routes; and for other purposes; to the Committee on Post Office and Civil Service.

H. R. 7907. A bill relating to contracts for the conduct of contract postal stations, and for other purposes; to the Committee on Post Office and Civil Service.

H. R. 7908. A bill to amend certain provisions of law in order to provide for the reimbursement of the Post Office Department for expenses incurred in performing certain services for other agencies, and for other purposes; to the Committee on Post Office and Civil Service.

H. R. 7909. A bill to clarify the law relating to the acceptance of business reply cards and letters in business reply envelopes, and for other purposes; to the Committee on Post Office and Civil Service.

H. R. 7910. A bill to revise the laws relating to the handling of short-paid and undeliverable mail, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. MURRAY (by request):

H. R. 7911. A bill to amend certain sections of title 13 of the United States Code, entitled "Census"; to the Committee on Post Office and Civil Service.

By Mr. PATTERSON:

H. R. 7912. A bill to authorize, in case of the death of a member of the uniformed services, certain transportation expenses for his dependents; to the Committee on Armed Services.

By Mr. PILLION:

H. R. 7913. A bill to promote the increase and diffusion of knowledge of the Antarctic; to the Committee on Interior and Insular Affairs.

By Mr. REECE of Tennessee:

H. R. 7914. A bill to amend the Career Compensation Act of 1949 to provide incentive pay for human test subjects; to the Committee on Armed Services.

By Mr. WALTER:

H. R. 7915. A bill to amend section 1733 of title 28, United States Code; to the Committee on the Judiciary.

By Mr. BROOMFIELD:

H. Res. 272. Resolution to authorize the Committee on Education and Labor to conduct an investigation and study of the feasibility of returning a portion of moneys collected as Federal taxes to the State, Territory, or the District of Columbia (as the case may be), from which such taxes were derived, for use for school construction; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BLATNIK:

H. R. 7916. A bill for the relief of Nikola Matak; to the Committee on the Judiciary.

By Mr. CELLER:

H. R. 7917. A bill for the relief of Ernst Haeusserman; to the Committee on the Judiciary.

By Mr. HERLONG:

H. R. 7918. A bill for the relief of Olson Corp. of Beresford, Fla.; to the Committee on the Judiciary.

By Mr. HOLT (by request):

H. R. 7919. A bill for the relief of Louis Narni-Mancinelli; to the Committee on the Judiciary.

H. R. 7920. A bill for the relief of Myer Leveen; to the Committee on the Judiciary.

By Mr. HOLTZMAN:

H. R. 7921. A bill for the relief of Branko Franovic; to the Committee on the Judiciary.

By Mr. JAMES:

H. R. 7922. A bill for the relief of Mardiros Kapamaciyan; to the Committee on the Judiciary.

By Mr. McDONOUGH (by request):

H. R. 7923. A bill for the relief of Mrs. Marie Seraydarian; to the Committee on the Judiciary.

H. R. 7924. A bill for the relief of Mrs. Lucy Seraydarian Vartanian; to the Committee on the Judiciary.

By Mr. MACHROWICZ:

H. R. 7925. A bill for the relief of Maria Stroclak; to the Committee on the Judiciary.

By Mr. MACK of Washington:

H. R. 7926. A bill for the relief of Catherine Katalinich; to the Committee on the Judiciary.

By Mr. PRICE:

H. R. 7927. A bill for the relief of Nuvart Donikian; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

263. Mr. HOEVEN presented a petition of Sioux City, Iowa, Chamber of Commerce urging that the Congress appropriate sufficient funds to permit operation of the Federal flood-insurance program as authorized under Public Law 1016, 84th Congress, which was referred to the Committee on Appropriations.

EXTENSIONS OF REMARKS

Statement of Hon. Kenneth B. Keating, of New York, To Extend the Refugee Relief Act of 1953

EXTENSION OF REMARKS
OF
HON. KENNETH B. KEATING
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 4, 1957

Mr. KEATING. Mr. Speaker, today I have introduced a bill to extend the Refugee Relief Act of 1953 for some 58,000 immigrants cut off by termination of the act.

Under terms of the bill, special nonquota immigration visas would be issued to spouses and minor unmarried children who for various reasons were left behind, when their breadwinner came to the United States under the Refugee Relief Act of 1953.

Another section of the bill would grant special nonquota visas to "pipeline" cases—those people and their spouses and unmarried minor children whose assurances had been received and whose applications for entrance into the United States had begun to be processed, but who were unable to come to this country due to the expiration of the act, or the shortage of visas.

Under both sections of the bill, the immigrant involved would be required to file an application, have assurances from American sponsors submitted and verified by State Department officials, and undergo investigations as provided in the Refugee Relief Act. An exception to this rule would be in cases involving immigrants for whom assurances had been submitted and verified under the old act. They would merely be required to have their original assurances reverified. If the old assurance were found to be no longer valid, however, a new assurance would have to be submitted and verified.

All safeguards of the Refugee Relief Act, including thorough investigatory provisions are retained in the proposed act, which would terminate 2 years after the date of its enactment.

The plight of families separated by expiration of the Refugee Relief Act is stark in the extreme. Many families sent their breadwinner on ahead to America, in full expectation the dependents could follow, only to be thwarted by the end of the act, a dearth of visas, or the complexities of the immigration laws.

Today, those from countries with heavily oversubscribed quotas face years and years of separation from their loved ones while awaiting visas. We must end these heart-rending separations.

This country should also permit entrance to those pipeline cases whose hopes for coming to America were raised only to be crushed when quotas became filled. After having earned the privilege of a visa, they now face the prospect of waiting for years for such authorization. We should grant these people special nonquota immigration visas.

According to estimates supplied by the Department of State, the following is a list of pipeline applicants who failed to obtain visas:

Belgium	1,601
France	2,001
Germany	368
Great Britain	1,563
Greece	11,323
Italy	24,175
Netherlands	362
Norway	24
Sweden	402
Jordan	367
Kuwait	36
Lebanon	495
Turkey	20
Burma	2
China	694
Hong Kong	13,357
Japan	1,865
Korea	175
Singapore	29
Australia	6
Costa Rica	1
Spain	2
Total	58,868

Passage of this legislation could strike a telling blow for America at a time when we are the target of so much worldwide criticism because of the stringency and inflexibility of our immigration laws. By enacting this bill into law, we can thus help ourselves abroad by raising our prestige, and can help ourselves at home by enriching our national blood with new and worthy citizens.

It is my hope that early hearings can be held on this legislation, as well as all other legislative proposals which have been made to amend our immigration statutes.

National Better Newspaper Contests

EXTENSION OF REMARKS
OF
HON. WILLIAM A. DAWSON
OF UTAH
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 4, 1957

Mr. DAWSON of Utah. Mr. Speaker, one of the many attractions of living in rural areas or small towns in this great country of ours is the hometown paper, more often than not a weekly with a total circulation which does not approach the street sale alone of a metropolitan daily.

These newspapers serve an entirely different purpose from their larger daily brethren, but they form as integral a part of that inestimable institution, the American Press. They prove, every week of the year, that the highest standards of journalism are not confined to, have no relation to, the size of newspaper circulation, staff, or plant.

Recently, the National Editorial Association announced the winners of its 1957 National Newspaper Contests. I am proud to notice, and to call to the attention of the House, that 2 of the plaques in the under 2,000 circulation class were won by Utah weeklies. The Springville Herald won first place for best news story with its outstanding account of a railroad wreck, and the Nephi Times-News won third place in service to agriculture. Our congratulations should go not only to those papers, but to their readers.

Address by Hon. Leverett Saltonstall, of Massachusetts, Before Graduating Marine Lieutenants of the Basic School at Quantico, Va.

EXTENSION OF REMARKS
OF
HON. BOB WILSON
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 4, 1957

Mr. WILSON of California. Mr. Speaker, on May 11, the distinguished senior Senator from Massachusetts, LEVERETT SALTONSTALL, addressed the graduating Marine lieutenants of the basic school at Quantico, Va. Because he is the ranking minority member of the Armed Services Committee of the Senate, his opinions regarding our Defense Establishment are particularly worthy of note. Unanimous consent is requested to insert at this point in the RECORD excerpts from his speech of May 11:

In our new role of world leadership among the free nations, the United States cannot follow the easy road of expediency but must always follow the sometimes hard road of keeping to our word.

We helped to establish the United Nations and we are firmly and irrevocably committed to abide by its charter. Sometimes we find ourselves confronted with the bitter choice of keeping our promises under that charter and taking actions which appear in the short run to be against our friends.

Such was the case in Hungary and again in Egypt. Here the leaders of our country had to make trying decisions but in each case the decision was that we should keep our word. Future generations will determine whether the courses we followed were right or wrong but it is my firm conviction that it is never wrong to stand by solemn promises. This applies to a nation as well as an individual. We want to live up to our word as we have in the past, and this is even more important to us now as leaders of the free nations of the world so that we can inspire the confidence of others in us.

We must also make other important decisions. We must remain strong and powerful in our armed services and in our economy. We must make the determinations as to just what our force levels should be and how much of our national productivity should be expended for our national defense. We must continue to develop new weapons for defense and retaliation and we must maintain the most modern military doctrines. Overall, we must be alert and imaginative as well as realistic and practical.

Marine Corps officers must be prepared to be first-line diplomats as well as frontline soldiers.

They must demonstrate to the world the high integrity and good character of American citizens. The time has passed when our military officers can consider their qualifications complete when they attain technical and military proficiency. Today our officers

all over the world represent symbols of the American way of life. On you rests the great responsibility of demonstrating to people in foreign lands wherever you may be the qualities of Americanism and the traditions of our heritage of which we are so justly proud.

You have reason to be proud of your corps and of the school from which you have today graduated. These schools at Quantico have had the distinction in modern military history of being among the outstanding doctrinal leaders in new military concepts. After the disastrous defeat of the British amphibious landing force at Gallipoli in the First World War, military strategists discarded the amphibious attack. The Marine Corps nonetheless persisted in its beliefs in a balanced fleet and through the bleak thirties developed the successful amphibious doctrine which was ultimately responsible for our victory in the Pacific during World War II.

Your own commander after the Second World War inspired the development of another new concept—the vertical envelopment, an amphibious assault tailored to an atomic era. Gen. Merrill B. Twining has been imaginative and vigorous in his development of new military concepts for our Navy and Marine Corps. He has indeed recognized the unique function of the marines when in a Navy Day address he said, "The United States Fleet, in the form it exists today, is just such a force (versatile, highly mobile force in being), and is tailored to the exact requirements. Its flexibility enables it to meet nearly any situation. An occupation, a brush fire war, a nonatomic war in a Communist controlled satellite area, or a major assault on the enemy's homeland—all these require varying degrees of military force, nicely graduated to fill the gap between scattering leaflets and dropping hydrogen bombs."

The Marine Corps, unique among military organizations as an integrated, coordinated military team, is an important part of our Nation's balanced military defense concept.

The Marine Corps has throughout its history and does today represent a mobile force in readiness. We hope that we will not have to use our forces. We do not start wars. But if they start one, we have mobile fleet marine forces which are always ready.

The United States Marine Corps has traditionally stood as a symbol to the world of American determination to resist aggression and tyranny, whether by Barbary pirates on the shores of Tripoli or Communists in Korea.

You can be proud of this tradition. You can be proud to be marines.

Armenian Independence Day

EXTENSION OF REMARKS

OF

HON. EDWIN H. MAY, JR.

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 4, 1957

Mr. MAY. Mr. Speaker, on June 2, in New Britain, Conn., I had the distinct privilege of being principal speaker at a gathering of 350 people of Armenian descent who were celebrating the 39th anniversary of Armenian independence day.

On May 28, 1918, Armenian independence was proclaimed and a democratic republic was established. Independence for this valiant people was short-lived, however, and after 2½ years the Armenian Republic was beset by Soviet intrigue and invasion. During the existence of the republic, the United States was generous in its assistance to the Armenian people by sending clothing, food, and medicine.

A heroic stand was made against the occupation by the Soviet Union in February 1921. The Soviets were ejected and for a period of 3 months were kept from occupying the country. Ultimately, the small republic, faced with overwhelming military odds, fell and since that time, Armenia has been under the heel of Soviet tyranny. It is now one of the so-called independent republics of the Soviet Union.

In the United States and elsewhere in the world there are people of Armenian origin who will never rest until the beloved land of their origin is again a free and independent nation. To work toward this end, an organization was formed and is known as the American Committee for the Independence of Armenia.

Let us in Congress remember that the cries and prayers for freedom from the Armenian people, although not audible from behind the Iron Curtain, are, nevertheless, as real and as fervent as the cries of the Hungarian people and those of the other captive countries. Let us work and pray, too, for the eventual liberation of the brave and suffering people of Armenia.

Revision of the Natural Gas Act

EXTENSION OF REMARKS

OF

HON. MERWIN COAD

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 4, 1957

Mr. COAD. Mr. Speaker, the following is a statement which I made before the House Interstate and Foreign Commerce Committee in opposition to the measures which call for the revision of the Natural Gas Act. My statement to this committee is as follows:

STATEMENT BEFORE INTERSTATE AND FOREIGN COMMERCE COMMITTEE ON JUNE 4, 1957, BY HON. MERWIN COAD, OF IOWA

Mr. Chairman, I am MERWIN COAD, Representative in Congress from the Sixth Iowa District, and I appreciate the opportunity afforded me in coming before your committee. I will be brief in my statement as I know you have heard many learned persons to date on the subject under consideration and many are yet to be heard.

The Sixth District of Iowa is composed of 15 large counties which are largely rural but are dotted with many towns and some small cities. We already have many of our communities using natural gas and at the present time arrangements are being made and negotiations completed to bring more natural gas to still additional towns and communities in the district. The people desire the efficient, clean, and moderately priced natural gas for use in their homes and for industrial purposes.

There are no oil or gas wells located in the State of Iowa, much less in the Sixth Iowa District. Therefore, all of the people whom I represent are consumers and I am stating this case in their behalf. However, even though all my people are consumers, they are still aware of the fact that those who produce, transport, and distribute natural gas must make a healthy margin of profit in order to continue their operations. There is no controversy whatsoever about this. But on the other hand, it is obvious that the rights of the consumer must be protected in those measures which would change the situation which has seemingly been fair and equitable to all involved. Admittedly the producers through to the distributors of natural gas have been regulated by one or another agency of the Government whether Federal, State, or local. But even so, there have been no cases recorded publicly to my knowledge wherein any Government agency acted in such manner as to bring about the economic death of any natural-gas producer, transporter, or distributor. In fact, the economic picture of the entire gas industry has been, throughout the years, one of good health. The general utility field has been one of the surest and safest attractions for capital.

It is obvious then, when an industry which has fared well under the observation, supervision, and regulation of a governmental agency wants to be removed from this control, it is not to reduce its pricing structure, nor to lower its profit level. Quite to the contrary, the only reason any group would want to free itself from any constricting regulation would be to further enhance its own economic picture.

Let us remember that those who are natural-gas consumers are limited and controlled. They are limited to using natural gas for they are controlled by the fact that they have a heavy investment in those appliances which utilize only natural gas. It is not a matter of deciding one day to change from one fuel to another.

Further, it should also be remembered that the industrial users will not shoulder the load of any increased costs, for already the home user pays the bulk of the costs which include the profit and the industrial users pay little more than the actual cost of the gas plus transportation.

Obviously, the consumer will pay for any increase in the cost of natural gas, just the same as the consumer pays the increased cost of any commodity. With the pricing structure the way it is already set up, it will mean that the families, in their homes, will pay any increase in the cost of natural gas.

There are millions of American families tied to the natural gas lines. Unless the Congress maintains a constant vigil for their rights, they stand unprotected.

Originally, the Natural Gas Act of 1938 was to protect the consumer against exploitation at the hands of natural gas companies when it was clearly seen that the States could not adequately supply this basic protection. It is also a known fact that the large oil companies control the production of natural gas. These companies have fared very well under the present regulatory law and the people's rights have been protected. Surely, for the sake of justice and fairness it would be unwise to turn loose these industrial giants upon the unorganized forces of our family unit consumers.

There have been many attempts to repeal the Natural Gas Act, but always there have been those who have stood firmly voicing the concern of the people who are not in a position to speak for themselves. Today, I stand in opposition to H. R. 6790 which would only free the producers of natural gas from pricing control. I do not believe this bill would be in the best interests of my people, nor would it be in the best interests of the total American consuming public. The only ones who would benefit by this measure would be those who are the producers of natural gas and their profit-and-loss sheets do not provide evidence that they have been the recipients of any economic abuse under the present Natural Gas Act.

I take this opportunity to express to you again my appreciation for the graciousness of your committee in permitting me to make this statement.

Poll Results

EXTENSION OF REMARKS
OF
HON. ROBERT J. CORBETT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 4, 1957

Mr. CORBETT. Mr. Speaker, since my first term in Congress in 1939 I have regularly conducted polls of public thinking on vital national issues in my Congressional district. The polls have been in the form of a printed questionnaire, requiring simple yes-and-no answers, mailed to registered voters in my district, regardless of political affiliation.

Total responses to the questionnaires have always been excellent. Because of the manner in which the polls are conducted, the tabulated results virtually constitute a referendum of the district and they have proved of enormous value to myself and, I hope, to my colleagues in the Congress.

My Congressional district is probably as representative and contains as many varied interest groups as any in the Nation. It has the wealthy, the poor, and the so-called middle class. It has a high concentration of labor, white-collar workers, small business, large industries, and some of the finest farmlands found anywhere. The district includes a thickly populated section of Pittsburgh, extends to the rural areas, and takes in many large and small residential towns in northern Allegheny County.

The percentage tabulation of the answers on the poll I have just recently conducted are included below without comment, along with the results of the poll I conducted at the beginning of the session.

I trust the results will prove as interesting and informative to all who study them as they are to me.

The polls follow:

POLL RESULTS, JANUARY 1957

1. Do you like the President's determined efforts to establish equal rights for Negroes? Yes, 72 percent; no, 28 percent.

2. Should we give permanent status to the Hungarian refugees? Yes, 38 percent; no, 62 percent.

3. Do you agree that we can admit a somewhat larger number of permanent immigrants? Yes, 32 percent; no, 68 percent.

4. Do you prefer a balanced budget to an income-tax reduction? Yes, 81 percent; no, 19 percent.

5. If a Treasury surplus develops would you prefer debt reduction to a cut in excise taxes? Yes, 81 percent; no, 19 percent.

6. Do you believe that the selection of Congressional committee chairmen by seniority is very bad? Yes, 70 percent; no, 30 percent.

7. Would you oppose increasing postal rates? Yes, 33 percent; no, 67 percent.

8. Do you think we are spending too much money on national defense? Yes, 19 percent; no, 81 percent.

9. Do you think we are spending too much money on foreign aid? Yes, 78 percent; no, 22 percent.

10. Do you oppose the Federal Reserve Board's policy of restricting credit (so-called hard money program)? Yes, 28 percent; no, 72 percent.

11. Do you believe the voting age should be lowered to 18 years? Yes, 37 percent; no, 63 percent.

12. Should the Congress grant the President the powers he requests to deal with the problems of Egypt and Asia Minor (so-called Middle East)? Yes, 77 percent; no, 23 percent.

POLL RESULTS, JUNE 1957

1. Do you approve appropriating Federal funds for a public school construction program? Yes, 55 percent; no, 41 percent; no reply, 4 percent.

2. President Eisenhower has reduced his request for foreign aid to $3.9 billion. Do you think it would be wise to cut his request by as much as $1 billion more? Yes, 50 percent; no, 45 percent; no reply, 5 percent.

3. Do you feel that substantial cuts can safely be made in funds available to the armed services? Yes, 38 percent; no, 56 percent; no reply, 6 percent.

4. Do you favor the construction of the Allegheny River Reservoir, often called the Kinzua Dam? Yes, 53 percent; no, 36 percent; no reply, 11 percent.

5. Should such professional sports as baseball, football, basketball, and hockey be subject to the antitrust laws? Yes, 54 percent; no, 31 percent; no reply, 15 percent.

6. Congress will soon vote on statehood for Hawaii and Alaska. Would you vote "yes" or "no"? Yes, 86 percent; no, 9 percent; no reply, 5 percent.

7. The House committee has favorably reported a bill raising postage rates on all classes of mail about $500 million. How would you vote? Yes, 77 percent; no, 19 percent; no reply, 4 percent.

8. Do you believe that Government is more to blame for post-Korean war price increases than labor and management? Yes, 29 percent; no, 59 percent; no reply, 12 percent.

9. Are you generally satisfied with President Eisenhower's conduct of domestic affairs? Yes, 73 percent; no, 23 percent; no reply, 4 percent.

10. Are you generally satisfied with President Eisenhower's conduct of foreign affairs? Yes, 63 percent; no, 31 percent; no reply, 6 percent.

P. S.—I am endeavoring to answer all separate requests and comments accompanying the returned questionnaires. Because of the workload some may undoubtedly be overlooked. Consequently, if you do not receive a reply within the next 10 days to any such request, please inform me.

Alaska Statehood

EXTENSION OF REMARKS
OF
HON. WILLIAM A. DAWSON
OF UTAH
IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 4, 1957

Mr. DAWSON of Utah. Mr. Speaker, I wish to take just a moment or two to comment on the results of the meeting of the House Interior and Insular Affairs Committee of Tuesday, May 28. At that time the full committee considered the bill which would admit Alaska into the Union. The Subcommittee on Territories and Insular Affairs had, a short time prior to the aforesaid meeting, voted out the statehood bill, after having conducted hearings and having considered innumerable amendments since the legislation was first taken up on March 11, at the 1st session of the 85th Congress.

Of the amendments that were adopted by the subcommittee, four principal amendments were considered separately by the full committee for adoption or rejection. First of all, an amendment providing that an election be held in Alaska to determine whether the duly qualified electors wished to have their Territory become a State, before it could legally become such even though Congress had favorably passed the legislation, was rejected by the committee. I felt that the people of Alaska had expressed their wishes on this matter previously; directly, in a referendum on the question in 1948, and indirectly, by approving the proposed Alaskan constitution drafted at a 75-day session commencing on November 8, at a constitutional convention formed pursuant to a law enacted by the 1955 territorial legislature. It is interesting to note that the Governor-designate of Alaska, Mike Stepovich, of Fairbanks, Alaska, indicated by telegram to the Interior Committee that while he would accede to the wishes of the Congress on this matter, he felt, as I have stated, that the foregoing was an indication of the feelings of the Alaskan people on this subject plus the further fact that a further referendum would be an unnecessary expense.

The second amendment considered by the committee was a proposal which would have delayed for 5 years after Alaska finally became a State, the transfer of jurisdiction over the fish and wildlife resources to the new State. This amendment, which was rejected by a 17–14 vote, means that the bill as it now stands, if enacted into law, would transfer these resources from the control of the United States Fish and Wildlife Service to the new State of Alaska. What this will mean to Alaska can be shown by simply referring to the 1956 Annual Report of the Governor of Alaska, where, on page 1, it is stated:

> Alaska's economic condition was generally good and did not change materially during the year. Total production from Alaska's natural resources totaled $131 million. Of this, $69.7 million was from the fisheries.

The third and fourth amendments, which were also considered separately by the committee, included a proposal by Delegate BARTLETT, of Alaska, to substitute language so as to require any Federal agency to obtain Congressional approval before taking over 5,000 acres or more of public land for its use during the first 5 years of statehood, and a proposal for retention in the Federal Maritime Board of its exclusive jurisdiction over common carriers engaged in transportation by water between any ports in the new State of Alaska, and between any port in Alaska and other ports in the United States, its Territories, or possessions. While a somewhat similar bill to the substitute language proposed by Delegate BARTLETT, in respect to the maximum

amount of public-land withdrawals without Congressional approval is pending before the House Interior Committee, the proposal to substitute was also rejected by the full committee as was the final amendment.

The full committee then adopted the rest of the amendments contained in the bill before it and proceeded to vote out the statehood bill by a vote of 24 to 6. As a firm believer in statehood for Alaska and Hawaii, I was happy to see that 11 of the 13 Republicans who voted on the bill and 13 of the 17 Democrats voted in favor of the legislation. It is this kind of bipartisan proceeding that will be necessary for the passage of this statehood legislation. I sincerely hope that it will be demonstrated when the House of Representatives votes on this important measure.

Address of Hon. Peter F. Mack, Jr., of Illinois, at Memorial Day Service, Honor Roll Park, Morrisonville, Ill., on Thursday, May 30, 1957

EXTENSION OF REMARKS
OF

HON. J. CARLTON LOSER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 4, 1957

Mr. LOSER. Mr. Speaker, our distinguished colleague, the Honorable PETER F. MACK, JR., delivered an outstanding address at Memorial Day services at Honor Roll Park in Morrisonville, Ill., on Thursday, May 30, 1957.

Under leave to extend my remarks, I am inserting in the RECORD this very fine address:

ADDRESS OF HON. PETER F. MACK, JR., OF ILLINOIS, AT MEMORIAL DAY SERVICES AT HONOR ROLL PARK, MORRISONVILLE, ILL., ON THURSDAY, MAY 30, 1957

I am proud to have been asked to participate in your Memorial Day service. But I am wondering why I was selected for this high honor.

Possibly it is because I am your neighbor and treasure the association and friendship of your fellow townsman.

Perhaps it is because I have served in the military service and have a continuing interest in it through my participation in the active Naval Reserve.

I think it is more logical, however, that you chose me because of my office as your Representative in Congress.

This office has been made possible by those men who have given their lives to protect our democratic form of Government.

Without their sacrifices our Congress would not exist nor would the liberties which we enjoy under our representative form of Government.

Therefore, it was appropriate for you to call on me, as your Congressman, to participate in this memorial service, so that I can be reminded of the responsibilities we have assumed in continuing the fight for a peaceful world.

Many of the Morrisonville men who gave their lives, and whose names appear on the honor roll in this park, were personal friends of mine.

There is no honor we can pay that is too great for the one who has made the supreme sacrifice of giving his life for his country.

In our feeble way, we are trying to remember the great contributions of our war dead and the sacrifices they made, by inscribing their names on this scroll and coming to honor them every Memorial Day. This is little enough for the service they rendered.

We should pray to God every single day of our life in this democratic country that these men we honor today will be sufficiently rewarded and decorated in the halls of heaven for their sacrifices on the sea, in the air, and on the battlefields of Europe, Korea, and the South Pacific.

Most of us here today are old enough to remember Memorial Days when there were still a few Civil War veterans around to occupy seats of honor on the platform.

We can recall when men who had fought in the Spanish-American War of 1898 were in the vigorous prime of early middle age.

Youthful veterans of the First World War led the march to the cemetery on Memorial Day. Most of us called it Decoration Day then.

Now, it is we veterans of World War II who have turned gray at the temples.

Veterans of the Korean war are the latest group of Americans who offered to give their lives that the Nation might live.

Each of the earlier wars had its troublesome aftermath. But none posed as many vexing problems, as much uncertainty or as grave a threat to our very existence, as our present concern with the hydrogen bomb.

In Washington this week the congressional Joint Committee on Atomic Energy, composed of Members of the Senate and the House of Representatives, began public hearings on the question of radioactive fallout from nuclear weapons explosions and its effect on man.

These hearings probably won't get as many headlines as the investigation of Dave Beck, but a Washington newspaper calls the fallout hearings the biggest quiz show of the century. As this newspaper put it, the question is: How much radiation from weapons tests, natural cosmic rays and medical X-rays can man tolerate without placing a veto on future generations?

The answer of the scientists seems to be nobody knows.

Nobody knows for sure how much radiation the human system can tolerate without hazard to health.

Nobody knows for sure how big a nuclear dose can be absorbed without harm to future generations.

We do know that radiation from any source—natural or manmade—is harmful.

The fallout hazard probably is greater in countries like the United States where medical X-rays already have subjected many people to considerable radiation.

Just what is fallout? I have heard it defined as the dropping back to earth of radioactive particles hurled into the atmosphere by nuclear explosions.

Scientists tell us that the most dangerous element of radioactive fallout is strontium 90. Two physics professors, John Fowler of Washington University in St. Louis and Norman Goldberg of the University of Pennsylvania, told of the dangers from strontium 90 in an article reprinted in the CONGRESSIONAL RECORD.

They wrote: "There is a strong possibility * * * that any amount of strontium 90 can cause serious damage—leukemia or bone tumors. Many scientists strongly suspect that any radiation which takes us appreciably above the existing natural level of radiation, which is due to cosmic rays, natural radioactivity in the soil, etc., is dangerous. We do not know what amount of damage is being done by these natural radiations and so cannot safely evaluate the effect of adding to them."

Yet we are told by a member of the Atomic Energy Commission, Dr. Willard Libby, that the risk from fallout is extremely small. Dr. Libby feels that these risks have been exaggerated by the many scientists and others who have called upon the United States, Britain, and Russia to stop testing large nuclear weapons.

On the other side of this question we have such scientists as Linus Pauling, winner of the Nobel prize in chemistry, and Laurence H. Snyder, president of the American Association for the Advancement of Scientists; such humanitarians as Pope Pius XII and Dr. Albert Schweitzer, and such statesmen as Adlai Stevenson, all of these men have urged that the testing of nuclear bombs be halted.

Just this week a petition signed by 25 prominent scientists, including Dr. Pauling and Dr. Snyder, states that—and I quote—"Each added amount of radiation causes damage to the health of human beings all over the world and causes damage to the pool of human germ plasm such as to lead to an increase in the number of seriously defective children that will be born in future generations."

Even Dr. Libby, who sees no real danger in continuing the tests, concedes that—and again I quote—"No scientist maintains that there is no risk at all from test fallout."

Another official who holds somewhat the same view is Dr. Charles L. Dunham, Director of the Biology and Medicine Division of the Atomic Energy Commission. Testifying before the joint committee, Dr. Dunham said that there is no question that any quantity—I repeat, any quantity—of radioactive fallout is undesirable.

But then he went on to say that other policy considerations besides health govern the continuance of weapons tests. Dr. Dunham said that from 300 to 500 scientists employed by the Atomic Energy Commission are now devoting their full time to studying radiation hazards.

My own view is that the United States should take the initiative now—with or without an international agreement—to stop the testing of large nuclear bombs.

Limited experimentation with small nuclear weapons may be necessary. But we should strive for an agreement that will put a stop to explosions of hydrogen bombs and other large nuclear devices that scatter harmful radioactive ash all over the world.

The United States was the first Nation to achieve atomic fission. We were the first Nation to drop an atom bomb. We are the only Nation that has ever used a nuclear bomb as an instrument of warfare. We have a greater moral responsibility than any other nation in this matter. I am not criticizing the decision to drop the atom bomb on Japan during World War II. Responsible statesmen and military leaders say these bombings actually saved lives by shortening the war.

I do say, however, that because we were the first to use the atom bomb in war, we have a moral responsibility to take the lead in taming the atom.

We should concentrate our efforts on adapting nuclear energy to peaceful uses so that it will become a blessing to mankind instead of a curse.

In my humble opinion there is nothing constructive to be gained from continued testing of hydrogen bombs or other large nuclear weapons.

I am not an atomic scientist. But as a layman with a continuing interest in this subject, I have been convinced that we already are capable of devastating one-quarter the surface of the earth in a matter of a few hours. Must we carry the art of destruction to any greater degree of perfection?

The small nations of the world look to the United States for leadership in this matter.

We must remember that nuclear weapons are now being manufactured by only three nations—the United States, Britain, and Russia.

But the peoples of the small countries of Europe and Asia, Africa, and the Americas, cannot evade the hazards to which they are exposed by our continued experimentation.

It has been said that the soil of Japan has been contaminated by Russian experiments in Siberia while the fish that are the staple of the Japanese diet has been contaminated by American experiments at Bikini.

Our moral responsibility is all the greater because of these risks to other peoples because of a national policy over which they have no control.

Why do not the United States, Britain, and Russia come to an agreement to end the testing of atomic bombs? Albert Schweitzer, the great humanitarian and winner of the Nobel peace prize, gives this answer.

"The real reason," Dr. Schweitzer wrote, "Is that in their own countries there is no public opinion asking for it. * * * Public opinion in all nations concerned must inspire and accept the agreement."

The Gallup poll recently reported that 63 percent of Americans believe the United States should stop testing nuclear weapons and H-bombs if Russia also agrees to stop.

It is my belief that the United States, without risk to our security, can stop these tests now, without waiting for agreement from Russia.

The effect of such a decision by us would go farther toward winning allies in this troubled world than the billions we have spent on foreign aid.

It has been said that the cold war is principally a battle for minds and souls of peoples in the neutral nations.

The proposed ban on further testing of H-bombs is a propaganda weapon of the greatest magnitude. Let's use it to advance the cause of peace in the world.

Representative Glenn Cunningham, of Nebraska, Shows How Matching Funds Penalize Industrious States and Cities

EXTENSION OF REMARKS

OF

HON. ROBERT D. HARRISON

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 4, 1957

Mr. HARRISON of Nebraska. Mr. Speaker, my colleague from Nebraska, Representative GLENN CUNNINGHAM, was given the 1957 outstanding alumnus award by the University of Omaha Alumni Association. Mr. CUNNINGHAM received this annual award in recognition of his work in civic and governmental affairs since his graduation from the university in 1935.

At the annual award banquet June 1 in Omaha, Mr. CUNNINGHAM spoke out sharply against certain matching funds of the Federal Government which allow reapportionment of unused State quotas. He pointed out that these programs are penalizing those States and cities which have gone ahead and done the job on their own, not waiting for or looking for a handout from Washington. His address follows:

ADDRESS BY THE HONORABLE GLENN CUNNINGHAM, MEMBER OF THE HOUSE OF REPRESENTATIVES FROM NEBRASKA, ON THE OCCASION OF THE 1957 ALUMNI ACHIEVEMENT DAY BANQUET, UNIVERSITY OF OMAHA, JUNE 1, 1957

Ladies and gentlemen, these past few months in Washington have been interesting—perhaps fascinating is a better word—but they have also been quite revealing. The manipulations of those in Government are interesting to follow, and the workings of our vast and complex Government sometimes leave you shaking your head.

Tonight I would like to take a few minutes to discuss an area of legislation which involves a sizable share of the 1958 budget. It is an area which promotes and fosters spending—not only by the Federal Government—but by States and cities as well.

It is an area that must be the delight of the free spenders and big dealers * * * those implanted in Government during the days when it was so fashionable to outbid the fellow at the next desk in devising schemes to give away Federal money.

JUST ONE FACET

Let me briefly describe this activity that is costing all of us a lot of unnecessary money. And please bear in mind that this information is the result of a study I have undertaken of just one small facet of the huge budget which contains 1,150 pages in all. There are many other parts where great economies can be made, such as in the public works bill—better known as the pork barrel. Year after year, this bill includes some public works projects which have not been approved by the departments concerned. Fortunately, last year President Eisenhower vetoed such a bill because of the unauthorized projects. But the good and approved projects get set back too. Senator ROMAN HRUSKA, a past recipient of the award given me tonight, made a valiant but futile fight on the floor of the Senate to strike out these unapproved projects this year, but the economy forces could not muster the needed strength, and the pork barrel rolled on.

But to return to my subject—matching fund programs. I am sure you are all familiar with matching fund projects, where Federal funds help pay for a State or local project, provided there is a certain share of the program paid by State or local contributions. In most projects of this type, State and local money is matched dollar for dollar by the Federal money.

TYPES OF PROGRAMS

There are three general types of matching programs. In the first, communities go to the Federal Government with their individual projects. If the plans meet certain standards and specifications set up by Congress or the administrator of the program, then the project is rated according to various criteria and placed on a waiting list. As Federal funds are available for the programs, the money is transferred to the communities. A program of this type is the watershed protection and flood-prevention program. Many Nebraska farm areas and cities are safer as a result of watershed protection and flood-prevention program.

Secondly, there are programs in which money provided by Congress is divided among the States on a quota basis, each State receiving a certain amount for its own use. If the State, or cities within the State, want Federal funds for the program, they apply to Washington, and the money is committed as long as it lasts. If there are not requests for all of one State's quota, the funds revert unspent to the Treasury. A program of this type is Federal aid for hospital construction, which has been of benefit to a number of Nebraska hospitals.

In the third type of program we find a real culprit. There is again a State quota of funds as in the second case mentioned. But if a State does not use all of its quota within a certain time, the unused Federal funds are made available to other States that have used their shares and still want more. A classic example of a program of this type is Federal aid to airports. Let me say now that using the airport program as an example does not mean I oppose the entire idea, but I was disturbed to find this certain section.

EXAMPLE CITED

Recently the Department of Commerce and the Civil Aeronautics Administration announced State quotas for $60 million worth of airport aid. Nebraska is scheduled to receive a little more than $750,000 of this money.

Now let's suppose that for some reason there is no interest in airport work in Nebraska, or that we have no need of additional airport facilities. There would be no applications to Washington, and none of the $750,000 would be spent in Nebraska.

After holding Nebraska's share for 2 years, the officials would then cancel our right to the funds, but the money does not revert to the Treasury in this case as it does with hospital construction funds. Instead it is reapportioned among the 48 States again. So let us assume now that Maine has spent all of its share of the original $60 million. But there are still some cities in Maine that would match Federal funds if they were available. As a result of Nebraska's lack of interest or need, the Nebraska funds are now available for cities in Maine, and in any other States that want the money.

So what happens is that Nebraska taxpayers contribute their share of this $60-million program through income taxes. After a small servicing charge by Washington administrators, a share of this money was reserved for us here in Nebraska to improve our airports. But we assumed nobody here wanted or needed airport improvements, so Nebraska loses its share of this money and it goes to Maine and other States to help them. The only way to get our own money back from this program is to spend more money on the local level. And if we don't, we find our taxes going to other States for their programs.

THE GRAB FOR FUNDS

Thus, in the cities and States of the country we find persons who can say of a certain matching fund program, "If we don't get the Federal money, somebody else will." I heard this said from time to time when I was mayor and interested parties made an effort to push a new local spending program through. In Washington I became interested in the matter again, and I have been able to do some research on the matter.

I was shocked to learn that there are several programs of this type which allow this Federal money, which is really your money and mine, to flow into those States which spend the most money themselves. Here in Nebraska our State government is trying to save money by reducing the budget and lowering taxes. How does such a policy affect these matching programs?

You know that answer yourself. If we don't have the State money to match a Federal fund, Nebraska's share goes to other States which then benefit from our taxes. So we end up with this ridiculous situation: States and cities increase their tax rates to raise money to match the Federal funds involved in these programs. The taxpayer is squeezed by the pressure from Federal income taxes and from State and local taxes. And remember this, so long as some States and cities match all this Federal money, the programs will roll on. For the sponsors who come back year after year for Federal money from Congress can show that all the previous year's appropriation has been gobbled up and more was wanted. So more Federal money is appropriated into matching funds of this type, and the people of the whole country keep paying their Federal taxes to support these programs.

NEARLY $2 BILLION

I said a few moments ago that I was shocked to learn that there are several programs which reapportion this matching money. And I think you will be equally

shocked to learn that these few programs I have uncovered so far are listed in the 1958 budget to receive $1,870,575,000—nearly $2 billion, or more than 9 percent of the total domestic budget.

That's a lot of money flowing from State to State by way of Washington. It penalizes those States and cities that are sincerely interested in trying to save tax money. Worse yet, it penalizes those States and cities that have gone ahead and done the job on their own, not waiting for or looking for a handout from Washington. Such programs could very well destroy the initiative so vital in State and local affairs. And I can prove it.

I received a letter earlier this year from a school district that was going to build a new school building. The officials of this small school district wanted my opinion about building now with their own financing or waiting to see if there would be a handout from Washington. And while they would wait for some of this free money from Washington, the children would also be waiting—for schoolrooms. Needless to say, I wrote them to get going and not to count on Congress to act, because they could get 435 different views on Federal aid to schools in the House of Representatives alone.

I was happy to see this ridiculous reapportionment provision knocked out of one bill already this year. And as my research finishes in the next few weeks on other matching aid programs, I will enlist the support of other economy-minded Congressmen in trying to make the necessary changes in the basic laws setting up these programs so that this spender's holiday can be slowed down, at least a little.

Speech of Hon. E. L. Forrester, of Georgia, Before the Georgia Bar Association, Savannah, Ga.

EXTENSION OF REMARKS
OF

HON. WILLIAM M. TUCK

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 4, 1957

Mr. TUCK. Mr. Speaker, under leave to extend my remarks in the RECORD, I am glad to include an address delivered by our able colleague, the Honorable E. L. (TIC) FORRESTER, before the Georgia Bar Association in Savannah, Ga., on May 30, 1957.

The gentleman from Georgia is an able and distinguished lawyer. I am glad to be associated with him on the Judiciary Committee of the House of Representatives.

The address of Congressman FORRESTER should be of particular interest at this time because of the so-called civil rights bill which will come up befor the House tomorrow. It is as follows:

SPEECH OF E. L. (TIC) FORRESTER, OF GEORGIA, BEFORE THE GEORGIA BAR ASSOCIATION, SAVANNAH, GA., MAY 30, 1957

Mr. Chairman, my colleagues of the bench and bar of Georgia, distinguished guests, ladies and gentlemen, I am sure that all of us have experienced certain satisfactions from our professions, our public life, and public service. Over all of the experiences I have had over many years the most satisfying are those I derived from being just a country lawyer and being one of you. One of the finest compensations in my life has been the privilege of knowing you, working with you, sometimes maybe working against you, associating with you, and at all times partaking deeply of the generous friendships which the Georgia bench and bar has undeservedly but completely extended me through the years.

I have always loved the bench and bar of Georgia. I always will. I know as a fact that there has never been a greater bench and bar than the bench and bar of our great State. Almost 7 years of service in Congress, and during that entire time being a member of the House Committee on the Judiciary, has further pointed up that positive fact.

I am keenly and deeply appreciative of the great honor extended me when, in your generosity, you permitted me to appear on your program. I have looked forward to being with you. It is a distinct pleasure to be here. Unless I get news from Washington that certain legislation is likely to be brought upon the floor this week I plan to stay through this convention and indulge my desire to have the opportunity of fraternizing with you and to renew the bonds of friendship and affection that we have had for each other over the years.

It is an additional honor, and additional privilege, to appear before this convention at a time when my warm and genuine friend, Howell Hollis, is president. Under Howell's leadership the Georgia Bar Association has had one of its most productive and progressive years. He is an outstanding lawyer, a conspicuously brilliant public servant, a man of incorruptible integrity, a devoted friend, and one whose future demands our brightest hopes and fondest expectations.

Permit me to express my gratitude over the splendid but most generous introduction by my long-time friend, Ernest Vandiver. I have observed Ernest as you have observed him, both as a lawyer and as lieutenant governor of our State. He has made a brilliant record. He is capable and efficient, the possessor of that rare indomitable courage necessary to support his convictions and a most effective champion of the principles in which you and I believe.

It was suggested to me that you would like for me to discuss the legislation pending in Congress masking itself under the spurious label of "civil rights." That I will attempt to do.

Those of you who know me, I do not have to assure that I was perfectly happy down in the little town of Leesburg, Ga., in the role of a country lawyer and solicitor general of our judicial circuit. I believe you know that I had no desire whatever to leave the section of Georgia which had been so kind to me, to leave the bench and bar, which had been a part of my life, and to take up my abode in Washington, other than the desire to try to be of assistance in restoring our ancient landmarks, to preserve our Constitution, to preserve our racial integrity and the racial integrity of any group or groups which take pride in their respective races upon the premise that their race is worth preserving. To that end I committed myself and to that end have I labored. If, and when, those desires are to any appreciable extent gratified, then I will consider that my work has been done and you can certainly expect me to return to Georgia for the balance of my days, with a generous amount of those remaining days being used in associating with you and the people who are the bone of my bone and flesh of my flesh. Yes, you can expect me then to spend the remainder of my days with the people whom I respect, admire, and genuinely love.

It so happens that I have been exposed to civil-rights legislation during the entire time I have been a Member of Congress. I have been on the committee which has handled this legislation, and I have had the opportunity to know this legislation as fully as any man in Congress. In order to discuss this legislation with you, it will be necessary that we discuss some of the background of this legislation.

This type of legislation had its inception as an aftermath of that terrible War Between the States when brothers were arrayed against brothers. It had its birth in an era of hysteria and at a time when there had not been a sufficient cooling period for minds of ordinarily reasonable men to act calmly and with judgment. Maybe with generosity, maybe with truth, we could draw upon that principle of legal jurisprudence that persons acting under the excitement of passion, without any mixture of deliberation whatever, and without malice, will not be held to the same strict accountability to the law as would a person acting in a calm atmosphere and at a time when irresistible passions were not aroused. It is not surprising to lawyers that civil-rights legislation was passed shortly after the War Between the States, for our legal minds are trained to take into consideration the infirmities and weaknesses of mortal man. Though that legislation was unjust and added to the problems of a prostrate section trying to arise from the ashes, we can see extenuating circumstances, perhaps, and ponder whether that legislation was inspired by malice or because of passion destroying reason and deliberation.

Neither is it surprising to lawyers that in a few short years, when hot blood had cooled, and reason had its sway that Congress on its own volition would annual some of that legislation and that the United States Supreme Court would void portions of that legislation because of its manifest unconstitutionality.

It is not surprising to you that by 1875 the high-water mark of that era had reached its peak and that no further civil-rights legislation was enacted by Congress since the year 1875, and during many years following 1875 Congress set itself to the task of annulling some of that legislation and the United States Supreme Court rose to the occasion and struck down those portions that they agreed were offensive to our Constitution.

It is surprising to you and surprising to me that 50 or 60 years later, and after we had become a united nation, indeed, and as comrades in arms had fought to victory through two wars—one a world war—and with indications that we would be called upon to fight other world wars and, if so, the South would cover itself with glory and distinction upon the battlefield, that agitation again would rear its ugly head, and that groups would urge, yes demand, that the very legislation which was annulled by Congress and the very legislation which was struck down by our Supreme Court as being unconstitutional, together with other more offensive and stringent legislation completely at odds with our Constitution and our philosophies would be placed upon the back of our people, despite the fact that we had the same Constitution and despite the fact that every one admits that those so-called problems are disappearing year by year.

It is to that startling development that I ask you as lawyers to address yourselves today.

Just why have our principles of jurisprudence been so rudely upset? Why is it that at a time when reason should hold sway and hot blood should have long ago cooled, that the people of this country are being assaulted with fervor unparalleled in our country? We do not have to look far to find the answer. You need look no further than the 178th Georgia Supreme Court Report, pages 832–869, in the case of *Herndon* v. *the State*. There was unfolded the Communist conspiracy to agitate and to overthrow this country by force and violence.

The Georgia court did its duty, convicted Herndon, but the United States Supreme Court reversed that conviction, I believe, on the premise that the State failed to show that the defendant and his coconspirators intended presently to overthrow our Government. Nevertheless, that Court was evidently not prepared to hold that the Federal

Government had preempted the field as the present United States Supreme Court held in the Nelson case and thereby striking down the laws of the States punishing insurrection, or attempts.

It might be of interest to you to know that the Communist Party platform of 1928 set out its demands regarding social and racial equality, and that virtually all of those demands have been fully met by judicial, administrative, and executive decrees and that the proposed legislation is simply for the purpose of implementing them.

One of the most unfortunate decisions ever rendered by the United States Supreme Court was in the case of *Missouri* v. *Holland* in 1920. There the Court ruled that treaties overruled our Constitution.

In the report of President Truman's Committee on Civil Rights, issued in 1947, will be found the following:

"It is true that the Federal Government does not possess broad, clearly defined delegated powers to protect civil rights which it may exercise at its discretion. A detailed examination of the constitutional aspects of the civil-rights problem makes clear that very real difficulties lie in the way of Federal action in certain areas."

But, let's continue reading; they gleefully say:

"In its recent decision in *Missouri* v. *Holland* in 1920, the Supreme Court ruled that Congress may enact statutes that carry out treaty obligations, even where in the absence of a treaty, it has no other power to pass such a statute. This doctrine has an obvious importance as a possible basis for civil-rights legislation."

But, read on:

"The Human Rights Commission of the United Nations is at present working on a detailed international bill of rights designed to give more specific meaning to the general principle announced in article 55 of the charter. If this document is accepted by the United States as a member state, an even stronger basis for Congressional action under the treaty power may be established."

In 1949, 81st Congress, the then Attorney General Tom Clark, now a Justice of the Supreme Court, made a statement before the House Committee on the Judiciary while advocating an omnibus bill encompassing civil-rights legislation or proposals in every field the human mind could conceive of, and his entire statement can now be found in hearings before subcommittee No. 5, 85th Congress 1st session, pages 325–347.

Mr. Clark made the following statements, among others:

"Following the Civil War, a number of civil-rights statutes were enacted, but over the years, through decisions of the Supreme Court and Congressional action in 1894 and 1909, the laws implementing the 3 amendments (13th, 14th, and 15th) were reduced in number and scope," page 326.

Also the following:

"I am not unmindful, of course, that serious questions of constitutionality will be urged with regard to some of the provisions of this bill. But I am thoroughly satisfied that the bill, as drawn, is constitutional. It is true that there is a line of decisions holding that the 14th amendment relates to and is a limitation or prohibition upon State action and not upon acts of private individuals (*Civil Rights* cases (109 U. S. 3); *U. S.* v. *Harris* (106 U. S. 629); *U. S.* v. *Hodges* (203 U. S. 1).) * * * However, without entering here upon a discussion of whether or not these decisions are controlling or possess present-day validity in this connection, it may be pointed out that such a provision punishing persons as individuals need not rest solely upon the 14th amendment. Upon proper Congressional findings of the nature set forth in H. R. 4683, the constitutional basis for this bill would include the power to protect all rights flowing from the Constitution and laws of the United States, the law of nations, the treaty powers under the United Nations Charter, the power to conduct foreign relations, and the power to secure to the States a republican form of government, as will as the 14th amendment" see page 347.

On page 329 Mr. Clark said that the legislation he was proposing would bring about a greater awareness of the obligations of this Nation as a member of the United Nations.

Page 334 shows that Mr. Clark pointed out that he was removing by his proposed legislation what appears to be an unnecessary technical limitation to citizens, and it may be properly urged, at this date, that the extension of coverage is in accordance with the general public policy of the United States, as subscribed to in the United Nations Charter, to promote respect for, and observance of, human right and fundamental freedoms for all.

On page 331 Mr. Clark said that his Civil Rights Department "has aided the Office of the Assistant Solicitor General in cooperating with the State Department in connection with United States participation in the preparation by the United Nations of the universal declaration of human rights and of a proposed covenant to enforce some of these rights." And, on that same page, Mr. Clark said that his Civil Rights Division assisted in the preparation of amicus curiae briefs submitted by his Department to the Supreme Court in the restrictive covenant cases. All of that is well known to the legal fraternity and the pity is that his successors have followed in his footsteps.

Alger Hiss contends that he was virtually the architect of the United Nations Charter. He may have been the inspiration, but he had lots of help. I have in my office a book entitled "Review of the United Nations Charter," published pursuant to Senate Resolution 126, 83d Congress, 1st session, presented by Senator WILEY and I believe you can obtain that work by ordering same from the United States Government Printing Office. That book ought to be in the library of every lawyer in our country. That charter was signed in San Francisco on June 26, 1945, by the United States and 49 other governments. It was ratified by the United States Senate in July 1945, and ratified by the President on August 8, 1945.

On July 2, 1945, President Truman submitted the charter to the Senate for approval and among other things said that the objectives were, among other things, "to achieve universal respect for, and observance of, human right and fundamental freedoms for all men and women without distinction as to race, language, or religion." Also, he said, "It seeks to remove the economic and social causes of international conflict and unrest."

On page 69 of that work, entitled "Purposes of Legislation," the committee said that "unless we are prepared to take all steps which are necessary to effectuate our membership in the United Nations, we will merely be defeating the hopes of the United States and humanity in ratifying the charter. The committee feels that the people and the Members of the Senate understand clearly the consequences and requirements of our membership in the United Nations and that they are prepared to undertake the responsibilities of membership in order to enjoy the privileges which that membership may ultimately bring in the form of world security."

Pages 247–251 show the universal declaration of human rights adopted by the General Assembly, United Nations, December 10, 1948. Page 251 shows the address of Mrs. Eleanor Roosevelt before the United Nations Committee 3, September 30, 1948. She identified herself as Chairman of the Human Rights Commission and as a delegate of the United States, charged with the responsibility of the subject of human rights. In her statements she said:

"The importance which my Government attaches to the promotion and preservation of human rights in general and to this declaration in particular has already been made amply clear by Secretary Marshall."

Also, she said:

"The United States looks forward to the approval of this declaration by the General Assembly as one of the great achievements of this session. The declaration will serve as a challenge to all nations and all peoples so they will all strive to achieve the standards set forth in the declaration. The declaration of human rights is of course only the first step in the implementation of the human-rights program called for by the Charter of the United Nations."

On page 253 she said:

"My Government is nevertheless prepared to accept the declaration as it stands and we will support its approval without amendment if other states are ready to follow that course."

I pause to say to you here that you will find the United Nations Charter and the universal declaration of human rights of great value in your attempts to reconcile any recent decisions of our United States Supreme Court, with our Constitution and the respect you have been taught to have for the rule of stare decisis.

Indeed, Thomas Jefferson said: "If the treaty power is unlimited, we have no Constitution."

If the *Missouri* v. *Holland* decision is correct, and I dispute it, or even if the United States Supreme Court thinks it is correct, then you may be willing as lawyers to concede that they had some basis for their rulings in the famous school case decisions. It may be that they were not ignorant of stare decisis, but were of the opinion that the ruling of *Plessy* v. *Ferguson* and other cases did not apply, because *Plessy* v. *Ferguson* was applicable to the Constitution only and was decided before the United Nations Charter overrode our Constitution.

This thought may be speculated upon with interest, inasmuch as in the recent football case (*Radovich* v. *National Football League*, February 25, 1957) the same court refused to disturb the decision rendered 25 or more years ago holding that baseball was not a business under the interstate commerce laws, recognizing the rule of stare decisis, and suggested that if Congress wished to legislate upon that subject Congress had the power.

Indeed, under the Universal Declaration of Human Rights, implementing the United Nations Charter, a lawyer can see some kind of basis for the rulings that the States exceeded their authority in denying admission to the bar of applicants confessing that they were once upon a time Communists. (Universal Declaration of Human Rights, art. 2, reading:

"Everyone is entitled to all the rights and freedoms set forth in this declaration, without distinction of any kind, such as race, color, sex, language, religion, political or other opinion, national or social origin, property, birth, or other status.")

Rulings that passports must be issued to suspected Communists might be understood under the Charter and the Declaration. (See Universal Declaration of Human Rights, art. 13 (2), reading:

"Everyone has the right to leave any country, including his own, and to return to his country.")

Even the upsetting of Stephen Girard's will might not be considered so heinous.

You are, of course, familiar with the Genocide Treaty, adopted by the United Nations, December 9, 1948. That was the proffered treaty that people, particularly lawyers, in the United States became highly interested in and opposition developed to such an extent that the Bricker amendment was proposed. It was never ratified, true. Bear in mind, the universal declaration of human rights did not require rati-

fication. They are enunciations of charter principles.

The book I have referred to as presented by Senator WILEY, page 262, shows a letter written by Secretary Dulles to Mrs. Lord, the United States Representative before the Human Rights Commission, United Nations, dated April 3, 1953, saying:

"The President and I are anxious that you carry a personal message to the Commission. We believe that the American people are determined to do all within their power to make the United Nations become an ever more effective agency for promoting, in the words of the charter, 'respect for human rights and fundamental freedoms for all without distinction as to race, sex, language, or religion'."

On pages 263–264 Mr. Dulles tells Mrs. Lord to say to the Commission that the covenants will not be as widely accepted by United Nations members as initially anticipated and he recommended a change in approach, saying:

"We recognize that in presenting to the Commission a change in approach, extended discussion will be required in the Commission and later in the Economic and Social Council and General Assembly as well. By reason of the considerations referred to above, the United States Government has reached the conclusion that we should not at this time become a party to any multilateral treaty such as those contemplated in the draft covenant on human rights, and that we should now work toward the objectives of the declaration by other means."

What are the other means? Are they Executive orders, administrative orders, new interpretations of our Constitution? Certainly, they have had that deleterious effect. Also, can one of the ways be the recitals set out in an article entitled "A Reappraisal of the Constitutionality of Miscegenation Statutes," by Weinberger, Cornell Quarterly, volume 42, No. 2, Winter, 1957, pages 208–222, and particularly page 218, saying:

"Under the sponsorship of the United Nations Educational, Scientific, and Cultural Organization (UNESCO), 12 scientists representing physical anthropology and human genetics met in June 1951 to consider the preparation of a statement which would effect the crystallization of scientific theory and opinion on matters of race and race differences."

Also:

"The statement on the nature of race and race differences was released by UNESCO in September of 1952. The statement at article 7 said concerning pure races: 'There is no evidence for the existence of so-called pure races. Skeletal remains provide the basis of our limited knowledge about earlier races. In regard to race mixture, the evidence points to the fact that human hybridization has been going on for an indefinite but considerable time. Indeed, one of the processes of race formation and race extinction or absorption is by means of hybridization between races. As there is no reliable evidence that disadvantageous effects are produced thereby, no biological justification exists for prohibiting intermarriage between persons of different races.' "

In the footnotes Weinberger said that certain school boards had voted unanimously to discontinue use of textbooks containing un-American ideas on the origin of races.

Also, the UNESCO has distributed the statement in a variety of publications, and it is only one of several publications in the series.

I ask you: Was your conception of the United Nations Charter a mutual undertaking for mutual security, or was it for one-world government, and the wiping out of our philosophy? We all believe in mutual security, we believe in uniting for that protection, but we contend that only the people themselves have the right to destroy their Constitution.

Certainly, you view with interest and alarm the quotations of Justices Black and Douglas in *Oyama* v. *California* (332 U. S., pp. 633–689) and the expressions of Justices Murphy and Rutledge, same case, page 73. Those four Justices said that as additional reasons for striking down a law of the State of California is the United Nations Charter which this Nation had recently pledged itself to observe. You would doubtless like to read the case of *U. S.* v. *Pink* (315 U. S. 203), where the Supreme Court extended the treaty doctrine to executive agreements. Also, you might wish to read United States Reports (Cunard Steamship Co.) (262 U. S., p. 100), which involved a secret negotiation made by President Coolidge authorizing importation of prohibited liquors on British ships though the 18th amendment was in full effect.

In the 84th Congress there were introduced 51 so-called civil-rights bills. Many of those bills contained a declaration of public policy and as a part of that public policy recited:

"To promote and enforce universal respect for, and observance of, human rights and fundamental freedoms for all, without distinction as to race or religion in accordance with the undertaking of the United States under the United Nations Charter, and to further the national policy in that regard by securing to all persons under the jurisdiction of the United States effective recognition of certain rights and freedoms proclaimed by the General Assembly of the United Nations in the universal declaration of human rights."

These so-called civil-rights bills were introduced in the present 85th Congress, many of them containing the same recitals regarding a declaration of public policy. Last year, I called the committee's attention to the declaration and that all of this civil-rights legislation was predicated upon the United Nations Charter. Last year, when it became evident that H. R. 627, a bill by the gentleman from New York [Mr. CELLER], was going to be reported favorably by Subcommittee No. 2, with the recitation relating to the public policy aforesaid being stricken, Mr. Brownell hurriedly prepared and sent over to Republicans on our committee what is now known as the Brownell civil-rights legislation.

Mr. Brownell did not set out any declaration of public policy. You, as lawyers, know that it was not necessary. The United Nations Charter and the universal declaration of human rights are either the law of the land or not. That Mr. Brownell was depending upon the United Nations Charter and implementing declaration there can be no doubt when the language of his legislation is considered. "By their fruits ye shall know them" remains a true criterion.

The Brownell legislation was voted out of Subcommittee No. 2 by a vote of 6 to 1, I being the only dissenter. The legislation was rushed through the committee and upon the floor of the House, and was passed by the House in the waning days of the 84th Congress, but too late for the Senate to consider. At the beginning of the present session of Congress the Brownell civil-rights legislation was taken up in subcommittee upon the convening of Congress. In this connection, an NAACP official in Washington is quoted as of a week or two ago as saying: "To Republicans, civil-rights legislation is a happy hunting ground; to Democrats civil-rights legislation is a necessity."

The Brownell version consisted of four parts. I will attempt to discuss each of those parts with you briefly.

Part I provided a Commission, to be appointed by the President, to investigate allegations that certain citizens are being deprived of their right to vote, or are being subjected to unwarranted economic pressure by reason of their color, race, religion, or national origin; to study and collect information concerning economic, social, and legal developments constituting a denial of equal protection of the laws under the Constitution; appraise the laws and policies of the Federal Government with respect to equal protection of the laws under the Constitution.

Here, let me say that this year for the first time was the opposition permitted to appear and testify in opposition to civil rights legislation. I availed myself of that privilege and I called upon the Governor to furnish to me the attorney general and the Honorable Charles Bloch of Macon. The Governor complied—those gentlemen appeared. They performed magnificently. I can hear Charlie Bloch now saying: "Mr. Chairman, how can you legislate on religion? Is not the first amendment to our Constitution a complete bar? Mr. Chairman, does not that amendment provide for the free exercise of religion?"

You know that the free exercise of religion carries with it indubitably the right to discriminate. Were that not so, there would be no basis for religious groups such as Catholic, Episcopalian, Baptist, Methodist, Seventh-day Adventist, and so forth. That amendment was for the purpose of conferring upon each and every one the right to be different in his religious faith, so as to protect against the very tyrannies that churches in Europe had practiced upon our ancestors by requiring them to conform. The American Civil Liberties Union tipped its hand by saying: "Free censorship of books, magazines and motion pictures is rapidly disappearing," but criticized boycotts whereby religious and other groups not only exercise their right to guard their membership from material believed objectionable, but also may keep other people from exercising their judgment. Also: "That the Roman Catholic Church was one of the religious groups that had moved in that direction."

That first amendment guarantees to all churches, including the Catholic Church, a right to recommend to their congregations, their members, and the public the boycotting of theaters, picture shows, the reading of books and magazines, and any other recommendations they desire to make in the religious field. By the way, it preserves the right of the ministers of our faith and our churches to the same extent.

Frankly, it is my considered opinion that the fight made by the attorney general and Charles Bloch caused that subcommittee to strike the phrase "or being subjected to unwarranted economic pressures by reason of their color, religion, and so forth." and restricted such investigations to deprivation of the right to vote by reason of color, race, and so forth.

Pressure mounted, and the word religion was placed again in the legislation, so far as deprivation of the right to vote on account of religion was concerned. That is innocuous, but unwise. It is my personal opinion that the word religion should never appear in such legislation, and it would be salutary to adhere to the first amendment. To tamper with that amendment is unwise.

As that provision now stands, the only excuse for such a Commission can be on political grounds. Every lawyer knows that existing statutes are sufficient to protect anyone who has been unconstitutionally deprived of the right to vote.

The Justice Department in the past has administered that provision, and if the Justice Department, with its horde of assistants, and with the cooperation of all of the district attorneys in the United States, cannot protect those rights, then we need another Justice Department and another Attorney General.

As the bill now stands, we have stripped it of the phrase "unwarranted economic pressures" and the words "economic," "social," none of which can be identified in the Constitution, but which are words and phrases taken bodily from the United Nations Charter. Of course, attempts may be made to

reinstate those provisions when we get upon the floor. Then, too, to establish such a Commission will mean an abdication on the part of Congress toward its responsibility.

If an investigation is going to be had, it ought to be a congressional investigation. I challenge them to rise up to their responsibility, hold such investigations as they think necessary, and accept my challenge to televise the proceedings, giving us the right to cross-examination and right to produce witnesses to testify. If we could have that kind of investigation I would be willing, for the good people of the United States, sitting in their homes or their offices, after hearing the truth and both sides, to bring in their verdict.

The Commission still has the right to have volunteer and uncompensated personnel, which, of course, will be the NAACP and other leftwing organizations, and, also, a waiver that persons otherwise disqualified because of service with the Government can be eligible. Of course, those provisions are completely political.

Part II appears to be an innocent provision, providing for an additional Assistant Attorney General. The trouble is, it does not tell how many assistants to the Assistant Attorney General will be required. We tried to get the Department to say, but they would never express themselves. Will Maslow, general counsel, American Jewish Congress, testified that it ought to have at least 50 lawyers in it. The cost of this Commission and the assistants to the Assistant Attorney General would probably be at least $2 million for the 2 years that the Commission is to operate, and a million dollars a year thereafter for the assistants to the Assistant Attorney General.

You, as lawyers, know that with this additional personnel there will be the requirement that we have additional judges to a number not even capable of envisioning.

Part III would amend section 1985, volume 42, United States Code, by adding 2 additional paragraphs. That, of course, is the conspiracy statute, and the one referred to as the Ku Klux Klan Act. One of the paragraphs to be added provides that whenever any persons have engaged or there is reasonable grounds to believe that they are about to engage in any acts giving rise to a cause of action under that section, the Attorney General may, in the name of the United States, institute a civil action for preventive relief, permanent or temporary injunction, or other order, without regard to the requirement that the aggrieved shall have exhausted the administrative or other State remedies, and without the consent of the alleged aggrieved.

The effect would be that in every imaginable conspiracy the United States, at the taxpayers' expense, will throw the entire Justice Department against our school officials, our registrars, and persons charged with the electoral process, free of cost to the alleged aggrieved, while the defendants will have such representation and assistance as their pocketbooks permit. What the phrase "about to engage" means, I do not know. No one else knew in the committee, including the authors of the legislation.

Part IV would amend section 1971, United States Code, so that "whenever any person has engaged or is about to engage in any act depriving any person of the right of any privilege secured by subsection A or B, the Attorney General, in the name of the United States, for the benefit of the real party, may institute a civil action or other proceeding for preventive relief, including permanent or temporary injunction, restraining order or other order; and that the district courts shall exercise jurisdiction without regard to whether the party aggrieved has exhausted any administrative or other remedies provided by law.

Make no mistake, the district courts would be required to entertain suits arising by virtue of any kind of election, general, special, and primaries, for the purpose of selecting candidates down to the lowest local levels including trustees of schools, justices of the peace, county surveyor, etc. The question is, does Congress want to approach this subject in such a general and blundering manner?

In view of the ruling in the Cloverleaf Butter case and the Steve Nelson case, to the effect that the Federal Government had preempted the field, and in view of the ruling in *U. S.* v. *Classic* (313 U. S. 299, 3) reading as follows:

"The right to vote for representatives in Congress is a right 'derived from the States' only in the sense that the States are authorized by the Constitution to legislate on the subject, as provided by section II of article I, to the extent that Congress has not restricted State action by the exercise of its powers to regulate elections under section 4 and its more general power, under article I, section 8, clause 18, to make all laws which shall be necessary and proper for carrying into execution the foregoing powers," and in view of the provision in this proposed legislation that all State judicial and administrative remedies shall be bypassed, it is my opinion that lawyers will seriously ponder whether or not the Supreme Court would hold that the Federal Government had preempted the field so far as the voting rights, the mode of holding our elections and primaries are concerned, and that these fields would hereafter be dominated from Washington.

Under parts III and IV of the proposed legislation, the district courts would have the right to grant ex parte injunctions upon the petition of an all-powerful government, with such an extensive staff that they could grind out over night thousands of affidavits, perjurous or not, and the judge then having established manmade law, whether right or wrong, could punish the defendant for contempt and sentence him to prison, the judge being the legislator, the prosecuting attorney, the judge, and the executioner. In other words, there is no provision for the right of trial by jury. The Attorney General has seen to that. He says that juries might not convict. You and I think that is why jury trials should be provided, because after all, there are some innocent defendants. By making the United States a party, the Attorney General has deliberately sidestepped the provision requiring that a suit be for at least $3,000 before the Federal court can entertain jurisdiction, that requirement not applying where the United States is the plaintiff. He has also proposed eliminating a jury trial in criminal contempt cases, realizing that jury trials are not permissible where the United States is the plaintiff, except in the one instance providing jury trials in labor disputes. The Attorney General knows full well that these exceptions applicable to the Government were for the purpose of preventing the defense of our country from being stymied. He well knows that it was not intended to make the Government a Frankenstein. Except where the Nation's defense is involved, the Government should be more than willing to go into court under the same terms and laws as the private individual.

When this bill gets upon the floor of the House, and it probably will on June 3, we certainly intend to offer an amendment for the purpose of deleting the provision that State judicial and administrative remedies can be bypassed and an amendment providing jury trials in all contempt cases. When we do that we will be asking only for the same privileges that Donald Richberg, Clarence Darrow, Easby-Smith, and other brilliant attorneys argued that labor should have and which Justices Taft, Hughes, Frankfurter, Cardozo, and others said labor should have.

We will be asking for exactly what the platforms of both the Republican and Democratic Parties in 1928 said labor should have. We will only be asking for what the House of Representatives said in 1932 that labor could have; 362 Congressmen voted for those rights for labor, while only 14 voted to deny those rights. We will be asking for those things which Gov. Al Smith said that labor should have. I have checked the CONGRESSIONAL RECORD, and southern Congressmen, including my distinguished predecessor, Hon. Charles Crisp, voted for labor to have those rights. It was a southern chairman of the House Committee on the Judiciary, Hon. Hatton Sumner, Texas, who stood upon the floor and fought for this legislation in behalf of labor. That legislation was designed to protect people, guilty or innocent, against the abuses knowingly practiced by some judges and from the ignorance of other judges. Also, for protection against the strong arm of the Attorney General, who reaches out over every Federal court district and who, it is said in Washington, tells every prosecuting attorney whether he can or cannot nolle pros a case.

The debate of this labor legislation I have referred to show that Congressman La Guardia charged Harry Daughterty, the Attorney General in the time of the Debbs case, with handpicking Judge Wilkerson to try that case and quoted from an article by Mr. Daugherty saying that he was most fortunate in getting Judge Wilkerson. "Judge Wilkerson listened to my argument with profound attention. He agreed with me on every point and granted the temporary injunction without a minute's delay."

It further developed that Judge Wilkerson was appointed, at the earnest solicitation of Mr. Daugherty, just a few weeks before.

I do not have time to go into it, but I am familiar with the ex parte injunction and the contempt proceedings arising out of the school desegregation issue in Clinton, Tenn. Without commenting upon the justice or injustice of the proceedings so far as the facts are concerned, but only from a lawyer's standpoint, interested in each and every defendant being tried according to law and having his rights accorded to him, that case standing alone, should cause legislators to provide the right of trial by jury.

I have talked too long and I know it. In a matter of a few days now the House will work its will. I can only assure you, that in my limited way, I will be upon that floor every minute of the time and I will do my best in an effort to defeat this legislation and at least try to preserve some of our constitutional concepts, the sovereignty of our States, the right to regulate and conduct our elections, and the right of trial by jury.

Joint Statement of Secretary of State John Foster Dulles and Secretary of Defense Charles E. Wilson

EXTENSION OF REMARKS
OF
HON. GEORGE S. LONG
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 4, 1957

Mr. LONG. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement:

JOINT STATEMENT OF SECRETARY OF STATE JOHN FOSTER DULLES AND SECRETARY OF DEFENSE CHARLES E. WILSON

The case of United States Army Sp3c. William S. Girard has far-reaching implications, involving as it does the good faith of the United States in carrying out a joint

decision reached under procedures established by treaty and agreement with Japan.

The case involves actions by Girard which caused the death of Naka Sakai, a Japanese woman, on January 30, 1957. The issue arose as to whether or not Girard should be tried by United States court-martial or by a Japanese court. After careful deliberation in the joint United States-Japan committee established by the 2 Governments pursuant to treaty arrangements, the United States representative on this committee was authorized to agree, and on May 16, 1957, did agree, that the United States would not exercise its asserted right of primary jurisdiction in this case. In view of this completed action, attempting to prolong the dispute over the jurisdictional issue would create a situation which could basically affect United States relations not only with Japan, but also with many other nations.

For these reasons, Secretary of State John Foster Dulles and Secretary of Defense Charles E. Wilson have carefully reviewed all the available facts in the case. They have now concluded that the joint committee's agreement that Girard be tried in the courts of Japan was reached in full accord with procedures established by the treaty and agreement, and that in order to preserve the integrity of the pledges of the United States, this determination by the joint committee must be carried out.

The Secretaries' review disclosed the following:

The incident occurred in a maneuver area provided by the Japanese Government for part-time use of United States forces. The Japanese Defense Force uses the same area about 40 percent of the time. When the area is not in use by either the United States or Japanese armed forces, Japanese civilians are permitted to farm or otherwise use the area.

Efforts to keep civilians away from the area during such military exercises have not proved effective. In this particular case, red boundary flags were, as customary, erected as a warning to civilians to keep off, and local authorities were notified of the proposed exercises. But, as was frequently the case, a number of Japanese civilians were in the area gathering empty brass cartridge cases at the time of the incident. These civilians had created such a risk of injury to themselves in the morning exercises when live ammunition was used that the American officer in charge withdrew live ammunition from the troops prior to the afternoon exercises. In the interval between two simulated attacks during the afternoon, Girard and another soldier, Sp3c. Victor M. Nickel, were ordered by their platoon leader, a lieutenant, to guard a machinegun and several field jackets at the top of a hill. Girard and Nickel were not issued live ammunition for this duty.

It was while these soldiers were performing this duty that the incident occurred. Mrs. Naka Sakai, a Japanese civilian, died a few moments after being hit in the back by an empty brass rifle shell case fired by Girard from his rifle grenade launcher. She was not over 30 yards from Girard and was going away from him when he fired the rifle. Girard had previously fired similarly in the vicinity of a Japanese man, who was not hit.

Girdard's action in firing empty shell cases from the rifle grenade launcher was not authorized. He asserted that he fired from the waist, intending only to frighten the Japanese civilians. Others stated, but Girard denied, that empty shell cases were thrown out to entice the Japanese to approach.

Under the United States-Japanese Security Treaty and article XVII of the administrative agreement under that treaty, as established by the protocol adopted September 23, 1953, the authorities of Japan have the prior right to jurisdiction to try members of the United States Armed Forces for an injury caused to a Japanese national, unless such injury is one arising out of any act or omission done in the performance of official duty.

The Japanese authorities have taken the position that Girard's action in firing the shell cases was outside the scope of his guard duty and was, therefore, not done in the performance of official duty.

The commanding general of Girard's division certified that Girard's action was done in the performance of official duty.

In accordance with the procedure established under the treaty and administrative agreement, the disputed matter was, on March 7, 1957, taken before the joint United States-Japan committee established under the provisions of the treaty and administrative agreement previously referred to.

Various meetings were held between the United States and Japanese representatives on the joint committee. As is customary, a representative of the American Embassy in Tokyo also attended these meetings in the capacity of observer. Both sides continued to press their respective claims to primary jurisdiction, and the committee was unable to reach agreement.

The commanding general, Far East Command, reported the facts to the Department of the Army, the executive agent for the Department of Defense. The Department of Defense considered having the joint committee refer the matter in dispute to the two Governments for settlement, but rejected this procedure as inadvisable under the circumstances. Department of Defense instructions were accordingly issued, through the Department of the Army, to the Far East Command to the effect that the United States representative on the joint committee should continue to press the claim for jurisdiction, but that, in case of continued deadlock, he was authorized to waive jurisdiction to Japan. After 3 weeks of additional negotiations, the United States representative waived jurisdiction in the name of the United States.

Girard was subsequently indicted by the Japanese judicial authorities for causing a death by wounding—the least serious homicide charge for which he could have been indicted under Japanese law. In determining whether Girard's actions were in violation of law, all the facts, as presented by both sides, must now be weighed by the Japanese court, just as they would by a United States court-martial, if trial were held under United States jurisdiction.

In accordance with Public Law 777 of the 84th Congress, the United States Government will pay for counsel chosen by Girard to defend him in this trial. Pursuant to the administrative agreement under the Japanese treaty, Girard will be guaranteed a prompt trial, the right to have representation by counsel satisfactory to him, full information as to all charges against him, the right to confront all witnesses, the right to have his witnesses compelled to attend court, the right to have a competent interpreter, the right of communication with United States authorities, and the presence of a United States representative as an official observer at the trial. This observer is required to report to United States authorities on all aspects of the trial and the fairness of the court proceedings.

The United States authorities will, of course, see that all evidence is available to Girard and his counsel, and will render every proper assistance to him and his counsel in protection of his rights.

United States troops are stationed in many countries as part of our own national defense and to help strengthen the free world struggle against Communist imperialism. The matter of jurisdiction in cases of offenses against the laws of host countries, whether by our servicemen abroad or by servicemen of other countries in the United States, is dealt with by mutual agreements.

In the operation of this system in Japan there has been the greatest measure of mutual trust and cooperation. Since the present arrangement became effective in October 1953, Japan, in the overwhelming majority of the cases in which it had primary right to try American personnel, has waived that right in favor of United States action. There is every reason to believe that trial of United States Army Sp3c. William S. Girard in the Japanese courts will be conducted with the utmost fairness.

SENATE

WEDNESDAY, JUNE 5, 1957

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

Our gracious Father: Before the toil of a new day opens before us, we lay before Thee the meditations of our hearts. May they be acceptable in Thy sight. Bend our pride to Thy control. Prepare us for the solemn role of responsibility committed to our fallible hands in this appalling day, with its vast issues that concern not only our own dear land, but all nations and the islands of the sea. May our loins be girt and our lamps burning and ourselves as men who watch for their Lord's coming. In the Redeemer's name we ask it. Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Journal of the proceedings of Monday, June 3, 1957, was approved, and its reading was dispensed with.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Tribbe, one of his secretaries, and he announced that the President had approved and signed the following acts:

On May 31, 1957:

S. 51. An act for the relief of Mary Barme and her two minor children, Steran Barme and Dinah Barme;

S. 94. An act for the relief of Lee Chong Taik;

S. 124. An act for the relief of Josephine Suydam;

S. 162. An act for the relief of Jew Gim Gee;

S. 271. An act for the relief of Johannes Sukevainen;

S. 358. An act to authorize the conveyance to the State of Wyoming of about 37.75 acres of land comprising a part of Francis E. Warren Air Force Base;

S. 754. An act for the relief of John (Ioannis) Legatos;

S. 799. An act for the relief of Eldur Eha; and

S. 1274. An act to amend the act of March 3, 1911 (36 Stat. 1077), to remove restrictions on the use of a portion of the Springfield Confederate Cemetery, Springfield, Mo., and for other purposes.

On June 4, 1957:

S. 184. An act for the relief of Mary C. Frederick.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its clerks, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 53) to consolidate into one act, and to simplify and make more uniform, the laws administered by the Veterans' Administration relating to compensation, pension, hospitalization, and burial benefits, and to consolidate into one act the laws pertaining to the administration of the laws administered by the Veterans' Administration.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 293. An act to authorize settlement for certain inequitable losses in pay sustained by officers of the commissioned services under the emergency economy legislation, and for other purposes;

H. R. 632. An act to amend the Federal Crop Insurance Act, as amended;

H. R. 787. An act to authorize the exchange of certain lands between the United States of America and the State of California;

H. R. 2070. An act for the relief of Mrs. Rhea Silvers;

H. R. 2075. An act for the relief of Albert A. Heinze;

H. R. 2224. An act providing for payment to the State of Washington by the United States for the cost of replacing and relocating a portion of secondary highway of such State which was condemned and taken by the United States;

H. R. 2340. An act for the relief of William R. and Alice M. Reardon;

H. R. 3775. An act to amend section 20b of the Interstate Commerce Act in order to require the Interstate Commerce Commission to consider, in stock modification plans, the assents of controlled or controlling stockholders, and for other purposes;

H. R. 3836. An act to repeal section 1157 of title 18 of the United States Code, as amended;

H. R. 3837. An act to amend the act of August 24, 1912, as amended, with reference to educational leave to employees of the Bureau of Indian Affairs;

H. R. 5110. An act to amend the Federal Property and Administrative Services Act of 1949, as amended, and for other purposes;

H. R. 5719. An act for the relief of Clara M. Briggs;

H. R. 6692. An act to authorize the transfer of the Coyote Valley Indian Rancheria to the Secretary of the Army, and for other purposes;

H. R. 7238. An act to amend the public assistance provisions of the Social Security Act so as to provide for a more effective distribution of Federal funds for medical and other remedial care; and

H. R. 7259. An act relating to marketing quotas and price supports for fire-cured, dark air-cured, and Virginia sun-cured tobacco.

The message further announced that the House had agreed to a concurrent resolution (H. Con. Res. 117) to commemorate the quadricentennial anniversary of the establishment of the first settlement in Florida, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills and they were signed by the President pro tempore:

S. 895. An act for the relief of Josefa Kusiak;

S. 1203. An act for the relief of Lydia Anne Foote; and

H. R. 53. An act to consolidate into one act, and to simplify and make more uniform, the laws administered by the Veterans' Administration relating to compensation, pension, hospitalization, and burial benefits, and to consolidate into one act the laws pertaining to the administration of the laws administered by the Veterans' Administration.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred, as indicated.

H. R. 293. An act to authorize settlement for certain inequitable losses in pay sustained by officers of the commissioned services under the emergency economy legislation, and for other purposes; to the Committee on Armed Services.

H. R. 2070. An act for the relief of Mrs. Rhea Silvers;

H. R. 2075. An act for the relief of Albert A. Heinze;

H. R. 2224. An act providing for payment to the State of Washington by the United States for the cost of replacing and relocating a portion of secondary highway of such State which was condemned and taken by the United States;

H. R. 2340. An act for the relief of William R. and Alice M. Reardon; and

H. R. 5719. An act for the relief of Clara M. Briggs; to the Committee on the Judiciary.

H. R. 632. An act to amend the Federal Crop Insurance Act, as amended; and

H. R. 7259. An act relating to marketing quotas and price supports for fire-cured, dark air-cured, and Virginia sun-cured tobacco; to the Committee on Agriculture and Forestry.

H. R. 787. An act to authorize the exchange of certain lands between the United States of America and the State of California; to the Committee on Armed Services.

H. R. 3775. An act to amend section 20b of the Interstate Commerce Act in order to require the Interstate Commerce Commission to consider, in stock modification plans, the assents of controlled or controlling stockholders, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H. R. 3836. An act to repeal section 1157 of title 18 of the United States Code, as amended;

H. R. 3837. An act to amend the act of August 24, 1912, as amended, with reference to educational leave to employees of the Bureau of Indian Affairs; and

H. R. 6692. An act to authorize the transfer of the Coyote Valley Indian Rancheria to the Secretary of the Army, and for other purposes; to the Committee on Interior and Insular Affairs.

H. R. 7238. An act to amend the public assistance provisions of the Social Security Act so as to provide for a more effective distribution of Federal funds for medical and other remedial care; to the Committee on Finance.

HOUSE CONCURRENT RESOLUTION REFERRED

The concurrent resolution (H. Con. Res. 117) to commemorate the quadricentennial anniversary of the establishment of the first settlement in Florida, was referred to the Committee on the Judiciary, as follows:

Whereas August 15, 1959, will mark the 400th anniversary of the first recorded attempt to establish a European settlement in what is now the continental United States; and

Whereas on August 15, 1559, Don Tristan de Luna landed his Spanish colonists in Florida at Pensacola; and

Whereas the city of Pensacola now commemorates annually the Fiesta of Five Flags in observance and celebration of this anniversary which has gained national and international recognition; and

Whereas this occasion reestablishes and reemphasizes the ties of friendship and heritage between the nations of the Western Hemisphere: Therefore be it

Resolved by the House of Representatives (the Senate concurring), That the Congress of the United States joins the people of Florida in commemorating the quadricentennial anniversary of the first attempt to found a European settlement in Florida at Pensacola.

SEC. 2. A copy of this resolution, suitably engrossed and duly authenticated, shall be transmitted to the Governor of Florida, the mayor of Pensacola, and the Fiesta of Five Flags Association, Pensacola, Fla.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. JOHNSON of Texas, and by unanimous consent, the following subcommittees were authorized to meet today during the session of the Senate:

The Subcommittee on the Judiciary of the Committee on the District of Columbia.

The Subcommittee on Public Health, Education, and Safety of the Committee on the District of Columbia.

TRANSACTION OF ROUTINE BUSINESS

Mr. JOHNSON of Texas. Mr. President, under the rule, there will be the usual morning hour, for the introduction of bills and the transaction of other routine business. In that connection, I ask unanimous consent that statements be limited to 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

AUDIT REPORT ON NAVY INDUSTRIAL FUND

A letter from the Comptroller General of the United States, transmitting, pursuant to law, an audit report on the Navy Industrial Fund, United States Naval Shipyards, Bureau of Ships, Department of the Navy, dated December 1955 (with an accompanying report); to the Committee on Government Operations.

SUPPLEMENT TO REPORT ON TRINITY RIVER DIVISION OF CENTRAL VALLEY PROJECT

A letter from the Secretary of the Interior, reporting, pursuant to law, certain data as a

supplement to his report on the Trinity River division of the Central Valley project, dated February 12, 1957; to the Committee on Interior and Insular Affairs.

AMENDMENT OF NORTH PACIFIC FISHERIES ACT OF 1954

A letter from the Acting Secretary of State, transmitting a draft of proposed legislation to amend the North Pacific Fisheries Act of 1954 (with accompanying papers); to the Committee on Interstate and Foreign Commerce.

REPORT OF MARITIME ADMINISTRATION

A letter from the Secretary of Commerce, transmitting, pursuant to law, a report of the Maritime Administration on the activities and transactions under the Merchant Ship Sales Act of 1946, from January 1, 1957, through March 31, 1957 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

REPORT OF ATTORNEY GENERAL, RELATING TO SUBVERSIVE ACTIVITIES CONTROL

A letter from the Attorney General, transmitting, pursuant to law, his report concerning activities under the provisions of the Subversive Activities Control Act of 1950, for the period June 1, 1956, through May 31, 1957 (with an accompanying report); to the Committee on the Judiciary.

SUSPENSION OF DEPORTATION OF CERTAIN ALIENS

Three letters from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders suspending deportation of certain aliens, together with a statement of the facts and pertinent provisions of law pertaining to each alien, and the reasons for ordering such suspension (with accompanying papers); to the Committee on the Judiciary.

GRANTING OF STATUS OF PERMANENT RESIDENCE TO CERTAIN ALIENS

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders granting the applications for permanent residence filed by certain aliens, together with a statement of the facts and pertinent provisions of law as to each alien, and the reasons for granting such applications (with accompanying papers); to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

A resolution adopted by the Los Angeles County Federation of Republican Women, relating to the Status of Forces Treaty; to the Committee on Armed Services.

A resolution adopted by the Southwest Missouri Annual Conference of the Methodist Church, at Joplin, Mo., favoring the enactment of legislation to control the advertisement of alcoholic beverages; to the Committee on Interstate and Foreign Commerce.

CONCURRENT RESOLUTION OF THE SOUTH CAROLINA LEGISLATURE COMMENDING THE SELECTION OF JOHN C. CALHOUN TO SENATE HALL OF FAME

Mr. KENNEDY. Mr. President, I ask unanimous consent to have printed in the RECORD a concurrent resolution adopted by the South Carolina House of Representatives and concurred in by the Senate on May 15, 1957, commending the committee of the United States Senate upon the selection of John C. Calhoun to the Senate Hall of Fame.

There being no objection, the concurrent resolution was ordered to be printed in the RECORD, as follows:

Concurrent resolution commending the committee of the United States Senate upon the selection of John C. Calhoun to the Senate Hall of Fame

Whereas the people of the State of South Carolina have long held in respect and admiration the memory of John C. Calhoun; and

Whereas John C. Calhoun served his State and Nation with distinction as a United States Senator, Vice President of the United States, Secretary of War, and Secretary of State; and

Whereas in those positions he exemplified all that is admirable in a public servant; and

Whereas the General Assembly of the State of South Carolina desires to express its appreciation to the Senate committee which named John C. Calhoun to the Senate Hall of Fame: Now, therefore, be it

Resolved by the house of representatives (the senate concurring), That the General Assembly of the State of South Carolina expresses its appreciation to the Senate committee for the selection of John C. Calhoun, an illustrious servant of the people of the State of South Carolina and of the United States, to the Senate Hall of Fame; be it further

Resolved, That a copy of this resolution be forwarded to the Honorable JOHN F. KENNEDY, United States Senate, chairman of the committee.

I hereby certify that the foregoing is a true and correct copy of a resolution adopted by the South Carolina House of Representatives and concurred in by the senate.

INEZ WATSON,
Clerk of the House.

THE LATE SENATOR McCARTHY OF WISCONSIN—RESOLUTION OF ILLINOIS SENATE

Mr. DIRKSEN. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted by the Senate of the State of Illinois, expressing its sorrow over the passing of the late Senator Joseph R. McCarthy, of Wisconsin.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Senate Resolution 45

Whereas the gravest threat facing this country today is world communism, which has as its objective the establishment of a world totalitarian dictatorship and the abolition of all freedoms guaranteed by and enjoyed under our constitutional form of government; and

Whereas the methods used by the exponents of communism include deceit, terrorism, espionage, sabotage, subversion, infiltration into government and our every way of life, and other treacherous and unlawful procedures; and

Whereas the Honorable Joseph R. McCarthy, as United States Senator from Wisconsin, through his courageous and unceasing efforts exposed this communistic plot and awakened the American people to the dangerous threat with which we are confronted; and

Whereas this great patriot continually labored to expose and defeat all communistic endeavors to infiltrate, subvert, and eventually overthrow our form of government and our way of life; and

Whereas as a result of his courageous activities, Senator McCarthy was made the object of attack by the Communists and the leftwing segment of the press, and was persecuted unmercifully by many persons, groups and organizations, including many of the officials of our Government who did so in order to find favor with the leftwing press and for political gain; and

Whereas the constant struggle against communism under the strain of unjust criticism eventually weakened the strength of this great fighter for freedom, and was in no small measure responsible for his untimely death; and

Whereas the members of this senate, as well as the people of the United States and all foes of communism, are saddened by the death of Senator McCarthy, who will live throughout the history of this Nation as a courageous investigator of communistic activities and as the great American, who, despite severe and unjust opposition, awakened the American people to the treacherous communistic plot against our very way of life: Therefore be it

Resolved by the Senate of the 70th General Assembly of the State of Illinois, That we express our sincere sorrow caused by the death of the Honorable Joseph R. McCarthy; that we extend our heartfelt sympathy to Mrs. McCarthy; and that a suitable copy of this preamble and resolution be forwarded to Mrs. McCarthy and to the President pro tempore of the United States Senate.

Adopted by the senate May 9, 1957.

JOHN WM. CHAPMAN,
President of the Senate.
EDWARD E. FERNANDES,
Secretary of the Senate.

RESOLUTION OF NATIONAL EXECUTIVE COMMITTEE, JEWISH WAR VETERANS

Mr. HUMPHREY. Mr. President, I have just received a copy of a resolution passed by the national executive committee of the Jewish War Veterans of the United States of America at its meeting in Washington, D. C., May 25 and 26, 1957. The resolution supports the President's request for funds to implement the mutual security program.

I ask unanimous consent that the resolution be printed in the RECORD, and appropriately referred.

There being no objection, the resolution was referred to the Committee on Appropriations and ordered to be printed in the RECORD, as follows:

Whereas our organization has for 10 years, consistently supported the essential elements of the mutual security program and appropriations fully adequate for the need thereof; and

Whereas the military aid, economic support in the form of loans and grants and technical assistance made available under that program, have strengthened our traditional allies and the independent nations of the world, especially those newly independent since World War II; and

Whereas the results of the mutual security program have inured to our own country's improved military defense and capacity for swift retaliation in the event of any Communist attack; and

Whereas the combination of our own strength and the capacity of the nations

which we have aided, to withstand the subversive and infiltrating activities of the Communists has served to deter Communist aggression and to frustrate their intent to dominate the world: Now, therefore, be it

Resolved, That the national executive committee of the Jewish War Veterans of the United States of America at its regular meeting in Washington, D. C., May 25–26, 1957, wholeheartedly supports the President's minimum request for funds to carry out the mutual security program as proposed in the President's message of May 21 to Congress and reaffirms its confidence that the dollars thus appropriated will be the most effective expenditure our country can make in achieving a durable, just peace.

RESOLUTION OF CLOQUET CENTRAL LABOR UNION, CLOQUET, MINN.

Mr. HUMPHREY. Mr. President, I have just received a notice from the Cloquet Central Labor Union, Cloquet, Minn., of their endorsement of a resolution previously adopted by the St. Paul Trades and Labor Assembly. Several other Minnesota unions have similarly endorsed this resolution. It protests action taken by the House in striking the contingency language of the Labor-HEW appropriation bill, thus depriving the States of funds for the administration of their employment service and unemployment programs for 1958.

The resolution asks the Senate Appropriations Committee to restore the contingency language and appropriate the total $270 million request made by the Department of Labor.

I ask unanimous consent that the resolution be printed in the RECORD, and appropriately referred.

There being no objection, the resolution was referred to the Committee on Appropriations and ordered to be printed in the RECORD, as follows:

Whereas the Department of Labor requested $270 million made up of $258 million basic request and $12 million contingency request for grants to States for administration of their employment service and unemployment insurance programs for 1958; and

Whereas the House of Representatives eliminated the contingency request on a technical point of order and reduced the basic request by $8,186,000; and

Whereas appropriations made by the Congress for grants to States for administration are charged by Public Law 567, 83d Congress, against collections under the Federal Unemployment Tax Act, and the remainder of such collections over $200 million are distributed to the unemployment trust funds of the various States; and

Whereas the cuts made would increase the distribution to the unemployment trust funds which do not need such funds, and

Whereas the cuts by operation of Public Law 567, 83d Congress, not only would not save the taxpayers any money, but would result in building up the unemployment trust funds at the expense of necessary funds which are urgently needed for efficient and proper administration of State employment and unemployment insurance programs, and

Whereas, the quality of services by State Employment Security Agencies to difficult-to-place groups such as older workers and physically handicapped, technical service such as counseling and testing and better employment and housing conditions of domestic migratory workers, and similar activities would have to be curtailed rather than expanded and improved, and

Whereas, these cuts, in the face of increasing costs to State employment security agencies for increases in salaries required by State laws and the rising costs of nonpersonal items, would seriously impair the services provided by employment security agencies to the public through reduction of personnel in such agencies already understaffed, and

Whereas these cuts, if sustained by the Senate, would result in reduction of personnel and services in the Minnesota Department of Employment Security: Now, therefore

The St. Paul Trades and Labor Assembly does hereby protest the action taken by the House of Representatives and petitions the Senate Labor-HEW Subcommittee on Appropriations to restore the contingency language and appropriate the total $270 million request made by the Department of Labor.

SERVING OF ALCOHOLIC BEVERAGES ON AIRCRAFT—PETITION

Mr. CARROLL. Mr. President, I present, for appropriate reference, and ask unanimous consent to have printed in the RECORD a petition signed by Edith A. Barcroft, and sundry other citizens of the State of Colorado, praying for the enactment of Senate bills 4 and 593, relating to the serving of alcoholic beverages on aircraft.

There being no objection, the petition was referred to the Committee on Interstate and Foreign Commerce and ordered to be printed in the RECORD, as follows:

We, the undersigned, voters in your State, do respectfully urge you to do all you can for the passage of the following bills: S. 4, THURMOND; S. 593, NEUBERGER.

These bills are important for the safety of airplane passengers.

(Signed by Edith A. Barcroft and 26 citizens of Colorado.)

HELLS CANYON DAM—PETITIONS

Mr. MORSE. Mr. President, I am in receipt of a series of identical petitions, signed by 1,127 citizens of the State of Oregon, praying for the enactment of Senate bill 55, authorizing the construction of Hells Canyon Dam on the Snake River, which bill is now on the calendar. I ask unanimous consent that one of the petitions may be printed in the RECORD.

There being no objection, the petition was ordered to be printed in the RECORD, without the signatures attached, as follows:

We, the undersigned citizens of the United States, believing that construction of a high dam at Hells Canyon will assure maximum comprehensive multipurpose development of the middle Snake, and will contribute materially to the economic growth of the region and the national economy and security, do respectfully petition that Senate bill 55, authorizing a Federal multiple-purpose high dam at Hells Canyon, be passed by Congress.

Mr. MORSE. Mr. President, I ask unanimous consent that the letter from James Harris, chairman, Hells Canyon Committee, Jefferson Young Democrats, Jefferson High School, Portland, Oreg., transmitting the petition just referred to, together with an article by Richard L. Strout, published in the Christian Science Monitor for the first of this month, entitled "Inept Handling of Power Issue," may be printed in the RECORD.

There being no objection, the letter and article were ordered to be printed in the RECORD, as follows:

PORTLAND, OREG., *March 6, 1957.*

Hon. WAYNE MORSE,
United States Senator from Oregon,
Senate Office Building,
Washington, D. C.

DEAR SIR: Enclosed you will find a petition signed by 1,127 citizens of the United States. These signatures by people favoring passage of high Hells Canyon were gathered in 2 weeks in a small area by 10 members of the Jefferson Young Democrats, who had to place circulating the petition second to school and mountains of schoolwork.

We are sending the petition to you, knowing that you will make the best possible use of it. It was on this very day shown to the seven members of the Multnomah County delegation in the State legislature. (Four of us were very fortunate and were able to go down to Salem to hear the debate with Monroe Sweetland. We have Alfred Corbett and him to thank that an Oregon house memorial may be passed; this, of course, I know little about, seeing as the whole affair took place only a few hours ago.)

One interesting thing about the petition is that we got about 1 percent of the population of Portland's adult population. This was from a very small area (the map is included), and we found about half the people not home. Naturally, a very large percentage of the people were apathetic toward anything to do with the State, dams, and Government. An exceedingly high percentage seemed slightly lukewarm for the dam and/or nearly completely uninformed. Many people would have liked a week to think it over; we had no time to backtrack. We did, however, find many, many people very much for the dam. The surprising thing about this was the lack of distinction between opinions of various parties. I mean we found life-long Republicans for high Hells Canyon, Republican members of precinct boards, and even one Republican who voted against you (as well as Stevenson). She agreed to keep a copy in her dry-cleaning store, and everyone that came in, she tried to get his signature. On the lower levels, Republicans seem to be very much with us after they've given the matter thought. We found several stanch Republicans quite irritated at the administration's power program. Did I only say several? It was way more than several.

We are certainly hoping here in Oregon. Well, perhaps this petition will help a little in showing how we in Oregon stand.

Good luck.

Sincerely and hopefully yours,

JAMES HARRIS,
Chairman, Hells Canyon Committee, Jefferson Young Democrats, Jefferson High School.

P. S.: Please thank Senator NEUBERGER for the cooperation given us by his Oregon secretary in mimeographing the petition.

[From the Christian Science Monitor of June 1, 1957]

INEPT HANDLING OF POWER ISSUE

(By Richard L. Strout)

Some Washington observers argue that it was not the celebrated Dixon-Yates contract itself but the way it was handled that caused the administration all its grief.

Now it is being asked if a similar pattern is not unfolding in the current Congressional controversy over Hells Canyon. It has just been disclosed—almost by inadvertence—that the present Secretary of the Interior, Fred Seaton, 2 months ago recommended against giving the Idaho Power Co. (incorporated in Augusta, Maine) a valuable tax amortization writeoff. Without disclosing this adverse recommendation of Mr. Seaton, Dr. Gordon Gray, head of the Office of De-

fense Mobilization, went ahead anyway and granted the tax benefit to the power company.

Democratic conservative HARRY F. BYRD, Democrat, of Virginia, denounced the tax grant at Hells Canyon as utterly indefensible and a subsidy.

It should be explained that the fast tax writeoff was a wartime act to provide financial incentives to build projects that were not useful in a peacetime economy. When Dr. Gray went before a Byrd subcommittee he failed to advise it of the Seaton letter. He left the impression that he was only following recommendations of the Interior Department.

Insofar as the recommendations of former Secretary of the Interior Douglas McKay went, this was correct. But times have changed. Republicans took a beating in the northwest power States in the 1956 election. Some years ago Congress voted to turn Hells Canyon over to private development—but the decision hasn't been popular in the area involved. It means that instead of a maximum-production high-level dam on America's last remaining great waterpower resource the private company will build three smaller dams and produce less electricity. One estimate of the loss is 400,000 kilowatts of prime power in perpetuity. The 1 big high-level dam would cost perhaps $400 million; the company's 3 smaller dams around $130 million.

Advocates of public power in Congress are now attempting to reverse this decision. A new vote will come soon in the Senate. It has appeared that they would be defeated. But with the new developments this is less certain.

One reason advanced for private development at Hells Canyon was that it would not cost the taxpayers anything—all expenses would be assumed by the company. But under the fast tax writeoff provision opponents now argue it will cost the taxpayers lost taxes on what amounts to a $30.5 million, 50-year, interest-free loan. This was one argument advanced by Mr. Seaton, it is now disclosed, in his letter of March 11 opposing the grant.

Why did Dr. Gray not tell Senator BYRD of the Seaton letter? He did not disclose it either to the Kefauver-O'Mahoney subcommittee which is currently making an inquiry. Senator KEFAUVER got a copy through another source. Dr. Gray explained that he had thought at first that the letter might be covered by so-called executive privilege. This is the right claimed by administration officials not to tell Congress about interdepartmental exchanges preliminary to official actions. (The same issue rose in the Dixon-Yates inquiry.) On the day before Mr. KEFAUVER got a copy of the Seaton letter, Dr. Gray explained, he had been advised that it was not privileged after all.

Dr. Gray agreed that he had discussed his current difficulties with Sherman Adams, Howard Pyle, and other White House assistants to the President. (Mr. Adams also came in as troubleshooter in the Dixon-Yates row.)

Other oddities are that when Mr. Seaton wrote his letter from a hospital some of his assistants never heard of it and have only just learned about it; again, Dr. Gray only learned in committee room that one of his assistants had been in touch with the Idaho utility to speed the date for completing the dams, so as to get the tax writeoff.

Nothing illegal seems involved in all this. But inept handling sometimes has serious political consequences.

REPORT OF A COMMITTEE

The following report of a committee was submitted:

By Mr. HUMPHREY, from the Committee on Government Operations, without amendment:

S. 931. A bill to provide for the reorganization of the safety functions of the Federal Government, and for other purposes (Rept. No. 408).

REPORT OF JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES—FEDERAL EMPLOYMENT AND PAY

Mr. BYRD. Mr. President, as chairman of the Joint Committee on Reduction of Nonessential Federal Expenditures, I submit a report on Federal employment and pay for the month of April 1957. In accordance with the practice of several years' standing, I ask unanimous consent to have the report printed in the RECORD, together with a statement by me.

There being no objection, the report and statement were ordered to be printed in the RECORD, as follows:

FEDERAL PERSONNEL IN EXECUTIVE BRANCH, APRIL 1957 AND MARCH 1957, AND PAY, MARCH 1957 AND FEBRUARY 1957

PERSONNEL AND PAY SUMMARY

(See table I)

Information in monthly personnel reports for April 1957 submitted to the Joint Committee on Reduction of Nonessential Federal Expenditures is summarized as follows:

Total and major categories	Civilian personnel in executive branch			Payroll (in thousands) in executive branch		
	In April numbered—	In March numbered—	Increase (+) or decrease (−)	In March was—	In February was—	Increase (+) or decrease (−)
Total [1]	2,395,764	2,392,987	+2,777	$899,697	$847,617	+$52,080
Agencies exclusive of Department of Defense	1,230,972	1,224,925	+6,047	456,010	425,756	+30,254
Department of Defense	1,164,792	1,168,062	−3,270	443,687	421,861	+21,826
Inside continental United States	2,190,548	2,188,431	+2,117			
Outside continental United States	205,216	204,556	+660			
Industrial employment	657,553	658,739	+1,186			
Foreign nationals	270,497	271,349	−852	27,415	27,172	+243

[1] Exclusive of foreign nationals shown in the last line of this summary.

Table I breaks down the above figures on employment and pay by agencies.

Table II breaks down the above employment figures to show the number inside continental United States by agencies.

Table III breaks down the above employment figures to show the number outside continental United States by agencies.

Table IV breaks down the above employment figures to show the number in industrial-type activities by agencies.

Table V shows foreign nationals by agencies not included in tables I, II, III, and IV.

TABLE I.—*Consolidated table of Federal personnel inside and outside continental United States employed by the executive agencies during April 1957, and comparison with March 1957, and pay for March 1957, and comparison with February 1957*

Department or agency	Personnel				Pay (in thousands)			
	April	March	Increase	Decrease	March	February	Increase	Decrease
Executive departments (except Department of Defense):								
Agriculture	85,417	83,341	2,076		$27,567	$26,650	$917	
Commerce [1]	49,305	48,020	1,285		20,824	19,706	1,118	
Health, Education, and Welfare	51,607	51,288	319		20,803	19,958	845	
Interior	51,269	50,263	1,006		20,117	18,939	1,178	
Justice	30,452	30,652		200	14,480	13,916	564	
Labor	5,928	5,942		14	2,607	2,508	99	
Post Office	524,265	524,347		82	192,747	173,970	18,777	
State [2]	33,568	33,384	184		12,030	11,620	410	
Treasury	83,857	82,789	1,068		33,683	31,827	1,856	
Executive Office of the President:								
White House Office	389	399		10	222	213	9	
Bureau of the Budget	444	437	7		286	270	16	
Council of Economic Advisers	30	28	2		21	21		
Executive Mansion and Grounds	70	69	1		26	26		
National Security Council [3]	28	27	1		18	17	1	
Office of Defense Mobilization	261	270		9	156	167		$11
President's Advisory Committee on Government Organization	6	5	1		3	2	1	

[1] April figure includes 303 seamen on the rolls of the Maritime Administration and their pay.

[2] April figure includes 11,141 employees of the International Cooperation Administration as compared with 11,026 in March and their pay. These ICA figures include employees who are paid from foreign currencies deposited by foreign governments in a trust fund for this purpose. The April figure includes 2,681 of these trust fund employees and March figure includes 2,643.

[3] Exclusive of personnel and pay of the Central Intelligence Agency.

TABLE I.—*Consolidated table of Federal personnel inside and outside continental United States employed by the executive agencies during April 1957, and comparison with March 1957, and pay for March 1957, and comparison with February 1957*—Continued

Department or agency	Personnel				Pay (in thousands)			
	April	March	Increase	Decrease	March	February	Increase	Decrease
Independent agencies:

[1] Subject to revision.
[2] Revised on the basis of later information.

NOTE.—The Germans are paid from funds provided by German Governments. The French and English reported by the Army and Air Force are paid from funds appropriated for personal services. All others are paid from funds appropriated for other contractual services.

FOREIGN NATIONALS

Table 5 segregates and accounts for certain categories of personal services rendered to the United States Government overseas, which cannot be regarded as ordinary direct employment.

Generally, this personal service is rendered military agencies overseas under agreements with the foreign governments. In most cases the employment is indirect. The foreign governments hire the employees. The United States military agencies in most cases administer or direct the activity.

The source of funds for the payment of these employees varies. The Germans are employed without direct reimbursement by the United States and by agreement, payment is made from the German economy. The Japanese are employed under a master labor contract between United States agencies and the Japanese Government.

French and English are employed for the Army and Air Force under agreements with the respective governments. Funds originally appropriated for "Personal service" are used for this purpose. The Koreans and others are paid under varying contractual agreements with funds appropriated for "Other contractual services."

Personnel hired and used under such circumstances cannot be properly considered in the same category as regular employment, but they are used and should be counted for what they are.

The Joint Committee on Reduction of Nonessential Federal Expenditures is endeavoring to identify these groups of employees and to count them along with, but separate from, the regularly reported United States employment overseas.

STATEMENT BY SENATOR BYRD

EMPLOYEES

Executive agencies of the Federal Government reported regular civilian employment in the month of April totaling 2,395,764. This was a net increase of 2,777 as compared with employment reported in the preceding month of March.

Civilian employment reported by the executive agencies of the Federal Government, by months in fiscal year 1957, which began July 1, 1956, follow:

Month	Employment	Increase	Decrease
July	2,398,673	14,250	
August	2,400,493	1,820	
September	2,388,854		11,639
October	2,396,163	7,309	
November	2,394,324		1,839
December	2,389,788		4,536
January 1957	2,387,015		2,773
February	2,390,517	3,502	
March	2,392,987	2,470	
April	2,395,754	2,777	

Inside continental United States civilian employment increased 2,117 and outside continental United States civilian employment increased 6,660. Industrial employment by the Federal agencies in April totaled 657,553, a decrease of 1,186.

Civilian agencies

Total civilian employment in civilian agencies during the month of April was 1,230,972, an increase of 6,047 as compared with the March total of 1,224,925.

Civilian agencies reporting the major increases were Agriculture Department with 2,076, Commerce Department with 1,285, Treasury Department with 1,068 and Interior Department with 1,006. The increases in the Departments of Agriculture, Interior, and Treasury were largely seasonal.

Military agencies

Total civilian employment in the military agencies in April was 1,164,792, a decrease of 3,270 as compared with 1,168,062 in March.

In the Department of Defense decreases in civilian employment were reported by the Department of the Air Force with 1,863, the Departments of the Navy with 1,044 and the Department of the Army with 342.

These figures are from reports certified by the agencies as compiled by the Joint Committee on Reduction of Nonessential Federal Expenditures.

FOREIGN NATIONALS

The total of 2,395,764 civilian employees certified to the committee by executive agencies in their regular monthly personnel reports includes some foreign nationals employed in United States Government activities abroad, but in addition to these there were 270,497 foreign nationals working for United States military agencies during April who were not counted in the usual personnel report. The number in March was 271,349. A breakdown of this employment for April follows:

Country	Total	Army	Navy	Air Force
Belgium	6			6
Denmark	1			1
England	7,221		37	7,184
France	25,592	17,873		7,719
French Morocco	5,791	156	950	4,685
Germany	98,234	82,127	565	15,542
Japan	128,117	66,523	19,252	42,342
Korea	4,804	4,804		
Malta	115		115	
Netherlands	42			42
Norway	24			24
Trinidad	550		550	
Total	270,497	171,483	21,469	77,545

PAYROLL

The regular monthly Federal civilian payroll in March totaled $899,697,000. United States pay for foreign nationals working under Federal agencies abroad totaled $19,003,000. The total March payroll for agencies of the executive branch of the Federal Government was $918,700,000.

These figures for the month were certified by executive agencies to the Joint Committee on Reduction of Nonessential Federal Expenditures. Payroll figures are on an actual basis and necessarily lag 1 month behind the personnel count.

Payroll for the first 9 months of fiscal year 1957, including United States funds for foreign nationals not on regular rolls, totaled $8.4 billion. This was a monthly average of $934 million, since fiscal year 1957 started July 1, 1956.

These payroll figures by months follow:

[In millions of dollars]

Month	Regular payrolls	Foreign nationals not on regular rolls, United States funds	Total
July	907	17	923
August	950	17	967
September	846	17	863
October	947	17	964
November	931	17	948
December	933	18	951
January 1957	990	17	1,006
February	848	16	864
March	900	19	919
Total (9 months)	8,251	155	8,406

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CAPEHART:

S. 2208. A bill to amend sections 542 (c) (6) and (7) of the Internal Revenue Code of 1954 relating to interest received by licensed personal finance companies and lending companies; to the Committee on Finance.

By Mr. CARLSON:

S. 2209. A bill to provide for the construction of the Cheney division, Wichita Federal reclamation project, Kansas, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. WILEY:

S. 2210. A bill for the relief of Emmanuel Kim Kosmitis; to the Committee on the Judiciary.

By Mr. MAGNUSON (by request):

S. 2211. A bill to amend the Civil Aeronautics Act of 1938, as amended, so as to prohibit certain practices regarding passenger ticket sales and reservations; and

S. 2212. A bill to amend the North Pacific Fisheries Act of 1954; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. MAGNUSON when he introduced the above bills, which appear under separate headings.)

By Mr. ROBERTSON (for himself and Mr. CAPEHART):

S. 2213. A bill relating to the release of materials from the supplemental United States stockpile of strategic and critical materials; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. ROBERTSON when he introduced the above bill, which appear under a separate heading.)

By Mr. SYMINGTON (for himself and Mr. HENNINGS):

S. 2214. A bill to revise the authorization with respect to the charging of tolls on the bridge across the Mississippi River near Jefferson Barracks, Mo.; to the Committee on Public Works.

(See the remarks of Mr. SYMINGTON when he introduced the above bill, which appear under a separate heading.)

By Mr. JACKSON (for himself and Mr. MAGNUSON):

S. 2215. A bill to authorize the Secretary of the Interior to construct, operate, and maintain the Spokane Valley project, Washington and Idaho, under Federal reclamation laws; to the Committee on Interior and Insular Affairs.

By Mr. IVES:

S. 2216. A bill for the relief of John C. Walsh; to the Committee on the Judiciary.

By Mr. MAGNUSON (for himself and Mr. JACKSON):

S. 2217. A bill to authorize the Secretary of the Army to sell certain lands at the McNary lock and dam project, Oregon and Washington, to the port of Walla Walla, Wash.; to the Committee on Public Works.

S. 2218. A bill to provide for certain reductions in the reimbursable construction cost of the Kittitas division of the Yakima reclamation project, Washington; and

S. 2219. A bill to provide for the apportionment by the Secretary of the Interior of certain costs of the Yakima Federal reclamation project, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. KEFAUVER:

S. 2220. A bill to amend the Sherman Act to declare the primacy of free enterprise, and for other purposes; to the Committee on the Judiciary.

(See the remarks of Mr. KEFAUVER when he introduced the above bill, which appear under a separate heading.)

By Mr. CARROLL:

S. 2221. A bill for the relief of Elfrieda Heuberger Glanz; to the Committee on the Judiciary.

By Mr. KENNEDY:

S. 2222. A bill to provide for the issuance of special nonquota immigrant visas to certain aliens who applied for admission to the United States under the Refugee Relief Act of 1953, for the issuance of such visas to spouses and children of aliens admitted to the United States under such act, and for other purposes; to the Committee on the Judiciary.

By Mr. BYRD:

S. 2223. A bill for the relief of Catherine Pochon Dike; to the Committee on the Judiciary.

By Mr. HUMPHREY (by request):

By Mr. KUCHEL:

S. 2227. A bill for the relief of Mario Angelini and Mrs. Anna Maria Sodani Angelini; to the Committee on the Judiciary.

By Mr. CHAVEZ (by request):

S. 2228. A bill to amend section 5 of the Flood Control Act of August 18, 1941, as amended, pertaining to emergency flood-control work; to the Committee on Public Works.

By Mr. MONRONEY (by request):

S. 2229. A bill to provide for Government guaranty of private loans to certain air carriers for purchase of aircraft and equipment, and for other purposes; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. MONRONEY when he introduced the above bill, which appear under a separate heading.)

SPECIAL COMMITTEE TO INVESTIGATE OPERATION OF STATUS-OF-FORCES TREATY WITH JAPAN

Mr. ALLOTT. Mr. President, the case of Army Sp3c. William S. Girard has been very perturbing to me as it has been, I am sure, to a great many Members of Congress.

I have followed this case since it came into public view, about 2 weeks ago. There are many equities involved, as well as our own national interest, the interests of individual American boys abroad, and, finally, the interests of the country which our troops occupy.

Mr. President, as a lawyer, as a father, and as a United States Senator, I believe it is our obligation to investigate this entire situation. We must determine beyond all doubt whether or not those charged with the administration of treaties and agreements have acted and are acting within their authority, or whether there has been some laxity in the use of the authority and in carrying out the intent of Congress.

The resolution which I now submit spells out clearly what I believe should be done.

Because of the serious implications and manifest significance of this case, and because an impartial study is a necessity in the national interest, it seems to me that a special committee is required if we are to do this effectively.

Nothing is more important than the constitutional rights of our citizens. They, and all the world, for that matter, are entitled to know that we intend to stand behind our obligations, and that we intend also to protect the rights of our citizens, wherever they may be. Certainly it is our obligation to see that our house is in order.

Therefore, Mr. President, I submit, for appropriate reference, a resolution and ask that it be printed in the RECORD.

The resolution (S. Res. 144), submitted by Mr. ALLOTT, was referred to the Committee on Foreign Relations, as follows:

Resolved, etc., That (a) there is hereby established a special committee to be composed of 8 Senators to be appointed by the President of the Senate, of whom 4 shall be members of the majority party and 4 shall be members of the minority party.

(b) The President of the Senate is instructed to appoint the members of this special committee from the following: Two members from the Committee on Armed Services, 2 members from the Committee on Foreign Relations, 2 members from the Committee on the Judiciary, and 2 members of the Senate at large.

(c) The committee is authorized and directed to conduct a full and complete study and investigation for the purpose of determining—

(1) The background, legality, sequence of events, the justification or lack of it under present laws, treaties and protocols upon which the decision was reached to give the person of United States Army Sp3c. William S. Girard over to the Japanese Government for trial in a Japanese court on charges now pending.

(2) Whether in fact the United States has primary jurisdiction in this case, and like cases under law, treaties, agreements, and protocols entered into with the Japanese Government;

(3) Whether the joint United States-Japan Committee established by the two Governments pursuant to treaty arrangements exceeded their authority, acted without authority, or in an unreasonable way so as to be prejudicial to the best interests of the United States or the rights guaranteed citizens of the United States under the Constitution;

(4) Whether such action as the joint United States-Japan Committee did take in the case of Army Specialist William S. Girard was in full accord with procedures established by treaty and agreement, and if such action was necessary to preserve the integrity of the pledges of the United States;

(5) Whether it was the intent of the United States, the intent of the Congress and the people represented thereby under the United States-Japanese Security Treaty and article XVII of the administrative agreement under that treaty, as established by the protocol adopted September 23, 1953, to give to the authorities of Japan the prior right to jurisdiction to try members of the United States Armed Forces for an injury caused to a Japanese national while such member of the United States Armed Forces was acting, with or without authority, but while on official duty status;

(6) The meaning and intent of the clause "arising out of any act or omission done in the performance of official duty" as used in the administrative agreement under the before-mentioned treaty as established by the protocol adopted September 23, 1953.

(7) Whether any official of the United States acting under instructions from higher authority or otherwise, acted illegally, without authority or was derelict in the performance of his duty;

(8) Whether the enactment of legislation is necessary to provide the intended protection of United States citizens serving in the Armed Forces of this country, while on assignment outside the continental limits of the United States, and, if such legislation is determined to be necessary, what legislation would be most likely to provide the necessary protections.

SEC. 2. The committee shall, at its first meeting, to be called by the President of the Senate, select a chairman and vice chairman from among its members. Any vacancy in the committee shall be filled in the same manner as the original appointment.

SEC. 3. (a) For the purposes of this resolution the committee is authorized to (1) hold such hearings; (2) sit and act at such times and places during the sessions, recesses, and adjourned periods of the Senate;

(3) require by subpena or otherwise the attendance of such witnesses and the production of such correspondence, books, papers, and documents; (4) administer such oaths; (5) take such testimony either orally or by deposition; (6) employ on a temporary basis such technical, clerical, and other assistants and consultants, and, with the prior consent of the executive department or agency concerned and the Committee on Rules and Administration, employ on a reimbursable basis such executive branch personnel, as it deems advisable.

(b) A quorum of the committee shall consist of 4 members, except that the committee may provide that, for the purpose of taking testimony, 3 members, 2 from the majority party and 1 from the minority party, shall constitute a quorum.

SEC. 4. The expenses of the committee, which shall not exceed $50,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

SEC. 5. (a) The committee shall report the results of its study and investigation, together with such recommendations as it may deem advisable, to the Senate not later than January 15, 1958.

(b) Upon the filing of its report, the committee shall cease to exist.

AMENDMENT OF CIVIL AERONAUTICS ACT OF 1938, RELATING TO PROHIBITION OF CERTAIN PRACTICES REGARDING PASSENGER TICKET SALES

Mr. MAGNUSON. Mr. President, by request, I introduce, for appropriate reference, a bill to amend the Civil Aeronautics Act of 1938, as amended, so as to prohibit certain practices regarding passenger ticket sales and reservations. I ask unanimous consent that a letter from the Chairman of the Civil Aeronautics Board, requesting the proposed legislation, be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the letter will be printed in the RECORD.

The bill (S. 2211) to amend the Civil Aeronautics Act of 1938, as amended, so as to prohibit certain practices regarding passenger ticket sales and reservations, introduced by Mr. MAGNUSON, by request, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

The letter presented by Mr. MAGNUSON is as follows:

CIVIL AERONAUTICS BOARD,
Washington, May 29, 1957.

Hon. RICHARD M. NIXON,
President of the Senate,
United States Senate,
Washington, D. C.

DEAR MR. PRESIDENT: The Civil Aeronautics Board recommends to the Congress for its consideration the enclosed draft of a proposed bill to amend the Civil Aeronautics Act of 1938, as amended, so as to prohibit certain practices regarding ticket sales and reservations.

The Board has been advised by the Bureau of the Budget that there is no objection to the presentation of the draft bill to the Congress for its consideration.

Sincerely yours,

JAMES R. DURFEE,
Chairman.

AMENDMENT OF NORTH PACIFIC FISHERIES ACT OF 1954

Mr. MAGNUSON. Mr. President, at the request of the State Department, the States of Washington, Oregon, and California, and the commercial fisheries industry of the Pacific coast and Alaska, I introduce, for appropriate reference, a bill that will in effect amend the North Pacific Fisheries Act of 1954, to extend Federal authority to regulate United States fisheries operations on the high seas, south of Dixon entrance in Alaska, to the entrance of the Strait of Juan De Fuca between the State of Washington and British Columbia, Canada.

The proposed amendment will serve to coordinate the efforts of the three Pacific Coast States with Canada to provide more effective conservation regulations to conserve and strengthen the important ocean fisheries resources of the Pacific area.

In addition, the suggested legislation will provide, for the first time in this area, legal responsibility over United States citizens fishing on the high seas, and will make possible the adoption of coordinated conservation fisheries practices for both United States and Canadian fishermen.

The act does not interfere with the right of the three Pacific Coast States to exercise control over resident fishermen, and provides for the three States participation with Federal and Canadian authorities to effect conservation laws and regulations for the protection of the common coastal fisheries.

I have been informed that the Canadian Government has preceded us in the enactment of similar legislation governing the high seas and coastal fishing operations of Canadian fishermen.

I hope the Congress will give prompt and favorable consideration to this bill.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 2212) to amend the North Pacific Fisheries Act of 1954, introduced by Mr. MAGNUSON, by request, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

RELEASE OF MATERIALS FROM SUPPLEMENTAL STOCKPILE

Mr. ROBERTSON. Mr. President, on behalf of myself, and the Senator from Indiana [Mr. CAPEHART], I introduce, for appropriate reference, a bill relating to the release of materials from the supplemental United States stockpile of strategic and critical materials. I ask unanimous consent that a brief explanation of the provisions of the bill may be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the explanation will be printed in the RECORD.

The bill (S. 2213) relating to the release of materials from the supplemental United States stockpile of strategic and critical materials, introduced by Mr. ROBERTSON (for himself and Mr. CAPEHART), was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

The explanation presented by Mr. ROBERTSON is as follows:

STATEMENT BY SENATOR ROBERTSON

The Joint Committee on Defense Production at a hearing on May 21, 1957, was informed by the General Services Administration that materials placed in the supplemental stockpile could not be used for the national defense at the direction of the President in time of war or emergency due to the technical phrasing of the present law. Materials in the stockpile itself can be so used. The committee recommended that the law be changed to remedy this undesirable possibility. The accompanying bill will accomplish this result.

The Agricultural Trade Development and Assistance Act of 1954 permits the acquisition of materials to accomplish its purposes by barter and otherwise and provides that strategic and critical materials so acquired be placed in a supplemental stockpile. The act states that they shall be released only under the provisions of section 3 of the Strategic and Critical Materials Stockpile Act. Section 3 of the latter act provides that no material can be disposed of without the express approval of Congress except by reason of obsolescence of that material for use in time of war. It further provides that notice of the date and plan of disposition shall be published in the Federal Register and given to the Armed Services Committees of the Senate and the House 6 months in advance of such disposition. Section 5, however, gives the President the power to order the release of materials in the stockpile for use, sale, or other disposition when in his opinion such release is required for the common defense, and in time of war or a national emergency to delegate this authority to an appropriate agency. Materials in the supplemental stockpile at present cannot be released under this emergency provision.

Materials other than those acquired under the Agricultural Trade Development and Assistance Act may be placed in the supplemental stockpile. The Domestic Tungsten, Asbestos, Fluorspar and Columbium-Tantalum Purchase Act of 1956 (Public Law 733) provides that tungsten and other materials acquired thereunder be made available to both the supplemental stockpile or the stockpile itself, but it is silent as to their disposition thereafter. Therefore, the instant bill makes provision for the release of all materials placed in the supplemental in like manner to those placed in the stockpile.

AUTHORIZATION FOR COLLECTING TOLLS ON JEFFERSON BARRACKS BRIDGE, MISSOURI

Mr. SYMINGTON. Mr. President, a serious traffic bottleneck has developed at the Jefferson Barracks Bridge which spans the Mississippi River near St. Louis, Mo. This bridge, constructed several years ago, is daily being taxed to capacity.

To alleviate this situation, the county of St. Louis wants to construct a companion bridge across the river, one span then to be used for eastbound, the other for westbound traffic. Congressional authority for such additional construction already exists in the 1946 Bridge Act—Public Law 601 of the 79th Congress.

Additional legislation is needed, however, to allow the county to continue to charge tolls on the existing bridge until

such time as the bonds for the new span are retired. This action is necessary to avoid having 1 toll bridge and 1 free bridge side by side across the river.

Therefore, Mr. President, at the request of the St. Louis, Mo., County Council, on behalf of myself and my colleague, the senior Senator from Missouri [Mr. HENNINGS], I introduce, for appropriate reference, a bill to accomplish this purpose, and ask unanimous consent that the bill, together with a resolution adopted by the St. Louis County Council, be printed at this point in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill and resolution will be printed in the RECORD.

The bill (S. 2214) to revise the authorization with respect to the charging of tolls on the bridge across the Mississippi River near Jefferson Barracks, Mo., introduced by Mr. SYMINGTON (for himself and Mr. HENNINGS), was received, read twice by its title, referred to the Committee on Public Works, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That, notwithstanding any provision to the contrary contained in the act entitled "An act authorizing the county of St. Louis, State of Missouri, to construct, maintain and operate a toll bridge across the Mississippi River near Jefferson Barracks, Mo.," approved August 7, 1939 (53 Stat. 1257), authority is hereby granted to the county of St. Louis, State of Missouri, to fix and charge tolls, in accordance with the provisions of this act, for transit over the bridge constructed pursuant to such act of August 7, 1939 (hereinafter referred to as the "Jefferson Barracks Bridge").

SEC. 2. The rates of the tolls authorized by the first section of this act shall be so adjusted that the amounts collected from the tolls on the Jefferson Barracks Bridge together with the amounts collected from the tolls imposed on not more than one additional bridge hereafter to be constructed by such county adjacent to the Jefferson Barracks Bridge and across the Mississippi River, will provide (1) a fund sufficient to pay the cost of the maintenance and operation of both such bridges, and (2) a sinking fund sufficient to amortize (a) any unamortized cost of the Jefferson Barracks Bridge and approaches thereto and the cost of any reconstruction or improving of the Jefferson Barracks Bridge, (b) the cost of constructing such additional bridge and the approaches thereto, and (c) interest and financing costs, within a period of not more than 30 years after the date such reconstruction and improvement, or construction, is commenced, whichever first occurs. After there has been collected from such tolls an amount sufficient to provide such funds, both such bridges shall be maintained and operated free of tolls.

The resolution presented by Mr. SYMINGTON is as follows:

Resolution 294

Resolution endorsing proposed legislation which would amend existing laws to enable St. Louis County to finance, by the sale of revenue bonds, the construction of an additional bridge across the Mississippi River adjacent to the present Jefferson Barracks Bridge

Whereas it has been called to the attention of the St. Louis County Council, by the Jefferson Barracks Bridge Association, that traffic over the Jefferson Barracks Bridge, owned and operated by St. Louis County, has shown a large increase each year and it has become apparent that the capacity of the bridge will be exceeded in the near future; and

Whereas the council has been informed that the highway connections to the bridge have been or will be designated as part of the Federal Interstate Highway System; and

Whereas the council also has been informed that neither the Missouri State Highway Commission nor the Illinois Division of Highways plan to construct an additional bridge on this portion of the Interstate System in the near future; and

Whereas it appears to be in the interest of St. Louis County and the St. Louis metropolitan area to provide, as expeditiously as possible, for the anticipated additional traffic across the Mississippi River at this point by constructing, through the sale of revenue bonds, an additional bridge adjacent to the present Jefferson Barracks Bridge, thereby creating two additional traffic lanes across the river; and

Whereas there is doubt that under existing laws it would be possible to so finance and construct such additional bridge and, therefore, amendments to existing applicable Federal and State laws are necessary; and

Whereas there has been introduced in the General Assembly of Missouri, house bill 561, a proposed act to amend chapter 234, Revised Statutes of Missouri, 1949, and there has been submitted to Senators STEWART SYMINGTON and THOMAS C. HENNINGS, JR., and to Congressman THOMAS B. CURTIS, a proposed act to amend an act approved August 7, 1939, which relates to the Jefferson Barracks Bridge, which proposed bill and act, if enacted into law, would make possible the financing and construction of such a second bridge: Now, therefore, be it

Resolved by the County Council of St. Louis County, Mo., as follows, That it go on record as favoring the passage of appropriate legislation which would authorize an additional bridge adjacent to the present Jefferson Barracks Bridge; and be it further

Resolved, That the supervisor of St. Louis County be, and he hereby is, directed to promptly take such action as may facilitate the construction of such second bridge; and be it further

Resolved, That the county clerk forward a copy of this resolution to the speaker of the house, the president pro tempore of the senate, each member of the senate and house of St. Louis County, Mo., to the United States Senators from Missouri and to the Representative in Congress from St. Louis County, Mo.

Adopted this 17th day of April 1957.

L. GORDON DAVIS,
Chairman, County Council.

Attest:

LEO E. SIEVERS,
County Clerk.

AMENDMENT OF SHERMAN ANTITRUST ACT, RELATING TO PRIMACY OF FREE ENTERPRISE

Mr. KEFAUVER. Mr. President, the bill which I am about to introduce is identical with H. R. 2142, which was introduced in the House by Representative EMANUEL CELLER, Democrat, New York. It amends the Sherman Act by having Congress declare that it is the policy of the United States to maintain, to the maximum extent possible, the American system of free, competitive enterprise which has so long been embodied in our antitrust laws.

One of the primary purposes of this bill is to establish and furnish a guide for administrative agencies, regulatory bodies and the courts in the exercise of their powers over business, and involving exemptions from the antitrust laws. The bill clearly creates a presumption in favor of free enterprise that should assure that our national policy favoring competition is not subordinated unless it is clearly found necessary to meet the objectives established by Congress. Administrative bodies will be clearly admonished by this bill, in the regulation of business and industry, that Congress intended this regulation to supplement and not to supersede our free, competitive system.

The need for this proposed legislation is clearly indicated by rulings of administrative bodies and the courts which have unduly expanded authorized exemptions from the antitrust laws. Under the so-called doctrine of primary jurisdiction, the courts of the United States have declined to give relief and the Attorney General has in fact failed to seek relief against allegedly unlawful restraints of trade where it appeared that administrative agencies have been vested with authority to approve some or all of the activities challenged as illegal. This reluctance on the part of the courts and the Attorney General to take action has been out of deference to so-called superior technical experience, commonly referred to as expertise, vested in the regulatory bodies. One of the most striking results of this doctrine of primary jurisdiction has been the ouster of the Attorney General from his prescribed duty to enforce the antitrust laws in regulated industry. A void has been created in certain trade areas that primarily come under regulatory agencies. Such business firms have been granted a greater immunity than was intended by Congress.

This bill admonishes any official, agency, board or commission in the exercise of its vested power and authority to give the maximum effect practicable to the objectives of the antitrust laws. Most important, the bill makes it clear to the courts that it is the intention of Congress that suits brought by the United States challenging violation of the antitrust laws shall not be barred or stayed for the reason that any administrative body or agency has jurisdiction, or is exercising jurisdiction, over some or all of the activities included in the alleged antitrust violation.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 2220) to amend the Sherman Act to declare the primacy of free enterprise, and for other purposes, introduced by Mr. KEFAUVER, was received, read twice by its title, and referred to the Committee on the Judiciary.

PROPOSED FAMILY REUNIFICATION AND EMERGENCY REFUGEE ACT OF 1957

Mr. KENNEDY. Mr. President, I introduce, for appropriate reference, a bill to provide for the issuance of special

nonquota immigrant visas to certain aliens who applied for admission to the United States under the Refugee Relief Act of 1953, for the issuance of such visas to spouses and children of aliens admitted to the United States under such act, and for other purposes. I ask unanimous consent that I may speak on the bill in excess of the 3 minutes allowed under the order which has been entered.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the Senator from Massachusetts may proceed.

The bill (S. 2222) to provide for the issuance of special nonquota immigrant visas to certain aliens who applied for admission to the United States under the Refugee Relief Act of 1953, for the issuance of such visas to spouses and children of aliens admitted to the United States under such act, and for other purposes, introduced by Mr. KENNEDY, was received, read twice by its title, and referred to the Committee on the Judiciary.

Mr. KENNEDY. Mr. President, I have introduced a bill which I believe should be acted on by the Congress at the earliest possible opportunity. It would provide principally for the reuniting of families separated when the breadwinner emigrated to the United States under the Refugee Relief Act of 1953, leaving his wife and children behind. It would also admit a limited number of so-called pipeline cases—refugees who were given assurance of jobs and homes under the act, and for whom processing had been begun, but who were unable to emigrate before the act expired.

In addition, it provides special nonquota visas for four classes of refugees whose resettlement is urgent for humantiarian, political, and economic reasons. Under these provisions the bill would admit: 10,000 refugee-escapees presently in Austria, 10,000 refugee-escapees presently in NATO countries, 4,000 orphans adopted by United States citizens, 5,000 Middle East refugees temporarily in refuge in Western Europe.

The total number expected to be admitted under the bill would be about 89,000 over a period of 2 years. Dependents and "pipeline cases" together would be limited under the bill to 60,000. It is estimated that some 20,000 of those would be dependents of refugees already in the United States.

I believe that there can be little doubt in any Senator's mind that it is morally incumbent upon the Congress to reunite the families which were inadvertently broken by the workings of the Refugee Relief Act. In Italy, for instance, there are about 10,000 wives and children waiting to be reunited with husbands and fathers who are now in this country and who are employed and capable of taking care of their families. Human decency demands that we facilitate the reunion of these broken families.

The Refugee Relief Act, as great a humanitarian effort as it was, had some unfortunate after effects. It raised the hopes of many thousands of refugees who had obtained assurances of jobs and housing in this country and for whom processing had been initiated. However, the act expired and the hopes which had been raised were dashed. This bill will permit these people, whose efforts to begin a new life were frustrated through no fault of their own, to finally emigrate. It is both morally and psychologically indefensible to allow the situation to continue as it is.

In addition to those persons who were left stranded by the expiration of the Refugee Relief Act, there are several other categories of escapee-refugees which present urgent problems for the United States not only from a humanitarian point of view but because our seeming indifference poses serious political and economic difficulties for the Free World. If enacted, this bill would relieve these economic and social pressures, reduce United States budgetary costs, and remove a condition which is grist for the Communist propaganda mill.

The bill would admit up to 10,000 escapee-refugees from Austria, including 3,000 Hungarians, and 10,000 refugee-escapees who are now temporarily residing in NATO countries. Many of the persons who would be admitted under these provisions have languished in camps for years, and the United States has and is indirectly contributing to their support through the United States escapee program. Thousands of refugees have already permanently settled in Western Europe or in other countries through the efforts of private agencies and the Intergovernmental Committee on European Migration, but there remains a significant number still to be resettled abroad. It is fair and in the best interest of this country to welcome a reasonable number of these refugees to the United States. It should be pointed out that to the extent that these people are resettled they will no longer constitute a drain on United States budgetary resources through the USEP program but instead will become self-supporting, industrious residents of this Nation.

Speedy action should also be taken to admit another group of aliens. I refer to those orphans throughout the world who, friendless and without parents, have been adopted by United States citizens but cannot be admitted to this country. These are truly the forgotten ones of the postwar years. Born in a world torn by strife and tension they have never enjoyed that which is the right of every child—the love and security of parental care. It is unthinkable that the Congress would not act to permit these children to join their adoptive parents—many of them members of the military services. The number of orphans who would be admitted under this bill is small—4,000 over a 2-year period—but the happiness which it would bring to adoptive parents and children alike is immeasurable.

The last small group of alien refugees which would be admitted under this bill are some 5,000 Greeks, Italians, and stateless Jews who have been expelled from countries in the general area of the Middle East and who arrived in overcrowded Italy and Greece. Although many of us believe that these homeless people could be admitted under the parole provisions of the Immigration and Nationality Act, the Attorney General has declined to do so. These are worthy cases and deserve our consideration. Many of these expellees have relatives in this country.

There are several general provisions in the bill to which I should like to draw attention. The first would permit the aliens to be admitted under this bill to enter the country under the regular provisions of the Immigration and Nationality Act. All of us recognize that the procedures of the Refugee Relief Act were cumbersome, time-consuming and expensive. Those in the Congress who know our immigration law best have advocated the return to the normal provisions of the Immigration Act which, while simple, afford necessary protections.

This bill also provides for the regularization of the immigration status of refugees who have heretofore been admitted under the parole provisions of the basic law. This is something that must be done sooner or later. This action will permit parolees to acquire a regular immigration status. This is an orderly procedure and should be followed with a minimum of delay.

Various past acts of Congress have mortgaged quota numbers available under the regular Immigration Act so that for all practicable purposes immigration from some countries is impossible until well into the 21st century. This, it seems to me, and I know to most of my colleagues in the Congress, is a fantastic situation which should be corrected promptly. This bill would cancel the mortgages which have been placed on immigration quotas by previous acts of Congress. It would merely have the effect of making all quotas under ou. immigration law current.

In summary I should like to say that the provisions of this bill meet the minimum requirements of the present refugee-escapee crisis. The situations to which the provisions of the bill are directed are well recognized by the Members of Congress and I believe there is general support for action in each of these areas, especially among those who have been closely associated with immigration and refugee legislation over the years.

The bill is directed to pressing situations, the continued existence of which is morally indefensible and abhorrent to the American conscience. The number of aliens which this bill would admit is relatively small—less than 90,000 over a 2-year period—yet the advantages to the United States and the people affected are tremendous. More importantly, however, this bill has great moral significance having as its basic purpose the preservation of families and the extension of assistance to the homeless. Who among us would suggest seriously that families should not be reunited as promptly as possible? And who would deny to orphan children the loving care of generous and eager adoptive parents?

This bill is no panacea nor is it a final answer to the immigration problem. As I have repeatedly stated, I believe that Congress must seriously and thoughtfully reexamine our entire immigra-

tion policy. However, the problems of the human beings to which the legislation is primarily addressed cannot await a thorough legislative review. These problems are urgent and their solution is vital—not only to the persons directly affected but to us to whom the power has been given to alleviate the distress suffered by other human beings. I cannot urge too strongly that Congress act during the present session on this important matter.

AMENDMENT OF FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT, RELATING TO ADVERTISED AND NEGOTIATED DISPOSALS OF SURPLUS PROPERTY

Mr. HUMPHREY. Mr. President, on behalf of the Committee on Government Operations, and at the request of the Administrator of General Services, I introduce, for appropriate reference, a bill to amend the Federal Property and Administrative Services Act of 1949, as amended, regarding advertised and negotiated disposals of surplus property.

This bill is a part of the 1957 legislative program of the General Services Administration and is proposed as being in accord with recommendations of the Commission on Organization of the Executive Branch of the Government in its report on use and disposal of Federal surplus property.

I ask unanimous consent that a letter from the Administrator of General Services addressed to the President of the Senate, which sets forth the need for the proposed legislation, be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the letter will be printed in the RECORD.

The bill (S. 2224) to amend the Federal Property and Administrative Services Act of 1949, as amended, regarding advertised and negotiated disposals of surplus property, introduced by Mr. HUMPHREY, by request, was received, read twice by its title, and referred to the Committee on Government Operations.

The letter presented by Mr. HUMPHREY is as follows:

GENERAL SERVICES ADMINISTRATION,
Washington, D. C., May 23, 1957.

Hon. RICHARD M. NIXON,
President of the Senate,
Washington, D. C.

MY DEAR MR. PRESIDENT: There is hereby transmitted for referral to the appropriate committee, a draft bill prepared by this Agency "to amend the Federal Property and Administrative Services Act of 1949, as amended, regarding advertised and negotiated disposals of surplus property."

The draft bill is part of the 1957 legislative program of this Agency. It is consistent with and will implement recommendations of the Commission on Organization of the Executive Branch of the Government contained in its report on use and disposal of Federal surplus property.

The bill prescribes in considerable detail the situations in which the disposal of surplus Federal property, real and personal, must be accomplished by public advertising and when disposals may be accomplished by negotiation. The bill prescribes also the advertising procedure to be observed, including such matters as the period of advertisement, opening of bids, and making the award.

The bill would provide a "charter" in this field for the disposal of surplus property comparable to the one contained in title III of the subject act applicable to the procurement of property and services. It is based on extensive experience and would replace by permanent law interim extensions of negotiation authority.

The statutory background of the draft bill is illuminating. The Surplus Property Act of 1944 provided that surplus property disposals "may be made without regard to any provision in existing law for competitive bidding, unless the Board shall determine that disposal by competitive bid will in a given case better effectuate the policy of the act" (sec. 29, 58 Stat. 781).

In 1946, the general advertising statute, section 3709, Revised Statutes, was amended to apply expressly for the first time to the disposal of surplus property, although exceptions were made for disposals under the Surplus Property Act of 1944 and disposals of small dollar value (sec. 9, 60 Stat. 809).

The Federal Property and Administrative Services Act of 1949 as originally enacted provided: "Unless the Administrator shall determine that disposal by advertising will in a given case better protect the public interest surplus property disposals may be made without regard to any provision of existing law for advertising until 12 o'clock noon, eastern standard time, December 31, 1950" (sec. 203 (e), 63 Stat. 386).

This provision has been amended four times, primarily to provide additional temporary authority. In July 1952 the negotiation authority was revived and extended to June 30, 1953 and a requirement was added that an explanatory statement be prepared and submitted to the appropriate Congressional committees, with a copy preserved in the file, of all cases where negotiated disposal occurs (sec. 1 (1), 66 Stat. 593). Authority was similarly revived and extended in August 1953 to June 30, 1954 (67 Stat. 521), in July 1954 to June 30, 1955 (68 Stat. 474), and in August 1956 to July 31, 1958 (Public Law 971, 84th Cong., 70 Stat. 1020).

Each interim extension of authority was granted only after the previously given authority had already lapsed, the period of lapse twice being a matter of weeks and twice being in excess of a year, reaching a maximum of 1½ years.

Plans for orderly disposal become disorganized under such procedure. Negotiations pending when the authority to negotiate expires must be suspended and perhaps terminated, to the disappointment of the prospective buyer and the vending Government agency. Less suitable sales machinery is then invoked. In some circumstances where negotiation with a particular buyer is especially desirable legislation is introduced covering the individual transaction. Sales through other methods are then postponed until action on the special legislation develops.

These difficulties merely highlight the accuracy of the principle of public administration that permanent operating responsibilities cannot adequately be carried out with only temporary grants of power.

The interim extensions were granted to provide ample opportunity for studies and plans to be made for the enactment of permanent legislation on the subject. The enclosed draft bill is based on considerable experience, and consultation with other Federal agencies. It is flexible to adapt to the variety of circumstances under which Federal surplus property is sold and seeks to protect the just interests of prospective buyers as well as the Government. We believe the proposed bill should properly supersede the present temporary authority now contained in section 203 (e).

Some comments on provisions of the draft bill follow:

Paragraph (1) of subsection (e) requires that surplus property be disposed of by public advertising unless disposal is made by abandonment, destruction, or donation, or through contract realty brokers, or on a negotiated basis in the nine situations set forth in paragraph (3), or, in the case of personal property, by sales at fixed prices as provided in paragraph (5).

Paragraph (2) prescribes advertising procedure similar to that of title III in procurement. Slight changes were made to accommodate auction sales.

Paragraph (3) authorizes negotiation procedure, rather than public advertising procedure, in certain enumerated special disposal situations. The negotiation procedure must be conducted under regulations prescribed by the Administrator of General Services and must include as much competition as is feasible.

Subparagraph (A) of paragraph (3), like its counterpart in title III, will facilitate Government operations during a national emergency. Undue delay and publicity may be avoided and particular property transferred to a particular contractor for defense purposes. Use of this authority is restricted to particular lots of property and, for short periods of time, to categories or general classes of property. Under paragraph (6), a justification must be prepared when this authority is exercised. Declaration of a national emergency without other pertinent circumstances would not constitute a justification.

Subparagraph (B) provides obviously desirable facility to make disposals in a manner which will further the public health, safety, or national security. Drugs and military items can be steered away from illicit traffic; surplus property can be directed to contractors who will use the property for public protection.

Subparagraphs (C), (E), and (F) correspond to similar provisions in title III on procurement procedure. They represent a suitable open-market limitation and recognized exceptions to the requirement of public advertising made by section 3709, Revised Statutes.

Subparagraph (D) will enable steps to be taken in disposals to prevent dislocation of the national economy from disruptive impacts of disposals on an industry. The serious effect of such impacts on employment and investment was critically noted recently by the second Hoover Commission (Commission on Organization of the Executive Branch of the Government, Report to the Congress on Use and Disposal of Federal Surplus Property, April 18, 1955, pp. 50–51, 53–54).

Subparagraph (G) is limited to real property, and would permit negotiation where the character or condition of the property or unusual circumstances make it impractical publicly for competitive bids.

The public interest is substantially safeguarded by the requirement in this subparagraph that, in the exercise of the negotiation authority, there must be obtained the estimated fair market value of the property and other satisfactory terms of disposal. The subparagraph strengthens the position of the Government in making disposals of surplus realty where competitors may not be on an equal footing, as in the case of scrambled industrial facilities or in-place Government property on leased property. It also will permit the Government to reconvey property to former owners where the equities of the situation justify such action.

Subparagraph (H) authorizes the Administrator of General Services to provide for the negotiation of sales of surplus property at fair market value with State and local

governments subject to obtaining such competition as is feasible. Purchasing agents of some of these governments labor under legal handicaps in submitting public competitive bids for property. The subparagraph will improve the likelihood of such public bodies buying Federal surplus property.

Subparagraph (I) corresponds to a provision in title III. Among the other situations where negotiation is authorized by the act is in the disposal of contractor inventory under section 203 (f). Such authority continues unaffected by section 203 (e).

Paragraph (4) supplements Public Law 760, 83d Congress (68 Stat. 1051, approved August 31, 1954), which amended the Federal Property and Administrative Services Act of 1949 to provide for the payment of brokers' (and other) fees from the proceeds of disposal of surplus real property. Under this paragraph, realty brokers retained by this agency under contract will observe the usual commercial practices in disposing of realty and will give wide public notice of properties for sale or lease.

Paragraph (5) would expressly grant to the Administrator of General Services the authority to make negotiated sales of surplus personal property at fixed prices, either directly or through disposal contractors. Such authority is consonant with recommendation No. 17 of the second Hoover Commission (pp. 68 and 69 of its aforementioned report to Congress of April 18, 1955). The Commission was of the opinion that private distributors and disposal agents could profitably be used for selected classes of surplus commodities. We believe that authority to employ this method of disposal should be made crystal clear in the permanent disposal charter represented by the accompanying draft bill.

Paragraph (6) recites a requirement contained in the present section 203 (e). The other requirement of that section, submission of the explanatory statement to the appropriate committees of Congress, has been omitted as unnecessary in a permanent law detailing the situations in which either public advertising or negotiation may be followed.

Paragraph (7) like its counterpart in title III, is a technical provision which avoids confusion as to governing law.

The Hoover Commission in its recent report on surplus property recognized the desirability of suitable use of advertised and negotiated disposals and in its recommendations Nos. 12 (a), (c), 13, and 22 (b) urged improved advertising and award procedure and careful selection of the best methods of sale (report cited above, pp. 55–57, 85–86). The draft bill will help reach these goals.

The Commission also recognized that in a commercial-type activity such as surplus property disposal the consideration of maximum net return was significant but not exclusive (report cited above, p. 50). The draft bill reflects this point of view. It seeks economy and efficiency without sacrificing the public interest.

For these reasons, prompt and favorable consideration of the enclosed draft bill is recommended.

While GSA is convinced that enactment of the proposed legislation will insure more timely and orderly disposals of surplus property with some savings in operating costs, we cannot at this time offer any firm estimate of the amount of such savings.

The Bureau of the Budget has advised that it interposes no objection to the submission of this bill to the Congress.

Sincerely yours,

FRANKLIN G. FLOETE,
Administrator.

PROPOSED PROGRAM FOR COTTON

Mr. SYMINGTON. Mr. President, the time has come for a serious reevaluation of our farm programs. The Secretary of Agriculture, Mr. Benson, recently stated that our present farm legislation is not achieving the desired results; and also that he has no comprehensive alternative solution.

This statement by the Secretary has stimulated interest on the part of farmers, farm organizations, and interested agricultural leaders throughout the country.

Those who are concerned with the future of our agricultural economy have ideas, and are making proposals, for new and better legislation to deal with our farm problems.

The bill I am about to introduce goes to the heart of the problem. It would, if enacted, expand cotton markets by enabling cotton to be sold on a competitive basis, both in the domestic and foreign markets.

The position of American cotton, the world's leading textile fiber, has declined over the past 25 years. Foreign markets have been lost to the expanded production of other countries throughout the world.

Domestic consumption has not kept pace with the rapidly expanding production of synthetic fibers.

In recent years, the American cotton growers have witnessed a steady deterioration of their income. As acreage allotments and price supports have been reduced, cotton farmers have found it increasingly difficult to maintain a minimum income.

The United States textile industry has suffered from the competition of foreign manufacturers—in many cases competition encouraged by our pricing policies.

The consumer has borne a double cost—the tax cost of Government support and loan programs, plus higher prices for the finished cotton goods he purchased.

Normal trade channels have been affected by the events of the past 25 years.

These were the conditions that faced the leaders from all segments of the cotton industry as they began work on a sensible solution.

After considerable thought, study, and several industry-wide conferences, the representatives from each area of the industry agreed on the principles offered in this bill.

The main thesis of their proposal is to put cotton back in the market place—to sell it, not to store it. Other advantages have been outlined as follows:

A. Protect the farmer's income and permit him to use his land and equipment more efficiently.

B. Provide full price competition both at home and abroad.

C. Eliminate the need for a special export sales program.

D. Increase consumption and prevent accumulation of surpluses.

E. Return cotton handling and marketing to normal channels of trade.

F. Eliminate present conditions which create unfair competition for American cotton mills.

G. Benefit consumers through lower retail prices and wider choices of fabrics.

H. Reduce the cost to the Government.

I. Counteract inflationary trend in textile markets.

The stated objectives would be accomplished as follows:

First. The loan program would be continued, but the loan level would be slightly—probably 5 percent—under the world price for cotton as determined by the Secretary of Agriculture as of June 1 of the calendar year in which the cotton is produced.

Second. The national marketing quota would be estimated domestic consumption plus exports. Under this method the minimum national marketing quota for 1958 would be 14 million bales which would provide a national acreage allotment of 20½ million acres, or an increase of 17 percent over 1957. This method would insure continuation of acreage allotments and marketing quotas and provide protection against unregulated production.

Third. Producers taking advantage of increased cotton allotments would be excluded from the cotton acreage reserve provisions of the soil bank. State, county, and farm history would be preserved under this provision.

Fourth. Domestic allotment: Marketing equalization payments would be made to the producer through the cotton merchant to represent the difference between the average spot market price or loan price, whichever is higher, and a stated percentage—probably 90 percent—of parity.

Export allotment: There would be no marketing equalization payments.

Fifth. The program would be financed with unused funds available for cotton payments under the Soil Bank Act; and, insofar as such funds are insufficient, the Secretary of Agriculture would be authorized to use funds of the Commodity Credit Corporation.

I respectfully urge that this bill be given serious study—that it be analyzed and compared with the other proposals, as well as with the present program.

If we approach these problems with a receptive but critical mind, I am confident that a new and more successful farm program will result.

On behalf of myself and Senators MCCLELLAN, HENNINGS, and KEFAUVER, I introduce, for appropriate reference, a bill which merits the study and consideration of those searching for a more satisfactory solution to the problems facing the cotton industry.

Mr. President, I ask unanimous consent that the bill lie on the table for the remainder of this week, in case there be other Senators who wish to become cosponsors of it.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, will lie on the table, as requested by the Senator from Missouri.

The bill (S. 2226) to increase farm income and to expand markets for cotton by enabling cotton to be sold competitively in domestic and foreign markets, introduced by Mr. SYMINGTON (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

GOVERNMENT GUARANTEE OF PRIVATE LOANS TO CERTAIN AIR CARRIERS

Mr. MONRONEY. Mr. President, at the request of the Civil Aeronautics Board, I introduce, for appropriate reference, a bill to guarantee loans for local service and territorial airlines, which is aimed at improving air service to communities throughout the United States, Alaska, and Hawaii.

By making loans more readily available for new equipment that will provide more efficient and economical operation, it is hoped that savings will enable these airlines to go off subsidies that now are costing $30 million a year.

These carriers, that reach the smaller cities off the main trunk routes, are equipped mainly with DC-3's, the old workhorse that went into service in 1936. For speed, comfort, and seat-mile economy, replacements are urgently needed.

Loans for new planes are hard to negotiate. The CAB has asked authority to guarantee private loans not to exceed $5 million per company for the 13 local service airlines serving areas of the United States; for the 6 airlines operating within Alaska; and for the 2 within Hawaii.

The purpose, amount, and duration of the loans will be fully controlled by the Board. Under the bill, the Board cannot guarantee the loans if the carrier can obtain necessary funds on reasonable terms without them. Such loans also are limited to 90 percent of the aircraft cost, and must provide full repayment within 10 years.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 2229) to provide for Government guaranty of private loans to certain air carriers for purchase of aircraft and equipment, and for other purposes, introduced by Mr. MONRONEY, by request, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. HILL:

Address delivered by Senator NEUBERGER at annual Memorial Day ceremonies at Hyde Park, N. Y., in memory of Franklin D. Roosevelt, on May 30, 1957.

By Mr. HUMPHREY:

Address entitled "The Human Approach to Foreign Relations," delivered by him before the American Pharmaceutical Advertising Club luncheon, at the Waldorf-Astoria, in New York, on June 3, 1957.

By Mr. COOPER:

Commencement address delivered by Senator HILL at the University of Kentucky, Lexington, Ky., May 27, 1957.

By Mr. JACKSON:

Correspondence between himself and the Atomic Energy Commission relative to health and safety aspects of using the Columbia River as a coolant for the Hanford Atomic Works.

By Mr. YARBOROUGH:

Article entitled "Floods, Twisters Leave Impact on 9,000 Texans," published in the Austin (Tex.) American of June 1, 1957, dealing with the effects of floods and tornados in Texas.

By Mr. JAVITS:

Editorial entitled "Overloaded Court," published in the Washington Post and Times Herald of May 25, 1957.

DEDICATION OF NEW WISCONSIN FARM BUREAU FEDERATION BUILDING

Mr. WILEY. Mr. President, next Sunday, June 9, there will be dedicated a new State office building in the capital of my State for one of the great private organizations of America's dairyland—the Wisconsin Farm Bureau Federation.

The Farm Bureau and its affiliates are not only indispensable aids to the agricultural population of my State; they are among the foremost constructive forces in civil-minded leadership for the State as a whole.

I was pleased to note in last Sunday's—June 2—issue of the Wisconsin State Journal, a tabloid supplement exclusively devoted to the Farm Bureau in my State—to its history, its achievements, its personnel, its outlook. The supplement is inspiring reading.

The federation is grassroots democracy at work for the welfare of the rural citizen and his family and for the welfare of the State as a whole. I convey warmest greetings to the federation.

I ask unanimous consent that excerpts from the supplement be printed at this point in the body of the CONGRESSIONAL RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

JUNE 1, 1957.

To the People of Wisconsin:

The Wisconsin Farm Bureau Federation and affiliated companies on Sunday, June 9, will dedicate their new State office building in Madison.

Ten board of directors join me in inviting you to our open house, beginning at 10:30, and the dedication ceremonies at 2.

We are proud of our new building—as the State office for 32,000 members of the farm bureau, as a place to work, and as a worthy addition to the architecture of Madison.

Farm bureau and affiliates, Wisconsin Farmco Service Cooperative and Rural Insurance companies, employ 200 persons in Madison and an additional 225 throughout the State. The insurance companies are represented also by 100 general and special agents in 53 counties.

The annual payroll from Madison alone exceeds $1 million. This goes to local people, most of them living in Madison, working for a farm organization and yet part of the city and its economic life.

Our fine new building on a 5½-acre grounds at South Park Street and the Beltline incorporates the most modern features. It gives travelers from the south and those traveling the Beltline an impressive introduction to the Madison business community.

The cost of the building including fixtures, land, and landscaping, was near a million dollars. Practically all of it was contracted in Madison.

Farm bureau is a free, independent, nongovernmental, and voluntary organization of farm families, united for the purpose of analyzing their problems and formulating action to achieve educational improvement, economic opportunity, and social advancement.

The new farm bureau building symbolizes the accomplishment of our members, past and present, in giving agriculture in Wisconsin its position of respect and importance. The produce of our farms now exceeds $1 billion annually.

We are happy to see this new building take its place in the capital city, marking as it does the place of farm bureau in the life of Wisconsin.

CURTIS HATCH,
President.

THE WISCONSIN FARM BUREAU

DEDICATION

"Gifts of Soil," symbolizing the source of the Farm Bureau's strength, will be the theme of the dedication ceremonies for the Wisconsin Farm Bureau's new headquarters at 801 West Badger Road next Sunday.

Speakers and dignitaries present will each present a gift of soil from a part of Wisconsin or the United States. The soil samples will be mixed in a flowerbed in which will be grown, in flowers, the emblem of the Wisconsin Farm Bureau Federation.

The day's activities will begin at 10:30 a. m. with tours of the building. Members and visitors will be invited to picnic on the lawn. The Farm Bureau will provide free milk and cheese.

Vice President Arthur Murphy will be master of ceremonies for the dedication program at 2 p. m. Music will be furnished by the 4-H band from De Forest.

Lt. Gov. Warren P. Knowles will present gifts of soil from each of Wisconsin's 71 counties. Dean Rudolph K. Froker of the University of Wisconsin College of Agriculture will contribute soil from the campus and branch experiment stations.

Soil from each of the 48 States will come from George Scarseth, director of the American Farm Research Association. Many of the States will send earth from historic spots, such as Virginia's Jamestown.

Mrs. Harold Russell, Janesville, Farm Bureau Women's Committee chairman, will lead the presentation of gifts of soil from the most important places of all, Farm Bureau members' own farms.

President Curtis Hatch will accept the gifts on behalf of the entire Wisconsin membership, and will unveil the dedication plaque.

While the makeup of the Wisconsin Farm Bureau Federation has remained basically the same through its 37-year history, changes occur occasionally to fit changing conditions.

Historically the basic unit of Farm Bureau organization has been the township. Now, however, modern means of transportation and communication tend to minimize the importance of township lines. Consequently the Wisconsin Farm Bureau is turning to neighborhood councils as the means of building solidarity between neighbors. Six to 12 families constitute a neighborhood council.

When the time comes to elect members to the county Farm Bureau board, all the councils in the township, plus any unattached families, elect one representative from the township.

County boards meet monthly. Each county is represented at the annual State convention on the basis of membership. One voting delegate is allowed for the first 25 members in a county and one additional delegate for each 100 additional members.

County Farm Bureaus are autonomous units, true to the traditional concept of Farm Bureau rule coming from the bottom up, rather than from the top down.

Dues are $10 per family per year in all counties except Rock and Jefferson, where they are $15. The Wisconsin Farm Bureau receives $4.25 of each family's dues and in turn passes $1 on to the American Farm Bureau Federation.

The recruitment activities of the State federation, once handled by a lone man, are now conducted by Robert Davie, State director of organization, and seven fieldmen.

Heading the Wisconsin Farm Bureau Federation in 1957 with president Curtis Hatch are vice president Arthur Murphy, Route 4, Chilton, and secretary-treasurer William KasaKaitas, Madison.

FARM BUREAU YOUNG PEOPLE

An organization that does not provide for continuity of leadership is headed for certain disaster. The Wisconsin Farm Bureau Federation is insuring its future by sponsoring Farm Bureau Young People, dedicated to teaching rural youth better methods of farming, better citizenship, and better leadership.

Formed in 1948, Farm Bureau Young People numbered about 300 for several years. Under the leadership of James Mersberger, Farm Bureau fieldman for young people's activities, it spurted to a record membership of 860 in 1956.

The county and State Talk Meets are one of the ways FBYP prepares members for their future tasks of presenting their ideas clearly and forcefully to promote Farm Bureau programs.

To be eligible for the State Talk Meet, to be held during the State convention at La Crosse, November 10–13, each contestant must have participated in a local contest judged by a competent person. Contestants will be prepared to speak on three topics, and will choose one of them for a 5-minute speech.

The young person's responsibility to his home community is stressed in the 1957 community service contest.

County FBYP groups will keep records of their community betterment activities during the year to be used as the basis for the contest report, to be submitted by November 1.

Competing groups will choose from projects in the general categories of citizenship, health, community beautification, recreation leadership, and safety.

In 1956 over 140 young men from all parts of the world spent 10 to 11 months on American farms. Six came to Wisconsin. Seven more are spending 1957 in our State with FBYP members.

The Market Basket program gives FBYP members a clearer understanding of the value of Wisconsin's crops to the Nation while they take this information to the public.

WISCONSIN FARM BUREAU WOMEN

Wisconsin farm women realized early in the Farm Bureau movement that there was a place for them in the big job of improving farm living.

The town of Waukesha, in Waukesha County, produced the first ladies' auxiliary, in the State, and in the same year, 1921, a county auxiliary was formed. Leaders of the county group reported their progress to the 1922 annual convention, prompting recommendations that more women's groups be formed.

The State executive committee of the WFBF voted July 13, 1923, to call a meeting of county women leaders at Madison July 27.

Attending this pioneer gathering were Maud Spooner, Evansville; Lu Frankenkoff, Boscobel; Karolyn Napp, Fennimore; Mattie Grebel, Randolph; Blanche Neis, Juneau; Mrs. Harry Berger, Hales Corners;

Mrs. Rolland Stitles, Winslow, Ill.; Mrs. Myra Reinhart, Browntown; Mrs. John Ehler, New Glarus; Mrs. William Olson, Monroe; Mrs. John Bolger, Waterloo; Mrs. Shelby Divan, Browntown; Mrs. Raymond Metcalf and Mrs. Harlan Metcalf, Dodgeville.

Mrs. Berger was elected chairman and Mrs. R. W. Jenkyns, Fond du Lac, vice-chairman; Maud Spooner was elected secretary-treasurer.

* * * * *

Today over 30,000 women in 50 Wisconsin counties are taking part in a wide variety of projects of the Associated Women.

One of the most important of these is the good-health giant milk program designed to give Wisconsin schoolchildren in 19 counties a better understanding of the value of dairy products in their lives.

Statewide cooking contests sponsored by Farm Bureau women promote the use of Wisconsin dairy products in old and new ways. In 1954 and 1955 contestants baked custard pies; in 1956, cheesecake.

The Associated Women are well aware that farm women and urban women need to cooperate and to understand each other's needs and problems. To get them together, the organization held three town and country dinners this spring in Madison, Eau Claire, and Green Bay.

The name "Associated Women" was changed to "Farm Bureau Women's Committee" in 1954.

Associated Women of the Farm Bureau are also members of the Associated Country Women of the World.

GENERAL HISTORY

Wisconsin farmers in 1920 were in much the same situation they find themselves in today.

The wartime period of high production and high farm prices had given way to a period of surpluses and slumping prices. Commodity prices dropped, but the farmer's costs didn't, and the now-familiar cost-price squeeze was on.

Farmers in a few Wisconsin counties had heard about the new approach to farm organization, the farm bureaus that had sprung up in other parts of the United States. They watched the county units federate into State farm bureaus, and they saw the birth in 1919 of a union of bureaus, the American Farm Bureau Federation.

By early 1920 there was farm bureau sentiment in Rock, Fond du Lac, Waukesha, Jefferson, Walworth, Dodge Dane, Ozaukee, and Crawford Counties. Feeling the time had come for a State organization, their leaders called for a State organizational meeting in Waukesha May 27, 1920.

The temporary chairman of the meeting, George W. Hull, Whitewater, was elected president of the Wisconsin Farm Bureau Federation. S. A. Baird, Waukesha, was vice president; C. W. Keys, Fond du Lac, treasurer; and Charles Peterson, Rosendale, secretary.

After voting to affiliate with the American Farm Bureau Federation and adopting a tentative constitution, the meeting elected an executive committee. Members were Hugh Hemmingway, Janesville; Math Michels, Fond du Lac; Gavin McKerrow, Pewaukee; Paul Gavin, Walworth; Paul Burchard, Fort Atkinson; and William Coogan, Watertown.

The infant national federation to which these few Badger farmers had attached themselves was unique in its makeup. It developed, not in a mood of violent rebellion, as so many farm organizations had in the past, but in the spirit of self-help and mutual cooperation that bred the county-agent system.

The county-agent system developed first in the South just after the turn of the 20th century. Specialists who started out to beat a specific problem, the boll weevil, stayed to give general help and advice. Broome County, N. Y., had the North's first county agent in 1911. The Smith-Lever Act of 1913 made possible a nationwide system of agents on a firm financial basis.

Groups of farmers, organized to advise the county agents, began to call themselves farm bureaus. In some States they contributed money to the work.

* * * * *

This organization seeks to promote friendship between groups of women in all countries. It works for better conditions in rural homes in all countries. The pennies for friendship program finances the central office of the organization, triennial conferences of delegates from member organizations, and sends representatives of ACWW to United Nations meetings.

Mrs. Harold Russell, route 2, Janesville, is State chairman of the women's committee of the Farm Bureau since 1951. Mrs. A. J. Baumann, route 2, Cottage Grove, is vice chairman, and Mrs. Alfred Winkler, route 3, Montello, is secretary.

INSURANCE

Farm Bureau operates to help solve farmers' problems. The cost of insurance is a sizable item in the cost of operating a farm. Farm Bureau believes that the problems of farm insurance can best be met by farmer-owned and controlled insurance companies which will provide insurance fitted to farmer needs and operated on a participating basis.

The Farm Bureau Mutual Insurance Co. began operations June 1, 1935, as a casualty company insuring only Farm Bureau members.

Membership was low during the depressed 1930's, and the number of policies in force was correspondingly low. When L. F. Roherty became manager of the company in 1937 there were only 2,200 policyholders. Twenty years later he manages an operation serving 86,000 policyholders.

The growth of Farm Bureau membership during World War II and immediately afterward brought expansion opportunities to the insurance company. The Rural Mutual Fire Insurance Co. was organized in 1947 to provide fire, windstorm, and crop hail insurance.

In was also in 1947 that Farm Bureau Mutual Insurance Casualty Co. became Rural Mutual Casualty Insurance Co.

The next step was life insurance, authorized by voting delegates in June 1949. The Rural Security Life Insurance Co. began operations that year as a stock company, with stock sold to Farm Bureau members.

Later this stock was recalled and reissued to Rural Mutual Casualty, Rural Mutual Fire, and the Wisconsin Farm Bureau Federation. The life company now operates as a participating stock company, with dividends to stockholders limited to 5 percent and all other profits going to policyholders or surplus.

Casualty claim service is offered on a unique patrol system, which has done much to improve relations between the companies and the policyholders. Ten claims adjusters are constantly in the field, keeping regular schedules of office hours at county headquarters. Policyholders are thus given the promptest possible service.

Beginning July 1, 1957, the casualty and fire companies will be merged under the name of Rural Mutual Insurance Co. The change was authorized by policyholders at a meeting on March 12, and voted by the board of directors the same month.

The casualty company had total assets at the end of 1956 of $3,180,613. The fire company's assets were $555,806 and the life company's assets were $2,543,912.

The merged company will have a surplus of $1,300,000.

BUILDING

The house that farmers built shows Madison and its visitors in a dramatic way the growth and importance of the Wisconsin Farm Bureau Federation.

Located at 801 West Badger Road, near the intersection of South Park Street and the south beltline, the Farm Bureau's new home is becoming a landmark with its clean lines and its arresting two-tone exterior.

* * * * *

FARMCO

A group of farsighted Wisconsin farmers laid the foundation for a $15 million business, when, in 1933, they started buying cooperatively the feed, seed and fertilizer they needed to conduct their farming operations. These farmers, all members of the Wiscon-

sin Farm Bureau, banded together to form a State cooperative, now supplying products to 53 county member companies, with a total of 132 retail outlets in the State of Wisconsin.

The demand for service increased rapidly, so that by 1937 it was necessary to establish a separate company to fulfill the needs of county farm supply companies. Then, too, came the decision of the American Farm Bureau Federation that State federations should not be involved in commercial activities.

Farm Bureau members in Dane, Green, Rock, Sauk, Iowa, Jefferson, Waukesha and Wood counties, through their county cooperatives, founded the Wisconsin Cooperative Farm Supply Co. as a central purchasing and manufacturing agency. Howard Johnson was named the manager of the new company.

The first home of the farm supply cooperative was located in the State Farm Bureau headquarters, 744 Williamson Street—the present home of the R. E. Ela Co.

FERTILIZER MANUFACTURING STARTED

It was in the basement of this warehouse and office building that Farmco first manufactured fertilizer. An old cement mixer, crude elevator and shovels constituted the equipment for this early manufacturing operation.

With expanded operations came the need for enlarged State headquarters. In 1940 the Farm Supply Co. built an office building at 18 South Thornton Avenue, Madison, which served as a home for Farm Bureau and its affiliated companies. The front quarter of the building housed the federation offices and the insurance and supply companies. The State warehouse and feed manufacturing plant took up the rear three-quarters.

Green County Farm Bureau members were the first to get into the oil business by building bulk storage tanks and giving delivery service to Green County farmers. This service company was started in 1942 with Farm Bureau members in Stephenson County, Ill. Service companies in Dane, Rock, and Jefferson Counties were established soon afterward.

Wartime demands on Wisconsin soil made vast inroads on soil fertility. Farmers needed and wanted high analysis plant food, but it was difficult, if not impossible, for them to purchase it.

The fertilizers then most common were of a 2-12-6 (2 percent nitrogen, 12 percent phosphorus, 6 percent potash), or 0-14-7 grades. These analyses were not high enough to do the job that Farm Bureau members felt ought to be done. Besides, these commercial fertilizers contained from 400 to 600 pounds of useless sand per ton. This situation was soon rectified with the establishment of the Wisconsin Cooperative Farm Plant Foods in 1944. Farm Bureau members took only a few weeks to purchase an entire subscription of $500,000 worth of 6 percent preferred stock to establish the new company.

The first source of high analysis fertilizer, which later became an identification phrase for the new company, was the purchase of part ownership of a cooperatively owned manufacturing plant at Hartsdale, Ind.

Ray L. Pavlak was named general manager of the new Plant Food Co.

The fertilizer program grew so rapidly that within a year the plant foods company built its own manufacturing plant at Green Bay. A mixing plant at Prairie du Chien was added in 1946, and in 1948 a second plant was built for the conversion of rock phosphate to a form making the phosphorus readily available to the growing plant.

Further growth necessitated the erection of plants at Antigo in 1949, Whitewater in 1950, and more recently, Cameron and South Wayne.

In order to have a good supply of basic fertilizer ingredients, Wisconsin Cooperative Farm Plant Foods joined with other Midwestern cooperatives to form Central Farmers Fertilizer Co. in 1946. Three big new projects of this firm will keep Farmco abreast of new fertilizer developments.

One is a phosphate mine in Idaho. Another is an $18 million nitrogen plant put into operation at Lawrence, Kans., in 1956.

The third, a $16 million nitrogen plant of the St. Paul Ammonia Products Co. at St. Paul, Minn., has just begun operations.

Another important development was the addition of equipment at Whitewater, Prairie du Chien, and Green Bay for the manufacture of a granulated fertilizer rather than the pulverized form.

Granulated fertilizers are easier to handle, they are free from dust and more even application is possible because of the freedom from drift on windy days. In addition, the granulated product is homogeneous. Each particle contains the complete analysis.

Continued growth of both the Farm Supply Co. and the Plant Food Co. in the busy years after World War II made a new business organization desirable. The two companies were merged in 1953 to form Wisconsin Farmco Service Cooperative, with Ray L. Pavlak named as general manager by the board of directors.

Wisconsin dairymen found that the Farm Bureau Open Formula feed filled their demands for a quality dairy feed. Good livestock men want to know exactly what they are feeding their livestock and the policy of listing on the feed tag exactly what's in the bag was promoted to do just that.

THE NEED FOR EXPLORATION OF THE UNKNOWN

Mr. WILEY. Mr. President, yesterday, together with 5 Norwegian sailor lads who had crossed the ocean in a sailing ship, I stood before the painting, that hangs in the Senate Gallery, of an historic event in the history of the North American Continent. I refer to the painting of the discovery of America by Leif Ericson in the year 1000.

The reaching into the unknown, which Ericson's bold exploit symbolized, brought to mind a similar reaching into the unknown on Friday, May 31, when 22 other Senators and I introduced S. 2189, to establish an Antarctic Commission. This bill is designed to formulate comprehensive American plans for our future efforts in the Antarctic, as well as to capitalize fully on all the data based on previous expeditions there. In this atomic age, who can tell what the significance of this vast continent of snow and ice will be—I mean the great significance these 6 million square miles—largely unexplored so far—may have in terms of the future safety, welfare, and economic well-being of our own country.

As Leif Ericson stood in his open boat and saw the coast of America, little could he dream of the America that we know today. Are we not now in a similar position in this great exploratory age of the 20th century? We can little dream of what lies before us. But we do know that man is reaching upward toward the stars and into the hidden forces of nature.

I have suggested that the Antarctic Commission be called the Richard E. Byrd Antarctic Commission, in honor of the great American who recently passed on—the brother of the distinguished senior Senator from Virginia [Mr. BYRD].

Admiral Byrd worked his heart out, almost worked his life away at the pole because he was a dedicated servant of the Republic. He, too, had the Viking spirit, reaching out for more knowledge, more light concerning this hidden continent.

Certainly, as anyone looks around today and recognizes the tremendous searching man is undertaking in every direction, he cannot help but realize that we have no alternative but to continue moving ahead in the Antarctic.

With outposts of the Kremlin already present in the Antarctic, in connection with the International Geophysical Year, we can hardly afford to do anything less than make our own most significant effort.

The International Geophysical Year, which commences on July 1, is a mighty world undertaking, involving the cooperation of 61 nations. In the Antarctic, in the Arctic, as elsewhere, the scientists of the world are assembling data to unlock the secrets of nature.

In Antarctica, we as a nation have established seven outposts. One of them is directly at the South Pole. At the opposite end of the globe, in the Arctic, the United States is establishing 58 stations. Nineteen of them are in cooperation with our good neighbor Canada.

Long after the International Geophysical Year will have concluded in December 1959, we must continue this exploration process. We must have a permanent Antarctic Commission. We must have, as a matter of fact, a permanent airfield in Antarctica.

Not long ago Admiral Byrd's worthy successor, Adm. George Dufek, was in my office. I asked him then about the possibility of establishing a permanent airfield, and he described how it could be done. It would be a costly project; yet it would have benefits in terms of commercial aviation for ourselves and for the Free World, and in terms of defense, whose value would be almost incalculable.

We need to compile more facts about aviation across the Antarctic route and about aviation over the Arctic and the North Pole—over the roof of the world, as well.

We need to have American airlines pioneer these routes, and we need to have the American Government encourage the Viking spirit in this and in many other ways.

Why? Not simply because of the material values to which I have already referred. Not simply because of passenger traffic, and commercial freight, and the scores of different minerals, such as manganese, which have already been discovered in the Antarctic, but because there are intangible values there, as well. I am thinking of these other horizons, far beyond the material. I am thinking in terms of the overall role which freemen must play if the human race is to advance.

Mr. President, we have but touched the surface of its knowledge that lies ahead.

I should like to recall the words of the poet Browning, who said:

That life has meaning, and to find its meaning is my meat and drink.

This Nation has become not only the leading nation of our day, but also the reservoir, or we might call it the treasury or safety deposit vault, of man's accomplishments in all the thousands of years which have gone before. We are the custodian of the highest achievements in the realm of the spiritual. We cannot sleep. We cannot stand still. We must go up and onward.

So it is my hope that the proposal to establish an Antarctic Commission, whose purposes I described in the CONGRESSIONAL RECORD, beginning on page 8130, and earlier on page 7499, will be acted upon favorably.

As an indication of man's overall search into the unknown, I send to the desk the text of an article which was published in the Monday, June 3, issue of the New York Times. The article describes the 61-nation effort for the International Geophysical Year. I ask unanimous consent that it be printed at this point in the body of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GEOPHYSICAL YEAR STATIONS TO HOLD TESTS THIS WEEK—PREPARATIONS FOR STUDIES STARTING JULY 1 ARE NEARLY COMPLETE, WITH NO SERIOUS SETBACKS—SIXTY-ONE NATIONS TAKING PART

(By Walter Sullivan)

Scientists the world over have almost completed preparations for giving their planet its first full-scale physical examination.

The examination will begin July 1 and continue for 18 months. Known as the International Geophysical Year, or IGY, it involves simultaneous observations of the earth and its environment by scientists at stations scattered from Tomsk to Tuckahoe, from the North Pole to the South Pole.

Reports from New York Times' correspondents in many capitals indicate that the mobilization of men and instruments for this project has been carried out without serious setbacks.

Test runs will start this week at many of the 2,500 or more observing stations.

A large part of the work is being done by the United States and the Soviet Union.

Nevertheless 61 nations have formed national committees to supervise studies within their own borders.

This, in the words of Lloyd V. Berkner, president of the International Council of Scientific Unions, is to be "the greatest cooperative venture in science the world has ever known."

It is, he adds, "a peaceful effort, which I believe is of particular importance in these troubled times, and which promises immeasurable benefits to all."

Dr. Berkner is president of Associated Universities, Inc., of New York.

Prof. Ivan Bardin, chairman of the committee conducting the Soviet program, terms the IGY "the outstanding scientific event of the 20th century."

The studies will be in sciences that are heavily dependent on synoptic observations—those made of many points at the same time.

The most obvious of these is meteorology, the science of weather, but geophysics also embraces those fields of science concerned with oceans, glaciers, and such interrelated phenomena as cosmic rays, the earth's magnetism, aurora, and sunspots.

Headquarters for this effort by about 8,000 scientists and technicians is a suite of offices in the Belgian observatory at Uccle, a wooded suburb of Brussels.

It is staffed by an overworked team of 15 men and women, led by Dr. Marcel Nicolet, an expert on matters of the upper atmosphere.

His office serves primarily as a clearing-house for information and an organizer of conferences. Each country plans its own program. The work in each scientific field has been coordinated at a series of international meetings.

During the last few months numerous new devices have been mounted to enable scientists to look through many windows at this planet and the space through which it is flying.

Among these are new types of radio telescopes, cosmic ray telescopes, and highly sensitive instruments that can detect infinitesimal changes in the force of gravity.

EARTH TIDES STUDIED

The latter are already being used to study earth tides that lift and lower great cities [illegible] New York. The Russians estimate that Moscow rises and falls 20 inches a day.

The most revolutionary of the new research devices are the earth satellites being prepared in both the United States and the Soviet.

If these can be placed in orbits around the earth, man will have achieved a major step toward space travel, not through a weapons race but through what many regard as a contest in scientific and technical know-how.

The United States had hoped to fire its first satellite into the sky this September. But now, because of various difficulties, the first earnest try is not expected until spring.

American technicians feel they have somewhat of a headstart on the Russians in the prior possession of the Viking, a rocket similar in many respects to the one necessary to lift a satellite outside the earth's atmosphere.

SOVIET EFFORT EXPECTED

Nevertheless, it is felt that Moscow, mindful of the prestige to be gained by beating the United States into outer space, is making an all-out effort to do so.

The Soviet Union anounced Saturday that it had created the rockets and all the instruments and equipment necessary to solve the problems of the artificial earth satellite.

No date was given for the first launching.

The United States satellite program has been slowed—but not stopped—by a succession of technical problems in producing the three rockets, which, when assembled into a single vehicle, will carry the artificial moon into its orbit.

A fully instrumented satellite already has been produced by the United States. It weighs only 21½ pounds, whereas the vehicle necessary to carry it aloft weighs 20,000 pounds.

There have been some difficulties with the engine for the first-stage rocket, which must lift the vehicle 40 miles in 2 minutes to a speed of more than 3,000 miles an hour.

SECOND-STAGE ENGINE READY

The engine for the second-stage rocket has been accepted and two competing rockets for use on the third stage are being tested.

Even if the satellite vehicle is ready before next spring, the cameras that are to photograph it will not all be installed. Twelve such cameras are to be set up at widely scattered points from Peru to India.

These telescopic cameras will be able to photograph the 20-inch spheres against a backdrop of stars even when the satellites are 1,000 miles away and flying at 18,000 miles an hour.

The resulting pictures should furnish sufficient data on the satellite's orbit to reveal to what extent the earth is flattened at the poles.

The 12 cameras necessary to insure that the flight path is recorded will not be in operation until next April.

SCIENTISTS FACE PROBLEMS

The problems that have confronted scientists preparing for the IGY have varied according to local conditions in various parts of the world.

Shipment of intricate instruments to some Latin-American countries has become bogged down in customs regulations.

Preliminary firings of IGY rockets into the sky 158 miles above Hudson Bay have been troubled by radio transmissions from Canadian taxis.

These upset recording instruments in the rockets. The solution, it was found, was to fire the rockets on Sundays, when most taxis were idle.

An international fleet has been organized to study the world's oceans and in particular the movement of deep chilly waters that are believed to have long-range effects on our weather.

About 140 special oceanographic vessels have been recruited for this concerted effort.

Reports from various nations of their preparations for the IGY follow:

UNITED STATES

The National Committee for the IGY reported to Congress on May 1 that the worldwide United States effort would be essentially in complete operation by the start of the year.

The greatest achievement to date has been the establishment of seven outposts in Antarctica, one of them directly at the South Pole.

This had to be set up entirely by air, as distances and mountains girdling the Polar Plateau ruled out the use of tractor trains.

The Pole Station was flown in through a joint effort of the Navy and Air Force.

One of the other six stations, at Cape Hallett, is manned jointly by Americans and New Zealanders. Scientific observations at all these points are already underway.

In the Arctic, at the opposite end of the globe, the United States is establishing 58 stations, 19 of them in cooperation with Canada.

The most northerly are two camps set up by airlift on drifting ice. About 400 locations are involved in the United States effort, many of them on lonely islands some of which have never been inhabited.

Jarvis Island, for example, is a rock in the Pacific about 2 miles long and 15 feet high.

United States furnishes instruments

To aid less developed nations the United States is sending instruments and technicians to outposts throughout the world. Seismographs, to measure earth tremors, are going to Lwiro in the Belgian Congo; Poona, India; Huancayo, Peru; Uppsala, Sweden; Hong Kong and Fiji, as well as a number of points closer to home.

In most cases the delicate instruments have been delivered and installed without difficulty.

About 2,100 packages of weather-observing materials weighing more than 125 tons were delivered to the American outposts in Antarctica with little damage.

An exception was the parachuting of radiosondes to the camp at Byrd Station in Marie Byrd Land.

So many of these instruments, used to broadcast weather information from high-flying balloons, were broken that upper-air observations, scheduled for twice daily, can only be made once a day.

SOVIET UNION

Soviet reports state that 100 scientific institutions in the Soviet Union are taking

part in preparations for the IGY, with thousands of scientists and technicians involved.

An additional 292 weather stations have been set up to supplement the network of several thousand regular stations.

In the Arctic, the Soviet Union has established about 100 outposts for scientific studies, including 3 drifting stations on the ice of the Arctic Ocean. Last week the Soviet press reported that aircraft had set up 14 automatic weather stations in the Arctic as well as 11 radiobeacons.

The latter, placed on ice floes, would facilitate study of current in the Arctic Ocean. One automatic weather station was placed at the North Pole.

The Soviet Union has 4 or 5 stations manned in the Antarctic.

However, the Russians will be unable to set up bases at their assigned locations in the hinterland until next October or November.

The points allocated to the Soviet Union are the Magnetic Pole and the pole of Inaccessibility. The latter is the point farthest from the sea.

Flights to the Pole of Inaccessibility last year revealed that it was about 14,000 feet above sea level. This apparently has prevented the Russians from establishing their base by airlift. Rarefied air at that elevation makes it difficult if not impossible for aircraft to take off.

Soviet oceanographic ships will operate in both the Atlantic and Pacific. A nonmagnetic ship, the *Zarya*, made of wood and nonmagnetic metals, is scheduled to make a 50,000-mile cruise.

BRITAIN

Stations have been activated throughout the British Commonwealth. Forty have been set up in the British Isles and thirty elsewhere. Seven research ships will take part in the program.

About £500,000 has been allocated by the government, half of it for the Royal Society station at Halley Bay in the Antarctic and the rest for other IGY projects. This is equivalent to about $1,400,000.

In addition, stations operated by the Colonial Office in Antarctica will conduct observations in a number of sciences.

One of the chief scientific efforts in Britain is the construction of a gigantic radio telescope at Jodrell Bank in Cheshire. Due to delays it will probably not be in operation until August.

FRANCE

France's chief effort is its expedition to Adélie Land, Antarctica. A coastal base, manned by 23 men, has been established at Point Geologie. Another outpost 200 miles inland toward the South Pole is manned by 3 men.

Other expeditions have been sent to the heart of the Sahara in French Equatorial Africa; to Tahiti, and to Kerguelen Island in subantarctic waters.

The chief difficulty of the French has been financial. Constant inflation has squeezed the IGY budget and this may prove a limiting factor to the program.

OTHER COUNTRIES

Reports from other capitals tell of widespread preparations. Expeditions have been established in Antarctica by a number of smaller nations.

Communist China, a comparative latecomer to the program, is to have 35 participating stations.

A number of international expeditions are being organized. One, formed jointly by France, Denmark, Switzerland, and West Germany, will study the Greenland icecap.

A Swiss-Finnish-Swedish expedition will be based at Murchison Bay, Spitzbergen, and will study the peculiarities of radio transmission in the polar regions.

TRIBUTE TO ARTHUR GODFREY

Mr. JOHNSON of Texas. Mr. President, there are four airmen who may owe their lives to a generous act performed by the well-known television and radio personality, Arthur Godfrey.

These airmen, flying from Yuma, Ariz., to Houston, Tex., encountered bad weather. They would have been forced into a crash landing if they had not spotted the lighted runways of the Gillespie County airport near Fredericksburg, Tex.

Those runways were lighted only through the generosity of Godfrey. More than a year ago, he flew down to Texas and—when landing at Fredericksburg—noticed that the airport had no lights. He promptly donated a set to the county authorities, and they have been a boon to the people of the county ever since.

On behalf of the citizens of the county, I wish to express deep thanks to Mr. Godfrey for his generosity. I ask unanimous consent that the article in the Fredericksburg Standard describing the plight of the four airmen be printed in the RECORD as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AIR CORPS MEN MAKE EMERGENCY LANDING HERE

Page Arthur Godfrey and tell him the landing-field lights he gave to the Gillespie County Airport probably saved the lives of four Air Corps men during the past week.

During last Friday night's turbulent weather, four United States Air Corps men, stationed at Yuma, Ariz., made a landing at the Gillespie Airport while en route to Houston, Tex.

The men told Fredericksburg Mayor Wm. Schroeder they were in desperate circumstances and undoubtedly would have had to crash-land if they hadn't spotted the lighted runway of the Gillespie Airport.

The men had left Yuma that afternoon and battled storms all the way across west Texas at a time when more tornadoes than planes were in the sky. Matters were made worse because there was so much static their radio was practically useless.

They arrived over Fredericksburg at 9:30 p. m. in their twin-engined plane and after circling the area spotted the lights on the field.

They made a good landing but their landing gear was damaged when they came down and the plane is still at the airport awaiting the arrival of Air Corps mechanics to put it back into flying condition.

As it was, the plane received only minor damages. It could have been much worse.

The landing-field lights, that have been a boon to fliers in this area for over a year now were donated to Fredericksburg by Arthur Godfrey, the famed TV and radio entertainer, who flew his own plane here a year ago last fall to visit his friend, Senator LYNDON JOHNSON.

He noted there were no lights on the field so he donated a set that were installed by city and county crews.

Godfrey, incidentally, is pictured on this week's cover of Look magazine, and is the author of an article entitled, "Plane Talk," that appears in the magazine.

BASIC CONSERVATION ISSUES FACING THE NATION

Mr. NEUBERGER. Mr. President, in his conservation column in the New York Times for June 2, 1957, Mr. John B. Oakes has stated succinctly the issues at the core of three major problems affecting our human resources and our natural resources.

To begin with, Mr. Oakes has noted that the indiscriminate use of insecticides and pesticide solutions has sometimes resulted in as much harm as good, under certain conditions. Nature's delicate balance is upset.

Second, the conservation editor of the New York Times has emphasized once again the stake in protection of roadside beauty which belongs to the American motorists who soon will be spending $33 billion for a new network of interstate highways. Mr. Oakes strongly favors legislation such as my bill S. 963, to keep our roads from being defaced and scarred by a picket fence of billboards.

Third, Mr. Oakes has stressed the reasons why the proposed Bruces Eddy Dam, on the North Fork of the Clearwater River, in Idaho, will endanger migratory fisheries, priceless elk herds, and wilderness values. This dam, already unfortunately authorized by the Senate on a contingent basis, can yet be eliminated from the omnibus public works bill in the House of Representatives.

I ask unanimous consent that the article by John B. Oakes, conservation editor of the New York Times, appear in the body of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CONSERVATION: NATURE'S BALANCE—GYPSY MOTH FIGHT RAISES VARIETY OF PROBLEMS OF CONTROL

(By John B. Oakes)

The danger and folly of introducing animal or insect species from the environment where they are controlled by their natural enemies to another where there is no such control is once again illustrated by the current $5 million spraying campaign against the gypsy moth. This insect pest, which has defoliated millions of trees in New England and other parts of the Northeast, was deliberately brought to the United States from France less than a century ago for the purpose of cross-breeding with silkworms in order to improve silk production, an experiment that not only failed but led to tremendous damage to American woodlands.

The hazard of artificial introduction of new species from one area to another is never-ending, and its consequences may ripple outward for years and generations. The introduction of the rabbit to Australia is of course the classic example; but, as has been previously pointed out in this space, the demand, and the danger, keep right on irrespective of the horrible examples of the past. For instance, in recent years we have seen pressure from sportsmen in some areas of the United States to introduce artificially the San Juan rabbit for hunting purposes. When man thus begins to play around with the delicate balance that nature has established through the eons, he is inviting disaster, but he never seems to learn.

CAUSE OF UPROAR

The spread of the gypsy moth in a westerly and southerly direction from New England is the basic cause of the present uproar over the Department of Agriculture's control methods. In an effort to stop the advance of this destructive insect, the Department has embarked this year on an aerial DDT-spraying campaign to cover some 3 million acres in a wide arc from central New York

through eastern Pennsylvania and northern New Jersey, out to Long Island.

A concentration of 1 pound of DDT per acre is being used which is generally considered to be relatively harmless to animal and bird life so far as its direct effect is concerned, but which is and has been damaging to fish and of course to many varieties of insects, including beneficial ones. That is the major difficulty: When any kind of poison is used on a wholesale basis, it is more likely than not to destroy both the specific species against which it is aimed and also various other species that may be of great value.

In the present case, there can be little doubt that some of the insects and parasites that have developed a taste for the gypsy moth over the years are being wiped out along with the moth itself, thus reducing whatever natural control there now exists against this particular pest.

FISH DESTRUCTION

Furthermore, the indiscriminate spraying of 3 million acres of the Northeast has already led to reports of considerable fish destruction, not to mention the potential health danger to humans which many medical authorities believe to be a very real possibility. The fact is that not enough is yet known about the long-range effects of wholesale chemical poisoning to warrant its use on such a widespread scale. And one of the greatest problems is the psychological one. As one expert of the Fish and Wildlife Service pointed out in a study of insecticides some years ago: "Human nature being what it is * * * there is frequent philosophizing that 'if a little is good, more should be better.' Such a doubling up of dosage (above the 1-pound-per-acre concentration) to insure a good kill has resulted in unfortunate and unnecessary losses to wildlife."

DAMAGE MAY BE HEAVY

Even this dosage may be doing right now much more damage than the Department of Agriculture is willing to admit. Certainly many individual property owners whose lands have been sprayed are reporting the death of countless fish and even birds.

Dr. Robert Cushman Murphy, one of the world's great authorities on birdlife, has been a leader in the as yet unsuccessful court fight on Long Island against the Department's program. Dr. Murphy points out that in addition to destroying the gypsy moth's natural enemies, DDT-spraying may well lead simply to the process known as "trading one pest for another," i. e., to an outbreak—such as has occurred before—of a different kind of insect pest once the gypsy moth has been reduced.

He notes that protests from the Fish and Wildlife Service have led to exclusion of eastern Long Island salt marshes from the spraying program, but "private landowners appear to share no such rights or privileges." One of the basic complaints against the way the program is being carried out is that property owners were not notified and that aerial spraying—as distinct from ground-spraying—is done on an indiscriminating basis.

The Fish and Wildlife Service, which has reportedly approved the present program, favors a pending bill introduced by Representative METCALF, of Montana, providing a comprehensive study of the effect of pesticides. Ross L. Leffler, Assistant Secretary of the Interior, notes that "pesticide programs have gone ahead without adequate information on the effects which the pesticides have on fish and wildlife resources." Some insecticides are being used, he says, at "10 times" the strength which can be tolerated by wildlife, with the resultant death of thousands of birds and fish.

RECREATION RESOURCES

Important support for the proposal to establish a commission to study the future needs and the lands still available for outdoor recreational purposes, and to make recommendations for their preservation and use, has come from the Department of the Interior. Under Secretary Hatfield Chilson has placed the Department on record in favor of the projected National Outdoor Recreation Resources Review Commission, the aims and objectives of which were discussed in this space last month. Observing that "in recent years * * * there has developed more and more an appreciation of the natural and scenic beauty, and the wilderness areas that are a part of our national heritage," the Department suggests that recognition of this phase of outdoor recreation and appreciation be set forth with more emphasis.

The Department's endorsement of the recreation resources review is commendable; but it should not be allowed to head off the parallel drive of many independent conservation agencies for the proposed wilderness preservation bill (S. 1176) which would give a firm legal basis—now—to the present wilderness system that exists largely only under administrative fiat. Both measures are desirable. The resources review to learn exactly what our future needs will be and to draw up plans to meet them; and the wilderness bill to nail down the relatively small amount of unspoiled natural areas that we have left. It is to the second—and more immediately important—of these two measures that typically bureaucratic objections have been raised within some of the Federal agencies committed to conservation of our natural resources.

BILLBOARDS

Time is growing short for Congressional action on a billboard control measure for the new Federal Highway System. The problem is simple: Is the billboard lobby sufficiently powerful to prevent any effective Federal prohibition of nauseous advertising signs lining the 41,000 miles of interstate roads now being constructed almost entirely with Federal funds?

Senator NEUBERGER, of Oregon, has proposed that the Federal Government be empowered to buy up advertising rights along the highways; the Department of Commerce—presumably acting for the administration through President Eisenhower's support for this measure has been less than lukewarm—has suggested withholding a small part of Federal funds from the States that do not agree to prescribe billboard restrictions. A third proposal, offered by Federal Highway Administrator Bertram D. Tallamy, would give the States a small bonus for complying with the Government's proposed billboard-control standards. This idea has already been approved by a Senate subcommittee.

At least 2 of these 3 proposals offer a complete answer to the shopworn argument about States rights that was first raised by former Senator George of Georgia in this connection. States rights is, of course, not the real issue; the real issue is whether the people of the United States have the power and the will to keep highways that they themselves pay for clean and clear, so that they can look at the countryside they are passing through and not become a captive audience even out on the so-called open road.

BRUCES EDDY

The $1.5 billion omnibus rivers and harbor bill was vetoed last year by President Eisenhower. A similar bill was passed this year by the Senate, is now in the House and contains a number of pork-barrel projects that have not even been fully reviewed by the competent authorities. But the one among them that has aroused most bitter opposition of conservationists is the proposed Bruces Eddy Dam on the North Fork of the Clearwater River in Idaho, a $177 million project that if undertaken may do irreparable damage to the fish and wildlife resources of the Northwest. Even if this dam is excluded from the House bill, it can still be restored in conference. The only sure means of defeating this proposal again is through Presidential veto of the entire measure.

COMPREHENSIVE RESOURCES DEVELOPMENT

Mr. CHURCH. Mr. President, comprehensive resource development is national policy, spelled out by Congress many times. It was enunciated by Theodore Roosevelt in 1908, when he said:

> Every stream should be used to its utmost. No stream can be so used unless such use is planned in advance. When such plans are made, we shall find that, instead of interfering, one use can often be made to assist another. Each river system, from its headwaters in the forest to its mouth on the coast, is a single unit and should be treated as such (S. Doc. 325, 60th Cong., 1st sess.).

There is no partisan flavor in the roster of great United States Senators identified with the fight for these principles—Senators identified with the fight for these principles: Senator Newlands, of Nevada; Hiram Johnson, of California; George W. Norris, of Nebraska; the elder La Follette, of Wisconsin; Charles McNary, of Oregon, and William Borah, of my own State.

Consequently, when my colleagues from the Northwest and I wrote to the President about the present chaos in the administration in river development and control issues, we did so in keeping with a national tradition, not a partisan tradition.

Mr. President, the White House reply to our letter has been printed in the RECORD. That reply is evidence of a policy of comprehensive confusion. I can do no better, in commenting upon it, than to have printed in the RECORD the Lewiston (Idaho) Tribune editorial of May 29, and I ask unanimous consent that that be done.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE SENATORS HIT THE JACKPOT

A surprising letter from the White House made public yesterday by Senator FRANK CHURCH, Democrat, of Idaho, represents a major strategic triumph for the 7 Democratic Senators from the 4 Pacific Northwest States.

"The President has asked me,' wrote Jack Z. Anderson, White House administrative assistant, "to send you this further reply to your May 8 letter cosigned by six of your western colleagues. After careful consideration of your request for a conference on water-resources development in the Columbia Basin, the President asked me to say that he believes such a meeting would be premature at this time"

The rest of the letter took issue with the Senators' contention that administration river-resources policies in the Northwest were chaotic. The arguments and examples used by the White House, however, were like political manna from heaven for the Democrats. Using those arguments and examples, the seven Northwest Senators should have little difficulty in translating the White House's premature to mean: So far we have just barely wrecked the Democrats' comprehensive river-development plan in the Northwest. Obviously it would be premature to expect us to have fashioned another one.

The worst of it was, from the Eisenhower administration's point of view, that the considerable ignorance of problems and pitfalls

displayed in the letter could not be blamed upon one agency or another of the several which have adopted conflicting approaches to this region's river problems. This time the letter came from the White House itself. It becomes rather difficult for any agency of Government to overrule the White House after the White House has voiced policy in public.

Nevertheless, some adjustments certainly will have to be made. The contradictions in the Eisenhower administration's recent Northwest river-development plans and studies might be excused or even ignored as long as they were bandied about intermittently by various agencies. They are bound to attract public attention, however, when they are proclaimed as virtues by the White House itself.

It was obvious that the seven Democratic Senators from the Northwest had devised a masterful stroke of politics when they dispatched their letter to the White House May 8 asking for a conference with the President on the region's river problems.

They wrote, in part:

"Although the Federal Power Commission has licensed a private company to build three dams in Hells Canyon, the Department of the Interior has proposed a high-storage dam which would flood out one and possibly two of these units. The staff of the FPC has recommended construction of another project which would be impossible to construct if the Interior Department proposal were approved. A third agency, the Corps of Engineers, has disclosed plans for a complete restudy of the Middle Snake River, including the Hells Canyon section. The inconsistency and irreconcilability of these conflicting proposals is evident."

Even if they never expected to hit the jackpot in getting a reply, Senators MAGNUSON, JACKSON, MORSE, NEUBERGER, MANSFIELD, MURRAY, and CHURCH must have glowed when they posted this letter. All they asked for was a conference—so the President could not very gracefully refuse it. But they made the proposal at the time when the administration was knee deep in river plan contradictions—so he could not very well grant the audience requested either. The only question was how he would wiggle out of a difficult situation.

Probably the Senators had no idea that the White House would plunge recklessly into the trap they had baited. But the White House most certainly did.

After three paragraphs of attempted justification of the Hells Canyon giveaway by the FPC, the White House letter continued:

"With respect to your comments concerning the 'objectives and means of implementing a full and comprehensive program for use of Columbia Basin resources,' the Corps of Engineers is reviewing its original 308 report on the Columbia Basin. The proposed project for Glacier View has, apparently, been rejected. The corps now plans, I am informed, to consider recommending construction of the project with 5 million acre-feet of storage at the Libby Dam site, instead of 4,250,000 as originally proposed. * * *"

Can it be that the White House does not know that the administration's feverish effort to build Libby Dam has been completely stymied by disagreements with Canada over backing water onto Canadian soil? Is it possible that the White House is unaware of how former Secretary of the Interior Douglas McKay was hooted in the Northwest for proclaiming that he was going to build Libby instead of Hells Canyon—when Libby already had been stalemated by the failure of former Gov. Len B. Jordan, of Idaho, to complete a deal with Canada? The letter would seem to suggest, at least, that the White House does not regard talk of Libby Dam as a political liability—even after all these years of failure to produce a start on it.

"In addition," the letter continued, "the Bruces Eddy and Penny Cliffs projects on the Clearwater are now under consideration by the Corps of Engineers. These projects would add 3,700,000 acre-feet for flood-control purposes. The Department of Interior is cooperating with the Corps of Engineers in the latter's general restudy of this basin."

At the very moment that Bruces Eddy authorization was under fire from wildlife interests in Congress, the White House muddied the waters by linking Bruces Eddy with the much more controversial and thoroughly sidetracked Penny Cliffs Dam on the Middle Fork of the Clearwater River.

This newspaper, for example, increasingly favors the construction of Bruces Eddy Dam as the evidence mounts that the prophecies of damage to wildlife were grossly exaggerated. We support authorization of the project now so that planning can proceed along with wildlife studies. We would favor construction only if construction were justified when the facts were in.

Objections to Penny Cliffs Dam from wildlife interests, however, seem to us to be much more valid than the objections to Bruces Eddy. The threat of Penny Cliffs to a primitive area and to the present Lewis & Clark Highway route was enough in this area to sidetrack the project for future consideration. The White House did its Bruces Eddy plans no good by its introduction of the Penny Cliffs issue again. This section of the letter certainly should have been reviewed by someone who understands the regional circumstances. From the Democratic Senators' point of view, however, the reference to Penny Cliffs was simply grease on the griddle already heated for the administration.

"Furthermore," the letter continued, "the Department of Interior is making a detailed study preparatory to a final feasibility report on the Pleasant Valley project. The detailed analysis of this project is complementary to the study being made by the Corps. Interior's role involves the complete evaluation of all facets of the proposed projects, including the effect upon the fisheries resources on the Columbia in the event the Nez Perce Dam were to be constructed."

And now observe how the excuses and alibis of the FPC's Hells Canyon decision become the binding principles which must be observed in later decisions:

"In this connection, I understand that an FPC staff study indicates the desirability of construction of a dam at the Nez Perce site because the Salmon River, which the FPC found in the Idaho Power Co. opinion to be one of the two principal flood-producing streams in the Snake River Basin, is presently unregulated."

There, indeed, would be the supreme irony—if the FPC recommended the fantastic and visionary Nez Perce dam to be consistent with the excuses it issued in what the White House so truly calls the Idaho Power Co. opinion.

"You may be sure," the letter concluded, "that this administration has been and will be insistent that all developments of our water resources shall conform to the principle of comprehensive development for the best and wisest use of river basin resources."

Hear. Hear. The White House itself is proclaiming this goal and is spelling it out in terms of acre-feet of water storage. That has always been the key to comprehensive development in the Northwest, vigorously though the FPC ignored or denied that fact. And here the White House is making a public pledge, in effect, that the great error of Hells Canyon will not be repeated, citing embarrassing and conflicting case after case to tie its own hands in the future.

The Democratic Senators, it seems from this distance, really hit the jackpot. It will be most difficult now for the administration to overrule the White House in western water policies.

Mr. CHURCH. Mr. President, I have a footnote on this confusion I wish also to have appear in the RECORD. The White House letter of May 25 referred to a detailed study of the feasibility of a high Pleasant Valley project on the Middle Snake as in progress.

The White House, it now appears, was in ignorance of the facts. Yesterday I received a letter from Commissioner of Reclamation Dexheimer advising me that on May 7, 2 weeks earlier than the White House letter, all investigation activities on the Middle Snake had been suspended, and they are still suspended.

Mr. President, I ask that my letter to Mr. Dexheimer and his reply be printed in the RECORD at this point:

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

MAY 24, 1957.

Hon. W. A. DEXHEIMER,
Commissioner, Bureau of Reclamation, Department of the Interior, Washington, D. C.

DEAR MR. DEXHEIMER: On May 23, Congressman MILLER of Nebraska inserted into the CONGRESSIONAL RECORD your remarks at Portland on April 27. In that talk, you made reference to the reexamination of the middle Snake being conducted by your Bureau.

Will you please advise me whether this study is still proceeding and, if it is, when it will be completed? If it has been terminated, I would appreciate being advised of the circumstances of the termination.

Sincerely,

FRANK CHURCH,
United States Senator.

UNITED STATES
DEPARTMENT OF THE INTERIOR,
BUREAU OF RECLAMATION,
Washington, D. C., June 3, 1957.

Hon. FRANK CHURCH,
United States Senate,
Washington, D. C.

DEAR SENATOR CHURCH: As you noted in your letter of May 24, my remarks on April 27 before the meeting of the Pacific Coast Fuel Oil Dealers' Association referred to the reexamination of the middle Snake being conducted by the Bureau of Reclamation.

The Secretary of the Interior instructed the Bureau to make an analysis of a high Pleasant Valley Dam last September. That study was made, using reconnaissance-type information, and a special report was prepared in October 1956. It was on the basis of the special report that Secretary Seaton wrote to Mr. Kuykendall, Chairman of the Federal Power Commission, on February 14, at which time he forwarded the special report and indicated that the high Pleasant Valley Dam held enough promise that he was having the Bureau of Reclamation make a more detailed study.

It was our intent that Pleasant Valley studies be carried forward as rapidly as possible in fiscal year 1957 by reprograming the funds already appropriated for investigations work. This reprograming of funds was accomplished within the Bureau of Reclamation and a start made on the studies. The work started included the issuance of specifications for drilling at the Pleasant Valley site. Other types of work were also started.

During the April 8 hearings conducted by the Appropriations Subcommittee on Public Works, House of Representatives, the subcommittee asked to be informed as to the work being done by the Bureau. It was our understanding from the subcommittee that award of the drilling contract should be withheld until the subcommittee had been advised on the matter. This information was sent to the subcommittee on April 11. Subsequently we were informed that the desires

of the subcommittee extended beyond the mere suspension of awarding the drilling contract and applied to all activities on the middle Snake River studies. Accordingly, on May 7, 1957, all investigation activities were suspended pending additional information and instructions as to the desires of the subcommittee.

Activities on the middle Snake River studies are thus suspended at this time.

Sincerely yours,

W. A. DEXHEIMER,
Commissioner.

Mr. CHURCH. Mr. President, the Army Engineers 308 Review Report, although compiled during a democratic administration, is not a partisan document. The needs there pointed out for flood control, and the opportunities for hydroelectric development and future reclamation benefits are engineering facts, not political facts.

A new study will not change the conformation of the rivers and mountains or the flow of water. It is paltry politics to scuttle the comprehensive plan long enough to give the vital Hells Canyon Dam site away, and then seek refuge in the same principles of comprehensive planning in order to foist upon the people discreditable alternatives necessary to reclaim the benefits lost in the giveaway.

It is time for the Congress to step in with leadership the Executive has abdicated, and reestablish the program for comprehensive development of the great Columbia-Snake River Basin.

WIDESPREAD USE OF COLUMBIA RIVER FOR INDUSTRIAL PURPOSES

Mr. NEUBERGER. Mr. President, at last Monday's session of the Senate, I introduced Senate bill 2206, an amendment to the Bonneville Project Act, to authorize the Administrator of the Bonneville Power Administration, as the marketing agent for the power from Federal dams on the Columbia River, to establish a new priority for industrial uses of power, within the framework of the public body preference clause.

The amendment, which would also recognize the principle of fair geographic distribution of power to promote economic diversification among the States of the Columbia Basin, was drafted with the view of assisting, for example, an Oregon State Power Agency to qualify as a preference customer in order to attract industrial power users to Oregon. Such a State agency could contract with manufacturing plants for large blocks of energy under long-term contracts. It is my belief that under the geographic provisions, an Oregon agency would have an equitable position alongside similar agencies in other States.

In my speech, I expressed the hope that the Senate Committee on Interior and Insular Affairs would hold hearings on my bill as a basis for comparing the present marketing policies of the Bonneville Power Administration with those which I believe would be in the public interest and which I have sought to express in the bill. I find, however, that although these policies are made and administered within the Department of the Interior, legislative jurisdiction over them is vested in the Committee on Public Works. I should, therefore, have been speaking of hearings by the Senate Committee on Public Works; as a member of that committee, also, I hope that such hearings can be arranged.

The amendment was introduced to give expression to my view that low-cost Columbia River system energy must in the future be used primarily for creation of new payrolls and for diversification of industry in the area, rather than to augment residential loads. Proposals for channeling of Federal power into industrial uses for expansion of Oregon's economy have evoked considerable editorial discussion in the State in recent weeks, because of the serious employment dilemma resulting from the decline in lumbering and agriculture.

Mr. President, I ask unanimous consent to have printed in the body of the CONGRESSIONAL RECORD two recent articles from the editorial page of the Oregonian, of Portland, Oreg. One article, entitled "Limbo Awaits GOP Unless It Mends Ways," by Albert McCready, associate editor of the Oregonian, was published on May 28, 1957. The other article, entitled "Power Is Key to Aluminum Survival," by Herbert Lundy, editor of the editorial page of the Oregonian, was published on May 31, 1957.

These articles emphasize the urgent need of the State of Oregon for low-cost power in abundance, so that new industrial payrolls can be attracted. In my opinion, the articles by Mr. McCready and Mr. Lundy serve to demonstrate the wisdom of the recent introduction of my power amendment to the Bonneville Power Act, which will assure industrial usage of energy a higher priority when power sales are authorized by the Administrator.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Portland Oregonian of May 28, 1957]

LIMBO AWAITS GOP UNLESS IT MENDS WAYS

(By Albert McCready)

In the Oregon Legislature just ended, Republican members exerted a considerable influence. Under the leadership of Senator Warren Gill of Lebanon, the 15-vote GOP bloc in the senate learned quickly the virtues of party discipline and, through dickering based on this strong position, won much that the Republicans wanted and thwarted much that the Democrats wanted.

But now the legislature has departed, leaving behind in the statehouse a Democratic governor armed with the great executive powers given to that office by recent Republican-dominated legislatures. For the first time in a long time the Republican Party in Oregon finds itself on the outside looking in at the machinery of State government.

The task of the Republicans, with the 1958 primaries less than a year away, is to work toward the recapture of their lost power. The other day the party held a grassroots conference in Salem to assess the opinions of Oregonians from all over the State concerning the performance of Republicans and Democrats in the statehouse. These opinions, it was thought, would help GOP candidates to do and say the right things to win voter support in 1958.

But who were the grassrooters? They were prominent GOP leaders—successful and respected businessmen, bankers, lawyers, lumbermen. As such, they were well qualified to pass along impressions from other conservative thinkers traveling in their social and professional circles. But what of the views of postmen, longshoremen, grocery clerks, and filling-station attendants? These are the voters whose opinions the Republican Party had best seek and heed if it wants to win any more elections in Oregon.

Before this legislature there was a bill for formation of a State power agency which might work to soften the harsh provisions of the public power preference clause in the Bonneville Act, and give Oregon a more even share of the hydroelectric energy from Federal dams in the Northwest. Without this or some other alteration of the present situation, the lion's share of cheap Federal power in a few years will be flowing into the lines of public power agencies serving most of the State of Washington. If private power companies serving most of the State of Oregon are obliged to turn to high-cost steam generation to supply their customers, this State can kiss goodby its prospects for attracting new electroprocess industries to stabilize our not-so-solid economy based on forest products and agriculture.

Far from being a threat to private enterprise, which the Republican Party properly supports, this program was intended to provide the stimulus to business of all kinds. Specifically, it barred the State from superseding private utilities in distributing electricity. But it would allow the State to sell power in amounts of 10,000 kilowatts or more at wholesale rates, thus to attract large, new electroprocess industries. Hundreds of smaller fabricating plants employing thousands of men and buying power from local utilities have grown up around such basic industries in Washington.

The Oregonian was among the first to propose such an agency. This newspaper did not, and does not, regard this as a partisan proposition. We simply believe that in the long run this plan could work to bring more industry, and more payrolls, to Oregon, and as such we indorse it.

The private power companies do not like the plan. They have hopes that somehow, if left alone, they can avoid any power shortage that would hurt Oregon. A State power agency, they fear, would revive a now-moribund movement to establish more public utility districts in this State. Their attitude, from the standpoint of self-interest, is understandable, and no one can blame them for trying to protect themselves. The squelching of H. R. 780 is considered by the power company lobbyist a notable victory.

Perhaps it is, for them, but is it a victory for the Republican Party, whose Senate Members obediently responded to the wishes of the utilities on this measure?

The Senate killed the bill in the final hours of the session, by the parliamentary device of refusing to suspend the rules calling for a 1-day delay between the second reading of a bill and the record vote on it. Fourteen of the Senate's fifteen Democrats wanted to suspend the rules, and thus can be said to have voted in favor of the bill. Fourteen of the Senate's fifteen Republicans refused to sanction the rule suspension, and thus can be said to have voted against the bill.

Thus did the Senate Republican bloc hand to the Oregon Democrats a most excellent campaign weapon with which to belabor the GOP at the polls next year.

Why did the Republicans do this? Because, as one disgruntled party member observed the other day to a representative of this page, the GOP inherently is committed to the philosophy that the interests of free enterprise take precedence over almost any other consideration. In addition to this

philosophical attitude, there is the practical one that party leaders feel themselves beholden to the party's big campaign contributors, who in turn are closely identified with and sympathetic to the major corporate entities in Oregon, including of course the private utilities.

Well, as recent election results plainly have shown, Oregon voters no longer are convinced that the sometime associate of Li'l Abner is right when he declares that what is good for General Bullmoose is good for everybody. They have been taking long, thoughtful looks at the policies and the deeds of the rival parties, and have been marking their ballots in what seems to them to be their own self-interest.

If the Republican Party is to survive as an influential force in Oregon politics its members had best adopt a more realistic and practical point of view. They need to discover the true meaning of the much misinterpreted term, "grass roots." They should face the cold arithmetical facts that there are a lot more ordinary, wage-earning voters in Oregon than there are big contributors to the GOP coffers, and that it is futile to have the backing of the latter without the favor of the former.

True friends of Oregon Republicans hope sincerely they can take an honest look at themselves and realize some of the turns they have been taking are labeled, "Dead End." Otherwise, it may be predicted the influence of the GOP in Oregan public affairs will not be regained for a long, long time.

[From the Portland Oregonian of May 31, 1957]

Power Is Key to Aluminum Survival

(By Herbert Lundy)

Spokane.—It's everyone for himself in the regional battle for kilowatts, as the Federal Government falls farther and farther behind in meeting the utility responsibility it was so eager to assume in the 1930's. In there slugging is the aluminum industry. And most concerned is Kaiser Aluminum and Chemical Corp. which gives three-shift, year-around jobs to 6,500 of the 11,400 persons employed in Northwest aluminum plants.

The availability and cost of power are critical factors in survival of the Northwest's aluminum industry, which operates plants with original cost of $255 million, pays $4,900,000 in State and local taxes, $63,900,000 in annual wages and $32,900,000 a year for materials, supplies, and services bought in the Northwest. These are the factors presently limiting expansion. Power cutbacks cause annual losses from shutdowns.

Kaiser pays an average price of 2.8 mills for the power it buys from the Bonneville Power Administration for its Mead reduction plant, second largest in the Nation. It could not survive by buying power from the local private utility, even if such power were available, at a cost of around 12 mills.

Rail freight rate increases and more efficient generation from coal and gas in other sections of the Nation have narrowed the margin of advantage attributable to 2.8-mill power in the Northwest to the vanishing point. Aluminum Company of America, offered power at around 3 mills from Grant County PUD's Priest Rapids project, recently chose instead to build a new plant at Evansville, Ind., where it can get coal-produced power for about 4 mills, and is in the heart of the eastern market. The difference in freight costs is approximately the equivalent of 2 mills of power cost, between aluminum production in the Northwest and in the Ohio Valley.

Most of the freight cost is in the shipment of alumina by rail. Kaiser's bauxite comes from Jamaica by ship and is reduced to alumina, a fine white powder, at Baton Rouge, La. Kaiser receives 20 carloads of alumina a day at the Mead plant, which employs 2,000, and ships 10 carloads of pig and ingots 15 miles to the sprawling Trentwood plate and tube mill, which employs 4,000.

The Mead primary aluminum plant is the big user of electricity in its furnaces. But only 52 percent of its power supply from the Federal Bonneville system is firm power—that is, available without diminution night and day the year around. The remaining 48 percent is interruptible; the Government can and does withdraw any portion of the interruptible supply in periods of shortage, which are almost annual. It costs aluminum producers a lot of money to shut down pot lines, and to unfreeze them to start up again.

In addition to the shortage of firm power, there is the problem of Bonneville contracts. Kaiser's 20-year contracts with BPA will expire in 1972. Other aluminum companies, Alcoa and Reynolds, will come to the end of their contracts in the same period. None has any assurance of renewal.

I have discussed on this page the problem the private utilities and the State of Oregon face in the inevitable withdrawal of Federal power to meet the demands of preference customers, PUD's, municipalities, and REA's chiefly in Washington. The private utilities can lose their power, on 5-years' notice, despite their contracts. The industrial customers of Bonneville are protected against such withdrawals until their contracts expire. But at that time, they may not be able to renew. The uncertainty of the interruptible power and of contract renewal explains why Kaiser's Northwest manager, Norman L. Krey, and power manager, W. A. Dittmer, are spending Kaiser money and manpower to try to develop power supplies which will be approximately as low-cost but outside the control of the Federal system.

Kaiser has offered to dam Arrow Lakes in Canada for storage, returning 20 percent of the power increment at Federal dams on the Columbia in the United States to the Province of British Columbia in repayment for water. The British Columbia government is receptive. But the Dominion Government at Ottawa is bearish. Ottawa's present attitude is that Canada should build its own dams and use its own power. Also, United States Federal departments—Interior and Army—are dragging their feet on the Arrow Lakes formula. Bigger projects await an American-Canadian master agreement—Libby and Mica Creek Dams.

Kaiser also has advanced to Douglas County PUD in Washington the money for surveys and engineering for the Wells Dam on the Columbia below Chief Joseph Dam. Under this agreement, Kaiser may get excess power from Wells—under a pullback contract. But there is a gimmick. Douglas PUD insists that 150,000 kilowatts of the amount it would deliver to Kaiser be put into a plant in Douglas County, many miles from the Trentwood mill. Kaiser is more in need of such power in the Spokane plants.

The Kaiser power plans are only one demonstration of how every group except the State of Oregon is doing something for itself powerwise. Those who discount the value of low-cost power—and oppose an Oregon Power Commission to get some—should visit Spokane. In addition to providing 6,000 jobs at Kaiser's Mead and Trentwood plants, this production has brought into the Spokane Valley since 1946 more than 40 smaller aluminum fabricating plants.

Some of these of larger size are Brown Trailer, Aeroliner, General Machinery Co., Aluminum Supply Co., and Miller-Posten. Some compete with Kaiser's Trentwood in production of irrigation pipe. Equally significant, 30 percent of the aluminum plates, tubes, and other stock produced at Trentwood are consumed in the 11 Western States. If Oregon had Kaiser's Mead and Trentwood plants—and the power to keep them going—this State would not be so badly shaken by seasonal unemployment in lumber and agriculture.

AGREEMENT FOR COOPERATION WITH ECUADOR

Mr. PASTORE. Mr. President, I ask unanimous consent to have printed in the Record an agreement for cooperation with the Republic of Ecuador, together with accompanying correspondence. This agreement was signed on May 31 and was received at the Joint Committee on Atomic Energy on June 1. It is a standard research agreement which provides for the lease of up to 6 kilograms of contained U–235 in uranium, enriched up to a maximum of 20 percent U–235.

There being no objection, the agreement was ordered to be printed in the Record, as follows:

United States
Atomic Energy Commission,
Washington, D. C., May 31, 1957.

Hon. Carl T. Durham,
Chairman, Joint Committee on Atomic Energy,
Congress of the United States.

Dear Mr. Durham: Pursuant to section 123c of the Atomic Energy Act of 1954, there is submitted with this letter:

1. An executed agreement for cooperation between the Government of the United States of America and the Government of the Republic of Ecuador concerning civil uses of atomic energy.

2. A letter dated April 18, 1957, from the Commission to the President recommending approval of the agreement.

3. A letter dated April 23, 1957, from the President to the Commission containing his determination that it will promote and will not constitute an unreasonable risk to the common defense and security, approving the agreement, and authorizing its execution.

This agreement, as executed, makes cooperation possible between the United States and the Republic of Ecuador on the design, construction, and operation of research reactors, including related health and safety problems; the use of such reactors in medical therapy; and the use of radioactive isotopes in biology, medicine, agriculture, and industry. The Republic of Ecuador, if it desired to do so, would be able to engage United States companies to construct research reactors, and private industries in the United States will be permitted, within the limits of the agreement, to render other assistance to the Republic of Ecuador. No restricted data would be communicated under this agreement. The Atomic Energy Commission, however, would lease to the Republic of Ecuador up to 6 kilograms of contained U–235 in uranium enriched up to a maximum of 20 percent U–235, plus such additional quantity as, in the opinion of the Commission, is necessary to permit the efficient and continuous operation of the reactor or reactors while replaced fuel elements are radioactively cooling in the Republic of Ecuador or while fuel elements are in transit. This expressed limitation will restrict the Republic of Ecuador in determining the choice of reactor to be constructed to a research reactor.

You will note that the agreement includes in article V provisions for the sale or transfer of research quantities of materials of interest in connection with defined research projects. The amount of special nuclear material which would be made available to the Republic of Ecuador under this agreement would not be important from the military point of view.

Article VIII of the proposed agreement records the obligations undertaken by the Republic of Ecuador to safeguard the special nuclear material to be leased by the Commission and article X contains the guaranties prescribed by section 123 of the Atomic Energy Act.

This agreement expresses the hope and expectation of the two Governments that this first stage of cooperation will lead to further development of the peaceful uses of atomic energy in the Republic of Ecuador.

The agreement will enter into force when the two Governments have exchanged notifications that their respective statutory and constitutional requirements have been fulfilled (article XI).

Sincerely,

LEWIS STRAUSS,
Chairman.

UNITED STATES
ATOMIC ENERGY COMMISSION,
Washington, D. C., April 18, 1957.

The PRESIDENT,
The White House.

DEAR MR. PRESIDENT: The Atomic Energy Commission recommends that you approve the enclosed proposed agreement entitled "Agreement for Cooperation Between the Government of the United States of America and the Government of the Republic of Ecuador Concerning Civil Uses of Atomic Energy," and authorize its execution.

The agreement has been negotiated by the Atomic Energy Commission and the Department of State pursuant to the Atomic Energy Act of 1954, and is, in the opinion of the Commission, an important and desirable step in advancing the development of the peaceful uses of atomic energy in Ecuador in accordance with the policy which you have established. The agreement would permit cooperation between the two Governments with respect to the design, construction, and operation of research reactors, including related health and safety problems; the use of such reactors in medical therapy; and the use of radioactive isotopes in biology, medicine, agriculture, and industry. The agreement contains all of the guaranties prescribed by the Atomic Energy Act of 1954. No restricted data would be communicated under this agreement, but the Commission is authorized to lease to the Government of the Republic of Ecuador up to 6 kilograms of contained U–235 in uranium enriched up to a maximum of 20 percent U–235 for use as reactor fuel. You will note that article V of the agreement would permit the Commission to transfer limited quantities of special nuclear materials, including U–235, U–233, and plutonium, for defined research projects related to the peaceful uses of atomic energy.

The Government of the Republic of Ecuador, if it desires to do so, may engage United States companies to construct research reactors, and private industry in the United States will be able, under the agreement, to render other assistance to the Government of the Republic of Ecuador. The agreement expresses the hope and expectation of the two Governments that this first stage of cooperation will lead to further discussions and agreements relating to other peaceful uses of atomic energy in Ecuador.

Following your approval and subject to the authorization requested, the agreement will be formally executed by the appropriate authorities of the Governments of the Republic of Ecuador and the United States and then placed before the Joint Committee on Atomic Energy in compliance with section 123c of the Atomic Energy Act of 1954.

Respectfully,

LEWIS L. STRAUSS,
Chairman.

AUGUSTA, GA., *April 23, 1957.*

The Honorable LEWIS L. STRAUSS,
Chairman, Atomic Energy Commission,
Washington, D. C.

DEAR MR. STRAUSS: Under date of April 18, 1957, you informed me that the Atomic Energy Commission had recommended that I approve the proposed agreement for cooperation between the Government of the United States of America and the Government of the Republic of Ecuador concerning civil uses of atomic energy, and authorize its execution. The agreement recites that the Government of the Republic of Ecuador desires to pursue a research and development program looking toward the realization of the peaceful and humanitarian uses of atomic energy and desires to obtain assistance from the Government of the United States and United States industry with respect to this program.

The recommended agreement has been reviewed. It calls for cooperation between the two Governments with respect to the design, construction, and operation of research reactors, including related health and safety problems; the use of such reactors in medical therapy; and the use of radioactive isotopes in biology, medicine, agriculture, and industry. The agreement contains all of the guaranties prescribed by the Atomic Energy Act of 1954. No restricted data would be communicated under the agreement, but the Commission is authorized to lease to the Government of the Republic of Ecuador up to 6 kilograms of contained U–235 in uranium enriched up to a maximum of 20 percent U–235 for use as reactor fuel. In addition, article V of the agreement would permit the Commission to transfer limited quantities of special nuclear materials, including U–235, U–233, and plutonium, for defined research projects related to the peaceful uses of atomic energy.

Pursuant to the provisions of section 123 of the Atomic Energy Act of 1954 and upon the recommendation of the Atomic Energy Commission, I hereby—

1. Determine that the performance of the proposed agreement will promote and will not constitute an unreasonable risk to the common defense and security of the United States; and

2. Approve the proposed agreement for cooperation between the Government of the United States and the Government of the Republic of Ecuador enclosed with your letter of April 18, 1957; and

3. Authorize the execution of the proposed agreement for the Government of the United States by appropriate authorities of the United States Atomic Energy Commission and the Department of State.

It is my hope that this agreement represents but the first stage of cooperation in the field of atomic energy between the United States and the Government of the Republic of Ecuador, and that it will lead to further discussions and agreements relating to other peaceful uses of atomic energy in Ecuador.

Sincerely,

DWIGHT D. EISENHOWER.

AGREEMENT FOR COOPERATION BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE REPUBLIC OF ECUADOR CONCERNING CIVIL USES OF ATOMIC ENERGY

Whereas the peaceful uses of atomic energy hold great promise for all mankind; and

Whereas the Government of the United States of America and the Government of the Republic of Ecuador desire to cooperate with each other in the development of such peaceful uses of atomic energy; and

Whereas the design and development of several types of research reactors are well advanced; and

Whereas research reactors are useful in the production of research quantities of radioisotopes, in medical therapy, and in numerous other research activities and at the same time are a means of affording valuable training and experience in nuclear science and engineering useful in the development of other peaceful uses of atomic energy including civilian nuclear power; and

Whereas the Government of the Republic of Ecuador desires to pursue a research and development program looking toward the realization of the peaceful and humanitarian uses of atomic energy and desires to obtain assistance from the Government of the United States of America and United States industry with respect to this program; and

Whereas the Government of the United States of America, acting through the United States Atomic Energy Commission, desires to assist the Government of the Republic of Ecuador in such a program;

The parties agree as follows:

ARTICLE I

For the purposes of this agreement:

(a) "Commission" means the United States Atomic Energy Commission or its duly authorized representatives.

(b) "Equipment and devices" means any instrument or apparatus and includes research reactors, as defined herein, and their component parts.

(c) "Research reactor" means a reactor which is designed for the production of neutrons and other radiations for general research and development purposes, medical therapy, or training in nuclear science and engineering. The term does not cover power reactors, power demonstration reactors, or reactors designed primarily for the production of special nuclear materials.

(d) The terms "restricted data," "atomic weapon," and "special nuclear material" are used in this agreement as defined in the United States Atomic Energy Act of 1954.

ARTICLE II

Restricted data shall not be communicated under this agreement, and no materials or equipment and devices shall be transferred and no services shall be furnished under this agreement to the Government of the Republic of Ecuador or authorized persons under its jurisdiction if the transfer of any such materials or equipment and devices or the furnishing of any such services involves the communication of restricted data.

ARTICLE III

1. Subject to the provisions of article II, the parties hereto will exchange information in the following fields:

(a) Design, construction, and operation of research reactors and their use as research, development, and engineering tools and in medical therapy.

(b) Health and safety problems related to the operation and use of research reactors.

(c) The use of radioactive isotopes in physical and biological research, medical therapy, agriculture, and industry.

2. The application or use of any information or data of any kind whatsoever, including design drawings and specifications, exchanged under this agreement shall be the responsibility of the party which he receives and uses such information or data, and it is understood that the other cooperating party does not warrant the accuracy, completeness, or suitability of such information or data for any particular use or application.

ARTICLE IV

1. The Commission will lease to the Government of the Republic of Ecuador uranium enriched in the isotope U–235, subject to the terms and conditions provided herein, as may be required as initial and replacement fuel in the operation of research reactors which the Government of the Republic of Ecuador, in consultation with the Commission, decides to construct and as required in

the agreed experiments related thereto. Also, the Commission will lease to the Government of the Republic of Ecuador uranium enriched in the isotope U–235, subject to the terms and conditions provided herein, as may be required as initial and replacement fuel in the operation of such research reactors as the Government of the Republic of Ecuador may, in consultation with the Commission, decide to authorize private individuals or private organizations under its jurisdiction to construct and operate, provided the Government of the Republic of Ecuador shall at all times maintain sufficient control of the material and the operation of the reactor to enable the Government of the Republic of Ecuador to comply with the provisions of this agreement and the applicable provisions of the lease arrangement.

2. The quantity of uranium enriched in the isotope U–235 transferred by the Commission under this article and in the custody of the Government of the Republic of Ecuador shall not at any time be in excess of six (6) kilograms of contained U–235 in uranium enriched up to a maximum of 20 percent U–235, plus such additional quantity as, in the opinion of the Commission, is necessary to permit the efficient and continuous operation of the reactor or reactors while replaced fuel elements are radioactively cooling in the Republic of Ecuador or while fuel elements are in transit, it being the intent of the Commission to make possible the maximum usefulness of the 6 kilograms of said material.

3. When any fuel elements containing U–235 leased by the Commission require replacement, they shall be returned to the Commission and, except as may be agreed, the form and content of the irradiated fuel elements shall not be altered after their removal from the reactor and prior to delivery to the Commission.

4. The lease of uranium enriched in the isotope U–235 under this article shall be at such charges and on such terms and conditions with respect to shipment and delivery as may be mutually agreed and under the conditions stated in articles VIII and IX.

ARTICLE V

Materials of interest in conection with defined research projects related to the peaceful uses of atomic energy undertaken by the Government of the Republic of Ecuador, including source materials, special nuclear materials, byproduct material, other radioisotopes, and stable isotopes, will be sold or otherwise transferred to the Government of the Republic of Ecuador by the Commission for research purposes in such quantities and under such terms and conditions as may be agreed when such materials are not available commercially. In no case, however, shall the quantity of special nuclear materials under the jurisdiction of the Government of the Republic of Ecuador, by reason of transfer under this article, be, at any one time, in excess of 100 grams of contained U–235, 10 grams of plutonium, and 10 grams of U–233.

ARTICLE VI

Subject to the availability of supply and as may be mutually agreed, the Commission will sell or lease, through such means as it deems appropriate, to the Government of the Republic of Ecuador or authorized persons under its jurisdiction such reactor materials, other than special nuclear materials, as are not obtainable on the commercial market and which are required in the construction and operation of research reactors in the Republic of Ecuador. The sale or lease of these materials shall be on such terms as may be agreed.

ARTICLE VII

It is contemplated that, as provided in this article, private individuals and private organizations in either the United States or the Republic of Ecuador may deal directly with private individuals and private organizations in the other country. Accordingly, with respect to the subjects of agreed exchange of information as provided in Article III, the Government of the United States will permit persons under its jurisdiction to transfer and export materials, including equipment and devices, to and perform services for the Government of the Republic of Ecuador and such persons under its jurisdiction as are authorized by the Government of the Republic of Ecuador to receive and possess such materials and utilize such services, subject to:

(a) The provisions of Article II.

(b) Applicable laws, regulations and license requirements of the Government of the United States and the Government of the Republic of Ecuador.

ARTICLE VIII

1. The Government of the Republic of Ecuador agrees to maintain such safeguards as are necessary to assure that the special nuclear materials received from the Commission shall be used solely for the purposes agreed in accordance with this agreement and to assure the safekeeping of this material.

2. The Government of the Republic of Ecuador agrees to maintain such safeguards as are necessary to assure that all other reactor materials, including equipment and devices, purchased in the United States under this agreement by the Government of the Republic of Ecuador or authorized persons under its jurisdiction shall be used solely for the design, construction, and operation of research reactors which the Government of the Republic of Ecuador decides to construct and operate and for research in connection therewith, except as may otherwise be agreed.

3. In regard to research reactors constructed pursuant to this agreement, the Government of the Republic of Ecuador agrees to maintain records relating to power levels of operation and burn-up of reactor fuels and to make annual reports to the Commission on these subjects. If the Commission requests, the Government of the Republic of Ecuador will permit Commission representatives to observe from time to time the condition and use of any leased material and to observe the performance of the reactor in which the material is used.

4. Some atomic energy materials which the Government of the Republic of Ecuador may request the Commission to provide in accordance with this arrangement are harmful to persons and property unless handled and used carefully. After delivery of such materials to the Government of the Republic of Ecuador, the Government of the Republic of Ecuador shall bear all responsibility, insofar as the Government of the United States is concerned, for the safe handling and use of such materials. With respect to any special nuclear materials or fuel elements which the Commission may, pursuant to this agreement, lease to the Government of the Republic of Ecuador or to any private individual or private organization under its jurisdiction, the Government of the Republic of Ecuador shall indemnify and save harmless the Government of the United States against any and all liability (including third party liability) from any cause whatsoever arising out of the production or fabrication, the ownership, the lease, and the possession and use of such special nuclear materials or fuel elements after delivery by the Commission to the Government of the Republic of Ecuador or to any authorized private individual or private organization under its jurisdiction.

ARTICLE IX

The Government of the Republic of Ecuador guarantees that:

(a) Safeguards provided in article VIII shall be maintained.

(b) No material, including equipment and devices, transferred to the Government of the Republic of Ecuador or authorized persons under its jurisdiction, pursuant to this agreement, by lease, sale, or otherwise will be used for atomic weapons or for research on or development of atomic weapons or for any other military purposes, and that no such material, including equipment and devices, will be transferred to unauthorized persons or beyond the jurisdiction of the Government of the Republic of Ecuador except as the Commission may agree to such transfer to another nation and then only if in the opinion of the Commission such transfer falls within the scope of an agreement for cooperation between the United States and the other nation.

ARTICLE X

It is the hope and expectation of the parties that this initial agreement for cooperation will lead to consideration of further cooperation extending to the design, construction, and operation of power producing reactors. Accordingly, the parties will consult with each other from time to time concerning the feasibility of an additional agreement for cooperation with respect to the production of power from atomic energy in the Republic of Ecuador.

ARTICLE XI

1. This agreement shall enter into force on the day on which each Government shall receive from the other Government written notification that it has compiled with all statutory and constitutional requirements for the entry into force of such agreement and shall remain in force for a period of 5 years.

2. At the expiration of this agreement or of any extension thereof the Government of the Republic of Ecuador shall deliver to the United States all fuel elements containing reactor fuels leased by the Commission and any other fuel materials leased by the Commission. Such fuel elements and such fuel materials shall be delivered to the Commission at a site in the United States designated by the Commission at the expense of the Government of the Republic of Ecuador and such delivery shall be made under appropriate safeguards against radiation hazards while in transit.

In witness whereof, the parties hereto have caused this agreement to be executed pursuant to duly constituted authority.

Done at Washington, in duplicate, in the English and Spanish languages, this 31st day of May 1957.

En testimonio de lo cual, las partes contratantes, debidamente autorizadas a tal fin, han convenido en la ejecución de este convenio.

Hecho en Washington, en duplicado, en los idiomas inglés e español, el día treinta y uno de mayo de 1957.

Ambassador.

GEN. CURTIS E. LeMAY LEAVES STRATEGIC AIR COMMAND

Mr. HRUSKA. Mr. President, after more than 8 years in command, Gen. Curtis E. LeMay is leaving the post of Chief of the Strategic Air Command which has its headquarters in Omaha,

Nebr. He has been reassigned as Vice Chief of Staff, Air Force.

My home city of Omaha and my native State of Nebraska greatly regret his leaving our midst. We have been proud to claim General LeMay as an adopted citizen.

This is not the time to note the place or to recite the many achievements of the Strategic Air Command since its coming into being in 1946. Under the leadership of General LeMay, however, we have witnessed two very fine developments.

In the first place, he has led the Strategic Air Command to a high point of achievement in its mission: The development and maintenance of a striking power which is the prime deterrent of Soviet aggression. The record of growth and size, efficiency, and effectiveness constitutes a tremendous tribute to the driving and dedicated personality and capability of the commanding general. Due to his singleness of purpose in the past 8 years, SAC has become powerful, tough, devastating, and above all, ever ready.

A second major achievement consists of the very satisfactory and happy public relations which have been so outstanding between Air Force bases of the Strategic Air Command and the respective communities in which they exist. We have noticed this particularly in and around Omaha. Progress in this area has been concrete. It has consisted of far more than lip service. For example, there has been a constant and very effective campaign for safety in driving of motor vehicles. This campaign has gone far beyond the confines of the Air Force base itself. It has been carried out in the driving of the officers and men on the highways of the surrounding territory. In this day of great slaughter on the highways, this very tangible evidence of coordinating his authority and influence with similar drive-safely efforts, has made General LeMay stand high in civic achievement.

In similar ways he has shown himself to be aggressively concerned about the conduct of his men on and off the base, in the matter of housing and living conditions for his officers and men, and in community activity generally.

The Omaha community has sought to cooperate with that approach. It has done so generously and forthrightly.

As we Omahans and Nebraskans bid farewell to this fine military leader, we extend to him the very best of wishes in his continued success in his new assignment.

Recent announcement has been made of General LeMay's successor as Chief of the Strategic Air Command, in the person of Lt. Gen. Thomas S. Power. This bids to be a very happy choice because General Power had served for several years as General LeMay's deputy out at SAC Headquarters. We bid him welcome to the Omaha community and to the Strategic Air Command Headquarters, confident that he will make every effort to maintain the high plane which SAC has attained under the leadership of his predecessor. This will take a lot of doing, but I can assure General Power of the continued keen interest of the community and its forthright support insofar as that will be needed to get the job done.

Mr. President, I ask unanimous consent that a recent editorial of the Omaha World-Herald entitled "LeMay's Successor" be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Omaha World-Herald of May 21, 1937]

LEMAY'S SUCCESSOR

Of all the jobs in the Military Establishment of the United States, that of Chief of the Strategic Air Command presents a peculiar challenge.

A half dozen military men might do well as Chief of the Joint Chiefs of Staff, which is the top position for a uniformed military man. Perhaps a score or more are qualified to be Chief of Staff of their service.

But not many have the know-how and the temperament and the all-around ability to be boss of SAC. In large part, Gen. Curtis LeMay is responsible for making that job so hard to fill. He is so thoroughly competent and has such a strong and vivid personality that SAC couldn't be more "LeMay-ish" if he had put his brand on it.

The next best thing to having General LeMay himself to run the show is to get somebody who knows SAC's operations under General LeMay inside and out.

The Air Force people say the newly appointed Chief, Lt. Gen. Thomas S. Power, is such a man. He is known to have been the choice of General LeMay.

General Power is no stranger to Omaha. He was the deputy boss of SAC for several years. His return to Offutt Air Base will be in a sense a homecoming. He has the respect and admiration not only of the men and women of SAC but of the entire community, which is proud to be SAC's friend and neighbor.

PRINTING AS A SENATE DOCUMENT THE INTERIM REPORT OF THE COMMISSION ON INCREASED INDUSTRIAL USE OF AGRICULTURAL PRODUCTS

Mr. CURTIS. Mr. President, I ask unanimous consent that the vote by which Senate Resolution 131 was agreed on May 16, 1957, to be reconsidered.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Nebraska? The Chair hears none, and the vote is reconsidered.

The resolution is before the Senate.

Mr. CURTIS. Mr. President, I offer a further amendment to the resolution on line 1, to strike out the word "interim" and insert in lieu thereof the word "final."

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Nebraska.

The amendment was agreed to.

The PRESIDENT pro tempore. The question is on agreeing to the resolution, as amended.

The resolution, as amended, was agreed to, as follows:

Resolved, That the final report of the Commission on Increased Industrial Use of Agricultural Products, submitted to the Congress April 17, 1957, pursuant to Public Law 540, 84th Congress, be printed as a Senate document, and that 6,500 additional copies be printed for the use of the Committee on Agriculture and Forestry.

The title was amended so as to read: "Resolution authorizing the printing as a Senate document of the final report of the Commission on Increased Industrial Use of Agricultural Products."

ORDER FOR ADJOURNMENT TO TOMORROW

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that when the Senate concludes its deliberations today, it stand in adjournment until 12 o'clock tomorrow.

The PRESIDENT pro tempore. Without objection, it is so ordered.

NOTICE OF CONSIDERATION OF PROTOCOL BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF CANADA

Mr. JOHNSON of Texas. Mr. President, I desire to make an announcement. We have on the Executive Calendar Executive C, a protocol between the Government of the United States and the Government of Canada relating to the sockeye salmon fisheries in the Fraser River system.

I should like to announce, for the information of all Senators, that we shall proceed to the consideration of the Executive Calendar on tomorrow. As usual, we will have a yea-and-nay vote on the treaty, and so I particularly want all Senators to be on notice.

NEW CRISIS IN THE MIDDLE EAST

Mr. JAVITS. Mr. President, a new crisis is building up in the Middle East. This time political—not military—but just as serious. There is an indicated breakdown of international support for the maintenance of the Palestine Arab refugees through the United Nations Relief and Works Agency for Palestine Refugees and notice of a new declaration of economic warfare on Israel by the Arab League. The league's economic council has just voted to start the process—unless halted by more levelheaded Arab leadership—of tightening the boycott and blockade of Israel and blacklisting firms, even American firms, that sell to Israel. It will be recalled that it was the Arab League, sparked by Egypt and Syria, which in 1955 kicked over the Johnston plan for the use of the Jordan River waters through a United Nations authority—which had been agreed to by Israel and Jordan, the two principal countries interested—and with it one of the Mid-East's best hopes for peace and stability. This new crisis is threatened at a time when there were reasons for looking toward a brightening situation.

The military situation is relatively stable; the influence of Colonel Nasser is diminishing; United Nations and United States-Israel relations are much improved; the Eisenhower doctrine has

been accepted in practical effect by the Arab countries, other than Syria and Egypt, and by Israel; and the United Nations emergency force remains in the Gaza strip and on the Gulf of Aqaba.

I urge the administration to start a major drive now in the Middle East for the resettlement of Palestine Arab refugees in the Arab lands. To do this, we should call in our Ambassadors and block out a diplomatic campaign to win acceptance for the Johnston plan for the development of the Jordan River Valley as the first step among the governments involved, and we should follow through from that point.

We are about to consider the Mutual Security Act again. It contains provisions allowing of our backing for regional development programs in the Mid-East like the Johnston plan, and it also provides continued authorization for our share of the United Nations cost of caring for the Palestine Arab refugees.

The same principle is applicable to the remainder of the $200 million available under the Eisenhower doctrine authorization resolution. It means that our Government needs to pursue the initiative with determination, which was opened to us by the failure of Egyptian influence to dismember Jordan and the first success of the Eisenhower doctrine in that operation.

Most observers believe that the Palestine Arab refugees remain one of the most nettling problems standing in the way of some affirmative progress toward permanent peace in the Middle East. I have been in the Gaza Strip recently, and have seen the Palestine Arab refugees there. From my personal observation, I am convinced that the camps no longer contain any appreciable numbers of doctors, lawyers, educators, or other professional or merchant class people, but that those remaining are essentially farmers who should be relatively easy to resettle. By now it is clearly recognized even by objective Arab statesmen themselves that substantial resettlement is practical only in the Arab States. Israel has already admitted 5,000 of such refugees officially, and is, I understand, permitting some 40,000 more to remain unofficially to reunite Arab families. Israel will, I believe, repatriate some additional modest number, but cannot be asked to admit a potential fifth column by the tens of thousands.

The Johnston plan provides for dividing the waters of the Jordan River and its tributary the Yarmuk, with Israel getting 40 percent and the Arab States 60 percent of the water. This project would reclaim enough desert to resettle an estimated one-half of the about 500,000 Palestine Arab refugees in Jordan, whose natural restlessness has contributed much to Jordan's unsettlement, now comprising the bulk of all the 800,000 to 900,000 Palestine Arab refugees; 922,000 are reportedly drawing U. N. rations. The project will aid as well in facilitating the settlement of the increased thousands of European and Arab-land Jewish refugees coming to Israel. The plan involves estimated costs of $200 million; and sharing of costs, contributions by the Arab States, Israel, and our country as well as others, remain to be worked out, but the objections to it are political, and this is the time when they can be overcome.

Our country has a large financial stake in this matter, too, aside from the overriding issue of peace, as we have been contributing about 70 percent of the funds contributed by participating member nations in the U. N. for the support of the Palestine Arab refugees, through the U. N. Relief and Works Agency for Palestine Refugees, having contributed approximately $173 million from June 1948 to the present. We are also committed to participate in a U. N. resettlement fund of $200 million, of which less than 10 percent has been spent for rehabilitation because of Arab opposition to resettlement projects. Moscow has never contributed one penny to helping the Palestine Arab refugees, and even the oil-rich Arab States have contributed small sums of under $100,000 a year. Also involved is the financial viability of Jordan, a key Mid-East problem, and one the Johnston plan could affect mightily for the good.

RETIREMENT OF OFFICERS AND MEMBERS OF THE METROPOLITAN AND OTHER POLICE FORCES

Mr. WILLIAMS. Mr. President, the unfinished business is Senate bill 1770, and I have made a motion that the bill be recommitted. At this time I ask unanimous consent that I may withdraw my motion.

The PRESIDENT pro tempore. Without objection, the motion is withdrawn.

Mr. BIBLE. Mr. President, the discussion of the bill last Monday was most helpful. A number of points were made during the debate which deserve further consideration by the Committee on the District of Columbia. I have conferred with the ranking minority member on the committee, the junior Senator from Maryland [Mr. BEALL] and at this time I ask unanimous consent that Senate bill 1770 be recommitted to the Committee on the District of Columbia.

The PRESIDENT pro tempore. Without objection, the bill will be recommitted.

EXTENSION TIME FOR MAKING OF LOANS BY EXPORT-IMPORT BANK

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of order of business No. 337, House bill 4136.

The PRESIDENT pro tempore. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H. R. 4136) to extend the period within which Export-Import Bank of Washington may make loans.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

PRINTING OF ADDITIONAL HEARINGS ON S. 963, CONTROL OF ADVERTISING ON INTERSTATE HIGHWAYS

Mr. HAYDEN. Mr. President, I move that the Senate proceed to the immediate consideration of Senate Resolution 139, Calendar No. 398.

The PRESIDING OFFICER (Mr. NEUBERGER in the chair). The resolution will be stated by title.

The LEGISLATIVE CLERK. A resolution (S. Res. 139) to print additional hearings on S. 963, control of advertising on interstate highways.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Arizona.

The motion was agreed to; and the Senate proceeded to consider the resolution.

Mr. HAYDEN. The purpose of the resolution is to authorize the printing of 800 additional copies of the hearings relating to control of advertising on interstate highways.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 139) was agreed to as follows:

Resolved, That there be printed for the use of the Committee on Public Works of the United States Senate eight hundred additional copies of the hearings on Control of Advertising on Interstate Highways, Senate bill 963, held by that committee during the current session of Congress.

SUMMARY OF HOUSE AND SENATE ACTION ON FISCAL 1958 APPROPRIATIONS

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a summary of House and Senate action on fiscal 1958 appropriations, as of June 5, 1957. This summary lists the bills, the amount of the Senate reductions under the House figures, and the amount by which the public law figures are under the estimates as well as the percentages for each.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

Summary of House and Senate action on fiscal 1958 appropriations, June 5, 1957

Bill	Amount of Senate reduction under House		Public-law figure under estimate	
	Amount	Percent	Amount	Percent
Treasury-Post Office	None		−$80,364,000	2.0
Commerce	−$40,100,770		−273,722,775	31.5
State-Justic-Judiciary	−714,500		−102,758,509	15.4
General Government matters	−11,000		−4,911,500	23.3
Total	−40,826,270	0.9	−461,756,784	8.4

LEGISLATIVE PROGRAM

Mr. JOHNSON of Texas. Mr. President, I express the hope that next week we shall have available for the consideration of the Senate the Agriculture Department appropriation bill, the District of Columbia appropriation bill, the independent offices appropriation bill, and the Labor-Health, Education, and Welfare appropriation bill. Those bills are now in the final stages of being approved by either the subcommittee or the full Committee on Appropriations. Proper notice will be given. Consent has been granted to file reports when the Senate is not in session.

I hope all Members of the Senate who are interested in any of those bills will obtain copies of the hearings and reports just as soon as they are filed, and study them, because we do expect to have a very heavy schedule of appropriation bills next week.

Mr. President, it is not the intention to have a meeting of the Senate on Friday. We are hopeful that the Committee on Appropriations can use Friday and Saturday to good advantage in the consideration of those bills previously mentioned, and that the Committee on Foreign Relations can do the same, since it has under consideration the atomic energy and mutual security bills.

In the event there are appropriation bills which are ready to be considered, and there is no objection, we could meet on Friday, but I doubt that that will be the case. I think all Senators may be assured there will be no controversial legislation considered on Friday, even if there should be a meeting of the Senate on that day. I wish to give that notice as far in advance as possible, so that Senators may make their plans.

Mr. President, I now desire to make a motion.

The PRESIDING OFFICER. The Senator from Texas has the floor.

IMPROVED METHODS OF STATING BUDGET ESTIMATES, ETC.

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the immediate consideration of Senate bill 434, Calendar No. 402.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 434) to provide for improved methods of stating budget estimates and estimates for deficiency and supplemental appropriations.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Government Operations, with an amendment on page 3, after line 20, to insert:

SEC. 2. (a) Whenever an appropriation bill or an amendment thereto provides for an appropriation in terms of annual accrued expenditures, or specifies that an appropriation therein is based upon annual accrued expenditures, it shall be in order to provide in any such appropriation bill or in any amendment thereto the authority to enter into contracts for the purposes of such appropriation in an amount in addition to the amount of such appropriation.

(b) The provisions of subsection (a) of this section are enacted by the Congress—

(1) as an exercise of the rulemaking power of the Senate and House of Representatives, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply; and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to the procedure in such House) at any time, in the same manner and to the same extent as in the case of any other rule of such House.

So as to make the bill read:

Be it enacted, etc., That section 201 of the Budget and Accounting Act, 1921, as amended, is further amended by adding the following new subsections:

"(b) It is the sense of the Congress that revisions in presentation of budget estimates and estimates for deficiency and supplemental appropriations are essential in order to provide a more informative basis for the enactment of appropriations by the Congress, to reduce or eliminate the large carryover balances of appropriations from 1 fiscal year to another, and to bring about economy in Government expenditures. It is therefore the policy of the Congress that estimates for proposed appropriations will be determined on an annual accrued expenditure basis.

"(c) The amount of proposed appropriations referred to in sections 201 (a) and 203 of this act shall, to the maximum extent deemed desirable and practicable by the President, be determined on an annual accrued expenditure basis.

"'Annual accrued expenditures' shall relate to goods and services to be received in a fiscal year, advance payments, progress payments, and such other payments as are authorized by law to be made in such fiscal year.

"This subsection shall not apply to appropriations for the payment of claims certified by the Comptroller General and of judgments; appropriations for the refund of Federal taxes and of other moneys erroneously received and covered into the Treasury of the United States; appropriations for private relief; appropriations for the payment of interest on trust funds; appropriations to provide or increase revolving funds; appropriations for the payment to former members of the Armed Forces, their dependents and beneficiaries, of any benefits to which they are entitled by reason of military service; appropriations for the payment of pensions and annuities; appropriations for the payment of any obligation of the United States for which liability is fixed by treaty; and other appropriations or funds analogous to the foregoing.

"(d) The conversion to the use of the annual accrued expenditures method for stating proposed appropriations in accordance with section 201 (c) of this act shall be accomplished in such manner and at such times as may be determined by the President.

"(e) As of the end of each fiscal year, the excess of any appropriation or fund made on an annual accrued expenditure basis over the accrued expenditures under such appropriation or fund shall lapse, unless hereafter provided otherwise in an apropriation act or other law. Any remaining balances of each such appropriation or fund shall be merged with any appropriation or fund made for the same general purpose for the ensuing fiscal year and shall constitute a single account."

SEC. 2. (a) Whenever an appropriation bill or an amendment thereto provides for an appropriation in terms of annual accrued expenditures, or specifies that an appropriation therein is based upon annual accrued expenditures, it shall be in order to provide in any such appropriation bill or in any amendment thereto the authority to enter into contracts for the purposes of such appropriation in an amount in addition to the amount of such appropriation.

(b) The provisions of subsection (a) of this section are enacted by the Congress—

(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply; and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognitior of the constitutional right of either House to change such rules (so far as relating to the procedure in such House) at any time, in the same manner and to the same extent as in the case of any other rule of such House.

Mr. HUMPHREY. Mr. President, I appreciate the action of the Senate in considering Calendar No. 402, S. 434, the bill introduced by the Senator from Massachusetts [Mr. KENNEDY] for himself and 49 other Members to provide for the stating of appropriation estimates on an annual accrued expenditure basis.

The bill was referred to the Committee on Government Operations and to the Subcommittee on Reorganization, of which it is my privilege to be chairman.

Last year a similar measure was before the Subcommittee on Reorganization, at which time the Senator from Massachusetts [Mr. KENNEDY] was the chairman and I was a member of the committee. The Senate passed that bill in the previous congress but the annual accrued expenditures provision was stricken by the House.

This year the subcommittee again held hearings, and heard testimony of officials of the executive branch of the Government, representatives of the Hoover Commission and all others interested in the bill.

I am happy to say that the bill was reported unanimously by the full committee and the subcommittee.

This bill, if enacted, would directly implement a most important objective of the second Hoover Commission report, namely that the executive budget and congressional appropriations be in terms of estimated annual accrued expenditures, namely charges for the cost of goods and services estimated to be received. That was recommendation No. 7 of the Hoover Commission budget and accounting report.

I am convinced, Mr. President, that this bill, when passed and signed by the President, will provide for much better control over the Government's expenditures—both by the Congress and the executive branch.

I am very appreciative of the leadership the Senator from Massachusetts [Mr. KENNEDY] has given in promoting this proposed legislation. He has concentrated his attention upon it now for more than a year, and I know it is a source of satisfaction to the Senator from Massachusetts, as it is to the other sponsors, that the Senate has the bill under consideration, today.

I desire to invite attention of the Senators to the report on the bill—Senate report No. 394. I shall not ask that the report be printed in the RECORD, but I do ask that it be referred to in the RECORD, so that Senators may familiarize themselves with the details of the bill.

Mr. KENNEDY rose.

Mr. HUMPHREY. I yield to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I wish to express appreciation to the Senator from Minnesota [Mr. HUMPHREY] for the leadership he has given on this matter. This is a most vital proposal of the Hoover Commission. It has been a matter of great interest not only to me but to the Senator from Virginia [Mr. BYRD] and the Senator from Maine [Mr. PAYNE]. The Senator from Maine [Mr. PAYNE] was especially instrumental in bringing this proposed legislation forward. The bill would place all expenditures of the Government on an annual accrued basis, giving the Congress, as the Senator from Minnesota [Mr. HUMPHREY] said, much greater control and assuring much greater economy. It would prevent the huge carryover of funds which has made governmental accounting and appropriating so difficult in the past few years.

Mr. COTTON rose.

Mr. HUMPHREY. I wish to thank the Senator from Massachusetts. I yield now to the Senator from New Hampshire.

Mr. COTTON. Mr. President, I appreciate the Senator's yielding to me.

I was a member of the Committee on Government Operations last year. Under the able leadership of the Senator from Minnesota, the present chairman of the subcommittee, and also of the Senator from Massachusetts, who was then chairman, we worked on this bill. We were disappointed that we did not get the bill passed last session. It is the keystone of the arch of the Hoover Commission recommendations. I am glad that the bill is being considered by the Senate this morning. I wish to join in commending the Senator from Minnesota and in expressing my satisfaction that this vital legislation is now on its way.

Mr. HUMPHREY. I thank the Senator from New Hampshire. I will say to the Senator that if commendation is to be doled out, for which we are all grateful, the Senator from New Hampshire is at the head of the list.

Mr. COTTON. I thank the Senator.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that a statement which I have prepared relating to this legislation, along with the Comptroller General's statement on the bill, be printed in the RECORD at this point as a part of my remarks.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HUMPHREY

This bill provides that estimates for proposed appropriations of the executive agencies of the Government shall, where appropriate, be prepared on an annual accrued expenditure basis.

Agencies would present their budget estimates for the fiscal year on the basis of expenditures actually to be made or to be accrued that fiscal year—not for expenditures to be made in subsequent fiscal years, as frequently occurs at present.

If appropriations are converted to the annual accrued expenditure basis, authority must be provided for forward contracting of long lead-time programs, such as the building of an aircraft carrier, which would require several years. Senator KENNEDY'S amendment to the bill authorizes the Appropriations Committees to grant such contract authority where necessary for the forward planning of these long lead-time programs.

The President on four separate occasions has requested authority to convert appropriation estimates to the accrued expenditure basis where conducive to better fiscal control. In addition, the Secretary of the Treasury, the Director of the Bureau of the Budget, and the Comptroller General strongly endorse this change in the appropriations process.

The bill directly implements the Hoover Commission's recommendations for (1) improved financial management within the executive branch; and (2) strengthening congressional control over Government expenditures.

The Senate approved the objectives of S. 434 last year when it passed S. 3897, which contained the identical objectives of the present bill. However, the budget estimates section was stricken by the House of Representatives when it acted on S. 3897.

The following statement by the Comptroller General before the Senate Subcommittee on Reorganization on April 12, 1957, is a convincing documentation of the necessity of enacting this legislation into law:

"STATEMENT OF JOSEPH CAMPBELL, COMPTROLLER GENERAL OF THE UNITED STATES, BEFORE THE REORGANIZATION SUBCOMMITTEE OF THE COMMITTEE ON GOVERNMENT OPERATIONS, UNITED STATES SENATE, ON S. 434, 85TH CONGRESS

"Mr. Chairman and members of the subcommittee, we appreciate the opportunity to appear before you to discuss S. 434 which is designed to carry out recommendations 7 and 17 of the report on budget and accounting of the second Hoover Commission. These recommendations are:

" 'Recommendation No. 7. That the executive budget and congressional appropriations be in terms of estimated annual accrued expenditures, namely, charges for the cost of goods and services estimated to be received.

" 'Recommendation No. 17. That each department and agency be authorized to maintain a single account under each appropriation title or fund for controlling the amount available for the liquidation of valid obligations.'

"S. 434 provides for the submission of requests for appropriations on an annual accrued expenditure basis, with certain exceptions. Under this method, appropriations proposed by the agencies would be stated in terms of the charges for goods and services to be received during the budget year and pyaments otherwise authorized by law to be made during that same year. In other words, the amount of each proposed appropriation would represent the estimated amount of financing required for the program of work to be conducted during the budget year.

"The proposed legislation provides in subsection (e) that any accrued expenditures charged to the appropriation for a fiscal year but not paid during such year shall be merged with the similar appropriation for the next year to constitute a single account for disbursing purposes. The latter provision covers the accounts payable on June 30 of any year for goods and services received during that year. Any remaining balance of the appropriation shall cease to be available after the end of the fiscal year.

"We endorse S. 434. The stating of appropriations on an annual accrued expenditure basis, together with the furnishing of cost data to the Congress as provided by Public Law 863, approved August 1, 1956, would provide great impetus to improved correlation of programing, budgeting, accounting, and funding of authorized Government activities each year. Congressional control of costs and expenditures can only be achieved by the maximum utilization of many tools. The stating of appropriations on an accrued expenditure basis can be a very important tool for the Congress.

"This basis of stating appropriations is a natural extension of the cost budgeting enacted in Public Law 863. Under that provision of law, the agencies will prepare annual budgets which will show the estimated costs of the authorized programs and the inventories and other assets available for use in the performance of the programs. Budgets on this basis provide needed tools for management and control of Government programs and activities in terms of annual and total costs.

"However, since the present basis of stating appropriations is in terms of obligating authority, i. e., the amount of funds to be earmarked for contracts and orders covering current and future deliveries of goods and services, the amounts of the appropriations requested for any year under the present method are not, in many cases, closely related to the cost of planned performance under the programs during that year. This results in large carryovers of appropriation balances from year to year. The 1958 budget contains requests for appropriations and other obligating authority totaling $73.3 billion. This is in addition to a $70 billion balance of appropriations and other obligating authority carried forward from prior years, resulting in $143.3 billion proposed to be available to the agencies during 1958, with actual expenditures estimated at $71.8 billion.

"The budget surplus or deficit is determined annually based on the difference between annual receipts and expenditures. But the appropriations, on the present basis, are in terms of obligations against the current and future years. Establishing a direct correlation between annual appropriations and expenditures vests in the Congress and the President a greater opportunity to control the level of operations during a particular budget year on the basis of conditions existing in that year.

"As matters now stand, Congress has little control over spending once the funds are voted, and the President has limited control over spending after apportionments of authority to incure obligations are made by the Budget Director to the agencies. The present situation stems from the fact that congressional control through the appropriation of funds and Budget Budget control through apportionments are both stated in terms of authority to obligate rather than budgeted work plans for the cost of goods and services estimated to be received by the agencies.

"This does not measure currently the cost of progress or performance where long lead-time items are involved. It is only when a program is totally completed that obligations approximate costs and then only if all resources have been consumed. Under the annual accrued expenditure basis of appropriations, Congress would base its appropriations of funds on the annual costs in relation to the accomplishments obtained and to be obtained for those costs, in the light of current conditions and the inventories and other assets on hand, after considering the total estimated costs of a program.

"We believe that total estimated costs should be considered by both the agencies and Congress before a program is initiated in the Government and while a program is

being performed. All of the present safeguards of consideration and control of total program costs are retained under the annual accrued expenditure basis of stating appropriations. Indeed they are improved, because, in addition to providing for consideration of the total estimated cost, this method of determining appropriations provides a means of direct congressional control over the yearly segments of planned performance. The proposed method provides for an orderly review by the Congress of the amount of funds needed in any year in relation to the year-by-year accomplishments and their costs as compared to each year's estimated performance and estimated costs, as well as the continuing need of the program in relation to current national and international conditions.

"An examination of the present-day practices in the long lead-time areas (for example, in procurement, construction, and research and development) involving extensive reprograming, a multitude of changes in engineering plans and specifications during the period of production of many items, and other factors, discloses the necessity for controlling total costs in terms of annual accrued expenditures. Because of these inherent factors in the operations involved, cost budgets as provided by Public Law 683, teamed with appropriations on an accrued expenditure basis, would provide a type of continuing budget presentation that would bring out the adequacy of management planning or the lack of it and would give the Congress an opportunity to have a voice in setting the level of operations from year to year.

"It is inherent in the proposed annual accrued expenditure basis of stating appropriations that congressional authority be granted as necessary on long lead-time items for the issuance of contracts which precede the phase of operations covered in an annual accrued expenditure appropriation. The Hoover Commission noted this necessity in its discussion preceding its Recommendation No. 7. We believe that the necessity for forward planning authorizations, both as to timing and amount, should be determined by the Congress as circumstances may warrant. Of course, under whatever method may be employed in granting such authorizations, the need for them would be subject to annual review from the standpoint of the costs and accomplishments, both completed and projected, and the proposed annual accrued expenditure appropriation.

"This authority has been exercised in the past by the Congress in the form of 'contract authorizations.' The authority to include requests for such contract authorizations in the budget, which is contained in the present section 201 of the Budget and Accounting Act, 1921, in view of the definition of the term 'appropriation' contained in section 2 of that act, will not be abrogated by the provisions of S. 434.

"It is a significant fact, however, that heretofore both the 'contract authorizations' and subsequent appropriations 'to liquidate contract authorizations' were stated in terms of obligational authority. Under the annual accrued expenditure basis of stating proposed appropriations, any necessary authority to enter into contracts and orders for future delivery of goods and services would be stated on the obligational basis but the appropriation of funds would be stated annually in terms of the accrued expenditures for the year based on the more precise planning possible on a year-by-year basis of planned performance.

"The need for contract authority, or any other form of obligational authority, in conjunction with annual appropriations on the accrued expenditure basis, is limited to the areas of operations where forward contracting is required to provide an orderly flow of product. It will not ordinarily be required for salaries, allowances, travel expense, and other current administrative expenses.

"The determination of appropriations on the annual accrued expenditure basis, with concurrent authority to enter into contracts to insure orderly future deliveries of long lead-time items, is in no way detrimental to the interests of contractors. They would be paid for performance just as they are now, the only difference being that such payments would be made out of the funds appropriated by the Congress for that year and not out of funds appropriated in some past year.

"The Government's liability to a contractor under a canceled or terminated contract would be no different than the Government's liability in similar circumstances under the present method of stating appropriations in terms of obligations. If, in the considered judgment of a Congress, a program entered into by an agency should be curtailed or eliminated in the best interests of the United States, the unperformed portion of the contract would be canceled and undoubtedly the Congress would, if necessary, appropriate funds to pay for the termination.

"The year-by-year congressional control of program performance, inherent in the annual accrued expenditure basis of stating appropriations, provides the Congress with an improved current and continuing tool for exercising restraint over contracting on a program when actual costs are substantially exceeding the original estimated costs, when performance is lagging behind schedule, or when the conditions under which the program was originally approved have changed substantially.

"In view of the changes that are required in many agencies to place into effect the accrual accounting and cost budgeting practices authorized by Public Law 863, which are necessary to support appropriations on an annual accrued expenditure basis, we endorse proposed subsection 201 (c) that permits flexibility in the timing of the change in the method of stating appropriation requests. It is believed that it is essential to approach such a change on the basis of individual programs or appropriations rather than any sweeping across-the-board plan.

"First of all, the successful use of these practices presumes a basic foundation of adequate accounting and the ability to program effectively. These fundamentals do not exist in a number of significant areas. To endeavor to adopt the annual accrued expenditure basis of appropriation before the groundwork is laid for it could only lead to confusion and unsatisfactory results.

"Moreover, the greatest advantages to be attained are in the areas of operations involving the long lead-time commitments, such as in major procurement, construction, and research and development. These appropriations are relatively few in number and it is logical to prove the value to Congress and the executive branch of the revised practices in such areas before complete adoption of the practices, government-wide, in the areas where the advantages to be gained are significantly less. The selection of areas to be converted and the timing of the changes should be a matter of mutual determination by the Congress, the Budget Bureau, and the individual agency.

"We believe that the legislation proposed in S. 434, if effectively implemented, would provide both the President and the Congress much greater control over Federal expenditures. We recommend its favorable consideration."

Mr. HUMPHREY. I also ask that a statement prepared by the Senator from Maine [Mr. PAYNE], who is unable to be present today, be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR PAYNE

As one who has played a leading part in the development of legislation to modernize financial administration in the Federal Government it is highly gratifying to me that the Senate is today considering S. 434. As all of my distinguished colleagues know, this bill would authorize the President to state the annual budget requests to Congress in terms of annual accrued expenditures, rather than on the basis of the present concept of obligational authority. In so doing the bill would directly implement one of the most significant of the budget and accounting recommendations of the second Hoover Commission. In passing it should be noted that this bill will, for all practical purposes, complete action on the second Hoover Commission's budget and accounting recommendations since most of them were put into effect by Executive action and legislation last year.

Before going further I want to take this opportunity to pay a word of well-deserved tribute to my very able and distinguished colleague, the junior Senator from Massachusetts [Mr. KENNEDY], for without his untiring efforts S. 434 might well never have come this far through the legislative process. In addition to Senator KENNEDY and myself the bill is sponsored by 48 other Members of the Senate, all of whom are to be commended for the valuable part they have played in the development of this very vital measure. However, very special praise should be given to the distinguished junior Senator from Minnesota [Mr. HUMPHREY], who, as chairman of the Reorganization Subcommittee of the Senate Government Operations Committee, has so ably conducted the hearings and given thorough consideration to the bill. His work in connection with this legislation has been outstanding, as is readily apparent to anyone who reads the very excellent report (S. Rept. 394) which he has submitted discussing fully and fairly the merits of this bill.

The history of the legislation which is now under consideration may fairly be said to have started in June 1955 when the second Hoover Commission submitted its budget and accounting report to the Congress. As an accountant with experience in private business and in Government, this report was of particular interest to me. Since I had long been concerned over the inadequacy of existing Federal financial practices this report held a great deal of promise. After long and careful study I drafted and introduced legislation in February of 1956 to implement most of the Commission's budget and accounting recommendations, because I was convinced that they represented the best possible approach toward putting our fiscal house in order. Twenty-one Members of the Senate joined with me in sponsoring that bill. After hearings were held in March 1956 by the reorganization subcommittee, which was then under the able chairmanship of Senator KENNEDY, it was decided that certain amendments should be made. When the White House announced in April that it had adopted the recommendations in this field which could be implemented by executive action, it was decided that a clean bill should be written and introduced. In May such a bill was submitted to the Senate by Senator KENNEDY and myself along with many of our colleagues as cosponsors. That bill contained a provision to recognize the annual accrued expenditure concept, together with other major financial improvements, such as cost-based budgets, accrual accounting, and simplification of the fund allotment system. It was passed by the Senate as reported from committee, and ultimately became Public

Law 863, but only after the House of Representatives eliminated from it the provisions for stating budget requests in terms of annual accrued expenditures.

It can fairly be said, then, that S. 434 is the logical followup of the work of improving the Federal Government's financial management that was accomplished last year. Without cost-based budgeting and accrual accounting, which were established by Public Law 863, the annual accrued expenditure method of stating budget requests and appropriations could never be made to work efficiently. In other words, these items are necessary prerequisites and now that the foundation has been laid we are ready to adopt the accrued expenditure principle.

President Eisenhower has on four separate occasions specifically requested the authority contained in this bill. In addition, the principle involved is strongly recommended by the second Hoover Commission and has the complete support of the Secretary of the Treasury, the Director of the Bureau of the Budget, and the Comptroller General. I am personally firmly convinced that until this measure is enacted Congress will never be able to get a really complete picture of the financial status of the Federal Government, and consequently will not be able to regain control of the purse which has been lost, largely because of the present cumbersome method of handling the Federal budget. It is my sincere hope that the Senate will today approve S. 434, and that this year it will be possible to secure the approval of the House of Representatives of this important concept which could be of material benefit to the Nation.

Mr. JAVITS. Mr. President, I should like to ask the Senator from Massachusetts [Mr. KENNEDY] a question about this bill, through the Senator from Minnesota.

Mr. HUMPHREY. I shall be happy to be the conduit for this discussion.

Mr. JAVITS. Will the Senator from Massachusetts tell us the extent to which the bill conforms Government budget practices to modern accounting practices? As I understand, the bill would accomplish that purpose. I think the Senator has done an outstanding job in heading this effort. I compliment him on it. I have discussed the bill with the Senator from Maine [Mr. PAYNE], whose seat is next to mine, and I know that he would join me in commending the Senator from Massachusetts who was most generous in according credit to the Senator from Maine.

I feel that this subject is extremely important. It should not be passed by without specific reference to how the bill will modernize Government accounting practices, so that the executive agencies will not be charged, in every budget, with money which they are not going to spend.

Mr. KENNEDY. The bill does bring governmental accounting more nearly into line with standard business practices, by providing that expenditures shall be placed on an annual accrued basis. As I have previously stated, it will prevent a great carryover of funds, both with respect to foreign aid and defense, which makes it almost impossible for us to know exactly what we are doing, and the effect our actions will have on the amount of money available to the executive branch. Under the new accounting practice, appropriations will be made each year. This bill, in combination with the cost-basis bill which was passed last year, will give us far greater control over the amount of money the Government will spend in each year.

So far as concerns long-range appropriations needed for defense, they will be handled through contract authorizations, but they will be subject to review each year. So I think this bill will give Congress far greater control. The reason why the Hoover Commission stated that it would save hundreds of millions of dollars is that placing this system in operation in business has brought about savings of 1, 2, and as much as 3 percent.

I think this is the most important budgetary reform in the past 15 years. I am glad the Senator from New York has brought out the importance of the bill. We should not underrate its importance merely because the bill is passed quickly. I trust the bill will also pass the House.

Mr. JAVITS. I join the Senator in the hope that the bill will pass the House, and that the President will sign it.

I thank the Senator from Massachusetts. I think he has rendered an outstanding public service.

Mr. KENNEDY. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

INCREASE IN INTEREST RATES ON SAVINGS BY CERTAIN NEW YORK BANKS.

Mr. BUSH. Mr. President, I ask unanimous consent to have printed in the RECORD at this point as a part of my remarks excerpts from an article entitled "Three Big Commercial Banks Move To Raise Savings Interest to 3 Percent," published in a recent issue of the New York Times, calling attention to the increase in the interest rate on savings accounts by certain New York banks.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

THREE BIG COMMERCIAL BANKS MOVE TO RAISE SAVINGS TO 3 PERCENT

Three of the five major New York City branch system commercial banks increased from 2½ to 3 percent yesterday the interest rate they will pay on savings deposits, effective July 1. A fourth is expected to take action shortly.

The move brings all of the city's big branch system banks in line with the Chase Manhattan bank, which led the local commercial bank parade to the higher rate last December.

Some 1,200,000 depositors with deposits of almost $1 billion are expected to receive nearly $5 million a year in added interest payments as a result of yesterday's action.

Mr. BUSH. The article calls to our attention the fact that the savers of this country, the forgotten men and women, so to speak, in the economic scheme of things for many years, are now coming into their own, to a modest extent. The article in the New York Times refers to an increase in the interest rate on savings from 2½ to 3 percent by certain banks in New York, resulting in approximately 1,200,000 depositors receiving nearly $5 million a year on savings accounts, in those particular banks.

I also ask unanimous consent to have printed in the RECORD at this point, as a part of my remarks an editorial entitled "Demand and Supply," published in the New York Times of June 2, 1957. The editorial commends the Federal Reserve Board for its courageous action and steady hand in connection with the operation of the money markets and the credit supply.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

DEMAND AND SUPPLY

Are the Federal Reserve authorities responsible for the present so-called tight money situation?

This week's news provided us with another answer to this question in the quarterly statistics released by the Securities and Exchange Commission on new offerings of corporate securities. According to the figures of the SEC, security issues brought out by American corporations in the first quarter of 1957 set an all-time high of $3.6 billion. This meant that corporations came into the market for 20 percent more investment funds in the first quarter of 1957 than in the last quarter of 1956. What is even more striking is the fact that the figure of $3.6 billion represented an increase of 60 percent, as compared with the corresponding quarter of 1956.

It should be noted that this enormous difference between the volume of new corporate financing in the first quarter of 1956 and the first quarter of 1957 did not signify the emergence of business from a subnormal level of activity and production. When the SEC notes that security issues were 60 percent higher in the first quarter of 1957 than in the first quarter of 1956 it is saying that business financing in the capital market was nearly two-thirds greater than in a recent, comparable period of very active business conditions. Needless to say, corporate capital issues constitute but one category of the innumerable sources of demand for a comparatively limited volume of savings available at the present time. There are similar pressures, just to mention a few, in the form of wages, for consumer credit and for State and municipal public expenditures.

True, the Federal Reserve could create sufficient credit to meet such demands, and at the interest rate prevailing, say, a year ago. But what would be the result? By increasing the volume of money relative to land, labor, and other resources, the result would simply be to increase the prices of all of these.

Demanding that the Reserve accommodate its monetary policies, at a time of high-level employment and maximum production, to the demands of everyone who wishes to increase his resources, in one form or another, immediately, would be a little like removing the safety valve of a boiler because from time to time the exhausting steam produced disagreeable and annoying sounds.

EXTENSION OF TIME FOR MAKING OF LOANS BY EXPORT-IMPORT BANK

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senate resume consideration of Calendar No. 337, House bill 4136.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H. R. 4136) to extend the period within which the Export-Import Bank of Washington may make loans.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

ADDRESS BY ROY A. ROBERTS UPON AWARD FOR DISTINGUISHED SERVICE IN JOURNALISM

Mr. MANSFIELD. Mr. President, on May 3, 1957, Mr. Roy A. Roberts, president, editor, and general manager of the Kansas City Star, was presented with the Missouri honor award for distinguished service in journalism, at the University of Missouri. On that occasion he delivered an address entitled "Newspapers in the New World Ahead." I ask unanimous consent that the address by Mr. Roberts, which I think is worthy of consideration by every Member of the Senate, be printed in the RECORD at this point as a part of my remarks.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

NEWSPAPERS IN THE NEW WORLD AHEAD

Sincerely, from the heart, I thank you for this honor you have accorded me.

There are two reasons why I especially cherish it. First, it comes from my neighbors and friends who have known me all these years. Somehow, recognition from home folks, who really are the hardest to fool, counts more. More impelling, I have known the Missouri School of Journalism from its first day on. Over the years its founder—the man who had the great idea—the beloved Walter Williams, was a close, valued friend. So was Charlie Ross, the master stylist, who was with him at the start so long ago. Over the years the contribution your school has made to newspaperdom, not just here in the United States, but over the world, has been profound. Your graduates and former students can be found everywhere. Even after nearly 50 years, the school's arteries show no symptoms of hardening. Under the able leadership of Dean English it still is a major constructive force for making better and more responsible newspapers.

When it comes to passing out kudos and honors, too often the recipients have lived most of their lives. They are apt to be garrulous. Too often as they speak to you, they dwell upon and look to the past. That's only human.

I, too, could regale you with a human story of personages and friends, and some enemies, I have known over 50 years as a newspaperman. I have known every President of the United States from Theodore, the first Roosevelt, down to Dwight D. Eisenhower. The first, of course, only after he had retired from the White House. I don't mean just a nodding acquaintance with them. Most of them I have known rather closely, some more intimately than others. I have known every Governor of Missouri, and Kansas, too, for that matter, for a half century—the strong, the weak, too many just average. I could tell you about nearly every conspicuous figure in American journalism the past 50 years.

In my span as a worker in the journalistic vineyard, I have experienced the coming of the automobile, the airplane, radio and television and many more of these onetime magics of science, now accepted as commonplace. I have lived through two major World Wars, several small ones, and world crises too many to recount. I have been through significant political and economic revolutions—through booms and busts.

It's been a fascinating era. It has meant living to the fullest, all these years. Yet I can resist the temptation to relate to you stories and anecdotes of the past, because the future—attempting to pry into what's ahead—is far more fascinating, yes, fantastic. That's what interests me, even at nearly 70. Certainly it is what more vitally concerns you. The pace of change is so much faster. It will continue to accelerate. The problems will be more challenging. Truly the years ahead will see a new world. Whether a better one, depends upon mankind's ability and daring to learn how to live in such a complicated scheme of things. The political and economic change will be as fast, as revolutionary as the advance of magical science in the atomic era ahead. It can't help but be.

The world, yes, life, is certainly on the move. What a great adventure it will be to live through such challenging years, to have the task of reporting them, even to be a part of them. The trite, even polite, thing to say would be that we oldsters made pretty much of a mess of our era and it is up to you to succeed where we failed. Well, frankly, I think you will strike out more often than we did. Why? Because you have a much more intricate world to live in. Your opportunity to mess things up is infinitely the greater. But the challenging future should make living a greater adventure. Oh, to be a part of it.

Before you discuss specifically what's ahead in the field of newspapers you have to ask: What kind of a world will they be produced in? The past decades especially have seen such an advance in methods of destruction, it's axiomatic now that "it's peace or else," and that "else" is terrible to contemplate.

H-bombs capable of total annihilation, guided missiles making possible push-button destruction thousands of miles away, supersonic planes not on the drawing board, but in being, that can outspeed the shell in flight from a 16-inch gun. Those are not things that are going to be; they are here. So mankind's learning to live with one another in peace is always present and first in importance.

We hear so much of the destructive forces in being that too little emphasis, and this should appeal especially to you newspapermen of the future, has been placed upon the corresponding counterpart to all this. There has been an equally magical development in the field of communications and electronics. The whole world is linked together so there is quick, almost instantaneous communication.

In some measure, at least, this knitting the world together through the airwaves can be and is almost the only answer to this buildup into this fantastic arsenal of annihilation, for the battle for peace ultimately has to be won in the minds of men. We must use this new development in communication with more effectiveness, with more imagination, and with more daring.

Dictators may attempt to put up barriers. Lack of mass ownership of receiving sets and substandard intelligence, of course, will always be a limiting factor. But no longer can any dictatorship enforce a complete blackout. A world statesman or even a national leader can make a vital policy statement. In less than 30 minutes it will be all over the globe to peoples everywhere in many languages.

Somehow, I don't like the term "containment." Its use may be necessary at times. You know what generally happens when one team has control of the ball most of the time trying this offensive or that while the other team merely wears itself out trying to improvise a defense. Too often the offensive breaks through. In this world battle for peace, essentially a battle to reach the minds of men the globe over, we need to take the offensive more. We must keep everlastingly at it. The United Nations may seem feeble and futile in times of crisis. But it must be made to work or the world will depend upon force alone.

Nothing is easier than being a Monday morning quarterback. We witnessed some months back how the world can and will react when a voice for peace that peoples everywhere respect and trust speaks out. The Near East, with its years-old insoluble hatreds, exploded violently. At the same time, in Hungary, a people with a tradition of centuries of sacrifice for freedom arose against the brutal oppressor, the Communist dictatorship. It seemed for a time that world war III, with all its tragic implications, was upon us. One voice spoke out clearly and firmly, and it was heard around the world. You got a glimpse—just a glimpse—of the possible future, the new order, of a world based on international law and justice, not force. Britain and France bowed to outspoken world moral opinion. Russia did not.

Young folks know too well what happens when one member of a football conference lives up to eligibility rules; another flouts them. But even if bleeding, dying Hungary paid the price, gave her all in a passion for freedom, it was not in vain. In spite of tanks and machine guns and brutal murderers, Hungary did much to destroy the march of world communism. The tragedy on the streets and barricades of Budapest forever stripped any pretense of communism as a revolutionary movement for the people. It left it exposed stark naked, as a brutal despotism seeking to enslave, not free, the world.

Probably a letdown couldn't be helped. But soon we were back in the trenches of cold war, moves and countermoves, and what looked like a glorious start for a real peace offensive bogged down completely. We are too much on the defensive.

From putting in economic aid just in vital danger spots, thinking only in terms of containment, we now are pouring out our substance the world over. And more and more aid is being asked. We are taking on military commitments to defend the free world the globe over. More and more the burden financially, as well as militarily, is being placed back on our shoulders. Our partners and allies are cutting down their efforts—possibly necessarily so—and letting us carry the burden. We might as well face facts. Our economy is beginning to feel the strain.

If the questioning of where our foreign policy is leading us is mounting at home, and it is, how are our peace aims and program going over with the all-important neutralist blocs, even with our historic free world partners? Secretary Dulles, fine and dedicated an individual as he may be, is not putting our story over.

One voice certainly can put the story over. That voice should not be worn thin in the petty partisan infighting now prevailing in Washington. It should be saved for the major world problem—peace.

There is nothing wrong with the American people. They will make any sacrifice—as they have so often in the past, a simply incredible record of accepting world responsibility. But the American people want to know the score. They haven't been getting it. I wonder if the time is not near, if not actually overdue, to get out of the trenches

of cold war and make a peace offensive—one of imagination and daring.

At the moment one question is giving newspapers great concern, rightfully so. That's the policy of our State Department in erecting barriers against newsmen penetrating Red China to find out what is going on so they can tell the story to the American people. I can't imagine a more fitting forum for discussion of such a question than here at the Missouri School of Journalism which has been conspicuous over the years for its many graduates in the foreign field, especially the Far East. I feel a bit of hesitancy on lifting my voice on this topic in the company of two such distinguished personages as Hollington Tong, truly a dedicated man if there ever was one, and Riley Allen, my old friend, the Sage of the Pacific, who at his listening post in Hawaii for nearly a half century certainly has come to know the Orient. Probably neither will agree with what I say, although all three of us abhor communism.

But as I see it, a fundamental basic principle is at stake. That principle transcends any possible expediency of the immediate present.

If we are going to have a foreign policy that means something, it must have the support of an informed public. And that public can't be informed intelligently when our own Government puts up barriers to newsmen seeking out the truth, forcing us to depend on State Department pronouncements as a sole basis of opinion. It's as simple as all that.

Only a few days ago I returned from our annual newspaper meetings in New York. I confess to a feeling of humiliation when I heard the annual report of the great Associated Press read. It recounted as one of the achievements of the year's report, the carrying of an exceedingly intelligent survey of conditions inside of China by a Canadian newspaperman. Yes, it was a good series. But has the American press abdicated its prime responsibility and function to the point where we must look to news writers of other nations to inform our people?

The implication was shocking. Nothing drove home to me more forcefully what a basic principle was involved in this question. It's not just a mere minor controversy with the State Department. While newspaper organizations, as well as radio and television, have spoken out on the subject in insisting on a change in Government policy, I am afraid there has been too much leaning over backward so as not to embarrass our Government. The fundamental issue is too precious for such a course when we have our own Government not only refusing to permit our news services and newsmen to enter Red China but implying retaliations on those who seek to enter.

Sound Government policy should be one of tearing down all barriers against the flow of world news and information, not erecting them. The reasons assigned by the State Department for a news blackout on Red China are in no sense valid. Nothing could demonstrate this more clearly than Secretary Dulles' latest shift in position. Now it is suggested the Department might consent to a pool arrangement for a few men to go in, their findings to go to all the press. A free press means not a hand-picked press. The Government should be prodding the press to go in, not seeking to bar such enterprise. If any individual seeking passport accreditation is subversive, let the Department say so. But the blackout on firsthand news from China should end. The sheer fact the State Department has now retreated to a grudging suggestion it might consider a pool arrangement clearly shows there was and is no justification for the policy.

On this subject I feel I can speak without suggestion of being a partisan critic. Goodness knows, no one ever accused our newspaper of being "New Deal." Yet we supported the foreign policy of Franklin D. Roosevelt. No one could accuse my fellow townsman, former President Harry S. Truman, of having any excess of love for our institution. Yet we supported the Truman foreign policy.

We have consistently supported the Eisenhower foreign policy. I might say we still like Ike. But on this basic question I say sincerely and with all the emphasis in me, the State Department is all wrong. Keeping American newsmen out of China is not a contribution to world peace. Sincerely let us trust there will soon be a complete reversal and that all the major news services and major newspapers will have bureaus in China bringing back to the American people facts—the truth. After all, that's the only basis on which an intelligent foreign policy can be furthered.

The road to peace, over the long pull, does not lie in building walls to divide peoples, but in tearing them down. A free flow of trade and commerce, under as normal conditions as circumstances permit, is in itself a potent agency working for better understanding. Exchange of scholarships, of missions, even travel itself, are simple but effective steps of progress. Above all, the press wires and air waves of a free press carrying the day-by-day news developments contribute far more toward a peaceful world than all the government-inspired propaganda whatever be its source—even our own.

Again, I wonder if newspapers themselves, yes, and schools of journalism, shouldn't approach and prepare for the swiftly changing world ahead with a more imaginative, a more daring conception—as forceful as that suggested for our foreign policy. Are we too rigidly adhering to the format of the past? Of course, newspapers are infinitely better than they were years ago. Our orbit, the field of coverage, then was small. One day recently we had stories in the Star by our own Star man from London telling the repercussions of the average Britisher toward the United States after the Suez crisis. The same issue had a story from a Star correspondent down at the South Pole on a geophysical expedition. The globe is our news beat today, not just main street, the state capitals, or even the National Capital. In that respect, newspapers have kept pace with the changing, broadening world.

Has education, including schools of journalism, kept pace? Are they clinging too rigidly to the prototype of the past? Are they preparing you even in a kindergarten degree for the new world ahead? By and large, today's output is sound. But is that enough? Are you getting even a sketchy base on which to deal with the fantastic years ahead?

Over the long pull, journalism schools probably will become graduate schools. But not overnight. I wonder if it wouldn't be worthwhile for some school to toy with the idea of sawing off for one semester all journalism education and curriculum as such. Devote those last months in preparing you for the complexities of the atomic world ahead. What I am thinking of, in crude form, is giving you an intensive briefing on some of the major things you will face in the changing world ahead in which you will live. How many of you know anything about nuclear power, uranium, fission, etc.? It shouldn't be thought of solely in terms of H-bombs but also in usefulness to mankind. Bring in an expert to talk just the primary ABC's for 2 weeks. Do nothing else except cram on that subject. Then take another 10 days or 2 weeks and go into world geography. Not the geography we learn in our common schools but world geography significant of the future races, populations, climates. Experts could be brought in on that. Population trends.

Another solid week or two on economics, taxation, business, labor, and management problems. You could cover just highlights. A lecture or two by experts on where research is headed. And then cap it off with maybe a couple of weeks of intensive briefing on reading and thinking—just a touch of philosophy. Too much canned thinking now. Too many, especially commentators, are willing to do all your thinking for you.

Of course, a briefing on the evolution in politics from the municipal to the national level. The pattern is changing almost too fast to record. What effects do the flight to the suburbs, the wider distribution of wealth, have on voting habits?

All this and more won't make you an expert. Never fear. But maybe enough will brush off on you to help you understand things better in the world ahead. If nothing more, it might stimulate your thinking.

Finally, back to what's ahead for newspapers. Erosion of costs and taxes will steadily increase the number of one newspaper-ownership cities, already the rule, instead of the exception. I see nothing to halt the process. Television, radio, the news magazines have come into the news field. I am just guessing. I think TV will settle down largely to entertainment, with news coverage largely confined to spectacular, dramatic, one-shot events. Radio, however, is growing as a purveyor and conveyor of news.

The big metropolitan papers even after finding themselves alone in their field face a troubled future—not just in costs and taxes but in getting distribution because of traffic congestion in city streets. That factor alone is making necessary significant changes in big city afternoon newspapers. They have to go to press so early they tend more to features and the interpretive and entertainment. Morning papers, with few exceptions, the weak sisters of years past, will dominate more generally the mass-wide territory circulation coverage in the years ahead.

Offsetting the shrinkage of circulation zones of afternoon newspapers, more and more strong afternoon community papers are building up, ringing all large cities. Population shift, the flight to the suburbs, is making this change. Sheer problems of declining advertising revenues because of the decay of the downtown districts coupled with this flight to the suburbs of population in itself are putting a limiting factor on great metropolitan afternoon papers. Little suburbs are becoming great cities. New York is surrounded with them now. Chicago and Los Angeles are outstanding examples. All around cities there are developing strong community afternoon papers built on the revenues of stores appealing to those areas. Sheer economics of costs and distribution will accelerate this tendency. That's just one phase of this changing world that opens to you budding newspapermen of the future—if. Well, if you are smart enough to make your opportunity; it won't be handed you on a platter, silver or wooden.

Another and significant change is under way. That is the matter of newspaper ownership of the future. Taxes and the impossible burden of inheritance levies are bringing amazing shifts in newspaper ownership. Some of the most powerful newspapers, even the chains, are headed into trusts or pension fund ownerships or are already there. There is no other alternative. The great McCormick empire is controlled by a charitable trust, the Hearst ownership lodges in final analysis in a charitable foundation; the basic plan of ownership of the fine Gannett chain already is in operation under a foundation plan; the Washington Post-Herald. I could go on and mention many properties either now controlled by or headed for the charitable foundation, public trustee or pension fund ownership route.

Just where all this is leading, I can't say. As a strong individualist, responsibility of newspaper ownership has always been a fetish with me. Seldom can a property rise above the inspiration and source of its actual ownership. For the first few years, the immediate future, I have no concern. Those left in charge usually are trained, dedicated men. Most likely they will give a lift to properties entrusted to them for a time. New incentive and responsibility will furnish the spur. Eventually with actual ownership flowing to trustees and pension funds, can and will newspapers retain the virility, the aggressiveness, the spirit of individualism that the responsibility of individual ownership brought? Frankly, I don't know. Some may contend it will bring more objectivity. I doubt it, without the impelling drive of direct personal ownership.

So you young folks just going into journalism in this changing world face a more exciting, adventuresome future than we did. But what a chance, what a challenge. What an opportunity just to be a part of it and find your niche in it.

Don't get impatient if you don't hit the summit all at once. That belongs to us oldsters. Impatience is the prerogative of us oldsters, not of youth. After 50 years in newspaper work, I can truly still look ahead, not behind, with the creed of the ancient philosopher: "So much still to do. So little time."

You have the time.

INDEMNIFICATION OF OWNERS OF BRUCELLOSIS REACTORS IN MINNESOTA

Mr. HUMPHREY. Mr. President, during the past weekend I learned that the Animal Disease Eradication Division of the Agricultural Research Service has decided not to participate in the planned program of the State of Minnesota to indemnify owners of brucellosis reactors whose animals must be destroyed under a new Minnesota law, unless each Minnesota herd is specifically tested immediately prior to the destruction of the reactors.

Dr. Ralph L. West, the secretary of the Minnesota Livestock Sanitary Board, and one of the great pioneers in the antibrucellosis effort, points out in a recent letter to me that there are already extraordinary testing precautions being taken in this matter. Each of the herds has been tested within the past 6 months, many of them within weeks and even days. In addition, each herd in which a reactor animal is found, must successfully pass three successive tests before being removed from the retest list.

The cost, inconvenience, and delay involved in requiring additional testing before Federal participation can only result in a suspension of the antibrucellosis program and the undoing, at least in part, of a splendid effort, very near to completion, to make Minnesota a brucellosis-free State.

Mr. President, I ask unanimous consent to insert at this point in the RECORD a letter from Dr. Ralph L. West dated May 29, 1957; a copy of Dr. West's letter to Dr. R. J. Anderson, Director of the Animal Disease Eradication Division; and a copy of my reply to Dr. West, and my letter to Dr. Byron T. Shaw, Administrator of the Agricultural Research Service, requesting that the decision of the Department be reviewed in the light of Dr. West's discussion of the problem.

There being no objection, the correspondence was ordered to be printed in the RECORD, as follows:

STATE OF MINNESOTA,
LIVE STOCK SANITARY BOARD,
St. Paul, May 29, 1957.

Hon. HUBERT H. HUMPHREY,
Senator from Minnesota,
Washington, D. C.

DEAR SENATOR HUMPHREY: I am enclosing herewith a copy of a letter I am writing to Dr. R. J. Anderson, Director of the Animal Disease Eradication Division, Agricultural Research Service, United States Department of Agriculture, pertaining to a ruling recently received that the Federal Government cannot participate in the payment of indemnity for reactors to the brucellosis test, which have been and are being held in the herds where tested, in accordance with the present Minnesota State law. I believe the letter is self-explanatory and presents my arguments for a reconsideration of that ruling.

I do not know that there is anything that you can do to assist the Live Stock Sanitary Board in this matter, but I felt you would like to be informed of what is taking place.

Since this ruling could well jeopardize our brucellosis program in this State, we hope and trust that the Agricultural Research Service will see fit to participate in the payment of these reactors as they have been and will continue to pay for new reactors disclosed in the testing in Minnesota.

Sincerely yours,

RALPH L. WEST,
Secretary and Executive Officer.

STATE OF MINNESOTA,
LIVE STOCK SANITARY BOARD,
St. Paul, May 28, 1957.

Dr. R. J. ANDERSON,
Director, Animal Disease Eradication Division, Agricultural Research Service, United States Department of Agriculture, Washington, D. C.

DEAR DOCTOR ANDERSON: Reference is made to your letter of May 20 and several conversations, personal and by telephone, with you and Dr. C. D. Van Houweling. These communications refer to the participation of the Federal Government in the payment of indemnity for certain cattle condemned for brucellosis in Minnesota.

At the present time, all counties in Minnesota are and have been for several years, eradicating brucellosis under the area plan. Under separate cover, I am forwarding to you the report of the last test in the 87th county, Mille Lacs, which if approved, will declare the entire State of Minnesota a modified certified brucellosis free area. This plan under Minnesota law, requires participation of all cattle owners in Minnesota.

The present law permits owners to retain reactors, either segregated from all other cattle, or if the owner provides proper facilities for protecting neighboring herds by double fencing where necessary, fencing away from water courses, et cetera, to operate his herd under the so-called B plan. All such herds, however, are and have been under quarantine and close supervision. They are retested at approximately 6-month intervals. On each successive retest, all old reactors are examined, retagged, and rebranded if necessary, and all new reactors are also identified.

The 1957 Minnesota Legislature amended the brucellosis law to provide that after July 1, 1957, all reactors must be sold for slaughter within 15 days after appraisal. The Minnesota attorney general has ruled that in compliance with this law, it will be necessary for the Minnesota Live Stock Sanitary Board to appraise all reactors retained either in isolation or in plan B herds, as promptly as possible after July 1, 1957, which under the law as amended, will require their shipment for slaughter within 15 days thereafter. He has also ruled that indemnity shall be paid for all such reactors, which are otherwise eligible for indemnity even though they have been held in the owner's herd for an indefinite time since they were condemned and identified.

We estimate there will be on July 1, 1957 approximately 2,000 of these old reactors in Minnesota. It is our intention to assign the appraisal of these animals to our fieldmen on that date, hoping to have the work completed and all old reactors shipped within the shortest time possible. We understand from your letter, however, and from my most recent telephone conversation with Dr. Van Houweling, that the Federal Government will not participate in the payment of indemnity for these animals unless we also retest all herds in their entirety in which these animals are maintained at the time these appraisals are made. We believe this ruling is unsound for the following reasons:

1. All cattle in these herds have been repeatedly tested, and retested, and all reactors have been identified following each such test. All herds in this category have been tested within the last 6 months, and many of them of course, within a matter of weeks.

2. All herds in which reactors are now maintained, will remain on the retest list and under close supervision until they have passed three consecutive negative tests following removal of reactors.

3. While it is recognized that each and every reactor is potentially dangerous, experience in retesting herds where such animals are retained, indicates that a large percentage of such herds will disclose no additional reactors. In such herds, retesting before the reactors are removed, represents an unnecessary expense and inconvenience to the owner, since it will still be necessary to conduct at least three tests thereafter before such herds are removed from the retest list.

4. Owners of herds which have been routinely tested within a short time prior to July 1, will justifiably object to another test at that time. They will, of course, realize such test cannot serve as one of the three negative retests required to remove their herds from the retest list. The good relationship between the disease-control agencies and the cattle owners, which exists in this State, will certainly suffer if we require tests which the owner must recognize as unnecessary.

5. We plan to assign field employees who are not veterinarians, to appraise these reactors. If a test of the herds is required, the appraisal work will be delayed and also the testing of infected herds to which the veterinarians have been assigned, since the veterinarians in that case will be engaged in retesting the plan B herds.

6. Since the money available for payment of indemnity appropriated by the legislature is limited and earmarked for that purpose only, and since Minnesota law provides that when the funds for the payment of indemnity are exhausted, no further tests may be conducted nor authorized, failure on the part of the Federal Government to participate could and probably will result in suspension for several months of all brucellosis activities in Minnesota, undoing much of the work already accomplished in this State.

7. Section 51.9, item (h) of the Code of Federal Regulations quoted in your letter, does not appear to apply to the question under discussion, in that the entire herds of which these reactors are a part, have been tested and retested, and will be again retested at the specified intervals until they have passed at least three consecutive negative tests after all reactors are removed.

It is my opinion the inference in your letter that the appraisal and shipment of these old reactors without first again retesting these herds is not sound disease eradication practice is made without full consideration of the facts as they exist in Minnesota. We have been seeking legislation requiring the elimination of these potential sources of infection for many years. We believe the action of the 1957 legislature is a long step in advance in the final eradication of this disease in this State. Participation by the Federal Government in carrying out the elimination of these disease carriers is, without question, money better spent than the hundreds of thousands of dollars spent in participation in the payment of indemnity in scattered individual herds in States where no orderly systematic plan of eradication is in progress.

I sincerely hope this matter will be given further consideration in order that the program in Minnesota may be continued without disastrous interruption.

Very truly yours,

RALPH L. WEST,
Secretary and Executive Officer.

JUNE 3, 1957.

Mr. RALPH L. WEST,
Secretary and Executive Officers Live Stock Sanitary Board, State of Minnesota, St. Paul, Minn.

DEAR DR. WEST: Thank you for giving me the opportunity to help in your efforts to persuade the Agricultural Research Service to take a reasonable view of the situation as regards the indemnity of reactors to the brucellosis test. Surely the Department of Agriculture recognizes that Minnesota's brucellosis program, the success of which is due in large part to your own leadership and planning, is the soundest in the country.

I assure you that I am glad to follow up your well-reasoned letter of May 28 to Dr. Anderson of the Animal Disease Eradication Division, and you will note from the attached copy of my letter to Dr. Byron T. Shaw that I am doing just that. Certainly the Federal Government would be shortsighted to require a separate test of each herd when there has been such a recent test, and when such elaborate safeguards are provided already in the system.

Sincerely yours,

HUBERT H. HUMPHREY.

JUNE 3, 1957.

Dr. BYRON T. SHAW,
Administrator, Agricultural Research Service, Department of Agriculture, Washington, D. C.

DEAR DR. SHAW: Dr. Ralph L. West, the distinguished secretary of the Live Stock Sanitary Board of the State of Minnesota, and a pioneer in the field of brucellosis control as you well know, has written to the Director of the Animal Disease Eradication Division of the ARS by letter of May 28, appealing the decision that the Federal Government will not participate in the payment of indemnity for brucellosis reactors unless all herds are retested in their entirety.

I wish to point out that Dr. West has led perhaps the most effective antibrucellosis program in the world, and under his leadership Minnesota has developed a splendid testing and eradication system enjoying the confidence and cooperation of all Minnesota livestock owners. When he assures the Animal Disease Eradication Division that recent tests of Minnesota livestock, and a projected succession of additional tests will follow after the removal of a reactor from a herd, I for one feel that his advice should carry great weight.

Dr. West points out there are more than adequate safeguards which obviate any necessity to require an immediate retest of these herds, none of which was tested more than 6 months ago. He also points out that the earmarked funds for indemnity appropriated by the Minnesota Legislature will not nearly suffice to indemnify all the herd-owners concerned, and should the Federal Government fail to participate there will probably be a suspension for several months of all antibrucellosis activities in Minnesota—undoing much of the fine work already accomplished which will soon make Minnesota a modified certified brucellosis free area.

Sincerely yours,

HUBERT H. HUMPHREY.

Mr. THYE. Mr. President, will my colleague yield at that point?

Mr. HUMPHREY. I am very happy to yield to my colleague from Minnesota.

Mr. THYE. I received a similar communication from Dr. West. Immediately upon its receipt, I called the Department of Agriculture and discussed the question with them.

I share the conviction of my colleague that there is a need for a review of this entire question, and that it should be done at once. I believe that the present stated policy of the Department of Agriculture will slow up the eradication of brucellosis. That should not happen. The fight against brucellosis should be accelerated, and the disease should be stamped out. Minnesota has a very splendid record in this regard, and the policy of the Department of Agriculture will very definitely have the effect of slowing up the program.

Mr. HUMPHREY. I wish to thank the senior Senator from Minnesota for his contribution and his work in this field.

Mr. President, I wish to refer now to another subject.

The PRESIDING OFFICER. The Senator from Minnesota has the floor.

UNITED NATIONS GENERAL ASSEMBLY ACTION ON THE HUNGARIAN REPORT

Mr. HUMPHREY. Mr. President, at the Tenth National Convention of the American Veterans Committee on April 26–28, 1957, they adopted a resolution requesting the reconvening of the United Nations General Assembly as soon as the special United Nations Commission on Hungary released its report. That report is about to be submitted. As a delegate to the United Nations General Assembly I wish to join the AVC in its recommendation. I too feel that the Hungary report is of the greatest urgency and I hope that a way can be found for the U. N. General Assembly to consider this report while the issue is still immediate.

I ask unanimous consent that the text of the AVC resolution as well as a letter which I have received from Kenneth M. Birkhead, the Executive Director, be printed at this point in the RECORD.

There being no objection, the resolution and letter were ordered to be printed in the RECORD, as follows:

AMERICAN VETERANS COMMITTEE,
Washington, D. C., June 4, 1957.

DEAR MEMBER OF CONGRESS: The Special Commission of the United Nations which has investigated Communist actions in Hungary is submitting its report to the United Nations. U. N. Secretary-General Dag Hammarskjold has indicated that the report cannot be considered until the U. N. General Assembly meets in the fall.

The American Veterans Committee feels that this would be a crime of the highest order since this delay in acting on the report would mean that more Hungarians would be subjected to Communist oppression.

The American Veterans Committee urges that the Congress immediately pass a resolution stating that it is the sense of our Congress that the United Nations General Assembly be called into special session to act on the Hungarian report. Our action is based on the attached resolution passed by the 10th national convention of AVC held here in Washington, D. C., on April 26–28, 1957.

We urge you to be one of those who assume the leadership in seeing that the Congress takes such action at the earliest possible moment.

Sincerely yours,

KENNETH M. BIRKHEAD,
Executive Director.

RESOLUTION ON HUNGARY AND THE UNITED NATIONS

AMERICAN VETERANS COMMITTEE, INC.,
Washington, D. C.

Whereas the U. N. General Assembly passed 10 resolutions condemning the crimes of the Soviet Union and the puppet Kadar government in Hungary;

Whereas these resolutions have been totally defied;

Whereas the U. N. General Assembly, when its observers were barred from Hungary, finally set up a Commission to hear eyewitness accounts of events in Hungary from its refugees, as well as from newsmen and neutral observers;

Whereas this Commission has finished its investigations and has begun to compile its report;

Whereas each day's delay means that more people in Hungary may be persecuted and condemned to deportation or death without even the help of protests from world public opinion, or from the United Nations; and

Whereas U. N. Secretary-General Dag Hammarskjold has indicated the Commission report won't be considered by the General Assembly until its next regular session late in September: Therefore, be it

Resolved, That this convention record itself as demanding for humanity's sake that the present session of the U. N. General Assembly, which currently is in suspension, be reconvened as soon as the Hungarian Commission report is completed to hear it and to take immediate action regarding it; be it also

Resolved, That copies of this resolution be directed to the attention of the United States Secretary of State, to United States Ambassador to the U. N., Henry Cabot Lodge, to U. N. Secretary-General Hammarskjold, to the public press, and to the President of the United States.

LOUIS M. RABINOWITZ

Mr. HUMPHREY. Mr. President, there are many stories of success and achievement in America, but none more illustrious or meaningful than the life story of Mr. Louis M. Rabinowitz, bibliophile, industrialist, and philanthropist, of New York City.

The New York Times editorial of April 30, along with the feature story in the same issue, reveals the character and quality of this man.

Mr. Rabinowitz came to this country from Lithuania at the age of 14. He did not have the advantage of a formal education. Although an immigrant boy, he became one of our most dedicated, patriotic and noted citizens. Denied the opportunity of a formal education, he became the patron of literature, arts and science. Few men have given more to

cultural institutions and the field of scientific research. His life is a continuous story of good deeds, generosity and the enrichment of our cultural heritage.

I knew Louis Rabinowitz as a personal friend. To share in that friendship was a rare privilege. America is a better and nobler country because Louis Rabinowitz came to our shores. The arts and science and literature are much more advanced because of his generous gifts and his constant care and attention. Louis Rabinowitz brought honor not only to himself, but to his family, his faith, and the country of his choice.

I ask unanimous consent that the editorial and the article from the New York Times of April 30 be incorporated at this point in my remarks.

There being no objection, the editorial and article were ordered to be printed in the RECORD, as follows:

[From the New York Times of April 30, 1957]

LOUIS M. RABINOWITZ

That this country is a land of opportunity for all has been proved innumerable times in the lives of innumerable individuals, but never more vividly than in the case of Louis M. Rabinowitz, who died in New York on Saturday at the age of 69. Arriving here as a penniless immigrant from Lithuania at the age of 14, he sold remnants from a pushcart on Hester Street and then became a house painter's helper. Knowing no English when he arrived, he studied the language by reading Darwin's "Descent of Man" at the Cooper Union Library. At his death, he was not only a very wealthy man but also one of the most truly cultured people in the United States.

But if he received much from this country, he also gave much. "People die, but culture doesn't die," he remarked once, and it was to help make sure that culture and freedom do not die that he devoted much of his fortune over many years. The Yale University Library, Hunter College, the New York Public Library, the Jewish Theological Seminary, and Columbia University were but a few of the institutions that benefited from his generosity and his love and respect for human culture.

No one man can assure the survival of culture, and more particularly of the books, paintings, and other physical objects which transmit culture from one generation to another. But the limits of what one man could do in this cause were brilliantly demonstrated by Louis M. Rabinowitz, and it is for this demonstration particularly that his passing will be mourned and that his name will go down in the history of the friends of the humanities.

[From the New York Times of April 29, 1957]

L. M. RABINOWITZ, BIBLIOPHILE, DIES—MANUFACTURER OF FASTENERS GAVE BOOKS AND FUNDS TO COLLEGES AND LIBRARIES

Louis M. Rabinowitz, bibliophile, industrialist and philanthropist, died Saturday of a cerebral hemorrhage in St. Vincent's Hospital. He lived at 1052 East Eighth Street, Brooklyn. His age was 69.

Mr. Rabinowitz came to this country from Lithuania at the age of 14 and dispensed with formal education thereafter. Over the years, however, he became interested in books and art and had presented thousands of dollars worth of paintings, books, and manuscripts to colleges, libraries, and museums.

He was founder and president of L. M. Rabinowitz & Co., 120 East 16th Street, a hook-and-eye fastener manufacturing concern.

Although Mr. Rabinowitz donated books and manuscripts to the New York Public Library, the Library of Congress, and the Jewish Theological Seminary, among others, the bulk of his gifts went to Yale University.

He was the donor of the Rabinowitz Fund for Judaica Research at Yale for the purpose of fostering researches in the legacy of Judaism. In 1955, Mr. Rabinowitz made a grant to the university for the establishment of a chair in Semitic languages and literature.

HONORED BY YALE IN 1955

He had served as a director of the Yale University Association of Fine Arts and as an honorary trustee of the Yale Library Associates. He was cited 2 years ago by the university for his activities.

Mr. Rabinowitz was a director of the Jewish Theological Seminary. He established the Louis M. Rabinowitz Institute for Research in Rabbinics at the seminary in 1951 and had donated many rare books to it. The seminary honored him with a gold medal in 1955 and an honorary degree of Doctor of Letters last year. He also was a benefactor of the New York Public Library and had served as an adviser to its reference department.

Mr. Rabinowitz's gift of $60,000 to Columbia University in 1951 made possible a 2-year study of academic freedom.

Two years later he established the Louis M. Rabinowitz Foundation for the purpose of financing archeological explorations in Israel in conjunction with the Hebrew Union College of Cincinnati. He sponsored the surveys for 5 consecutive years.

MADE GRANT TO HUNTER

The Hebrew University in Jerusalem made him an honorary fellow in 1955 in recognition of his work. Hunter College was the recipient of a Rabinowitz grant of $106,000 in 1955 to establish a coeducational Graduate School of Social Work.

He gave many paintings to museums in Israel and was chairman of the American Fund for Israel Institutions exhibition committee at the Metropolitan Museum of Art in 1953. He served as a vice president of the New York Chapter of the America-Israel Society.

He was vice president of the Jewish Hospital of Brooklyn and presented several murals to the hospital. He was also vice president of the American Jewish Historical Society.

Surviving are his widow, Rose; a daughter, Mrs. Samuel Perlman; a son, Victor Rabinowitz, of New Rochelle, N. Y., and four grandchildren.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. HUMPHREY. I am very happy to yield to the Senator from New York.

Mr. JAVITS. I knew Louis Rabinowitz, the gentleman of whom the Senator from Minnesota speaks, for many years as a friend and distinguished fellow New Yorker. It certainly reflects a great deal of credit on the Senator from Minnesota to make his significant observations in memoriam of the rather typical career of an immigrant who came to our country because of our institutions and opportunities, and did so well for our community and our country, as well as in a personal sense. His family will be most grateful for this fine expression.

It is a very fine thing that the Senator from Minnesota has seen fit to speak of these things on the floor of the Senate, and to give national recognition to them.

Mr. HUMPHREY. I know that my late departed good friend Louis M. Rabinowitz thought very highly of the Senator from New York. That was additional good evidence of his fine judgment. I wanted to say these few words about him because his story touched my heart. I know how his hand of generosity reached out to touch our great Library of Congress. He was one of the great benefactors of what is known as Lincolnianna. He gathered from all over the United States papers and documents and personal effects bearing on the beloved great President, Abraham Lincoln. A man of such quality and kindness and generosity is needed very much indeed. When we lose from our midst such a man, it is only fitting that those of us who knew him should say a word about him.

Mr. JAVITS. I thank the Senator.

WEST GERMAN GOVERNMENT TO REDUCE UNITED STATES TROOP FUNDS

Mr. CHAVEZ. Mr. President, I have before me an article entitled "Bonn Will Halve United States Troop Funds," written by Arthur J. Olsen, and published in the New York Times of June 5, 1957. Before asking to have the entire article printed in the RECORD, I wish to read certain portions of it.

BONN, GERMANY, June 4.—The United States was reported today to have agreed to accept a 50-percent reduction in funds contributed by West Germany for the support of United States Forces in the Federal Republic.

The report, from German sources, was not denied by the United States Embassy here.

Another portion of the article is as follows:

The support-cost issue was raised on the United States side during Chancellor Konrad Adenauer's visit to Washington last week. When the Bonn officials were found to be firm on their standing offer, the problem was referred to the Embassy here for direct negotiation. A settlement on the main terms of the agreement followed quickly.

I am the chairman of the subcommittee which is handling the Department of Defense appropriation bill, which runs into billions of dollars. The matter referred to in the article affects every American taxpayer.

According to the agreement heretofore made, the West German Government was supposed to pay in deutschemarks the equivalent of so many United States dollars for the support of the United States Army. The Department of State has now agreed that that amount may be cut in half. If it be cut in half, there is only one other source from which the expenses can be paid, namely, American taxpayers.

Mr. President, I ask unanimous consent that the entire article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BONN WILL HALVE UNITED STATES TROOP FUNDS—WILL REDUCE SUPPORTS COSTS BY AMOUNT OF INCREASE GRANTED TO THE BRITISH

(By Arthur J. Olsen)

BONN, GERMANY, June 4.—The United States was reported today to have agreed to accept a 50-percent reduction in funds contributed by West Germany for the support of United States forces in the Federal Republic.

The report, from German sources, was not denied by the United States Embassy here.

Embassy officials said that an announcement on a "support costs" agreement for the 1957–58 administrative year could be expected within a few days.

Qualified German informants said that the essence of the agreement was Bonn's pledge to contribute in the year ending April 30, 1958, 335 million deutschemarks ($78 million) to help defray the local expenses of the 250,000 United States soldiers and airmen in West Germany.

This is one-half the sum made available in 1956–57. The Bonn Government made the new offer in February and held to it in the face of repeated United States requests for a renewal of last year's contribution of 650 million deutschemarks, German sources said.

United States negotiators were said to have succeeded, however, in obtaining at least one concession from the West German Foreign Ministry. This was said to be Bonn's agreement to consider a future United States request for continuation of the support-costs payment for at least another year beyond 1958.

The support-cost issue was raised on the United States side during Chancellor Konrad Adenauer's visit to Washington last week. When the Bonn officials were found to be firm on their standing offer, the problem was referred to the Embassy here for direct negotiation. A settlement on the main terms of the agreement followed quickly.

The West German Government decided last winter to scale down its financial contribution to the Western Allied forces from 1,450,000,000 deutschemarks to 1,200,000,000. It then negotiated an agreement with Britain to pay 588 million marks in 1957–58 and another with France for 223 million marks.

The agreed payment with France and the 64 million marks earmarked for the Belgian and Danish forces represent slight reductions from the level of the preceding year.

The net result of the series of negotiations was, in broad terms, to reduce West German support for United States forces by approximately the sum Bonn increased support for the British forces.

RADIOACTIVE FALLOUT

Mr. NEUBERGER. Mr. President, 10 days ago a special subcommittee of the Joint Committee on Atomic Energy began hearings on the nature of radioactive fallout and its effects on man. Since that initial session, a number of scientists have appeared before the subcommittee, which is headed by Representative CHET HOLIFIELD of California's 19th District, to testify regarding the dangers of radiation exposure. These hearings are unique in that they represent the first attempt on the part of Congress to gather and coordinate information on this subject, which is becoming of increasing concern to the people of the United States and of the world as we push forward more rapidly into an atomic era.

Although testimony before the subcommittee has been primarily concerned with the effects of radioactive fallout resulting from the explosion of nuclear weapons, important conclusions can be drawn from the evidence submitted regarding the dangers inherent in the use of military and industrial reactors and medical use of radioactive materials. As research progresses in this area, we know that man will risk ever greater perils of exposure to radiation.

As sponsor of S. 1228, a bill to establish a National Radiation Health Institute within the Institutes of National Health, I have been particularly interested in the hearings being conducted by Representative HOLIFIELD's subcommittee. Yesterday a group of the Nation's top geneticists informed the subcommittee that all radiation, regardless of the amount of the dose, represents a danger to mankind. Dr. Hermann J. Muller, winner of the Nobel prize for physiology and medicine in 1946, proposed that a "Radiation Health Institute" be established to conduct more genetic research to determine more exactly the degree of danger involved.

Mr. President, I hope that Congress will heed the advice of this eminent scientist. The peril of radiation exposure is acknowledged. Surely we owe it to the citizens of this country to insure that they receive at least basic protection through accelerated research and establishment of elementary precautions such as those provided for in my bill now pending before the Senate Committee on Labor and Public Welfare.

Mr. President, I ask unanimous consent that an article by Mr. Warren Unna, which appeared in today's Washington Post and Times Herald, and which describes yesterday's testimony before the Holifield special subcommittee, be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ANY RADIATION PERILS MAN, TOP GENETICISTS TELL HILL COMMITTEE—FALLOUT PRODUCED NOW WILL SHORTEN LIVES IN FUTURE, UNANIMOUS VIEW

(By Warren Unna)

A panel of the country's top geneticists was unanimous yesterday in telling Congress that radiation, no matter how small the dose, endangers future generations of mankind.

The group further concluded that the radioactive fallout from atomic-weapons tests conducted so far will have a definite effect—although proportionately not a great one—in shortening future lives, increasing deformaties, and impairing man's fertility.

The scientists' main worry came in anticipating what radioactive fallout will do to coming generations if the present weapons-test rate continues—or, as many expect, goes up.

MOST PESSIMISTIC VIEW

The most pessimistic view came from the most prominent panel member, Hermann J. Muller, Nobel prize-winning Indiana University professor and one of the world's foremost authorities on the effects of radiation on heredity.

Without hesitation, he declared: "The number of lives that will be seriously curtailed or injured throughout the world in future generations as a result of the tests already held is in all probability in the hundreds of thousands, or millions, and is therefore enormous."

A full-fledged nuclear war, Muller said, would result in the cataclysmic ruination of humanity in general.

Yesterday was the midway point in a Joint Atomic Energy Subcommittee's 2- to 3-week showdown hearing on what is and is not known about radioactive fallout.

The momentous topic of mankind's chances at survival was discussed in the quiet dignity of the Capitol's Old Supreme Court Chamber, with Muller acting as a genetics instructor for the Subcommittee's Senators and Representatives as he chalked up pictures of damaged genes and cells on a portable blackboard.

CHILDREN IN AUDIENCE

Representative CHET HOLIFIELD, Democrat of California, hearing chairman, looked at several rows of Orr Elementary School pupils in the audience and noted: "The gravity of this hearing is for you, the future generation."

The class teacher explained upon leaving: "We've been studying atomic energy back in school."

Yesterday's hearing was by no means confined to the academic halls. The Atomic Energy Commission, which up to now has been the chief authority on fallout, came in for considerable criticism.

Mueller said that "higher echelons in the AEC" had kept him from appearing in person at the August 1955, Geneva Atoms-for-Peace Conference to discuss radiation effects on heredity.

Mueller noted a curious official silence concerning radiation victims and proposed that a Radiation Health Institute be established at the National Institutes of Health to conduct more genetic research.

H. Bentley Glass, of Johns Hopkins University, said an unbalance existed in the AEC between emphasis on the physical aspects of atomic energy and on the biological counterpart. He proposed that a geneticist or biologist be appointed to the Commission itself, or at least be represented on the AEC's General Advisory Committee.

Glass is himself a member of an advisory committee for the AEC's Division of Biology and Medicine. He indicated later that his group's report on strontium-90 effects, requested by the Commission more than 2 years ago, has yet to be issued in its final form because of AEC reluctance.

Glass testified that the increasing tempo of weapons testing in 1957 will certainly make a reevaluation necessary for last year's National Academy of Sciences report on radiation effects.

EXPOSURE TO INCREASE

He said that man's radiation exposure is certain to increase as wastes from the development of peaceful uses of atomic energy multiply. On top of this, Glass predicted a fivefold increase in fallout from present weapons tests would add a grave problem.

A. H. Sturtevant, California Institute of Technology genetics professor, emphasized every bomb test adds to the biological hazard.

He said scientists have made a serious effort to present an objective statement of the biological hazards and suggested that the AEC reciprocate with a detailed and objective statement of the reasons for continued testing.

Sturtevant disputed the administration analogy that the risk from test fallout is similar to the risk from wearing a wristwatch with a radium dial. He said no one is forced to wear the wristwatch, while they are forced to be exposed to the radiation from tests.

ALL WORLD EXPOSED

James F. Crow, University of Wisconsin geneticist, told the Holifield subcommittee: "The number of people exposed to fallout is as large as the world population and therefore we can be sure that several hundreds, or thousands, or tens of thousands, or perhaps more persons will be diseased, or deformed, or will die prematurely, or be otherwise impaired as a consequence of fallout if the present rate of testing continues.

"In my opinion, even one unnecessary individual tragedy is too many and no increase in radiation for any reason should occur unless it offers some compensating benefit for mankind," Crow declared.

Crow said studies on hereditary effects in insects, mice, corn, virus, bacteria, and some fragmentary effects on the children of radiologists indicate:

There is no such thing as a safe dose of radiation; any amount of radiation involves a risk.

The number of mutations on hereditary genes is strictly proportional to the amount

of radiation received; and "almost all" mutations are harmful.

It makes no difference whether 1 person receives a radiation dose of 10 roentgens or 10 persons each receive a 1-roentgen dose; the cumulative effect on future generations will be the same.

Crow said fallout from the present rate of weapons testing will mean only a "small damage" to future generations—in proportion to the number of people on the globe.

Both Dr. W. L. Russell of the Oak Ridge National Laboratory and Dr. B. Hardin Jones of the University of California Radiation Laboratory, reported "significant evidence" of life-span shortening in the first generation offspring of irradiated animals.

Russell added: "There is no recovery from genetic damage at any time after irradiation."

Senator BOURKE B. HICKENLOOPER, Republican, of Iowa, at one point in the hearing commented: "All of us would like to hope that we never had to test atomic weapons. By the same token, we could abolish automobiles and go back to horses."

Johns Hopkins Professor Glass summarizes for the scientists: "We know there is a genetic hazard. We don't know the exact amount. We think it is better to overestimate and play it safe than to underestimate and wreak irreparable havoc."

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. NEUBERGER. I am delighted to yield.

Mr. HUMPHREY. I am very appreciative of the Senator's action in bringing this matter to the attention of the Senate again by way of these fine articles.

I should like to add, for the purpose of the RECORD, that the Senate Subcommittee on Disarmament, some 3 months ago had before it as witnesses some of the leading scientists of the Nation. At that time we discussed radioactive fallout. We suggested to the Joint Committee on Atomic Energy the importance of beginning a study, which is now underway, and we are deeply indebted to Representative HOLIFIELD, representing the Joint Committee on Atomic Energy, for his initiative in taking up this matter.

I would only have it noted that the information which now comes forward, which has received headlines, and which has commanded public attention—and all to the good—was presented to the responsible agencies of the Government some months ago by what I consider to be a responsible committee of the United States Senate.

I hope our country may proceed to give leadership in limiting these tests, not on a unilateral basis, but at least on a basis of seeking an agreement.

Today, as all of us may be aware, the President of the United States had something to say about the subject. In fact, the President spoke in response to questions about testimony given before the congressional committee. I read from an Associated Press dispatch, as follow:

Eisenhower first said that some of the scientists giving views on the subject appear to have gotten out of their field of competence. He added that it seemed to be an organized sort of thing.

Asked why he felt that way, Eisenhower said he did not mean organization in any evil kind of way. Personally, he went on, he prefers to base his judgment on a study of the situation put out last October by the National Academy of Scientists.

Eisenhower said, of course he is concerned about the possibility of fallout danger to future generations, but that he also is concerned with defense of the United States.

He said further that the United States has succeeeded in reducing fallout in its nuclear tests by nine-tenths of what it previously was.

I read now from a later bulletin which appears on the news ticker:

President Eisenhower said today he would favor a complete ban on testing of atomic weapons—if there could be total and complete disarmament.

Then, in a later dispatch:

Eisenhower said he would like to allay worldwide anxiety over fallout radiation.

But Eisenhower went on to say at a news conference that the United States never could join in any ban on testing unless there also were an agreement with Russia against use of atomic weapons.

The President did express doubt that this country ever again will test such tremendously devastating hydrogen bombs as it has in the Pacific on two occasions.

Mr. President, all of this seems to add up to the fact that the administration reluctantly—and I emphasize the word "reluctantly"—is reconsidering a position it took last October, because of the pressure of scientific evidence and the deep concern of people all over the world regarding the dangers involved in radioactive fallout. I hope the Atomic Energy Commission will pursue this matter in a way which will give us some final answers, because the testing continues—even the testing conducted by our own allies—and certainly this is a matter of concern and worry to the entire world.

While Mr. Stassen is in London, negotiating with respect to disarmament, I hope he will include on that important agenda an effort to arrive at an agreement on banning or limiting—I emphasize the word "limiting"—tests of the large thermonuclear weapons, so that the constant fear facing the people will not continue.

Mr. COOPER. Mr. President, will the Senator from Oregon yield to me?

Mr. NEUBERGER. I yield.

Mr. COOPER. I heard the Senator from Minnesota state that the President's position on this matter is a revision of his position of last October. Was the Senator referring to any statement about the effects of fallout, or was the Senator stating that it was a change of the position taken against the discontinuance of tests until some adequate inspection agreements have been reached?

Mr. HUMPHREY. Mr. President, if the Senator from Oregon will yield further to me, let me say that I know of no responsible person who has felt that the United States alone should discontinue the tests. Instead, the feeling is that that matter should be the subject of agreement between the major powers. But I repeat that I believe the administration is making a strategic redirection, so as to come around to the point where the testing of large thermonuclear weapons will be the subject of negotiation and of an effort to limit them.

Mr. COOPER. As I understand the statement of the Senator from Minnesota, it relates only to the effects of the fallout.

Mr. HUMPHREY. That is correct.

Mr. COOPER. And not to any change of position about discontinuing the tests in the absence of adequate controls.

Mr. HUMPHREY. I do not think anyone has ever suggested that they be discontinued in the absence of effective controls. During the last campaign an attempt was made to indicate that Mr. Stevenson had suggested such a procedure, but he had not. However, I am saying that today responsible men, both in and out of Government, are recognizing the dangers as a result of the continuing tests; and they are looking to the scientists for effective answers. The scientists are divided in their opinions regarding the effects of the fallout. I am saying that the administration is reaching the point where it may prefer and may seek a limitation on the testing of thermonuclear weapons.

Mr. COOPER. I agree, and particularly in connection with the negotiations regarding disarmament. But I wished to point out that there was no indication that the administration proposed that the tests be discontinued in the absence of some stable agreements about disarmament or about control.

Mr. HUMPHREY. Of course that position has always been held by all responsible persons.

Mr. COOPER. I thank the Senator from Oregon for yielding to me.

Mr. MONRONEY. Mr. President, will the Senator from Oregon yield to me?

The PRESIDING OFFICER (Mr. SCOTT in the chair). Does the Senator from Oregon yield to the Senator from Oklahoma?

Mr. NEUBERGER. I yield.
